Minnedosa, Man.—Until January 31st for $10,000 5 per ent. general debentures, and $16,500 5 per cent. 30-year local nprovement debentures. G. T. Turley, town clerk. (Official dvertisement appears on another page).

Kamsack, Sask.—Until January 15th for $2,000 5½ per ent 5-year hospital, $5,000 5½ per cent. 15-year road, and 20,000 5½ per cent. 20-year town hall debentures. A. A. rawford, secretary-treasurer. (Official advertisement apears on another page).

Barrie, Ont.—Four by-laws were carried. They provide r spending $50,000 on enlarging and equipping the Colgiate Institute; granting a fixed assessment of $7,500 to Dr. arber's hospital; taking over the public library and making a free library; granting certain small concessions to Whitede and Arnold.

Fort William, Ont.—Six by-laws were carried. Two give onuses to the Maritime Nail Company and the Canada Steel oundries Company. For improvements to the McKellar Hosital $5[illegible] was voted; $10,500 for good roads; $140,000 for xtension of the municipally owned street railway, and for an cinerator plant, $35,000.

MUST INSTALL BRICK PLANTS

Order-in-Council Issued—Lease Holders Will Have to Use Their Clay Within Two Years

Lessees of Western clay lands in future must make bricks as well as stock sales. An order-in-council has been issued regarding the leasing and administration of lands containing limestone, granite, slate, marble, gypsum, marl, gravel, sand or any building stone, in the provinces of Manitoba, Saskatchewan and Alberta, and the Northwest Territories; within twenty miles on either side of the main line of the Canadian Pacific Railway in the province of British Columbia, and in the tract of three and one-half million acres acquired by the Government of the Dominion from the province of British Columbia. The order amends the existing regulation so as to include the leasing of Dominion lands containing deposits of clay, subject, however, to the following additional conditions:—

Within Two Years.

1. The lessee of a clay location shall, within two years from the date of the lease, erect upon the lands described therein, or on lands acceptable to the Minister, a plant suitable for the manufacture of brick or other clay products, and he shall, within the same period, furnish evidence, supported by affidavit, showing the character and value of the plant installed and the date of its installation. If the required plant is not installed within the time specified, and if evidence of its installation is not furnished within the same time, the lease shall be subject to cancellation in the discretion of the Minister. Provided, however, that the Minister shall not require that the value of the plant so installed shall exceed the sum of $10,000.

Must Start Manufacturing.

2. The lessee of a city location shall, during each year of the term of the lease after the second year, manufacture from his leasehold and produce ready for shipment not less than 100,000 bricks, or their equivalent in some other form of clay products, to the satisfaction of the Minister. If during any year, after the second year of the term of the lease, the lessee fails to furnish satisfactory evidence of his having done so, the lease shall be subject to immediate cancellation in the discretion of the Minister.

NO BETTER PAPER

"There is no better financial paper published than The Monetary Times, in my estimation."—Extract from letter of December 17th, 1912, of Mr. A. Allayne Jones, President, Canadian Development Company, Vancouver, B.C.

The Grand Trunk Pacific has carried 30 million bushels of grain to the head of the lakes, [illegible] against 15 million bushels a year ago.

NEW CHARTERED COMPANIES NUMBER SEVENTY-THREE

Three Corporations With Capital of One Million Dollars and Over—New Trust Organization

Company promotion was a feature in Canada's development during the past year, and 1913 has commenced with seventy-three companies being incorporated, their total capitalization being $10,699,020. The largest companies this week being:—

Alphonse Racine, Montreal	$1,500,000
Bankers' Trust Corporation	1,000,000
Denis Advertising Signs, Montreal	1,000,000

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	20	$3,404,900
Ontario	8	1,495,000
Manitoba	27	3,669,120
British Columbia	16	2,130,000
Total	71	$10,699,020

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Brantford, Ont.—Brantford Courier, $100,000. F. D. Reville, Misses. F. M. Senn, M. C. G. Hawkins.

Three Rivers, Que.—La Compagnie Theatrate de Trois-Rivieres, $49,500. J. A. Carignan, T. Richard, C. H. Moineau.

New Westminster, B.C.—Moresby Island Development Company, $250,000. MacLean-Burr Auto Company, $25,000.

St. Narcisse, Que.—La Compagnie Industrielle de Saint Narcisse, $20,000. J. X. Cossette, A. A. Trudel, J. A. Gravel.

Florence, Ont.—Florence Power, Light and Milling Company, $5,000. J. A. MacLean, S. P. Campbell, W. R. Hickey, Bothwell.

St. Basile, Que.—Harvay Chemical Company of Canada, $100,000. A. Marcotte, D. Belanger, St. Basile; F. Vanasse, Montreal.

Lauzon, Que.—Lauzon Dry Dock Land Company, $75,000. J. G. T. Charland, Lauzon; F. X. G. Charland, G. S. Hunton, Montreal.

Victoria, B.C.—Genoa Bay Lumber Company, $100,000. Bonnet Shop, (milliners), $25,000. Victoria Construction and Engineering Company, $100,000.

Louiseville, Que.—La Compagnie Electrique de Louiseville; $49,400. J. A. Bourbeau, Quebec; C. Caron, Louiseville; W. B. Lafreniere, Maskinonge.

Hamilton, Ont.—National Canners, $40,000. G. J. Nichols, J. Casson, R. Tresidder. Elk Fire Brick Company of Canada, $40,000. J. D. Ramsay, W. G. Bauer, C. W. Clewell, St. Mary's.

Toronto.—Surani Oil Fields, $200,000. J. E. Evans-Jackson, London, England; P. H. Simson, Berka Buzen, Roumania; A. A. Dickson, Toronto. Preston Limited, (stockbrokers), $50,000. C. M. Preston, H. G. Smith, J. F. Boland. Bankers' Trust Corporation, $1,000,000. N. A. Belcourt, E. R. E. Chevrier, A. W. Guertin, Ottawa. M. Joss and Loewenstein, $100,000. W. N. Ferguson, J. T. White, A. W. Hunter.

Vancouver, B.C.—Orr and Ebbage $50,000, (financial and insurance agents), Bentinck Logging Company, $500,000. Anglo-Canadian Savings and Trust Company, $100,000. Cousins Inlet Trading Company, $250,000. British Columbia Co-operative Settlers' Association, $10,000. Holmwood and Holmwood (Canada), $10,000 (insurance). Port Thompson Townsite, $100,000. Bentley Company, $10,000. A. R. Coutts and Company, $50,000, (electric light). Eden Lake Oil and Coal Company, $500,000. Granville Hotels Company, $50,000.

Montreal, Que.—Canadian Concrete Products Company, $20,000. C. A. Thomson, J. Davidson, J. H. L. Pelletier. Montreal Cabinet Directory Company, $20,000. J. A. Mann, C. G. Mackinnon, T. B. Gould. Eureka Parlor Games and Toys, $20,000. L. H. O'Connor, M. S. Kilby, W. A. Magor. La Subdivision, $40,000. E. Provost, R. Gregoire, H. Lavallee. La Compagnie King Edward Boulevard Park, $40,000. A. Vidal, A. Danais, F. Lebrun. La Compagnie Immobiliere Montmartre, $45,000. R. C. Dery, A. Dery, J. H. Venne. Montreal Consolidated Real Estate and Investment, $100,000. J. A. Bisson, H. M. Williams, J. C. H. Dussault. Merrill Process Company, $10,000. P. W. St. George, R. C. Smith, F. H. Morley. Times Company, (printers), $100,000. F. W. Parker, S. C. Marson, C. Gaudet. Goodform Clothing Company, $100,000. A. R. Hall, G. C. Papineau-Couture, L. Fitch. American Advertising Clocks, $20,000. J. J. Creelman, G. S. Stairs, P. F. Casgrain. Citizens' Real Estate Syndicate, $46,000. C. C. Cottrell, H. D. Bennett, H. O. Wilkinson. Denis Advertising Signs, $1,000,000. W. MacDougall, L. Macfarlane, C. A. Pope. Alphonse Racine, $1,500,000. A. Racine, J. L. A. Racine, C .A. Racine. Grenier-Warrington Motor Company, $50,000. E. Ostigny, T. Viau, J. T. Warrington.

Winnipeg, Man.—de Cew Company, $300,000. T. L. de Cew, C. D. H. MacAlpine, J. W. Lunney. Original Townsite Company of Canada, $500,000. C. E. Burrows, E. A. Boom, H. E. England. Canadian Gas Generator Company, $100,000. G. G. McCable, W. C. Flloyd, F. O. Larson. Franco-Canadian Investments, $100,000. F. Descloquement, St. Claude; C. Vanpoulle, St. Boniface; L. A. Delorme, Winnipeg. Peerless Sales Company, $15,000. F. C. Hamilton, T. R. Dunn, C. M. Mohr. Bradburn Investment Company, $300,000. F. S. Andrews, W. H.Curle, F. M. Burbidge. Roehrig and Koenig Machinery Company, $100,000. F. Euweeke, F. Leitner, E. R. Chapman. Lake Winnipeg Brick and Lumber Company, $200,000. W. Frank, T. F. Shannon, S. L. Head. Brett Manufacturing Company, $60,000. W. H. Brett, W. H. Cairns, Winnipeg; J. C. Avison, Springfield. Canada Tile and Fireproofing Company, $500,000. C. S. Tupper, J. Allen, H. W. Hollis. Winnipeg Paper Company, $20,000. G. Saults, S. Stovel, H. Wilson. North-West Builders Supply and Fuel Company, $50,000. D. J. McDonald, M. Drexel, Winnipeg; R. H. Green, Ottawa, Ill. H. S. Galbraith Company, $100,000. H. S. Galbraith, J. S. Hough, J. Coupar. Canada Paving and Contracting Company, $100,000. A. R. McNeill, L. A. A. Smart, W. J. Donovan. La Fonciere Canadienne, $20,000. A. Lalonde, E. Aubin, X. Portleande. Royal Land and Investments, $500,000. C. G. Stewart, W. H. Walker, A. McCurdy. Marble Tile Company of Canada, $500,000. J. McDiarmid, E. Cass, J. Carr. Labor Press Bureau of Western Canada, $5,000. L. Randolph, A. G. Bitterman, E. H. Goddard. Swedish-Canadian Sales, $19,120. J. A. Gustafson, G. Loren, O. Wiberg. Regals, $40,000. J. A. Tearney, C. J. Binney, A. E. Carson. Canadian Building and Supply Company, $20,000. G. Coulter, L. D. Smith, H. C. Heightingon. Kilpatrick and Company, $5,000. J. Kilpatrick, L. C. De Merrall, A. Smith. Parisian Wine Company, $50,000. J. Galloway, W. Martin, H. E. Johnston. Canadian-Scandinavian Land and Investments Company, $5,000. H. M. Hannesson, S. J. Masters, E. J. Bingham. Maryland Investment Company, $50,000. R. W. Paterson, F. J. Dingwall, H. G. Mayes. Sovereign Securities, $40,000. C. R. Smith, R. Mathieson, W. E. Hales. Metropolitan Cigar Stores, $10,000. W. A. Petrie, J. Foley, L. Emma.

ORGANIZING INTERNATIONAL BROKERS' ASSOCIATION

The International Association of Brokers will hold its ratification meeting at the Waldorf-Astoria, New York City, on February 20. Several city chairmen for the organization committee have been appointed, and they in turn will name other brokers in their respective cities in order to make this first meeting of the association successful.

The cities for which chairmen have been appointed and their names follow:—

New York, Norbert R. Pendergast; Cleveland, D. P. Osborne; Philadelphia, George J. Childs; Denver, C. W. Savery; Toledo, Charles M. Cook; Detroit, Lewis G. Gorton; Toronto, M. R. Edgar; Pittsburg, Charles A. Parker; St. Louis, Little and Hays; Chicago, Frederick W. Hall; Montreal, O. B. D'Aoust; Lawrence, Kans., E. O. Perkins; Buffalo, George M. Kellogg; Bloomfield, W., Va., J. Elliott Hall; Indianapolis, Livingstone Investment Company; Mobile, Ala., MacArthney and Schley; Bangor, Me., M. W. Shute; Troy, N.Y., Charles A. Stone.

Mr. J. N. Sechrest, of Buffalo, chairman of the organization committee, has received many letters from brokers, declaring the need of such an organization as is proposed.

Mr. Sechrest himself says that the association will be representative of all the reliable brokerage houses in the United States and Canada, and that more than 500 brokers will be at the organization meeting

Further information and copies of the proposed constitution of the association may be obtained from Mr. Sechrest, or any member of the organization committee.

Several prominent men are to address the association at the first meeting. At the banquet to be held in the evening, Mr. Norbert R. Pendergast, of New York City, will act as toastmaster.

Much interest is being manifested in this association in Canada. Mr. O. B. D'Aoust, of Montreal, was actively identified a few years ago with the formation of a similar organization in France. He is heartily in favor of the American organization.

GERMANY DESIRES MORE TRADE

She is a Large Buyer of Canadian Wheat—Tariff and Treaty Suggestions

The German export report draws attention to the existing trade between Canada and Germany and shows a desire for increasing same, as will be seen from the following excerpts:—"So far we have not been over lucky regarding our trade relations with Canada, as may plainly be seen from the figures of last year's trade between Germany and the Dominion.

During the year of 1912 our imports from Canada have for the first time exceeded our exports to that country. Up to 1912 the exports were considerably larger than the imports in spite of the very unfavorable treatment which German goods received under the existing tariff conditions in Canada.

"During the year of 1912, however, as far as the returns have been published, the mutual trade relations have changed to such an extent that the imports from Canada will have a value of more than 60,000,000 marks, while our exports to Canada are hardly likely to reach those of 1911 of about 43,000,000 marks.

Resulting Chiefly From Two Causes.

"This change is chiefly due to two causes, first, the enormous increase in our import of wheat and feeding materials, and, second, to the complete elimination of our sugar exports to Canada.

"Apart from these two, the decrease in our exports of iron and cotton goods to Canada has been a considerable item.

"In 1911 our imports of Canadian wheat amounted already to 14,300,000 marks, as against 2,900,000 in 1910. During 1912, however, it has reached the figure of at least 48,000,000 marks, as may be gathered from the returns already published.

"The imports of feeding materials (oats, etc.) from Canada amounted in 1911 to not over half a million marks; in 1912 they will have a value of approximately 3,000,000 marks. Furthermore, the imports of Canadian machinery, especially sewing machines, have increased."

After referring to the fact that Canada maintains her highest tariff rate against Germany, while France and certain other countries have favorable treaty arrangements, the article continues:—

Provisorium Referred to Negotiations.

"The only means to effect a change in this very unsatisfactory state of affairs consist in an improvement of our trade relations with Canada and it certainly is high time that such a change was effected.

"When in the beginning of 1910 the present trade provisorium with Canada came into effect, German industrial circles were as a whole satisfied with the agreement, which at least removed the Canadian surtax on German goods.

"However, it was taken for granted that the provisorium would soon be followed up by a proper treaty, which would put German goods in the Canadian market on the same basis as French ones. It is specially stated in the provisorium that negotiations for a proper treaty would start as soon as possible; unfortunately, however, nothing seems to have been done so far in this direction.

"Is it possible that the difficulties in coming to a just and fair agreement with Canada are insurmountable? With the statistical material now available, we can prove to the Canadians the importance of the German market for their goods and the great advantage they derive from a continued enjoyment of the German preferential tariff.

Elimination of Differential Treatment.

"These advantages are far greater than those granted to Canada by France. Germany's tolls on Canadian imports are lower, especially on wheat, than those levied by France. Furthermore, there should be no objection to granting Canada still greater advantages for the import of wheat, dressed meats and dairy products to Germany.

"We must insist, however, on the complete elimination of any differential treatment of German goods as against French ones or any other non-British ones.

"For this purpose it would be advisable that the representatives of the German Empire in Canada get into communication with individuals who, on account of their social, industrial and commercial standing, are in a postion to wield an influence in Canadian political circles, which so far seems to have been done only to a very small degree."

◆

The number of directors of the Peace River Land and Investment Company, Limited, has been increased from nine to fifteen.

LAST YEAR'S GOLD PRODUCTION

It Exceeded That of Previous Year by Five and Half Million Dollars—India Presents a Problem

The world's production of gold during 1912 was $5,500,000 greater than in 1911, the total having been $465,000,000, according to a preliminary estimate of Mr. George E. Roberts, director of the United States mint. Gold production in the United States amounted to $91,685,168, compared with $96,890,000 in 1911. California led with $19,988,486; Colorado was second with $18,791,710; Alaska third with $17,398,946; Nevada fourth with $13.331,680, and South Dakota fifth with $7,795.680.

Of the world's production the Transvaal and Rhodesia made a gain of about $20,000,000, and Canada gained nearly $3,000,000. The United States, Mexico and Australasia lost about $16,000.000, and in the rest of the world the production was about what it was last year. Since 1908, when the production of gold in the world was $442,475,000, the annual increase has been comparatively small.

Requirements of Dominion and Republic.

The mint service of the United States during the year sold $38,000,000 worth of gold bars for consumption in the arts in this country and Canada, as against $35,000,000 in 1911. The net consumption of new gold, including coin for such uses, in the United States and Canada was about $35,000,000, and in the world, excluding Asia, probably between $100,000,000 and $115,000,000.

The absorption of gold by India, which has been attracting attention for several years, was again a noteworthy feature. The net imports of India in 1909 were approximately $50,000,000; in 1910, $90,000,000; in 1911, $116,000,000, and in 1912 approximately $140,000,000. The movement of silver to India also continues to be very heavy. The importations of silver, in ounces, during 1912 have been exceeded only once in the history of India in 1906.

Increase of Silver Production.

The increase of gold in the monetary stock of the United States in 1912 was approximately $90,000,000. The gold holdings of the United States Treasury increased about $70,000,000, chiefly in bullion, represented in the circulation by certificates.

The production of silver in the United States during 1912 amounted to 62,369,974 fine ounces compared with 60,399,400 fine ounces in 1911, the chief gains in production having been made in Utah and Colorado. Nevada ranked first in production with 13,042,118 fine ounces, Utah second with 12,795,072 ounces, Montana third with 12,338,589 ounces, Colorado fourth with 8,350.316 ounces, and Idaho fifth with 7,703,121 ounces.

◆

DEBT

It all began so lightly, even so blithely—not a burden at all, just a pleasant favor. You had left your money in your other suit. Your friend was ready with the five dollars that solved the evening for you. It was so easy that you tried it again, and you gave some other fellows the chance to show their good will for you. Then the trick of asking for it became a habit. Then the other men, with whom you'd gone to school and grown up, began to buy motor cars, and you thought a neat runabout would be nice for you. So you pulled out the insurance policy which was to protect your wife's old age, and you borrowed money on that. Later came a chance to "invest" in an oil company which had just developed a "gusher," all of it a "sure thing." So you mortgaged the house in which you live. All the time the family expenses kept going higher, so finally you went to a loan shark and paid out money to get more money to pay the bills, the mortgages, and the interest which came tumbling in with almost every mail. And now your back is bent and almost broken with the great load of debts—a pack as heavy as Christian's load of sin in "Pilgrim's Progress." And the hill grows steeper with each step, the burden heavier. And soon you'll go toppling down, head first, and there'll be an end of the stumbling and striving. Better not get into debt! Thank God if you're not in debt! If you already are, cut down expenses. Give up the motor car. Quit speculating. Start saving. Lead the simple life, the really simple life.—Collier's Weekly.

◆

An order-in-council has been passed amending the harbor regulations of Canada and prohibiting the discharge or disposal of oil, tar or other dangerously inflammable material in the water of any harbor of the Dominion. The order provides for a fine of $50 for violation of its provisions, with a further penalty of $10 for every twelve hours during which the offence continues.

DEBENTURES AWARDED

Mantario R.M., Sask.—$5,000 5½ per cent., 20 instalments, to Flood Land Company, Regina.

London, Ont.—$231,400 4¼ per cent., 10, 15 and 30 years, to Messrs. Wood, Gundy & Company, Toronto.

◆

ONTARIO HYDRO-ELECTRIC COMMISSION

The total revenue of the Ontario Hydro-Electric Commission for the past year reached $511,801.88. These receipts were for power delivered, including charges for administration, general expenses, operation, maintenance and interest. The expenditure reached $456,635.43; the total for the fourth quarter, with a tremendous increase in power purchased, was but $28,000 above that of the first quarter. The surplus on the year was $55,166.45, half of which was rolled up in the last quarter. This has been nominally set aside as a "depreciation reserve."

◆

HARRIS BOND HOUSE HAVE CANADIAN BRANCH

Messrs. N. W. Harris & Company, of Boston, one of the largest and most important bond houses in the United States, have opened a branch office in Montreal under the management of Mr. G. E. Wills. Although the company are only now establishing such a branch for Canada, they have been doing business here for more than fifteen years. Their business is confined solely to the highest grade of investment bonds. The Harris organization, since it started business, has purchased and placed over $1,250,000,000 safe investments. During the first week in January their customers received interest on over $250,000,000 of current investments.

The total loans of the Harris Company to Canadian railroads, public service corporations, and municipalities amount in the aggregate to over $45,000,000. They took over $10,000,000 of Montreal Tramways bonds last year and several other similar issues, as well as a small block of Halifax municipals.

Mr. Wills, who will represent the company in Canada, has been with the Harris corporation for a number of years, and has latterly represented them in Toronto and Montreal. He is well known and liked in Canadian investment spheres, and there is no doubt that the Harris Company's new venture, under his charge, will be successful.

Mr. N. W. Harris, one of the principals of the company, contributes an interesting story to the annual number of The Monetary Times.

◆

BOND NOTES

Asked if he had heard any complaints in London on the subject of overborrowing by Canadian municipalities and general business organizations, Mr. Sifton, premier of Alberta, who has just returned from England, said: "I heard no such suggestions. The British investor realizes, I think, that the enormous growth of the West requires large capital sums if development is to proceed in a brisk manner. The disposition, we noticed, is to look for higher interest on the money invested. Investors in general are looking for higher and higher interest, and Canadian municipalities, I think, will in the future have to pay more money for their financial accommodations when they go to London than they have done in the past. Our bonds were underwritten and offered at ninety-seven, and the public response was very fair. The amount of that issue was £1,000,000, and the bonds will carry interest at the price they sold at, a shade over four per cent."

A Montreal city loan of $6,000,000 at 4½ per cent. is awaiting flotation in London. An offer was made the other day, but it was too low, and was not accepted. As soon as it is issued, another loan of seven million dollars will be called for.

During the five years ended December 31st, 1912, London, Ont., sold on nine occasions bonds amounting to $1,205,952, and of this amount the sum of $935,022 represents the city's borrowings for the past three years, $439,000 being borrowed in 1912. The following table shows what the money cost the city:

	Per cent.
June, 1908	4.55
October, 1908	4.20
February, 1909	4.10

March, 1911	4.20
March, 1912	4.40
December, 1912	4.80

The last sale of $[illegible] cost the city a little over 4¾ per cent. Messrs. Wood, Gundy & Company have handled over $6[illegible] in three of the latest sales.

PROGRESS OF THE BANK OF TORONTO

One of the most substantial and conservative institutions, the Bank of Toronto, has again demonstrated that a sound business policy and profitable operation may travel together. Maintaining its high position in the business world, it made net profits last year of $835,787, or about 17 per cent. on the average paid-up capital for the year. The reserve fund was strengthened by a sum of $391,950, making that account at the end of November, 1912, $6.000,000, or $1,000,000 in excess of paid-up capital.

The shareholders of the bank met in Toronto this week and were presented with a good report of the year's results. The bank's resources were steadily loaned throughout the twelve months, thus creating an increase in profits. The stockholders shared in this gain, as a bonus of 1 per cent. was paid in addition to the regular 11 per cent. dividend. After discussing general conditions in Canada, Mr. D. Coulson, the president, stated that while large sums of money have again been obtained abroad by our railroad companies, municipalities, and large industrial corporations, and have been used by them in furthering their development, yet the banks have been called upon to an unusual extent, and their loans to the public in Canada show an increase on November 30th, 1912, of more than $100,000.000 over the corresponding period of last year.

The advances and bills discounted of the Bank of Toronto show an increase for the year of over $4,700,000. These are all made in Canada, and the large increase shows that the bank has tried to meet the requirements of customers with their expanding trade. This has been specially true so far as the Western provinces are concerned. The amount loaned by this bank west of Lake Superior is more than double the amount supplied by that part of the country, and it will probably be found to be true of the banks generally that they have used their Eastern resources very freely in aiding in the development of the newer provinces.

The following figures show at a glance the increase made in some of the accounts of the bank:—

		Increase for year.
Capital	$ 5,000,000	$ 391,950
Rest and profits carried forward	6,176,578	516,508
Deposits	41,622,345	495,682
Notes in circulation	5,474,917	612,485
Loans	45,066,977	4,773,640
Assets	59,226,548	2,158,884

The management, directorate and shareholders have good reasons for feeling satisfied with their fifty-seventh annual statement.

◆

Careful estimates place the salmon pack for the entire Pacific coast for 1912 at 5,905,120 cases, worth between $35,000,000 and $37,000,000. The pack is the largest on record, although the current year is the year of the big run, exceeding that of last year by a few thousand cases.

Peterborough has been fortunate in escaping from damage by fire in the past year. Fire Chief Howard states that during the year the brigade responded to 131 alarms and that the total amount of fire loss during the twelve months was $20,134. In 1911 there were 126 alarms and total damages of $22,798. The biggest fire during the year just closed was that in the Cameron store, a few weeks ago, with a loss of $7,000. Two fires during the year, causing a loss of $1.000, were due to lightning.

Mr. J. A. Ruddick, Dairy Commissioner for the Dominion, says that not a solitary pound of Canadian butter had been shipped to Great Britain since last March, as compared with shipments of 34,000,000 pounds in 1903, the record year for exports to the old country. "This is great dairying country," said Mr. Ruddick, "one of Britain's principal sources of supply a few years ago, found it necessary last year to go to the opposite end of the earth (New Zealand) for supplies to feed her own people, and the indications are that the imports of butter into Canada this year will reach several million pounds."

The nominee for the presidency of Calgary's board of trade for the coming year is Mr. J. W. Campbell, managing director and first vice-president of General Supplies, Limited, and president of the Federated Engineering and Supplies Company, Limited, of Toronto, a director of the Vancouver Portland Cement Company. Other nominations for the various offices are: First vice-president, Mr. W. H. Berkinshaw; second vice-president, Mr. A. McKillop; third vice-president, Mr. J. A. Valiquette. Council: Messrs. A. Allan, J. A. Brookbank, D. G. Campbell, A. F. Cross, E. A. Dagg, J. W. Davidson, W. G. Fowler, W. Georgeson, A. E. Graves, M. D. Geddes, T. A. Hornibrook, R. J. Hutchings, F. M. Macbeth, P. D. McLaren, W. C. Nancarrow, J. F. Porter, A. Price, A. W. Pryce Jones, W. B. Reilly, E. L. Richardson, B. L. Robinson, E. M. Saunders, P. D. Sprung, L. P. Strong, W. J. Tregillus, C. H. Webster and D. J. Young.

A TRIP THROUGH THE PROVINCES

NEW BRUNSWICK

Saint John.—The year 1912 has been a notable one in industrial and commercial history of New Brunswick. e like is true with regard to agriculture and the develop- nt of resources generally. A good deal of progress has n made with the St. John Valley Railway, which will con- t Grand Falls and St. John, and it is possible that a por- of this line will be ready for operation by the end of this r. The Gibson and Minto Railway, thirty-three miles in gth, which will connect the Canadian Pacific Railway h the Queen's County coal fields is not quite completed. ly in the summer, this line will be in operation, and the put of coal from the mines will be greatly increased. Last r, the New Brunswick section of the National Transcontental Railway was in operation with a limited service. angements had been made to construct a bridge across St. John River at St. Leonards, which will connect the ernational Railway from Campbellton to St. Leonards oss the province, with the railway system of the state of ine.

Turning to agriculture it is to be noted that the province gained this year an experimental farm, a Canadian Pa- Railway demonstration farm, and the assurance of the ablishment of two agricultural schools. A number English farmers have settled in the province during the t year, and under the ready-made-farm scheme a number settlers were also located. There is a steadily growing nand for farm lands, and also the formation of a number companies for colonization purposes. Great promise was de with the orchard industry, and arrangements com- ted for the planting of a number of commercial orchards t spring. The department of agriculture also appointed heep expert, and now has an expert in charge of the three ortant branches, sheep husbandry, poultry raising, and t culture.

With regard to natural resources, there has been a fur- r development of natural gas, which has been piped into city of Moncton. There has been more work at the coal es, and also at the Gloucester County iron mines. The nadian Sardine Company has built during the year a new n at Chamcook.

A number of new manufacturing industries have been ablished at St. John and other points. At St. John the at harbor works were begun at Courtenay Bay, while at st St. John new wharves and a new grain elevator for the nadian Pacific Railway are under construction, and there been more building and general construction work in city than at any time in more than thirty-five years.

The rush of business this winter has over-taxed the arf and warehouse accommodation at St. John, despite steady increase in equipment provided each year for rs past. Fortunately two new steamship berths, as well the new grain elevator, will be ready this year, and the nadian Pacific Railway will double-track portions of its between St. John and Vanceboro to handle the increased fic.

Wholesale trade has been active throughout the year, merchants in all lines express themselves well satisfied h the year's business. Bank clearings at St. John con- ie to show an increase. Labor is well employed, and the look for the new year is very bright.—Acting Secretary, John Board of Trade.

Fredericton.—A spirit of greater optimism than has ever ore existed seems to pervade the community and continu- expansion is expected.

During the past year construction was commenced on St. John Valley and the Fredericton and Grand Lake l Railways. The former line will run from Grand Falls St. John and will open up a large agricultural territory exceptional promise. It will have connection with the nd Trunk Pacific Railway at Grand Falls. This route st soon become the New Brunswick portion of another nscontinental railway looking for the shortest haul to the antic seaboard. It is probable that the shops of this rail- will be located in Fredericton, as this city is the ter- ius of the Intercolonial and the valley line will be leased and operated by the Intercolonial managing board. By son of the construction of the Fredericton and Grand e Coal Railway, Fredericton will receive cheap steam l from the Grand Lake mines and become the distribut- centre for this coal. This will mean cheaper power for l manufacturers. The statement has been made that the ver charges, when the new railway is completed, will rival hydro-electric power rates of Upper Canadian cities.

The Dominion Government established the experimental farm at Fredericton during the year. Two new larriggan factories and tanneries were put up, and a new foundry was established. The Donald Fraser and Sons' Company, Limited, acquired the Scott lumber mills and lands and will cut several millions feet during the coming season.

The Bank of Commerce opened a branch bank in Fredericton in October last.

Three water power companies commenced preliminary work to supply Fredericton with cheap hydro-electric power from the St. John River.

The city council offers a free site, free water and exemption from taxation to sterling, bona fide industries.—George M. McDode, publicity commissioner, Fredericton.

Campbellton has now reached its most critical period since the great fire of 1910. However, on the whole, trade has been as good as could be expected under the circumstances, and a number of new buildings have been erected. For next season prospects are very fair. Both lumber and shingle markets are good, perhaps better than they have been for a long time. There is a fair prospect of the establishment of a pulp mill here in the spring, which would mean considerable aid to the town. Besides this there are negotiations under way for the establishment of a factory for manufacture of railway supplies.—John T. Reid, town clerk.

PRINCE EDWARD ISLAND

Farm land, buildings, &c., were valued in the recent census returns at $34,379,515, being an increase of $8,589,333 in ten years, or 33%.

The production of the census year in field crops, and fruit grown, in live stock, animals slaughtered, dairy products, wool, eggs, honey and maple sugar marketed, was $11,967,425, being an increase of 60% over the production of 1901.

To the value of live stock on the farms should be added at least $4,000,000 on account of the black fox industry. This enterprise has shown a most remarkable development and many considerable fortunes have been realized in it. There are now over 120 ranches containing hundreds of very valuable animals, which at present sell for $10,000 and upwards per pair.

Many new companies have been formed to carry on fox-breeding, oyster culture and other industries.

The farmers have had good crops and better prices than before.

The production of the fisheries is not materially different from previous years, which has been slightly over a million dollars in value, the greater half being in lobsters. There are 187 lobster canning factories surrounding the island. The entire production of the island during the closing year should run close upon $16,000,000, or $170 per head of the population.

The outlook toward the future is bright in this province. This arises in part from the promise of a car ferry to connect the island with the mainland at a narrow portion of the strait, where the water is only eight miles wide. $1,400,000 for this purpose was voted by parliament at its last session, and surveys and estimates have been completed. The ferry promises to give continuous crossing where heretofore in the winter there has been frequent interruptions on account of the ice.

Another promising line for development and investment is afforded by the oyster areas of the province which were last year transferred wholly to the control of the provincial government and which they are now taking vigorous and well-considered measures to restore. Oysters of the finest quality in great abundance grew naturally all around these shores. Twenty years ago almost three-fourths of the oyster product of the Dominion came from the island. From overfishing and neglect the fishery has been depleted. The entire area made up of beds still productive and other areas now non-productive but affording excellent soil for oyster culture is at least 100,000 acres. Of this about 18,000 acres was this year carefully surveyed for leasing and the number of applicants for leases exceeded expectations. A field for investment is available and already capitalists are becoming interested.

Again, the island is a summer resort for tourist visitors. This traffic also awaits, and is possible of great development. The car ferry, the oyster industry, and the development of the summer tourist business brightens the business and trade outlook for Prince Edward Island, although without these the past year has been a prosperous one.—J. E. B. McCready, publicity agent for Prince Edward Island.

ONTARIO

Welland.—The general situation and outlook in the Welland district for the coming year is exceedingly bright and from present appearances it would seem that this year will be one of the best that Welland has ever experienced.

We have secured here in the last year two new industries in the Welland and Terminals and the Northern Steel Company; in addition to this the Metals Chemical Company, Toronto, are now building a plant here which will employ a large number of people and the Empire Cotton Mill have decided on a location and are building their new plant which will employ about 500 people at the start. All of the factories located here are building additions and enlarging their plants, and some doubling their capacities. Considerable house building is going on and large additions to the population taking place.—J. D. Payne.

Campbellford's progress is as favorable as can be wished along the lines of all growth that comes to any community from year to year. During the past few years some extensive work has been carried on by the government in the erecting of the Trent Valley Canal, together with private enterprises in the building of power houses for the transmitting of electric energy to this town and to outside points.

Few towns, if any, possibly have better advantages to offer to intending manufacturers and industries. The withdrawal of funds for investment in the West has been much felt. To a large extent people have forwarded their total savings, either for investment or real estate speculation, and in a great many cases have withdrawn the loanable value of their insurance to keep pace with the call for Western transactions.

The exodus of Bulgarians returning to take up arms has been heavily felt by employers in this district, and with the withdrawal of funds, this town has lost perhaps some $60,000 alone taken with the people.

The crops have been about the average. Prices have been good for all stock. Cheese this year has commanded a higher price than during the past few years, that is, throughout the season. The general outlook for all trade is good.—C. H. Harris, Secretary, Board of Trade.

Woodstock's progress during the past year has been satisfactory. Municipal improvements include an excellent lighting system. Many residences have been built and there is evidence of much building being done this year.

Woodstock has at present 35 industries, and practically without exception all have had a successful year, and have experienced great difficulty in keeping pace with their orders. Among the new industries secured during the past year might be mentioned the Harvey Knitting Company; the McKinney Lumber Company, Limited, planing mill, etc.; and the Canadian Morehead Manufacturing Company, Limited. Several of the manufacturing companies here have made large additions to their plants during the past year and have very largely increased the number of their employees. The Oxford Knitting Company have doubled their factory capacity and are employing a large staff of operatives.

The Canada Furniture Manufacturers, Limited, have built several fine additions to their factories here within the last twelve months, and have for some time been working overtime to fill their orders. The Standard Wire Fence Company, Limited, and the Hamilton Tube Company, Limited, have completed arrangements for an amalgamation of the two companies at Woodstock, and a new factory of the same size as the present Standard Wire Company factory is now under way, and will be completed this year. The Woodstock Floral Company during the past summer have erected five large new greenhouses, each 225 feet long, and now have one of the most complete floral equipments in America.—H. Sykes, Secretary Board of Trade.

Sudbury.—This town is growing very rapidly. Houses and offices are exceedingly scarce. There is room here for several small manufactures, a woolen mill, a foundry and machine shop, a wagon and sleigh shop would do well here. There is an exceptional opening for a large restaurant well run. The floating population is large, from one thousand to fifteen hundred people. It is estimated there is at least twelve hundred meals per day are served by the Chinese restaurants.

Within six miles of Sudbury there is at present distributed in wages by the mines alone about $3,000,000 per annum; the lumbering and pulpwood industry adds nearly [illegible], and the Canadian Pacific, Canadian Northern, and Algoma Eastern Railway considerable more. [illegible] preparation is being made by the Canadian Copper Company and the Mond Nickel Company. The Mond Nickel Company are completing a $2,000,000.00 plant at Coniston, the junction of the Canadian Pacific and Canadian Northern Railways, six miles from Sudbury. The Canadian Copper Company are increasing their output from two thousand to five thousand tons. The Dominion Nickel Company, within three miles of Sudbury, are developing the Murray Mine, and are to erect a $2,000,000.00 smelter there. This will make an output of nine thousand tons of copper-nickel ore smelted within six miles of Sudbury. The American Smelting Company are also active; they hold a large number of valuable options on copper-nickel lands. Within the last few months valuable gold discoveries have been made immediatelly north of Sudbury.

The Ontario government took up the question of building a railroad from Sudbury, north-west to the Grand Trunk Pacific, and the department promised the board of trade that a sum will be placed in the estimates at the coming session to locate the line, and build it into the clay belt on to the Grand Trunk Pacific.—J. F. Black, President, Board of Trade.

Hamilton.—This city enters the new year enjoying the largest measure of industrial prosperity in her history. Each year, for the past few years, has exceeded the previous one in development and expansion, but 1912 was in advance of all previous years. On every hand are indications of great prosperity. During the past year twelve new factories, with an invested capital of over two million dollars, have located in this city.

Three new factories are under construction at the present time, which will employ 1,500 men by this spring.

The National Steel Car Company have had a large force of men employed erecting their plant, which will cost nearly three-quarters of a million dollars, will employ 1,000 men early in the new year. It will have a capacity of from thirty to thirty-five steel and wood freight cars per day.

The Dominion Steel Castings Company are putting up a factory on Depew Street, to cost $300,000, and about 400 hands will be employed, and it will have a capacity of 12,000 tons per year.

The Canadian Porcelain Company are erecting a $150,000 plant on 20 acres of land adjoining the golf links. They will employ 125 to 150 men at the start, and will manufacture vitrified white porcelain for electrical and other purposes.

Among the other industrial acquisitions secured by Hamilton this year may be mentioned: Canadian Knitting Company, Buffalo Brake Beam Company, Fretz Canning Company, Harper, Presnail Cigar Company, Hamilton Steel Construction Company, Hamilton Trolley Wheel Company, Hamilton Gas Mantle Company.

There is reason to believe that Hamilton is entering upon a period of greater development and growth. An attraction for manufacturers seeking location is the fact that raw materials entering into the construction of machinery is manufactured and can be purchased in Hamilton. Additional factories also strengthen the labor market, which is another important factor.

A start has been made on improving Hamilton harbor, and the Dominion government will likelly spend a million dollars in the next few years, deepening the bay along the water front, so that navigation will be safe for the largest freighters, will also play an important part in Hamilton's future industrial prosperity, as will the installation of the municipally-owned hydro-electric department, which distributes power for manufacturing and lighting at cost. Hamilton Industrial outlook for the coming year is very promising.—H. M. Marsh, Commissioner.

MANITOBA

Duck Lake.—The crop in this district was fully up to that of recent years, averaging: Wheat, 25 bushels; oats, 55 bushels; and barley, 50 bushels to the acre. Collections are somewhat late, but have been generally good. Merchants in this town report a successful year. A new flour and oatmeal mill is expected to be in operation here this spring, with a capacity of 400 barrels daily.—Hamforth, Secretary Board of Trade.

Pilot Mound, Man.—Despite the wettest harvest season on record, there will be moderate return. In August the most promising crop for 15 years past seemed probable, but that estimate was somewhat lowered by a cold, wet fall. Still this district had and will continue to have a fairly good share of prosperity.—H. M. Speechly, M.D., Secretary Board of Trade.

Rapid City.—The crop is not netting up quite as much money as it did a year ago. The rains were not as early in July as further West in Saskatchewan—and the dry weather made a great difference in the crop. After the rains in ıly the straw grew very rank, and there was a very heavy rowth in the straw, and very little grain in proportion. usiness seems bright, and farmers are meeting their paper ıtisfactorily. The prospect for next year looks good; there ıs been much summer fallow done, and it has been well orked, and the moisture of the late summer and fall rains e stored up in the land for the present year's crop. One ing that the farmers should go into more extensively, and at is stock raising. As an example, a party bought ur pigs, and all the feed for them, the returns of these o that were sold netted a little more than the cost and ed of the four. Stock-raising should be encouraged by e banks, and money should be advanced to the farmers to ıv stock and to allow him to use up his feed and receive a rger profit on his grain than he would get otherwise. Beef ıs paid well in this district, and if the farmer, instead of lling his oats and barley to the grain dealer, would buy ıttle and feed them a larger profit would be obtained.—H. . Harvey, secretary-treasurer, Board of Trade.

Dauphin.—For Dauphin the year 1912 was most proerous. The city's indebtedness totals $440,000. $75,000 in bentures, yet to be put upon the market, the greater amount this was incurred in the installing of public utilities, sews and water.

The assessment of $1,628,054 at the present time is low, ere being many new residences, stores and factories erected ıce the assessment was made, which will bring it near the ree millions.

The sewerage system is nearing completion.

The water system, which will, when completed, be one the best and cheapest operated in Western Canada, obıns its supply in the mountain from a soft spring lake, and conveyed to the city by gravitation, giving ample supply r domestic and fire-fighting purposes.

The Government erected a Dominion lands title office ıring the past year; the Canadian Northern Railway built $50,000 depot; and some 100 residences were built. Buildg prospects for 1913 are bright. The contract for the erecın of the new Anglican church is to be soon let, and will, is estimated, cost $30,000.

The crops were very satisfactory. They had a set-back one time owing to the excessive rain. This caused a dey in the harvest operations, but with the help of the mild en weather to the end of November cutting and threshing ere continued. An average of about 34 bushels of wheat the acre was obtained.

Two banks have notified their intention of locating here, aking five branches. The Bank of Montreal has secured emises on Main Street.—Langdon, secretary, Dauphin ard of Trade.

SASKATCHEWAN

Saskatoon.—The civic census taken on October 25th, 12, makes the population 27,527. And it even does not clude all the people. Nevertheless, 50 per cent. increase in e year is most encouraging.

One interesting phase of our development is that the y of one and two storied blocks has apparently passed. Six d eight storied blocks of metropolitan type are now being nstructed. Industrial enterprise is expanding steadily and lidly. Last August the Quaker Oats Company, of Chicago, cided to locate their sole western Canadian plant at Saskaon.

Quite a number of small manufacturing concerns have tablished within the past year, all of which show every mptom of larger things. In addition, our Industrial eague has been working quite energetically, and has arnged for the location here of a number of concerns. The evitable effect of the money received in payment for crops ll be an increase even upon the activity which now charterizes every department of our commerce. Some indicaon of the amount of such money may be gathered from the ct that last season over 16,000,000 bushels of all grains were ıuled out of the 125 mile stretch of the Canadian Northern ailways Goose Lake line, running to our south-west These ,000,000 included a large proportion of flax, and could, erefore, be estimated as representing a value of approxiately $16,000,000. And the Goose Lake line is only one Saskatoon's ten inlets. This year will probably do more r Western Canada's development than the last two comned.—F. Maclure Sclanders, Commissioner.

ALBERTA

Vegreville.—The past year in the Vegreville district has een one of increased activity in every branch of business. he merchants of the town review it with gratification as eing in advance of the previous year. Farmers have almost ompleted the liquidation of their debts. Crops have been good in yield and quality, in many cases the best that has ever been grown here. Cattle have been brought in for sale to the stock dealers in large numbers; 125 carloads were shipped during one month (Qctober).

In regard to municipal improvements, Vegreville has its waterworks completed, and also its power house of solid brick. A large reservoir has been constructed on the northern limits of the town. The sewerage system is being installed and a considerable distance of piping has been laid. An abundant supply of good water has been obtained at a depth of 100 feet, which will be available for domestic use and fire protection as soon as the pumping machinery can be erected.

Natural gas, it is expected, will be available in sufficient force to provide light, heat and power for industrial purposes at a low rate.

There has been a steady increase in the population, and the school house has been doubled its original size. Another attractive feature for Vegreville is the new line connecting Vegreville with Calgary, from which place the distance to be completed is now only 35 miles. The town is on the main line of the Canadian Northern Railway, being 72 miles east of Edmonton. The new line will thus make Vegreville a centre of business importance, having outlets to two large cities, viz., Edmonton and Calgary.

Manufactures and industries at present established comprise a sash and door factory, electric light plant, machine shop, flour and grist mill, brick yard, cheese factory, and creamery.

The prospect of the situation for Vegreville is therefore of the brightest.—Secretary, Board of Trade.

BRITISH COLUMBIA

Salmon Arm.—The municipality contains about 72 square miles of exceedingly fertile country. Its cultivatable land includes splendid benches for fruit growing, notably apples, while the extensive Salmon River Valley and other smaller valleys provide very rich bottom lands, specially suited to hay, dairy and general mixed farming.

It is the shipping and business centre of a large outlying district surrounding the Shuswap Lake.

The outlook for Salmon Arm for the coming year is promising. During the past year the city was incorporated, and let contracts for a water system costing $45,000, electric light system costing $22,000, and added largely to the sidewalks at a cost of $4,000. By-laws will be introduced early in 1913 for authority to borrow $45,000 for sewers and $20,000 for roads.

An agricultural hall standing in 25 acres of ground within the city limits was erected, meeting a long-felt want for adequate accommodation for agricultural and fruit shows. Important new trunk roads are being made by the government, providing better communication with the more distant parts of the Salmon River Valley and with Enderby in the Okanagan.

Land is being cleared and cultivated, and new orchards are coming into bearing. 500 to 600 acres have been planted in trees during 1912, and it is estimated that 500 acres are cleared ready for planting this spring. 2,000 acres are at present in orchard, 150 acres of which are in full bearing.

At present there are no manufacturers established here.

As compared with previous years production has greatly increased.

The quantity has increased about 50% in the last two years, and 36 carloads of fruit were shipped last year.

600 tons of hay were sold at $20 per ton.

The district produced about 40 carloads of potatoes and 45,000 gallons of milk were shipped at 30c. per gallon.

In view of this agricultural development the careful attention of the directors of the various associations interested is being given to the extension and perfecting of the selling organizations, so as to keep pace with the increased output.—J. D. Macey, Secretary, Board of Trade.

Revelstoke.—Notwithstanding the set-backs, great as they were in 1911, a movement was put on foot to organize a progress club to act in conjunction with the board of trade, until Revelstoke has now a strong organization. Recognizing the possibilities of the district for attracting the tourist traffic a suggestion was made and followed to build an automobile road to the top of Mount Revelstoke. The provincial government was approached on the subject and a grant of $10,000 obtained with which to start it. A survey proved the route feasible to an altitude of 6,500 feet above sea level, opening up a park of several thousand acres of the grandest and most beautiful scenery imaginable. It is expected that further grants will be made with which to complete this road this year.

The Dominion Sawmills commenced operations again in the spring, the company having been reorganized and its finances placed on a stronger basis.

The city streets have been improved by grading and macadamizing and about five miles of cement sidewalks have been added to those already laid.

The sum of $100,000 has been expended on, and 18 miles of roads outside the city have been added in extensions opening up more of the surrounding country to settlement and bringing nearer the time when Revelstoke will have connections with other towns by this means as well as by rail. The construction of these roads is necessarily slow owing to the difficulties to be overcome, but once completed they are built for all time to come.

The Canadian Pacific Railway built large oil tanks and installed all their locomotives with oil burners. This does away with the use of coal for the whole mountain section. They are also at present erecting a large gas plant for the purpose of supplying gas to all their cars between the coast and Winnipeg.

Revelstoke is anticipating building a new post office, city hall, high school, also a brewery, tourist hotel, government wharf, Canadian Pacific Railway extensions, enlargement of the shops and freight sheds, &c., the building of a railway through the Big Bend country, street improvements and the throwing open to settlement of all the available Dominion lands in the vicinity and within the railway belt which have in the past been held under timber leases, and not been available to settlement.

The farmers and fruit growers in the district of Revelstoke and Arrow Lakes and districts immediately west of Revelstoke also had a most prosperous year in that just closed.—H. H. McVity, secretary, board of trade.

◆

ONTARIO'S LIVE STOCK

The numbers of live stock in Ontario are as follow, with comparisons:—

	1910.	1911.	1912.
Horses	724,384	727,916	742,139
Milch cows	1,052,796	1,045,610	1,044,177
Other cattle	1,514,332	1,547,595	1,580,603
Sheep and lambs	1,065,101	1,040,245	1,021,848
Swine	1,561,042	1,744,983	1,702,652
Poultry	12,460,787	12,942,293	13,024,983

The numbers of live stock sold or slaughtered during the year ended June 30, 1912, were as follow, with comparisons:—

	1910.	1911.	1912.
Horses	97,900	105,741	101,911
Cattle	817,239	837,544	849,140
Sheep	512,909	505,015	531,957
Swine	1,844,405	1,963,937	2,088,874
Poultry	4,164,715	5,011,313	5,501,913

The clip of wool was 3,669,419 pounds against 3,780,798 in 1911

RED DEER'S SMALL FIRE LOSS

Ten fires and eight false alarms is the report of Red Deer's, Alta., fire department for 1912.

The average number of men responding to fires has been 18.7; the average number of men responding to false alarms, 14.7; the average number of men attending practices, 13.8. The total loss by fire was $1,105.00, of which 75 per cent. was covered by insurance.

The cause of fires was as follows: Children playing with matches, 2; hot ashes piled against a building, 1; chimney fires, 2; coal oil coffee boiler exploded, 1; coal oil lamp exploded, 1; spilled gasoline and a lighted match, 1; unaccountable, 1. Three thousand feet of hose was laid and one hundred and three gallons of chemical were used in extinguishing the fires.

At the present time there is a total of twenty-three men and officers in the brigade.

The fire alarm system has been responsible for some of the false alarms and, while it has proved fairly successful, the town has outgrown this primitive kind of system, and should have a modern fire alarm system, is the opinion of Fire Chief Meeres, who adds: Our building by-laws are away out of date, and at this time of rapid growth their revisement is a vital question if we are to maintain our reputation of small fire losses.

On account of the extensive building, and largely increased value of buildings at risk, the ratepayers must be prepared to spend a large sum of money to increase the efficiency of the fire department.

A branch of the Canadian Bank of Commerce has been opened at Pandora Avenue and Cook Street, Victoria, B.C., under the temporary management of Mr. R. S. Ross.

SUCCESSFUL SHIPPING SEASON ON ST. LAWRENCE

Montreal's Passenger Traffic Broke All Previous Records—Many Improvements Were Made, Including the Establishment of a Floating Dock

An increase in passenger traffic and enhanced rates for freight, marked the past St. Lawrence navigation season. The size and tonnage of steamers also increased.

Important changes took place both in the port itself and in its directors. The resignation of the harbor commissioners, Messrs. G. W. Stephens, C. C. Ballantyne, and L. E. Geoffrion, was not the only change that has occurred in the management. Early in the season Hon. James McShane resigned the post of harbormaster, and was succeeded by Captain L. E. Demers, who, till then, had been wreck commissioner. Captain Demers was succeeded in the wreck commissioner's court by Captain H. St. George Lindsay.

The most important works that were completed in the port were eclipsed by the arrival of the floating dock Duke of Connaught, which was formally opened by the Governor-General, whose name it bears, in November. Works completed within the harbor include the No. 2 grain elevator opened by the Minister of Marine and Fisheries, Hon. J. D. Hazen, the new sheds at the Tarte Pier occupied by the Elder Dempster Company, the Head Line, New Zealand Shipping Company, and Furness, Withy & Company. The new shed, No. 16, at the Victoria Pier, was also completed.

Receipts for Seven Months.

The past season was a record one with regard to customs receipts. Increases were shown each month over the corresponding month of the previous year. The receipts during the seven months of navigation amounted to $15,508,124.53, an increase over the corresponding period of 1911 of $4,333,134, or more than 33⅓ per cent. The figures of the several months are given herewith:

May	$2,144,476.16
June	1,949,077.80
July	2,251,657.54
August	2,318,871.76
September	2,218,169.68
October	2,348,993.00
November	2,276,878.59

Harbor Commissioners' Returns.

The Harbor Commissioners entertained delegates to the twelfth international congress on navigation, held at Philadelphia, the delegates having previously made a tour of inspection over the inland waterways of the Dominion. The reciprocity agreement with the British West Indies will result in direct steamship communication between Canada and British West Indies next year and benefit Montreal.

A record season is reported from the offices of the Harbor Commissioners. The revenue of the port showed an increase for the past season over that of 1911 of $30,773.18; the figures for the two years being $461,396.43 for 1912, as compared with $430,623.24 during 1911. The total increase was made up of the following amounts: Wharfage inwards, increase $6,000; wharfage outwards, an increase of $5,500, and a local traffic increase of $19,273.19. There was a small decrease to report in the number of sea-going vessels that arrived in port, the number being 26 less than last year, 736 vessels for this year, instead of 762 for the 1911 season; but there has been an increase in tonnage, that for this year having been 2,403,924 tons against 2,338,252 for last.

Satisfactory Year for Shipowners.

From a shipowner's point of view the year was satisfactory. Passenger traffic, especially west-bound, increased ten per cent, this estimate being a conservative one. Freight rates increased in a manner that is unprecedented for years past, and there was no trouble last year with the depth of water in the ship channels, as there was previously, the mean increased depth, owing in part to exceptionally heavy rainfalls, having been over two feet throughout the season. Labor troubles caused practically no inconvenience, and minor difficulties that arose were soon remedied.

Montreal's navigation season opened with the arrival of the Canada liner "Nieten" on May 1st, and closed with the departure of the "Bray Head" on December 3rd. One hundred and twenty-five individual ships entered the port during the navigation season.

SUPPOSED INFERIORITY OF FIRST AND SECOND BORN MEMBERS OF FAMILIES

Theory Should be Supported by Positive and Convincing Proof—Statistics Used at Present Prove Very Little

BY T. B. MACAULAY, F.I.A., F.A.S.

There is a general impression that while the study of eugenics may be interesting, it can be of but little practical value, owing to numerous and obvious difficulties in applying to the improvement of the human race the principles and methods which can be used in animal and plant breeding. Students of the science, while frankly recognizing this difficulty, have endeavored, nevertheless, to make their investigations as practical and helpful as possible. It has been thought by some that one foothold for practical work has been found in the supposed inferiority of the early born members of families which certain authorities claim to have discovered. If later born children are, on the average, superior to their elder brothers and sisters, then it is evident that the prevailing tendency towards small average families has a most serious significance apart altogether from its numerical effect upon the population, while all influences which tend to increase the size of families tend also to prevent degeneration, and to improve the quality of the race. Several other important and discouraging assertions have also been made in this connection.

Used as Texts for Criticism.

It is, for example, claimed to be proved that the average families of the inferior classes of the community are even larger than those of the normal population.

Assuming the soundness of these theories, they have been used as texts for the criticisms of the child-labor regulations, and of other enactments designed to improve the condition of the poor. These various assertions, therefore, deserve to be investigated most carefully, not merely for their own sake, but because of the far-reaching character of the theories of which they are the foundation.

Before me is Professor Karl Pearson's "First Study of the Statistics of Pulmonary Tuberculosis." If I venture to criticize this paper, I hope that my readers will clearly understand that I fully appreciate the great achievements of this eminent scientist, in a multitude of directions, which have made his name a household word amongst students of eugenics. Even giants, however, nap at times. Professor Pearson's paper, just mentioned, contains an analysis of the records of 381 families, with 2,164 members, each family having one member in the Crossley Sanatorium.

Tuberculous Families, Number of Each Class of Sibling.

Sibling's order ...	1	2	3	4	5	6	7	8	9	10	11
Number of cases...	381	366	332	289	247	185	126	86	57	35	21
Sibling's order ...	12	13	14	15	16	17	18	19	20	21	22
Number of cases...	15	9	6	2	1	1	1	1	1	1	1

The tuberculosis patients from these families were distributed as follows:—

Sibling's order	1	2	3	4	5	6	7	8
Number of cases observed	113	79	41	52	39	18	18	9
Number of cases calculated	67.1	64.4	58.5	50.9	43.5	32.6	22.2	15.1
% observed of calculated	168.4	122.6	70.0	102.1	89.6	55.2	81.1	59.6
Sibling's order ...	9	10	11	12	13	14	Abv. 14	
Number of cases observed	3	3	3	1	1	1	..	0
Number of cases calculated	10	6.2	3.7	2.6	1.6	1.1	..	1.6
% observed of calculated	30	48.4	56.6					

Professor Pearson says:—

"If we consider the community as a whole, it will be built up of families in all stages of development. There will be some in which both oldest and youngest siblings have passed through the tuberculous zone, some in which the eldest have and the youngest have not, and some in which the eldest are in it and the youngest have not reached it. Each one in his lifetime passes through the danger zone, and we might expect, out of the totals that pass through, the same percentage would be attacked, whether they happen to be elder or younger siblings. In other words, if we take the Crossley Sanatorium population at a given date, we might expect that as far as position in family is concerned it would be drawn indifferently from all parts of the family."

The ratio of the 381 patients to the 2,164 members of the families to which they belonged is applied to the number of children of each order of birth, and the claim is then made that the resulting calculated numbers as given above are the numbers that should have been in the sanatorium if the liability to tuberculosis were equally great in all members of each family, regardless of their order of birth. (See above table.) The actual number of inmates, it will be seen, are, among the early births, greatly in excess of the supposed normal numbers as calculated by Professor Pearson, and are less than the numbers calculated for the later births.

Professor Pearson further presents a diagram which vividly illustrates the supposed greater liability to tuberculosis of the early born, and the supposed comparative immunity of the later born, and adds: "It will be obvious on mere inspection of this table, or of the accompanying graph, that the excess of elder born, and defect of younger born, is most marked."

T. B. MACAULAY, F.I.A., F.A.S.

The conclusion, as voiced by Professor Pearson, is: "In general, whether we deal with all tuberculous stocks, or only with those having no parental history, the elder offspring, especially the first and second, appear subject to tuberculosis at a very much higher rate than the younger members. If this special incidence on the earlier be found to be true for other forms of pathological heritage, we have a very serious factor of national deterioration introduced by the growing limitation of the family. It is further conceivable that any class which reproduces itself largely from the elder children, e.g., the peerage, as far as the father is concerned, would tend on the average to more rapidly degenerate. The substantiation in other cases of this pathological weighting of elder children, which appears true for the cases of tuberculosis and insanity, would be a eugenic fact of the greatest importance. The limitations of the family may not only be an evil, if it leads to a smaller relative output of the mentally and physically better stocks, but even in the case of feebler stock, it may lead to a relatively larger proportion of the more affected individuals being added to the community."

Problem of Practical Eugenics.

In his pamphlet on "The Problem of Practical Eugenics," the professor reproduces the diagram above mentioned, and adds other similar diagrams, showing the supposed greater liability to insanity, crime and albinoism, among the earlier born. He adds:

"If our observations are correct, and I believe them to be so, then the mental and physical condition of the first and second born members of a family is differentiated from that of later members. They are of a more nervous, and less stable constitution. We find that the neurotic, the insane, the tuberculous, and the albinotic, are more frequent among the elder born. Dr. Goring's results from criminality show the same law. The diagrams I put before you bring this out; you see in the tuberculous, the insane and criminal stocks that the first few members are weighted. But the result of this law is remarkable. It means that if you reduce the size of the family you will tend to decrease the relative proportion of the mentally and physically sound in the community. You will not upset this conclusion in the least, if, as I suspect, the extraordinarily able man, the genius, is also among the early born. For you will not lose him if you have a larger family, although you will lose the sounder members if you curtail it."

From these supposed facts the professor draws some far-reaching conclusions, even claiming that they require a modification of the Mendelian theory. These arguments are certainly plausible, and the conclusions derived therefrom are most interesting. Before, however, we accept these conclusions, let us carefully consider the nature of the evidence on which they are based.

Shown by Statistics.

Let us consider first the statistics of tuberculosis. It is perfectly clear that the sanatorium contained larger proportionate numbers of early born patients than of later born of the 381 families. Does this, however, prove that early born children are more liable to the disease than later born of the same families? Not at all. Such a condition as that shown by these statistics was inevitable, and could have been foretold. Suppose, for instance, that of the 381 families included in the statistics, one consisted of fifteen children, the eldest twenty years of age, the youngest six months. If the eldest were the one who had developed tuberculosis, and entered the sanatorium, then all the fourteen younger brothers and sisters would be carefully tabulated and included in the numbers of tuberculosis stocks of the later born. Because fewer of such later born, and, therefore, young siblings, babies, perhaps, had become inmates of the sanatorium, we are asked to accept that fact as proof that later born children are superior to their elder brothers and sisters. It may be claimed that a family of fifteen is an extreme supposition, but the statistics before us include not only a family of fifteen children, but one of twenty-two. It is not wonderful, however, that the statistics also show that at least the youngest eight of that family (all of the eight being probably young children, some of them possibly infants), were not inmates of the sanatorium, there being no inmates belonging to any group beyond the fourteenth born.

Must Substantiate Assumption.

We are, however, told that "while a certain number of families exist with young siblings in which the older alone are likely to suffer, there are others in which the older are dead, or past the danger zone, and in which only the younger are likely to suffer," and he makes the assumption, therefore, that there will be enough older members of families whom he considers to be dead or past the supposed "danger zone," to offset the younger siblings.

Unless this assumption be substantiated, that there is a special danger zone, and enough members of the families beyond it to affect the younger siblings, the foundation of the whole theory and of its developments is removed, and the entire structure collapses like a house of cards. When the vital importance of this assumption is thus realized, we would expect that some proof would have been produced in support of it, but the foundation is simply assumed to be there, and a great edifice is then endeavored to be built on it. To those who think the assumption is sound, we commend the following statistics from the report of the Registrar-General of England and Wales, 1891-1900:—

Annual Mortality from Phthisis per Million Living at Various Ages.

Ages	0-4	5-9	10-14	15-19	20-24	25-34
	413	206	368	1144	1730	2135

Ages	35-44	45-54	55-64	65-74	75 and over	All ages
	2502	2362	1881	1154	437	1391

In the face of such figures it is difficult to see how the claim can be supported that the older members are "past the danger zone," and, therefore, not likely to become inmates of a sanatorium. Not until age 75 does the death rate from phthisis descend to the neighborhood of what it is below age 15.

To sum up. In these tables the inclusion of children and babies who are not yet old enough to be exposed to the dangers in question, very clearly makes it inevitable that the groups of later born, to which these children belong, will show a more favorable percentage than the groups of early born, who are of necessity grown up. Professor Pearson, however, contends that there are as many people dead or who have passed through the supposed danger zone, as there are children in the families not yet old enough to be exposed. This may be so, or may not be so. It is a tremendous assumption to make, and he does not produce proof in support of it.

The diagrams produced in regard to insanity and crime are, as already mentioned, similar to that relating to tuberculosis. I have not before me the statistics upon which they are based, but there is little doubt that they have been prepared in the same manner. If so, the inclusion of young children among the latter births renders these results also valueless.

The later born groups, which include a considerable number of children, naturally have not developed as large a proportion of insane persons and criminals as the older adult members of their families. It cannot even be claimed that there is a danger zone in insanity and crime, such as was claimed for tuberculosis. The older siblings have in reality had just so much longer time to develop insanity or criminal propensities than the younger ones.

Let us consider, for example, the inmates of any penitentiary or asylum. Is it not certain that many of those inmates have brothers and sisters younger than themselves? Is it not equally certain that many of those younger siblings are so immature that, merely because of their youthfulness they have not yet committed any crime of sufficient importance to place them in the penitentiary? Some of them may be little more than babies—some of them actual babies. Can it reasonably be claimed that because these babies have not yet entered the penitentiary they are superior in moral quality to their elder brothers? Only the adult members of the families have had the opportunity to develop criminal propensities.

Suggestion of Danger Zone.

In regard to tuberculosis, the consideration of the question is complicated by the suggestion of a danger zone, and the claim that there may be sufficient persons past that zone to offset those who have not yet reached it.

Even those who believe there is such a zone in the case of tuberculosis, will, however, hardly be likely to argue that if two criminals or insane persons be each aged twenty, and one of them has a brother fifteen years older (age thirty-five), while the other has a brother fifteen years younger (age five), then the elder brother may be considered to have passed the danger zone of crime or insanity, and to be no more likely to have developed criminality or insanity than the child of five, and that the man of thirty-five may be properly offset against the child of five.

Apart altogether, however, from the effect of including in the statistics the undeveloped members of the families, another consideration, not, however, probably productive of as marked an effect on the statistics would lead us to expect that the early born groups would show higher percentages of individuals lacking in robustness, or even given to crime. If one or other, or both parents die, for example, of consumption, at comparatively early ages, their average family will certainly be much smaller than in the case of couples neither of whom die prematurely.

Fail to Prove Point.

Parents of criminal, or semi-criminal tendencies, moreover, may not remain together sufficiently long in the marriage state to have large families, though, on the other hand, some paupers and others may have families over the average. The children of these small tuberculous or criminal families would, of course, all fall into the earlier born groups, and as a result of heredity we would expect somewhat larger percentages of weak or criminal children in those groups. That, however, in no way indicates that early born children are inferior to later born of the same families.

Statistics which combine small and large families in one heterogeneous group are clearly valueless for our purpose. They may prove that tenth born children are superior to the average of all first or second born children, including those of families which contain but one or two members, an undue proportion of these latter being possibly from consumptive or criminal parents. But such statistics prove nothing as to the superiority of later born children over the elder born of the same families, and that is the point we are considering.

Is This a Statistical Fallacy?

We now, however, come to another point which is claimed to have been made. It is stated that families containing tuberculous, insane or criminal members, are, on the average, larger than those of the total population. Is this contention well founded, or is it, too, a statistical fallacy?

I quote again from Professor Pearson's Study of the Statistics of Tuberculosis:—

"The distribution of the 381 tuberculous families, which may be practically considered as completed, is as follows:—

Size of family	1	2	3	4	5	6	7	8
Number of family	15	34	43	42	62	50	40	20

Size of family	9	10	11	12	13	14	15	22
Number of family	22	14	6	6	3	4	1	1
Total								381

"Accordingly the mean family contains 5.68 offspring. For the male pedigrees the mean size is 5.80, and for the female pedigrees 5.59. Mr. Schuster finds the mean size of families containing at least one deaf mute to be from American statistics 6.08, and from English statistics for probably completed families 6.19.

"It would thus appear that fewer offspring are not born to stocks tainted with pulmonary tuberculosis.

"There is no reduced fertility in the case of tuberculosis; in fact, their fertility is as great as that of any other class in the community."

The professor compares the results obtained as above with the average size of families in the community as a whole, and claims that these statistics show that "the families of the affected are larger, not smaller, than those of normals."

Do these figures really prove that the tuberculous families of the community are on the average as large, or larger, than those of normal stocks? Most decidedly not

Average Is Overstated.

The mean family as given represents the mean for those particular 381 families, but it does not, and cannot, represent the average size of tuberculous families in the community as a whole. It is, in fact, impossible to ascertain the average size of a family in this manner. Statistics compiled in this way must always, and inevitably, overstate the average. These 381 families are treated as though they were indifferently chosen from the tuberculous families of the community, but this is not so. Such a selection is one of children, not of marriages or of families, and the probability of any marriage being represented in the sanatorium is in direct proportion to the number of living children in the family. Marriages with a large number of children are very likely to be included.

Marriages with but few children are correspondingly less likely; while childless marriages will not be represented at all. A marriage with ten children has ten times as great a chance of being included in the statistics as a marriage with but one child.

A marriage with twenty-two children, like the one mentioned in the statistics, has twenty-two times the chance of being included that a marriage with but one child has, for there are twenty-two children who may develop tuberculosis as against one in the other case. The mean family derived from statistics so compiled clearly does not, and cannot, represent the average of the tuberculous families of the country, and to compare a result so found with the average size of a family in the community as a whole is to deceive ourselves.

Suppositious Case Is Taken.

Perhaps we will better appreciate the nature of these fallacies if we apply the same rules and reasoning by which they are produced, to a suppositious case. Let us imagine a community which contains 1,000 families of one child each, and 1,000 other families with ten children each. These 11,000 children in the 2,000 families give an average family, of course, of exactly 5.5 To simplify the problem, let us assume that the 10,000 children of the families of ten are so evenly distributed that there are precisely the same number of first born children living at every age, from twenty to forty-four inclusive, and that the ages of the children of the same families are precisely two years apart. This is a purely artificial grouping, but its very simplicity will help us to understand better the principles involved. It is, of course, quite proper for us to ignore families of which no member has reached maturity, just as such families find but little place in the records of a sanatorium for pulmonary tuberculosis, or of an asylum or penitentiary. The 1,000 members of the families of one child are, we will say for convenience, divided evenly from ages twenty to forty-nine inclusive, there being forty living at each age.

When these materials are arranged according to order of birth, the following is the result:—

Order of siblings	1	2	3	4	5
Age over 25	1520	680	600	520	440
20—25	480	240	240	240	240
11—19	....	80	160	240	320
Total	2000	1000	1000	1000	1000

Order of siblings	6	7	8	9	10	Total
Age over 25	360	280	200	120	40	4760
20—25	240	240	240	240	240	2640
11—19	360	360	360	360	360	2600
2 10	40	120	200	280	360	1000
Total	1000	1000	1000	1000	1000	11000

We will now suppose that of the above group, 148, or exactly two per cent. of the total number of siblings beyond age 20, are college professors, the selection being made from each group in exact proportion to its members living at age 20 or over. I mean no disrespect to our professorial friends in naming this young age, choosing it merely in order to harmonize somewhat with the records of a sanatorium, asylum or penitentiary.

Arranging these professors according to order of birth, and comparing them with the calculated number of cases which we should have if the professors were "drawn indifferently from all parts of the family in proportion to the total number of persons of each birth," we get the following:—

Sibling's order	1	2	3	4	5
Number of professors observed	40	19	17	15	13
Number of professors calculated	26.9	13.5	13.5	13.5	13.5
Percentage of actual to expected cases	148	141	126	111	97

Sibling's order	6	7	8	9	10
Number of professors observed	12	11	9	7	5
Number of professors calculated	13.5	13.5	13.5	13.5	13.5
Percentage of actual to expected cases	89	82	67	52	37

May I take the liberty of applying in friendly banter the professor's words and arguments to the above suppositious case?

"It will be obvious on mere inspection of this table, or of the accompanying graph, that the excess of elder born, and defect of younger born, is most marked. Testing by the usual process for goodness of fit we conclude that the probability of such a distribution of older and younger members of a family occurring by random selection lies between one and two in the ten millions trials."

We thus make what on its face would appear to be a very wonderful discovery. "It is very evident that a much larger proportion of the older born members of families become professors, and the first born are evidently peculiarly subject to this dread complaint. These statistics, when combined with the equally convincing statistics in regard to tuberculosis, insanity, crime and albinoism, furnish conclusive evidence that the older born, and particularly the first born, are on the average inferior physically, mentally, and morally, and that the later born are their decided superiors in these respects."

According to Size of Family.

A further and most interesting and important point is to be noted as to the fertility of professorial stocks. Grouping the professors in our statistics according to size of family, we find that twenty belong to families of one, and 128 belonged to families of ten. In the 148 families there were thus 1,300 children, the average size of the family being 8.8. This is a surprisingly high figure, and, of course, enormously greater than that of the general population. It furnishes convincing proof that "the families of the affected are larger, not smaller, than those of normals." The results are, in fact, so striking that we must really conclude that there is some connection between fertility and the tendency to professoritis. The exact nature of that connection and which is cause and which is effect, we are not yet able to say, but the fact of a connection is obvious. It is not impossible that by increasing the number of professorships we may be able to bring into operation a force that may effectively combat the tendency towards degeneration in the community resulting from race suicide, for with their large average families, the numbers of later born, and, therefore, superior individuals, would be greatly increased. These statistics, moreover, confirm the necessity of modifying seriously our conceptions of the Mendelian theory, as already pointed out in connection with our study of tuberculosis.

Positive and Convincing Proof Must be Given.

This is precisely the reasoning which is used as proof of the theories in connection with eugenics, which we have been discussing.

In conclusion, it will be noted that I do not claim that elder born children may not possibly be inferior, on the average, to later born of the same families. What I do say is, that we should not be asked to accept this theory, and the far-reaching conclusions based on it, without positive and convincing proof.

The statistics, such as those given by Dr. Rivers and Professor Pearson, in reality prove nothing.

If this theory be correct, it should be easy to establish that fact without relying on fallacies. Exclude from the statistics all families with less than, say, five children; exclude, also, all children that are too young to have been fully exposed to the risk under consideration; compare the later born with the earlier born of their own families only; make allowance for the fact that in cases where the risk is continuous, or partly continuous, during adult life, a man in middle or old age has had a longer time to develop the trouble than one just reaching manhood; carefully exclude all other sources of error; then give us the results, and we will judge of the truth or otherwise of the theory. It is quite possible that the offspring of immature parents may be less robust than others; but the assertion that the first child born to a couple who marry at age thirty is more likely to be a degenerate one than the same child would have been had his parents married ten years earlier and had several children before him, will require a lot of proof.

EXPORTS OF FLOUR AND GRAIN

Big Business from the Port of Montreal Last Year—No American Corn Was Shipped

The total exports of grain from Montreal, during the past season, showed an increase of more than 9,000,000 bushels compared with 1911. In the latter year, over 5,890,000 bushels of American corn were exported from Montreal, while last year not one bushel left that port. This was due to the short crop in the United States. The largest part of the business was in wheat. The total shipments were 30,971,057 bushels, as compared with 18,122,042 in the previous year, exhibiting an increase of 12,849,015 bushels.

Exports of Canadian oats amounted to 6,523,969 bushels, showing an increase of 740,926 bushels as compared with the figures of 1911, and the shipments of barley were also larger, being 1,214,934 bushels, as against 60,707 bushels a year ago, an increase of 1,154,227 bushels. The total exports of all grains for the season amounted to 38,918,264 bushels, as compared with 29,893,184 for the season 1911, showing an increase of 9,025,080 bushels.

The following table shows the exports of grain from the port of Montreal to foreign ports from May 1st to the close of navigation, **1912**:—

Ports.	Wheat, Bush.	Oats, Bush.	Barley, Bush.	Rye, Bush.	Flaxseed, Bush.	Total, 1912.	Total, 1911.

The total exports of the flour trade from Montreal last year amount to 1,827,431 sacks and 409,726 barrels, as compared with 2,217,365 sacks and 186,470 barrels for the season 1911, but the export trade in cereals was not as large as in 1911, as the shipments of meal were only 89,213 sacks and 55,212 cases, and rolled oats, 116,278 cases and 122,870 sacks, which all show a decrease as compared with the season of 1911.

The following table shows the exports of flour, oatmeal, and rolled oats from the port of Montreal to the different foreign markets for the season 1912, with comparisons:—

	1912.						1911.				
	Flour, Sacks.	Flour, Bbls.	Meal, Sacks.	Meal, Cases.	Rolled Oats, Cases.	Rolled Oats, Sacks.	Flour, Sacks.	Flour, Bbls.	Meal, Sacks.	Rolled Oats, Cases.	Rolled Oats, Sacks.

◆

CANADIAN GOLD MOVEMENT

Representatives of the Canadian banks with branches n New York think that a flow of gold to that centre from Canada is not a likely happening of the near future. There s not sufficient inducement in the shape of high call money o cause such a return movement. The Canadian banks are still finding more profitable use for their funds at home. Their charges for mercantile advances range from 6 to 7%, and will probably continue so well into the present year.

At the same time the gold movement did not arrive at his settled condition as early as is commonly supposed. Shortly after the beginning of December, New York recovered a portion of the gold which the Canadian banks had re-

SASKATOON UNDERWRITERS' PROPOSAL

How to obtain better protection for holders of life insurance policies was considered by the Saskatoon Underwriters' Association at their annual meeting. It was decided to request the provincial government to make it compulsory for insurance companies wishing to do business in Saskatchewan, to obtain a dominion charter before a provisional license is granted. Besides more adequately protecting policy holders, this would relieve the provincial government of the necessity of looking into the standing of such companies.

The following officers were elected:—President, W. Welch, Northern Life; 1st vice-president, W. J. Smith, Canada Life; 2nd vice-president, W. H. Becker, London Life; secretary-treasurer, C. Melville Pearson. The executive consists of these officers and Messrs. J. H. Colwill, George Un-

THE BANK OF TORONTO

Report of the Fifty-Seventh Annual General Meeting

The fifty-seventh Annual Meeting of the Stockholders of his Bank was held on 8th January, 1913, at the Head Office, n Wellington Street East, Toronto.

The Chair was taken by the President, Mr. Duncan oulson. Mr. Thomas F. How, the General Manager, acted s Secretary, and Messrs. George R. Hargraft and E. M. hadwick were appointed Scrutineers.

The Secretary then read the following Report:—

The Directors of the Bank of Toronto beg to present heir Report for the year ending 30th November, 1912, accomanied by a statement showing the condition of the Bank on hat date and the result of the operations for the year.

PROFIT AND LOSS ACCOUNT.

he Balance at credit of Profit and Loss, on 30th November, 1911, was	$ 52,019.99
he Net Profits for the year, after making full provision for all bad and doubtful debts, and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of	835,787.04
remium received on New Stock	391,950.00
	$1,279,757.03

This sum has been appropriated as follows:—

ividends at Eleven per cent.	$541,228.79	
onus, one per cent., making a total distribution of twelve per cent.	50,000.00	
		$ 591,228.79
ransferred to Officers' Pension Fund		20,000.00
ritten off Bank Premises		100,000.00
ransferred to Rest Account—Premium on New Stock		391,950.00
arried forward to next year		176,578.24
		$1,279,757.03

REST ACCOUNT.

alance November 30th, 1911	$5,608,050.00
remium on New Stock	391,950.00
Total per Balance Sheet	$6,000,000.00

verage amount of Paid-up Capital for the fiscal year	$4,926,906.00
ercentage of Net Profits to Average Paid-up Capital	16.96 per cent.

The business of the country continues to expand. Steadily creasing immigration, extension of railroad communication, rowth of towns and cities, opening up and development of ew territory, and increase in the number and capacity of anufacturing establishments have had the effect of stimulatg every branch of trade. The volume of imports and exorts has greatly increased, and the whole community has ared in the general prosperity thereby created.

The available resources of the Bank have been very fully mployed, and the demand for loans has been constant roughout the year.

The following new Branches have been opened during the ear, making the total number of offices now 116:—

Ontario—Cobalt, Norwood, Stratford.

Quebec—Atwater Avenue and St. Antoine Street, Montal.

Manitoba—Logan Avenue, Winnipeg.

Alberta—Oyen, Veteran, Youngstown.

Saskatchewan—Assiniboia, Colonsay, Gravelbourg, Lemerg, Mortlach, Odessa, Springside, Summerberry.

Payments on new stock issued last year have been comleted and the paid-up capital now amounts to $5,000,000. he premium on new stock paid in has been added to the est, and this fund now amounts to $6,000,000.

The new Head Office building of the Bank is approachg completion, and we hope early in the year to enter into ctive possession of a very dignified and commodious banking ouse.

The Bank Act, which has recently been introduced by the inister of Finance, provides for the appointment by the stockolders of each Bank of an auditor who must verify and sign e balance sheet to be presented by the Directors at the Annual Meeting. In anticipation of this proposal becoming an enactment, the stockholders will be asked to appoint an auditor or auditors to represent them in making this examination, and to give in a report at the next Annual Meeting.

The Directors have, with the deepest regret, to record the death of their former President, Mr. W. H. Beatty. For over thirty years he had been a member of this Board, and his great ability, wide experience, and thorough loyalty to the Bank's interests were freely devoted to its service. The vacancy thus caused has been filled by the election of Mr. J. L. Englehart, Chairman of the Temiskaming and Northern Ontario Railway Commission, and a large stockholder of the Bank.

The Head Office and Branches of the Bank have undergone the usual careful inspection. At the Head Office a Committee of the Board have, as usual, verified the Cash, Securities, and Loans at the Head Office, and have examined the returns received from all the Branches of the Bank and verified the figures contained in the balance sheet, which is herewith presented.

All of which is respectfully submitted.

D. COULSON,
President.

GENERAL STATEMENT,

30th November, 1912.

LIABILITIES.

Notes in Circulation		$ 5,474,917.00

			45,066,977.65
Bank Premises			1,970,352.71
			$59,226,548.85

THOS F. HOW,
General Manager

After the Report had been read, the President addressed the meeting as follows:—

Gentlemen:—Before moving the adoption of the Report which has just been read I desire to make a few remarks, enlarging to some extent upon the topics suggested in the Report.

General Conditions:—The year has been an eventful one, and here it has been characterized by great expansion and activity in general business, and by an unusual demand for money.

On the Continent matters have been unsettled and financial disturbance has been general. Germany has been under financial strain for more than a year past; Italy engaged in a war that has drawn heavily upon her resources; the war in the Balkans has wasted enormous sums of money, and the unrest created by the war and the jealousies existing between the Nations have produced great uneasiness and financial disturbances in Russia and Austria. In many of the Continental countries hoarding has been general, and large sums of money have been hidden away.

The trade of Great Britain has never before reached such volume. The number of unemployed there has never been so small, and the prosperity of the country has never been more marked.

In the United States there has been an improvement in conditions throughout the year, and a marked increase in development.

In Canada the returns from the Department of Trade and Commerce show a very large increase over any preceding year. The volume of imports and exports for the twelve months ending 31st October, 1912, amounts to very nearly one billion dollars, as compared with a total of $804,000,000 for the year ending 31st October, 1911.

These figures relate only to foreign trade, but there has been as great an increase in the domestic trade.

In manufactures the capital invested increased from $446,900,000 in 1900, to $1,247,583,000 in 1910, and the products of these factories increased from $481,00,000 to $1,165,975,000. The increase for the years 1911 and 1912 has been at even a higher ratio. Expansion of industrial enterprises has been everywhere manifest, and the addition to their capitalization has been large.

The Immigration Department estimates that the country has received this year an addition of 394,984 persons. These add to the prosperity of the community, in that they become producers as farmers and artisans, and in turn become customers of our merchants and manufacturers. They in many cases brought with them considerable sums of money and personal effects. The Department has assumed that for the year 1911-1912 the approximate value of cash and effects brought in by the 133,710 settlers from the United States amounted to over $201,012,000.

We know what the large addition to its population has done for the city of Toronto. To provide homes for the newcomers, schools, sidewalks, sewers, lighting, water, and street railway facilities, large sums of money have been expended, and the benefits accruing from the increase in numbers have extended in every direction.

When it is considered that what has taken place in Toronto is going on throughout the whole Dominion, and especially in the Western part of it, it is not to be wondered at that there has been rapid growth, increased expenditure on the part of Municipalities, and the need of large sums of money to provide for what is absolutely necessary.

Borrowings abroad have again been heavy, being estimated at over $180,000,000. This money has been obtained by our governments, municipalities, railroads, industrial establishments, land, and public utilities companies. Prosperity caused by the expenditure of money thus obtained is not always on a sound basis, and it is only to the extent that this money is being expended in enterprises that are stable and profitable that the country can hope to bear the heavy interest charge that is being laid upon it.

In consequence of the unsettled condition of affairs in Europe and the demands made upon loanable capital from every source, there is manifested an unwillingness and an inability to make loans at present. It is necessary that this situation should be carefully considered, and that prospective borrowers should proceed cautiously. Enterprises in this country are so large and development so rapid that there is not sufficient money in the country to continue to expand as it has been doing. We are, therefore, dependent on outside financial assistance, and if this is to be withheld for a time we must adapt ourselves to the changed conditions. The country has, however, been favored with good crops, we have a rapidly growing producing territory, our mines are yielding more largely than ever, our manufacturers are intelligent and quick to anticipate conditions, and we must, therefore, regard fundamental conditions as satisfactory, but the necessity for [illegible] imperative.

Loans.—While large sums of money have been obtained abroad by our railroad companies, municipalities, and large industrial corporations, and have been used by them in furthering their development, yet the Banks have been called upon to an unusual extent, and their loans to the public in Canada show an increase on the 30th November, 1912, of more than $100,000,000 over the corresponding period of last year.

The advances and bills discounted of this Bank show an increase for the year of over $4,700,000. These are all made in Canada, and the large increase shows that we have tried to meet the requirements of customers with their expanding trade. I may say that this has been specially true so far as the Western Provinces are concerned. Complaints are frequently made by those professing to represent the West that the Banks are not doing full justice in extending loans to that part of the country. It has been stated that deposits of the West have been used for the promotion of enterprises in the East. The reverse, we believe, is the case. It is certainly true of this Bank that the amount loaned west of Lake Superior is more than double the amount supplied by that part of the country, and we believe it will be found to be true of the Banks generally that they have used their Eastern resources very freely in aiding in the development of the newer Provinces.

Deposits.—I should, perhaps, comment on the fact that the total deposits appearing in the statement show but a moderate increase over last year. At the time of our last Annual Report we had several large deposits of a special character. These amounts have been withdrawn as expenditure in connection with the undertakings was incurred. These temporary deposits represent a large sum. Their place has, however, been taken by a steady and general increase in deposits at all of the branches of the Bank, especially those that are designated as Savings deposits, which show a very satisfactory growth.

Profits.—Owing to our resources having been steadily loaned throughout the year, profits show an increase, and your Directors decided to pay a bonus of one per cent. to the shareholders, in addition to the regular eleven per cent. dividend for the year.

Bad and Doubtful Debts.—The usual careful examination of all loans and investments has been made, and full provision has been made for everything regarded as doubtful. In times like the present, when there is great prosperity, the losses are usually much below the average, but for a term of years there is an average amount required to provide for contingencies. We have, however, as in former years, not only set aside sufficient to provide for what we at present regard as doubtful, but have also provided an amount equivalent to a reasonable average.

Branch Banks.—The number of our branches has been increased by 16, largely in the Western Provinces. We have now in all 116 branches. These new branches are not in all cases immediately profitable, but in a short time they become so, and they add to the Bank's ability to serve the public.

There has been an increase in the number of branches of Banks in Canada during the year ending 30th November of 230, the total number of banking offices in Canada now being 2,790.

I believe it is quite safe to assert that no country is so well served by its banking system as Canada. There is not a place of importance that is not, as a rule, overbanked. Even the smaller places have facilities furnished them to an unusual extent, and it must be taken as an evidence of the desire of the Banks to afford to the people of Canada the facilities at their disposal, and, in this way, further the interests of the country.

Bank Premises.—This account has increased during the year $705,689.96. This amount, however, has been expended in connection with 32 buildings. In each case the expenditure has been necessary and will prove profitable to the Bank. The new Head Office building is approaching completion, and we hope to occupy it within a short time. The expenditure upon it has necessarily been large, but not too great considering that it is to be the Head Office and the position the Bank occupies in the community. The present building was erected over fifty years ago, and was in those days the finest banking office in the city. Circumstances and the growth of the Bank required that a change should be made. The new building is generally regarded as a dignified one, and also an ornament to the city whose name the Bank bears. We believe that it will be the means of adding largely to the business and earning power of the institution

Audit.— In the Bank Act submitted to Parliament it is provided that the Stockholders of a Bank at its Annual Meeting must elect an Auditor or Auditors to verify the figures presented to the Stockholders in the Annual Statement The proposal made by the Minister of Finance is in accord with the practice in Great Britain, and has been found to be satisfactory there

Farmers' Loans.—Another feature in the proposed Bank ct relates to loans to farmers, and a clause has been added the Act permitting Banks to make advances to them on the curity of grain and cattle in their own possession, enabling pledge or an assignment to be taken as security.

It is but right that farmers should have privileges en- yed by others; but too much importance should not be at- ched to the benefits this clause of the Act may afford. Such lvances, even though accompanied by security under the Act, ust rest largely upon the responsibility of the individual bor- wer. The grain given as security remains in his custody, id therefore the personal element must be largely consider- l. At present advances are made to farmers without this curity, and as freely as they will probably be made with it, id considering the number of banking offices there are in the est, and the competition that exists between Banks, the ises should be few in which responsible farmers do not re- ive the accommodation to which they are entitled.

I have only to refer to the loss the Bank has sustained rough the death of Mr. Beatty. For the past two years had not been able, on account of ill health, to be much ith us, but during the years of his active service on the oard the Bank has never had a more loyal friend and ad- ser. He was most conscientious in discharging the duties his office, and, as you are all aware, he had marked ability id a wide knowledge of business.

It has been a source of great satisfaction to the Board that we had amongst our Stockholders, in the person of Mr. Englehart, one who will worthily fill the vacancy caused by Mr. Beatty's death.

I have now to say, gentlemen, that I will be very glad to answer any questions relating to the Report, and beg to move, seconded by the Vice-President, that it be received and adopted.

This motion was carried, and also a resolution expressing the hearty thanks of the Stockholders of the Bank to the President, Vice-Presidents, and Directors for their management of its affairs during the past year.

A motion was also passed appointing Mr. Geoffrey T. Clarkson as Auditor to represent the Stockholders of the Bank of Toronto, and to report to them (in accordance with such requirements as may be imposed upon Auditors by the Bank Act), upon the Statement to be presented by the Directors of the Bank at the next Annual General Meeting.

The following Directors were elected for the ensuing year:—William George Gooderham, Robert Reford, Charles Smith Hyman, William Stone, John Macdonald, Albert Edward Gooderham, Nicholas Bawlf, Duncan Coulson, Joseph Henderson, Frank Stephen Meighen, Jacob Lewis Englehart.

At a subsequent meeting of the new Board, Mr. Duncan Coulson was unanimously re-elected President; Mr. W. G. Gooderham, Vice-President, and Mr. Joseph Henderson, Second Vice-President.

PRINCE EDWARD ISLAND

he Smallest Canadian Province is Progressive and Shares the General Prosperity of the Dominion

Prince Edward Island was taken into the Confederation n July 1st, 1873, and is the smallest province of the Do- inion. Its area is 1,397,991 acres or 2,184.36 square miles.

From 1534 to 1798 it was known as Isle St. Jean, when e legislature changed the name to Prince Edward, after the uke of Kent. The population was then 9,676 and in 1822 it as 24,600. It grew to 62,678 in 1848, to 80,857 in 1861 and 94,021 in 1871. These were provincial enumerations.

The Dominion census gave it a population of 108,891 in 881, of 109,078 in 1891, of 103,259 in 1901, and of 93,728 in 911.

With a population of 9,531 less than in 1901 it has 14,369 arms, being an increase in the ten years of 355. The farm nd occupied is 1,202,347 acres, of which there is owned ,160,168 acres and leased or rented 42,179 acres.

The land in natural forest has an area of 316,409 acres, n field crops 477,698 acres, and in pasture 284,923 acres.

rchard and Nursery Products.

Small fruits have an area of 114 acres, vegetables of 1,171 cres, and orchards and nurseries of 4,350 acres.

The occupiers of farm holdings ten acres and under num- er 1,284, of 11 to 50 acres 3,849, of 51 to 100 acres 5,495, of 01 to 200 acres 3,227, and of 201 acres and over, 514. Occu- iers of less than one acre are 10 less than in 1901, but all thers have slightly larger holdings. The whole number of ccupiers increased during the ten years from 14,014 to 14,369.

There were 147,637 apple trees bearing and 58,342 non- earing in 1910 as compared with 115,091 and 82,009 in 1900, nd 160,124 bushels of fruit in the former and 159,421 bushels n the latter year.

Peach and pear trees bearing were 1,620 in 1910, and ,365 non-bearing, as compared with 693 bearing and 1,432 on-bearing in 1900. The yield in 1900 was 324 bushels and n 1910, 786 bushels.

Plum and cherry trees numbered 61,918 bearing and 35,- 93 non-bearing in 1900, with a yield of 22,103 bushels, and 9,199 bearing and 24,520 non-bearing in 1910, with a yield of 2,807 bushels.

airying and Agriculture.

The value of butter, cheese and condensed milk made at actories in 1910 was $561,756, against $567,802 in 1900. The alue of the products of all factories in 1910 was 3,136,470, gainst $2,326,708 in 1900, being an increase of 34.80 per cent.

The values of lands owned and of buildings, rents and mplements given in table viii. had in 1911 a total of $34,369,- 515, being an increase in ten years of $8,589,333; the values f live stock were $7,489,754, an increase of $2,610,774; and he values of field crops, vegetables and fruits $6,833,597, an ncrease of $2,052,646.

The values of live stock sold in 1911 were $1,514,607, being an increase of $836,390; and of dairy products sold $2,- 166,262, an increase of $1,054,648. Animals slaughtered on the farm in 1911 had a value of $850,625, an increase of $206,- 934.

Wool, eggs, honey and wax and maple sugar produced in the census year had a value of $593,334, being an increase in ten years of $260,116.

The number of weeks of hired labor on farms was 42,668 in 1910, with a value of $256,115, as compared with 93,795 weeks in 1900 with a value of $346,241.

The total areas of field crops in the Island was 478,366 acres in 1911 as compared with 477,698 acres in 1910 and 447,737 acres in 1900.

The highest average value per acre for grain crops is credited to beans, and for forage crops to sugar beets; but the highest values of crops of all kinds are credited to hay and clover, oats and potatoes, being $5,399,215 from 427,326 acres for those three crops in a total of $7,044,827 from 506,432 acres for all crops.

This is $12.63 per acre for hay and clover, oats and potatoes, as compared with $20.80 per acre for all other crops.

The increase in values of lands, crops and farm implements in the province is evidence of improved methods of farming.

Fox Ranching Grows.

A comparatively new industry has recently been developed on the island for which the climate proves to be well adapted, namely, the founding of ranches for propagating the black fox, an animal famous for the fine quality of its fur. The census has not yet taken account of this industry, but the men who have taken hold of it and the capital that has been invested in it will not allow it to be ignored. A sale of one ranch has recently been made for $600,000. The ranches are scattered all over the province and extend in area from a quarter of an acre to five acres.

◆

PROGRESS WITHOUT BONUSING

Hon. Charles Stewart, minister of municipal affairs for Alberta, stated in a recent interview that he was of the opinion that it would be in the interests of the cities of the West if they could come to a mutual understanding on the question of bonusing new industries. "The spirit of the West," he said, "is one of progress; and it is a very fine spirit, but there is just danger that in order to secure advantages at the present day we may place too big a mortgage on our future."

The principle of prohibiting towns and rural municipalities from giving bonuses to industries has been embodied in the towns' act and the rural municipalities' act of Alberta Hon. Mr. Stewart stated in the course of an interview that the bonus clause in both acts in Alberta had been received with a great deal of satisfaction. Indeed it seemed to be one of the most popular parts of the act. The act prohibits bonuses of money, free light or power and exemption from taxation.

Medicine Hat is the only city in Alberta offering a bonus to new industries, the town giving free natural gas. Possibly Medicine Hat would object to a no-bonus agreement among the various cities, but Mr. Stewart points out that a nominal charge for a natural utility which can be produced very cheaply would meet the requirements of the case.

THE ROYAL BANK OF CANADA

ANNUAL GENERAL MEETING

The Forty-Fourth Annual General Meeting of the Shareholders of the Royal Bank of Canada was held January 9th, in the Board Room at the Head Office of the Bank, 147 St. James Street, Montreal.

Among those present were:—

C. R. Hosmer,
E. F. B. Johnston,
N. B. Smith,
T. J. S. Skinner,
H. S. Holt,
C. S. Wilcox,
Stuart Strathy,
T. J. Drummond,
A. J. Brown,
W. J. Sheppard,
W. H. Thorne,
Fayette Brown,
A. Haig Sims,
E. L. Pease,
Dr. Alfred McDiarmid,
Hugh Paton,
F. J. Sherman,
G. F. Greenwood,
J. McK. Rea,
John Wood,
Wm. C. Ball,
C. E. Neill.

On motion of Mr. A. J. Brown, seconded by Mr. T. J. Drummond, the President, Mr. H. S. Holt, was requested to take the Chair.

Mr. C. E. Neill acted as Secretary of the meeting and Messrs. C. R. Hosmer and A. Haig Sims were appointed scrutineers.

The minutes of the last Annual General Meeting and Special General Meeting of July 3rd were taken as read and were confirmed. The Secretary was then called upon to read the annual report of the Directors, as follows:—

DIRECTORS' REPORT.

The Directors have pleasure in submitting to the shareholders the Forty-Third Annual Report covering a period of eleven months ending November 30, 1912, accompanied by the Statement of Assets and Liabilities.

PROFIT AND LOSS ACCOUNT.

Balance of Profit and Loss Account, December 30, 1911, brought forward	$ 401,480.56	
Net Profits for the Eleven Months ending 30th November, 1912, after deducting Charges of Management, Accrued Interest on Deposits, Full Provision for all Bad and Doubtful Debts, Rebate of Interest on Unmatured Bills and General Bonus granted to the Staff	1,527,324.77	
Premium on new Capital Stock	5,503,812.00	
		$ 7,432,617.33
Appropriated as follows:—		
Dividends Nos. 98, 99, 100 and 101	$ 943,585.97	
Transferred to Officers' Pension Fund	75,000.00	
Written Off Bank Premises Account	300,000.00	
Transferred to Reserve Fund	5,503,812.00	
Balance of Profit and Loss Account carried forward	610,219.36	
		$ 7,432,617.33

RESERVE FUND.

To balance carried forward, 30th November, 1912	$12,560,000.00
	$12,560,000.00
By Balance at Credit, 30th December, 1911	$ 7,056,188.00
Premium on new Capital Stock	5,503,812.00
	$12,560,000.00

The assets of the bank have recently been subjected to the usual careful re-valuation.

Your Directors have to record with deep regret the death of their late colleague, Mr. F. W. Thompson, who joined the Board on February 14th, 1906. Mr. Albert J. Brown, K.C., was elected to fill the vacancy on the Board.

In accordance with the authority granted by the Shareholders at the Special General Meeting held July 3rd, 1912, the authorized Capital Stock of the Bank has been increased, with the approval of the Treasury Board, from $10,000,000 to $25,000,000.

The Agreement to purchase the Assets of the Traders Bank of Canada, approved by the Shareholders on July 3rd last, was sanctioned by the Treasury Board in due course. After a thorough investigation, the business of the Bank was taken over on September 3rd, and your Directors are pleased to report that it has since proved entirely satisfactory.

In accordance with the By-Law enacted at the Meeting of the Shareholders held July 3rd, 1912, increasing the number of Directors to sixteen, the following were added to the Board:—

Mr. E. F. B. Johnston, K.C.,
Mr. W. J. Sheppard,
Mr. C. S. Wilcox,
Mr. A. E. Dyment.

The Board has also to report the purchase of the business of the Bank of British Honduras, Belize, B.H., on advantageous terms. This Bank had a capital of $100,000, surplus of $80,000 and deposits of approximately $400,000.

In addition to the one hundred branches acquired through the purchase of the Traders Bank of Canada (not including eleven closed at points where this Bank was already represented), and one branch in Belize through the acquisition of the Bank of British Honduras, offices have been opened during the year as follows:—

IN BRITISH COLUMBIA.

Princeton,
Sapperton (New Westminster),
Broadway East—Vancouver,
Kitsilano—Vancouver.

IN ALBERTA.

Blairmore,
Cardston,
Namayo Avenue—Edmonton,
Grouard,
Taber.

IN ONTARIO.

Brantford,
Pander,
Lambeth.

IN DOMINICAN REPUBLIC.

Santo Domingo,
San Pedro de Macoris.

IN SASKATCHEWAN.

Ardath,
Conquest,
Delisle,
Milden,
North Battleford,
Weyburn.

IN QUEBEC.

L'Epiphanie,
Papineau Avenue—Montreal
Van Horne Avenue—Montreal,
Rawdon (formerly open only certain days),
Snowdon Junction.

IN NEW BRUNSWICK.

Sussex

IN CUBA.

Monte Street—Havana.
Muralla Street—Havana.

The Head Office and Branches of the Bank have been inspected as usual during the year.

All of which is respectfully submitted.

H. S. HOLT, President.

PRESIDENT'S ADDRESS.

The adoption of the report was moved by the President, Mr. H. S. Holt, who spoke as follows:—

I beg to move the adoption of the report.

The statement presented to you to-day includes the assets of the Traders Bank of Canada, purchased in September last. Eliminating the figures of that bank, our deposits increased $10,145,093 during the 11 months, and commercial loans $6,467,285. Twenty-eight new branches were opened.

The new issue of capital stock offered to the shareholders in December, 1911, viz., $2,000,000, and the issue of $3,360,000 in September last to the shareholders of the Traders Bank of Canada as the purchase price of the assets of that bank, were both fully absorbed. The unallotted fractional shares were advertised for sale and disposed of in due course. At the present time, so far as we are aware, there is no floating supply of Royal Bank shares.

To effect the purchase of the Traders Bank of Canada, it was necessary to obtain the Government's approval of an increase in the authorized capital. In order to provide at the same time for possible future extensions, we applied, with your approval, for an increase from ten to twenty-five millions. The sanction of the Government was duly obtained.

The average paid up capital for the 11 months was $8,680,756 and net earnings were 19.19% per annum. The latter were not materially augmented by the operation of the business of the Traders Bank for the short period of three onths, especially in view of the heavy incidental expendi-re for new stationery, new bank notes, etc. Considering e large influx of new capital during the year, we are grati-d that we have been able to maintain our percentage of rnings. The increase in combined capital and reserve in e past twelve months amounted to $10,920,000, which ould show good results in the coming year.

I am pleased to say that the business of the Traders ink has proved to be of superior quality. The potential lue of the increased facilities of a hundred branches, ostly in the prosperous Province of Ontario, and the addi-on of 1,800 new shareholders cannot be over-estimated. he simultaneous inspection of this number of branches and e subsequent assimilation of the business imposed no light sk upon the executive of this bank. The whole machinery now running smoothly and efficiently, which is abundant oof of a good organization.

The bill to revise the Bank Act and extend the charters the banks, which was recently introduced in the House by e Minister of Finance, contains important amendments. hese are in the interests of both the general public and of e banks, and will meet with our hearty acceptance. If the oposed shareholders' audit does not accomplish all that its dvocates expect, it is sure to have a good moral influence the banks.

We have reason to congratulate ourselves on the con-nued prosperity of the country, which shows no sign of batement. The present outlook could hardly be better. At e same time, we should be cautious in our optimism. It ust not be forgotten that the most influential factor in our rogress is the investment of foreign capital, and that the terruption of this flow would have adverse results, especi-lly if anticipated. London's attitude towards Canadian of-erings of securities has been unfavorable for some months ast, which is no doubt primarily due to the Balkan War, hich has shaken confidence throughout Europe, and secondly the large borrowings of our municipalities. The financial onditions abroad are reflected here in the present money tringency. With peace concluded, the demand for new apital to repair the waste will be very great,—consequently he expectation is for firm rates for money for some time to ome.

GENERAL MANAGER'S REPORT.

In seconding the adoption of the report, the General Manager, Mr. Pease, said:—

The statements submitted to you to-day, showing the esult of our operations for eleven months past may be briefly ummarized as follows:—

We paid the usual dividend of 12 per cent.; transferred $75,000 to Officers' Pension Fund; reduced Bank Premises Account by $300,000; transferred to Reserve Fund $5,503,812, eing the premium received on new capital stock issued, and arried forward to the next year's account $610,219,—or $209,000 more than we brought forward in December last. We have in addition set aside $200,000 for rebate of interest on unmatured bills, which was necessitated by the fact that no such provision had been made by The Traders Bank of Canada. Of course this fund remains an asset of the bank.

Bank Premises, after writing off $300,000, are valued at $5,520,000. This amount includes the premises taken over from The Traders Bank of Canada at the very conservative valuation of $2,356,000. Negotiations to sell several of their buildings are now under way, which, when accomplished, will effect a very large reduction in the account.

Through the addition of 725 Traders Bank employees to the staff, large contributions to the Pension Fund by the shareholders are rendered indispensable for some time to come, in order to maintain it on a proper basis. You will therefore be asked to pass a resolution authorizing an annual contribution of $100,000 to the present fund out of profits for five years. With these contributions, supplemented by the present assessment of 3 per cent. on salaries, we hope to build up in five years a fund that will meet actuarial requirements. I am sure you will appreciate the great importance of treating the staff with liberality, and adequately rewarding them for the efficient services which they perform. I need not say that the success of the bank depends upon the loyalty and contentment of the staff, which now numbers 2,617.

Our liquid assets amount to $73,428,782, being 47.64 per cent. of our total liabilities to the public, and our total trade assets, excluding the valuation of bank premises, exceed our total liabilities to the public by the sum of $19,552,249.

CANADA.

According to the latest returns, the total field crops of Canada last year yielded approximately $610,000,000, being an increase of $45.000,000 over 1911. Gross railroad earnings increased over $26,000,000; bank clearings $1,752,000,000; bank note circulation $13,435,000; public deposits in chartered banks $87,282,000; post office Government savings bank and other savings bank deposits $2,417,000; commercial loans $102,767,000. Exports increased $18,121,000; imports $86,973,000; customs receipts $33,500,000. Immigration reached 354,237, an increase of 21,000—immigrants from Great Britain numbering 138,121, and from the United States 133,712.

In Mr. E. R. Wood's review of the Bond Market in Canada in 1912, the total Canadian bond issues are placed at $261,917,000, compared with $269,312,000 in 1911, of which Government issues represented $35,639,000; municipal $45,792,000, railway $69,639,000 and miscellaneous $110,846,000. Great Britain absorbed 77.53 per cent. of these issues, Canada 13.84 per cent. and United States 8.63 per cent.

In considering the amount of foreign capital invested in the country, we should include investments in mortgage loans. Records are not yet available for the past year, but at the close of the fiscal year 1911 there were over eighty registered companies doing a strictly mortgage loan business with aggregate loans of $248,164,260, being an increase of $16,018,690 over 1910. Besides these, numerous English and American insurance companies lend largely in Canada on mortgage.

The above figures denote splendid progress during the year. There is only one fundamental defect in the trade of the country, viz., the adverse balance of trade. I do not think we attach sufficient significance to this adverse balance, which has been growing steadily in the past five years. The excess of imports for the fiscal year ending March 31st, 1908, was $90,000,000; 1909, $48,000,000; 1910, $90,000,000; 1911, $175,000,000; and 1912 $243,000,000, the excess for the eight months ending November 30, 1912, being $200,000,000. Our exports to the United Kingdom have continuously exceeded our imports during the last ten years, the maximum being 72 millions and the minimum 27 millions, but the excess of imports from the United States has steadily increased from $49,000,000 in 1902 to $235,000,000 in 1911-12. The inward balance has grown in spite of the increase of $105,000,000 in our agricultural and other exports in that period.

It is remarkable that the value of the annual production of our factories is estimated to have increased from $480,000,000 in 1900 to approximately $1,462,000,000 in 1912. Practically all of this is marketed in Canada, and yet is short of the home demand, which explains the excess of imports. It is to be hoped that the shortage will be overtaken in the near future and that our manufacturers will have a surplus for export. Meanwhile the adverse balance is more than offset by the great wealth brought in by immigrants,—estimated last year at $160,000,000 in cash and in kind—and by the large amount of foreign capital annually coming into the country.

While the outlook in Canada is exceedingly bright, there are evidences on many sides that we are straining our prosperity. There is too much inflation. It would be the part of prudence to retrench in our expenditure until we have harvested another crop.

WEST INDIES.

Turning to our interests in the West Indies:

CUBA.

Cuba's imports for the fiscal year 1911-12 were $119,000,000 and exports $146,000,000. The sugar crop of 1911-12 amounted to 1,895,000 tons, the largest in the history of the island. One hundred and twenty million dollars may be considered a reasonable estimate of the value of this crop, and on this basis an increase of $43,000,000 is shown over the previous year, 1910-11. The crop just beginning will be a record one, with reasonably good weather. Estimates reach as high as 2,350,000 tons, or about 400,000 tons more than last year. Prices are now lower than in 1911-12, but this unfavorable feature may be partially offset by the expected greater extraction of sugar from the cane. Many mills have been enlarged and provided with technical improvements, and the cane area is being largely extended. It is interesting to note that the production of sugar in 1899, when we established our first branch in Cuba, was about 300,000 tons, against 1,900,000 tons last year.

The tobacco crop of 1911-12 is of average size, but the best in several years as regards quality. Its value is placed at $34,000,000. The new crop gives promise of being the largest in many years, and the condition of the industry was never so satisfactory as at present.

Satisfactory conditions prevail in the cattle business. Owing to a high protective tariff there have been no importations during the year. The natural increase is enough to provide for the local consumption, and satisfactory prices are being obtained.

The railway companies show substantial increases in earnings over the past year, and many securities listed on the stock exchange are twenty to thirty points higher than they were last year.

Business conditions generally are sound and the outlook is very hopeful. General Menocal's election to the presidency last fall ensures an honest and economical administra-

LEGAL NOTICE

THE A. MACDONALD COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 7th day of December, 1912, incorporating Harry Riley and William Robert Anderson, law clerks; John Fraser MacGregor and William Hamilton Walter, accountants; and Everett Bristol, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, namely:—(a) To carry on the business of wholesale and retail merchants and for that purpose to import, manufacture, buy, sell, produce and deal in all kinds of goods, wares and merchandise, including groceries, provisions, bread, flour, biscuits and farinaceous compounds, hardware, dry goods, leather goods, canned goods, farm, garden and dairy produce, spices, condiments, pickles, jams, jellies, preserves, table delicacies, fruits, sugars, syrups, meats, live stock and dead stock, products of the sea, lakes and rivers and other articles of commerce; (b) To construct, acquire, hold, let and sell elevators, storehouses, mills, factories, bakehouses, shops, buildings, machinery and appliances; (c) To manufacture and deal in cans, boxes, baskets, jars, cartons, containers, labels and all kinds of sundries and supplies for canners, manufacturers shippers and dealers; (d) To establish warehouses, stores, agencies, depots and other markets for carrying on the business of the company; (e) To acquire, maintain, operate and carry on warehouses, stores, cold storage warehouses, elevators, mills, factories and other plant and equipment; (f) To acquire by purchase, lease, hire, exchange or otherwise and hold real or personal property, water lots, water privileges and powers and rights and interests therein, and to build upon, develop, cultivate, farm, settle and otherwise improve and utilize the same; (g) To construct, acquire, own, manage, charter, operate, hire and lease all kinds of steam and sailing vessels, boats, tugs and barges and other vessels, wharves, docks, elevators, warehouses, freight sheds and other buildings necessary or convenient for the purposes of the company; (h) To acquire by purchase, lease, hire, exchange or otherwise any rights or privileges which may be necessary or useful for the carrying on of the business of the company; (i) To construct or acquire by lease, purchase or otherwise and to operate works for the production, sale and disposal of steam, electric, pneumatic, hydraulic and other power or force, and to produce, create, develop, acquire by lease or otherwise, and to control and generally deal in and use, sell, lease, or otherwise dispose of such steam, electric, pneumatic, hydraulic and other power for any uses and purposes to which the same are adapted, provided always that the rights, privileges and powers hereby conferred upon the company in this paragraph in acquiring, using and disposing of electricity, when exercised outside the property of the company, shall be subject to all the laws and regulations of the provincial and municipal authorities in that behalf; (j) To apply for and maintain, register, lease, acquire and hold or to sell, lease and dispose of and grant licenses in respect of or otherwise turn to account any patents of invention, improvements or processes, trade marks, trade names and the like necessary or useful for any of the purposes of the company; (k) To lease, sell, improve, manufacture, develop, exchange, turn to account or otherwise dispose of any or all of the properties and assets of the company for such consideration as the company deems fit, including shares, debentures or securities of any other company; (l) To enter into any arrangement for sharing of profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on any business or transaction which the company is authorized to engage in or carry on, or to amalgamate with any such company; (m) To acquire by purchase, concession, exchange or other legal title the good-will, property, rights and assets and assume the liabilities of any person, firm or company transacting any business similar to that conducted by this company, together with the buildings, stock-in-trade and assets generally with such business, and to purchase, acquire and hold the stock or shares of stock in any other corporation carrying on business similar to that which this company is hereby authorized to carry on, or any business similar thereto, notwithstanding the provisions of section 44 of The Companies Act, and to pay for the same wholly or in part in bonds, debentures or other securities or fully or partly paid shares of the company, and to sell, lease or otherwise dispose of the same or any part thereof; (n) To acquire the stock, bonds or debentures of any railroad, elevator or transportation company carrying on business within the Dominion of Canada, notwithstanding the provisions of the said section 44, and to purchase, build or construct any elevator, railroad siding or branch line of railroad on lands owned or controlled by the company which may be necessary or convenient for the business of the company; (o) To issue paid-up shares, debenture stock, debentures, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be acquired by or for any services rendered to or work done for the company, or in or towards the payment or satisfaction of debts or liabilities owing by the company, or for raising money for any other purpose of the company; (p) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any other company or corporation and to guarantee the performance of contracts by any such company or corporation, or by any other person or persons with whom the company may have business relations; (q) To invest the moneys of the company not immediately required in such manner as may from time to time be determined; (r) To distribute among the shareholders of the company in specie and property of the company and in particular any shares, debentures or securities in any other companies belonging to the company, or which the company may have power to dispose of, but so that no distribution amounting to a reduction of capital be made except with the sanction, if any, for the time being required by law; (s) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (t) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such person; (u) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, warehouse receipts, bills of lading, warrants and other negotiable or transferable instruments; (v) To sell or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, and to sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (w) To do all or any of the above things as principals, agents, bailees, contractors, trustees or otherwise and either alone or in conjunction with others, and to do all such other things as are incidental or conducive to the attainment of the above objects; (x) The powers in each paragraph are to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The A. Macdonald Company, Limited," with a capital stock of seven million dollars, divided into 70,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Winnipeg, in the Province of Manitoba.

Dated at the office of the Secretary of State of Canada, this 11th day of December, 1912.

THOMAS MULVEY,
Under-Secretary of State.

THE ROYAL BANK OF CANADA

Annual General Meeting

(Continued from Page 165.)

tion. He is an experienced business man of high character and enjoys great popularity.

PORTO RICO.

Porto Rico produced a crop of 371,000 tons of sugar last year, about 21,000 tons more than the previous year. The prosperity of this island, which had been continuous since the American occupation, suffered a reaction during the past twelve months, caused by the lower sugar tariff agitation in the United States, and land values, which had reached excessive figures, as we mentioned last year, have severely declined. Pending definite action by Congress regarding the tariff, the sugar industry in the island will probably remain in a depressed condition. A moderate reduction would not seriously affect the industry. It would diminish profits, but these have been excessive under the present free tariff which was the cause of the inflation of land values. It is inconceivable that the United States, with a consumption of sugar last year of $400,000,000, would do anything to imperil the industry in Porto Rico, her own colony.

A contributory cause to the present setback was the outbreak of the bubonic plague, which, however, has been controlled. Fortunately the coffee and fruit crops last year were unusually large, with good prices, and this has helped out the situation. Our business in the island, I am pleased to say, is on a sound basis. No losses have been made and none are anticipated.

BANK OF BRITISH HONDURAS.

As mentioned in the Directors' report, we have purchased the assets of the Bank of British Honduras, Belize. This Bank was established in 1902. While a small institution, it was very successful, dividends latterly having been paid at the rate of 20% per annum on its capital of $100,000. There is no other bank in the colony.

BRITISH WEST INDIES.

The business of our branches in the British West Indies where we are represented—Jamaica, Bahamas, Barbados and Trinidad—continues to be quite satisfactory. The crops in these islands suffered more or less last year from drought. Otherwise general conditions are not much changed. The oil industry in Trinidad is developing slowly but satisfactorily. The reported damage in Jamaica from the hurricanes in November last was greatly exaggerated. The trade of this island is steadily increasing, as indicated by the growth of over £1,000,000 in exports in ten years, and £1,143,000 in imports.

MR. E. F. B. JOHNSTON.

Mr. E. F. B. Johnston, K.C., made the following remarks:

Mr. President: It is with feelings of great satisfaction that the Ontario members of your Board have listened to the remarks of yourself and Mr. Pease, Vice-President and General Manager. As one of the Ontario members I desire on my own behalf, as well as on behalf of my co-directors, to say to you that the result of six months careful study of the affairs of the Royal Bank and its management have impressed us with confidence in its progressive and conservative management. Our connection with the Traders Bank, of which, as you are aware, we were three of the Directors, afforded us a fairly correct estimate of the practical requirements of a bank, as well as giving us some knowledge of the wants of the public. We kept before us the fact that we were the trusted agents of our fellow-shareholders. To the great body of depositors who entrusted their funds to those in control of the bank's affairs, we felt a still graver obligation For them, especially we were trustees, and we were fully aware that by both shareholders and depositors a very great confidence was reposed in us. We proceeded cautiously. The result was a unanimous approval of our negotiations and final arrangement with the Royal Bank. Our people had before them the full details of the proposition. They had the unqualified recommendation by us, as their directors, that the union would inure to the benefit of both banks, and to-day, as a result, I believe we have one of the strongest and most progressive banks in this country.

I mention these preliminary matters because it is well to understand the fundamental principles which govern the situation as regards the bank and the public, and to consider the moving causes which led up to the amalgamation.

And let me point out that what I have to say to you is not based on the technical or professional knowledge or the [illegible] of a banker. As those who watch the game often see and hear more than the players do, so it may be that an outsider and a layman may be able to put things after his own fashion and thereby give to you and the public some ideas which may be useful and more or less instructive. I want to put on record some reasons why we approved of the amalgamation, and why I think it is a matter of great advantage to the community as well as to the banks immediately concerned.

First.—It is fundamental that the continuous control of money is the greatest necessity in banking business. If a bank is able to meet all the reasonable requirements of the public who deal with it, it is serving one of the great objects of the banking system. It can only do so by being ready at all times to meet the proper demands made on its resources. Whether it be the borrowing customers or the depositors, their wants must be attended to. Failure in either case means loss of business on the one hand, or want of confidence and perhaps disaster on the other. The withdrawal of deposits means scarcity of funds for legitimate borrowers, and therefore, both progress and stability are endangered. Strength and solidity in a bank increase the supply of money, and the public are in consequence better served. That this has been the case in the present instance is undeniable. Our deposits have increased, and the united bank is every day growing in strength and usefulness. The old Traders Bank depositors have continued and increased. There has not been a withdrawal, except in one or two cases, where the ordinary current of business would have shown the same result if the union had not taken place. This shows that this source of supply was not affected, except for the better. It shows also that our depositors, as well as our shareholders, approved of and confirmed the act of amalgamation, and enabled us to continue and increase our usefulness as a public financial institution.

Another feature we looked for was economy in management. The present relative cost is and will continue to be less than the aggregate cost of maintaining two separate corporations. We have even at this early day realized on properties rendered unnecessary by reason of the change, and which has resulted in handsome profits, and in the near future, a still greater saving will be effected in this direction. In course of time, a saving in the multiplicity of officials can be accomplished, or the work can be eventually done for less money as the older and higher paid members of the executive staff retire on allowance, and other arrangements are made for the performance of the duties. Cost of advertising, always a very serious item, will be substantially lessened by reason of there being one bank advertising instead of two, and other elements of expense can be moderated without any disadvantage or loss. The opening of new branches, where one will serve all the purposes of two, means a great saving, as all new branches must necessarily involve considerable loss for a few years. This means a very large sum in the case of an expanding and progressive bank, and is much more than most people imagine. A bank cannot stand still. The moment it does in a growing country like Canada where new demands for money are being daily created, it begins to lose its foothold and other financial institutions forge ahead and capture the business and its connections. It is, therefore, necessary to keep advancing, even if the outlay is great. We have only to look at our great West, to say nothing of the progress being made in the older Provinces, to feel that hundreds of thousands of dollars must be spent in opening new branches before much return can be had, in order that a bank may be able to hold its own and increase its business so as to keep step with the onward march of commercial and industrial development.

Stability is another feature of the gravest importance, and this we considered very material in our negotiations. As an outsider this element appealed to my mind with convincing force. A large institution, well managed, controlling great resources, having the confidence of the public, and able to meet all the demands made on it for the purposes of its customers, must be stronger and better able to weather a commercial storm than an institution not so favorably situated. The barometer of a bank is a peculiarly sensitive article. There is sometimes difficulty in accounting for the sudden rise and fall of the financial mercury. Difficult situations and stringent periods must be constantly provided against by cash reserves, liquid assets, or other available means of meeting any sudden or unforeseen demand. Certainty with the public is everything. "As safe as the Bank of England" is a common comparison, and it shows the attitude of the public mind on questions of stability when money is concerned. Absolute security is what is meant, and fortunately our Canadian banks generally are in a position to warrant the application of the saying to themselves. With large resources and assets available at a moment's notice, our own Bank may safely lay claim to a high degree of stability which should be most gratifying to the former shareholders of the Traders Bank as well as to the public. Our former shareholders and depositors feel a confidence in the larger institution, which, with a smaller and less resourceful bank, could not be expected to exist to the same extent. Personally, I look upon public confidence founded on the stability of any institution as the greatest feature in the mind of the people who desire to know that when they leave their money in the Savings Bank over night, they are sure to find it safe and certain in the morning. And whatever on good grounds increases this feeling of security is in the interest of general public credit, as well as for the benefit of the individual interested.

The interest of the shareholder is another matter we had to consider. He invests his money in bank stock, and ought to have a reasonable prospect that his shares are of continuing value, and will bring him fair dividends. This condition cannot safely be created, except by means of a strong financial body with plenty of readily available assets, a proper earning power, and a large surplus fund to meet any possible contingency. The forcing of a few hundred shares of any ordinary banking or other institution on the market may materially decrease values and cause complications. It is only when a corporation is fortified by ready resources and backed by public confidence that such sudden movements are not dangerous. It would be idle to argue that under former conditions the market value of Traders Bank shares could be maintained against adverse circumstances in the same way as the shares in the present amalgamation. Bank stocks have, like all others, their rise and fall, but the fall, even when it reaches its limit by force of general financial conditions, does not carry with it permanent or critical results, if the Bank's foundation is solid. We feel that, notwithstanding all our faith and pride in the Traders Bank, we are now better prepared to face a general commercial crisis than we would have been in the smaller institution. The shareholders' interest is one of great importance, and as his means are practically the foundation of the whole structure, his judgment as to what is best in his interest should be entitled to weight, more, at any rate, than the opinion of those who run no risk, except the risk of refusal by a bank to discount an uncertain security.

Having made these few observations from an outside point of view, and having indicated briefly some of the reasons why we came over to the Royal Bank, I shall trouble you with a few facts showing that in the practical result of the union of the two banks, the statements I have made are verified, and the general conditions underlying safe and successful banking have been accentuated.

Let us see how the public are affected by the union. The Traders Bank had one of the best connections in the Province of Ontario, but had no agency east of Montreal. We also had a number of well-located branches in the West as far as Vancouver. The Royal Bank had extensive facilities in that part of Canada east of Montreal, but owing to lateness in entering the field was not strong in Ontario branches. The time for union was, therefore, opportune. We gave you Ontario, with all its resources—manufacturing, agricultural and industrial. You gave us the benefits of Quebec, New Brunswick, Nova Scotia and the seaboard, where we did not have a single office. Your British Columbia connection was of great value. You also gave us the West India business, and well-established offices in New York and London. The necessities of each Bank were met by the resources of the other. There was practically no duplication. To have opened sufficient agencies in Ontario to meet the demands of the public on your Bank would have cost you a very large sum of money, and if we had extended our business eastward and opened offices in London and New York, which the exigencies of our business were forcing on us, we would have been compelled to spend hundreds of thousands of dollars. I say "exigencies," because we had under the then existing conditions to go on or recede. It was not a case of resting on our oars. We had reached that point when in order to keep our business, it became necessary to increase the facilities for doing it. The surplus profits would have been absorbed for some years in endeavoring to carry on the necessary work of expansion. Our dividend rate could not have been increased for some years, nor could we have added yearly to our reserve as much as our shareholders were fairly entitled to in order that they might be benefited by the consequent increased value of their stock. We were already a strong, active, healthy bank, but by reason of this very fact, we had to advance and enter fields new to us in order to increase our existing business and make it certain and permanent. All the money representing the cost would necessarily have to be withdrawn from public use. The expense of running the offices for three or four years would have to be taken from funds which might otherwise have gone in the way of loans to customers, and thereby increase our profits. The Royal Bank would have required many years and great expenditure to reach the stage of that banking and public advantage which we give you in Ontario and parts of the West by a fair exchange through a common sense arrangement. The public will reap and is reaping the benefit. Banking facilities are increased. Expenses of carrying on the united business are less than the aggregate cost of two separate banks. At least from two to three million dollars will be added in the next few years to funds available for commercial purposes by the disposal of large and valuable properties not now required. And I will show you that competition has not been lessened, nor has a single customer suffered.

As to competition, I may state that out of the combined agencies, amounting to 320, there were only sixteen places where both banks did business. This is another example of the exact fitting in of the functions and conditions of each institution. In at least four out of these sixteen branches, the chief business of the Traders Bank was receiving deposits. This leaves only twelve in which there could be any semblance of competition. And in this connection let me say that not a single former customer has been refused accommodation, and not a new applicant for credit has been turned away where the security offered has been deemed satisfactory. In four places out of the twelve, agencies of other banks were opened before we had closed our arrangements with the Royal Bank. This leaves only eight branches by the closing of which the public could possibly be affected, and in all of these the Royal Bank continues to do business. In these eight places, which represent the largest cities in Canada, such as Montreal, Toronto, Ottawa, Winnipeg, Vancouver, etc., there are large agencies of all the old leading banks, and many of the younger banks as well. The banking facilities in these eight cities are undoubtedly ample. In the remaining 312 points, where we have agencies, the situation remains absolutely as it was before the amalgamation.

I am glad to say that the Traders Bank staff was taken over in a body and given substantial advantages in the way of pensions, etc., which did not exist in connection with the Traders' Bank.

In every way the amalgamation will be found to be most beneficial, and, speaking from a personal knowledge of the circumstances, I have no hesitation in stating to this meeting that the Royal Bank has gained by the acquisition of the Traders Bank, and the shareholders, customers and depositors of the Traders Bank have greatly advanced their own interest, and the country is, and will be, better served and provided with greater banking facilities than if the two banks had continued separate from each other.

MR. STUART STRATHY.

Mr. Stuart Strathy, late General Manager of the Traders Bank of Canada, spoke as follows:—

The Shareholders of the Royal Bank of Canada are to be congratulated upon the organization which took over so successfully the business of the Traders Bank of Canada. The transfer was made without the slightest disturbance to the business of either bank.

The report was then unanimously adopted.

On motion of Mr. H. S. Holt, seconded by Mr. E. F. B. Johnston, K.C., the by-laws of the Bank, with amendments, were re-enacted.

On motion of Mr. A. J. Brown, seconded by Mr. W. J. Sheppard, an annual contribution to the Officers' Pension Fund was authorized

The usual resolutions expressing the thanks of the Shareholders to the President, Vice-President and Directors and to the General Manager and Staff, were unanimously carried. The President and General Manager replied.

The ballot for the election of Directors was then proceeded with and the scrutineers reported the following elected Directors for the ensuing year: H. S. Holt, E. L. Pease, E. F. B. Johnston, Wiley Smith, Hon. D. Mackeen, Jas. Redmond, G. R. Crowe, D. K. Elliott, W. H. Thorne, Hugh Paton, T. J. Drummond, Wm. Robertson, A. J. Brown, W. J. Sheppard, C. S. Wilcox, A. E. Dyment.

At a subsequent meeting of the Board of Directors, Mr. H. S. Holt was unanimously re-elected President, Mr. E. L. Pease, Vice-President, and Mr. E. F. B. Johnston, K.C., second Vice-President, for the ensuing year.

GRAND TRUNK IS CENTRAL TOPIC

Before Charles M. Hays came into the service of the Grand Trunk Railway, that company was the "easy mark" of its rivals and connections on both sides of the line, says the Providence Evening Bulletin. On the one hand, the Canadian Pacific, aided by powerful politicians, made the Grand Trunk a mere switching yard. On the Vermont side of the line, country politicians legislated it out of opportunity even to collect its just credits, due for car mileage balances. Timidity and indecision marked its policies. Mr. Hays changed all that; but the question is now, Is the change permanent?

The ballot for the election of Directors was then pro-Grand Trunk Railway in New Hampshire is sending out a letter to the associates and directors of Southern New England Railroad Corporation and to the organizations and individuals whose support of the Grand Trunk may have been induced by my assurances of its good faith, in which he purports to show how he, President Fitzhugh and others were tricked in abandonment of Grand Trunk project. Judge Remick is caustic in his expressions and suggests legislation to secure control of Boston and Maine Railroad."

DEBENTURES FOR SALE

DEBENTURE TENDERS

TOWN OF KAMSACK

Sealed tenders will be received by the undersigned up to January fifteenth, 1913, for the purchase of:—

(a) $2,000.00 Hospital Grant debenture bearing interest at the rate of 5½%, repayable in five equal annual instalments of principal and interest of $468.35 and payable at the Canadian Bank of Commerce, Kamsack, Sask.

(b) $5,000.00 Road improvement debenture bearing interest at the rate of 5½%, repayable in fifteen equal annual instalments of principal and interest of $498.13 and payable at the Canadian Bank of Commerce, Kamsack, Sask.

(c) $20,000.00 Town Hall debenture, bearing interest at the rate of 5½%, repayable in twenty equal annual instalments of principal and interest of $1,673.60 and payable at the Canadian Bank of Commerce, Kamsack, Sask.

Debentures to bear interest from date of issue of coupons.

Tenders will be opened at eight o'clock on the evening of the 15th January, 1913.

The highest or any tender not necessarily accepted .

A. A. CRAWFORD,
Secretary-Treasurer.

Kamsack, Sask.,
6th December, 1912.

CITY OF LADYSMITH, B.C.

Sealed tenders will be received by the undersigned till 6 p.m. January 27th, 1913, for $7,750 (seven thousand, seven hundred and fifty dollars) 6% (six per cent.) 15 (fifteen) year local improvement debentures of the city of Ladysmith, B.C.

N. A. MORRISON,
City Clerk.

January 1st, 1913.

TENDERS FOR DEBENTURES

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m. January the 25th, 1913, for the purchase of $50,000 debentures, repayable in forty equal annual instalments, with interest at 5 per cent.

This issue is for the purpose of purchasing site and erecting thereon a four-room school.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,
Secretary-Treasurer.

The St. Agnes Roman Catholic
Separate School District No. 22, Moose Jaw, Sask.
December 21st, 1912.

TOWN OF MINNEDOSA, MANITOBA

TENDERS FOR DEBENTURES

Tenders are invited for the purchase of the following debentures:—

1. $10,000 five per cent. General Debentures, repayable as to principal on March 1st, 1941, interest payable annually on March 1st, Sinking Fund.
2. $16,500 five per cent. Local Improvement Debentures, repayable in 20 equal consecutive annual payments of $1,324.00 each comprising principal and interest on March 1st each year. First payment March 1st, 1914, computed from March 1st, 1913.

Tenders must be given for each parcel. Successful tenderer to pay at par in Minnedosa. Tenders to be received by undersigned not later than January 31st, 1913.

G. T. TURLEY,
Town Clerk, Minnedosa, Man.

FORTY-FIVE YEARS' INVESTMENT IN INSURANCE COMPARED WITH THE SAVINGS BANK

An interesting example of an investment made in life insurance in 1867, with an United States Company, by the late Frank Goodwin, of Portsmouth, N.H., on a policy issued to him for $5,000, recently became a claim by the death of the insured. This policy required an annual premium of $214.10. The contract called for the payment of this sum each year for ten years; when all premiums should cease and the policy become paid up and payable at his death. The insured paid each year's premium in cash, thus allowing all dividends to accumulate, and after he had ceased to pay any more premiums he continued to allow the dividends to accumulate, until at the time of his death they had reached the sum of $3,582, making the value of his policy as a claim $8,582. The total amount paid to the company was only $2,141, ten annual premiums, showing the company to have paid to the beneficiary $4 for every $1 paid to the company. The following is a history of the policy:

Issued August 31, 1867, $5,000. Life, 10-premium plan, annual premium, $214.10.

Original insurance	$5,000
Dividends additions declared on policy	3,582
Amount of claim paid by company	$8,582
10 annual premiums paid to company	2,141
Return over cost realized by the heirs	$6,441

If Mr. Goodwin, when he took this policy, had elected to place a sum equal to his annual premium each year for 10 years in a savings bank at 3½ per cent. compound interest and let it remain there until his death his estate would have

received the sum of	$8,666.02
The insurance company paid to his estate	8,582.00
Difference in favor of the bank	$ 84.02

But although the bank would have paid to his estate $84.02 more than the insurance company, he would not have had the 45 years of insurance protection for $5,000 in 1867 to $8,582 in [illegible] that the insurance company gave.

WASTE OF NATURAL GAS

Much has been written about the saving effected by using natural gas in gas engines to generate power, instead of burning the gas under boilers to generate power from steam. Experiment has shown that the amount of gas required per hour, for the development of one horse-power, varies from 9 cubic feet, with the highest type of large internal combustion engine, to 130 cubic feet with the ordinary steam engine. In other words, the efficiency of the gas is over fourteen times as great when used in gas-engines as when used for generating steam under boilers.

It has also been suggested, in other countries, that provisions be made for preventing the use of natural gas for such purposes as lime and brick burning, etc., in order to conserve this ideal and economic fuel for domestic and other less wasteful industrial purposes, for which, owing to its nature, it is especially useful.

We, in Canada, need not at present consider the above refinements in the use of natural gas. Natural gas rights in the provinces of Alberta, Saskatchewan, Manitoba and North-West Territories are disposed of under Dominion laws. These laws make no provision for preventing the waste of natural gas, and the consequence is that considerable waste occurs.

The importance of natural gas in Alberta may be realized when it is considered that a company is now piping natural gas from Bow Island to Calgary a distance of 175 miles. In addition to supplying Calgary, the company has branch lines to Lethbridge, MacLeod, Granum, Nanton, Claresholm, Brooks and Okotoks.

The province of Ontario has reduced the waste of natural gas to a minimum by causing all abandoned wells to be plugged and by levying a tax of two cents per thousand feet, with a rebate of 90 per cent. when the gas is used.

◆

Brigden, Ont., board of trade officers and committee for 1913, are as follows:—President, Mr. J. C. Massie; first vice-president, Mr. John Hayne; second vice-president, Dr. M. Galbraith; secretary-treasurer, Mr. W. J. Brownlee; council, Messrs. D. McDonald, John Wheeler, T. E. Poland, F. McLean, W. J. Grey.

WINNIPEG'S FIRE REPORT

Six hundred and ninety calls out of a total number of 1,451 received by Winnipeg's fire department during 1912 were either false alarms or else small chimney fires. The false alarm cannot be guarded against to any great degree, and is one of the greatest evils against which the department has to contend. The fire department cannot ignore a call. There were outside of chimney fires, 761 fires, or roughly two fires a day; being 121 more than last year. The total number of alarms for 1912 were 226 more than the previous year.

The list of casualties is slightly heavier than in previous years, there having been two firemen killed and six injured. The most serious fire of the year was the Radford-Wright fire, at which conflagration the two fire lads were killed as well as several private citizens. Other serious fires were the Hobbs and Company, the Blackwood Brewery and the Imperial Oil Company's plant.

The equipment has made great advancement and there are three more fire halls this year than previously. There are now thirteen fire halls. The department consists of 180 men. This force consists of one chief, two assistants, one master mechanic, one motor mechanic, one secretary, one clerk, 13 captains, 14 lieutenants, six engineers, and six assistant engineers, and 132 firemen. The purchase of a motor car for the assistant chief is a move that has been much appreciated and which at the same time is helping to do away with the romance of the department, a romance made thrilling to the eye, by the prancing of horses.

There are six chemical fire engines, 15 horse-drawn waggons, three motor wagons, seven steam fire engines, three aerial ladder trucks, seven hook-and-ladder outfits, etc., 90 horses and 60 underground fire tanks, 1,693 hydrants, and 55,000 feet of fire hose. There are 291 fire alarm boxes.

◆

There is talk of double tracking the Temiskaming and Northern Ontario Railway.

MARITIME TRUST CORPORATION

A new financial company known as the Maritime Trust Corporation has commenced business at Halifax. The initial capital of the company is $150,000. Mr. Blake G. Burrill, who is well known in Nova Scotia, is the manager of the new company.

The policy of the company will be directed to the carrying on of a trust business, acting in the capacity of administrators and executors, trustees, agents for estates, etc.

The directors are:—Hon. G. E. Faulkner, Messrs. C. J. Burchell, Thomas Notting, E. J. Murphy, E. K. Spinney, Augustus Cann, Jacob Bingay, J. H. Winfield, Bowman B. Law, and W. H. Brookfield.

The headquarters of the Maritime Trust Corporation will be at the corner of Hollis and Salter Streets, Halifax. The investments to be dealt in will be carefully approved securities; real estate will be handled, rents collected, and all the functions of a trust company will be performed.

Hon. George E. Faulkner, Messrs. Charles J. Burchell, Edward J. Murphy, and Augustus Cann are the president and vice-presidents, and Mr. Blake G. Burrill is manager. Mr. Burrill began in the investment business twelve years ago. From 1905 to 1908 he was with the Royal Securities Corporation and since then he has been engaged in the development of water power at Yarmouth, giving to that town its light, power and tramway enterprise.

The Maritime Trust Corporation will soon occupy its permanent office, and in the meantime has temporary quarters at 173 Hollis Street, Halifax. The corporation will also open a branch at Yarmouth.

◆

The head office of the Alberta Land Company, Limited, has been changed from Ottawa to Calgary, and the 15,000 shares of the capital stock of the par value of $100 have been sub-divided into 300,000 shares of $5 each.

IN BOND SPHERES

First New Year's Issue in London—Cedar Rapids Financing—Municipal Bonds

The expected January rush of new capital issues has begun. The British Columbia Electric Railway is offering in London £750,000 four and a half per cent. debentures at 98 for extension purposes.

At a meeting of the shareholders of the Cedar Rapids Manufacturing Company, a resolution to retire such of the $10,000,000 authorized bonds as were issued originally was passed. This was followed by a resolution to replace that issue with an issue of $15,000,000 forty-year 5 per cent. first mortgage gold bonds, to be issued from time to time as required for the development of the property. Both resolutions were carried unanimously. A plan which will provide for a bond and stock issue, with Montreal Power and Shawinigan shareholders having the right to subscribe, may be adopted.

Grain Growers' Bonds.

In order that better provision may be made for the handling of farmers' grain in Alberta, the provincial government will guarantee the bonds of the Grain Growers' Grain Company, whose headquarters are in Winnipeg, to the extent of at least $1,000,000. The company in return will build sixty elevators in the province during the year, and will be in condition to handle a large proportion of the crop of this year. At present the company is doing a large business in Manitoba.

The Royal Bank of Canada is one of the two bidders for the Government of San Domingo's bond-secured loan of $1,500,000 gold, issued under the sanction of the United States Government. The only other bidder, so far, is the National Bank of San Domingo. The opening of the tenders has been postponed from January 1 until January 10.

Point Grey's Finances.

An approximate financial statement has been prepared by Comptroller Floyd, of receipts and expenditures of Point Grey municipality, B.C., during the past year. It shows the total receipts of the period to be $1,279,027.04. Expended on roads was $544,000.87, and on sidewalks $24,929.07. General expenditures amounted to $146,610.83. $113,184.72 was applied to interest on loans, bank commission and to sinking funds.

The largest items under receipts were the amount received from treasury certificates, $809,374.50, $159,092.66 from 1911 roads loan debentures, $127,532.53 from general and school taxes, and $114,882.97 from special taxes. Other sums received were $20,300.62 from tax arrears, $10,000 as government grant for the Marine drive. Money received from miscellaneous sources raised the sum total to considerably over one million and a quarter.

Five bids were received for the $231,400 debentures of London, Ontario. As previously noted, the award was made to Messrs. Wood, Gundy and Company, Toronto.

Messrs. J. and L. M. Wood, the Montreal bond house, have prepared a short folder primarily for distribution in the United States. They have included therein a few pointed arguments showing that a great many dangers which beset the path of the investor in the neighboring republic can be avoided altogether in Canada.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended January 3rd:—Peterson Lake, 87,562; Dominion Red, 84,197; Hudson Bay, 61,832; Penna Canadian, 61,894; Cobalt Lake, 64,094; Coniagas, 296,307; La Rose, 236,385; Cobalt Townsite, 103,500; McKinley-Darragh, 224,800; Temiskaming, 61,115; Kerr Lake, 60,628; total, 1,342,314 pounds, or 671 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons.

REVIEWING THE SITUATION

Once again business men have the pleasure of reading Sir Edmund Walker's review of the business conditions of the past twelve months. This annual survey, a financial classic, is concise and comprehensive, and is perused carefully from first to last by those at home and abroad interested in Canadian development. As a supplement to Sir Edmund's interesting address, a more detailed review has been issued in pamphlet form, each section of the country being dealt with by one of his managers there. The United States, Mexico and Great Britain are treated by the bank's representatives resident in those countries. The first impression gathered from a perusal of these reviews is that the past year was one of substantial progress and prosperity, casting before it the bright glow of a satisfactory outlook.

We are reminded that in the maritime provinces a new spirit of enterprise has manifested itself, and the people are coming to realize that in variety and permanency of natural resources and in facilities for various branches of manufacturing, they occupy a position in growing importance in the industrial life of the Dominion. One factor in bringing this about is the opening of large, undeveloped districts in New Brunswick and Nova Scotia by a new railway.

The province of Quebec has had its full share of the general prosperity enjoyed throughout Canada in 1912. Notwithstanding the anxiety which was felt during the summer regarding the crop prospects, the yield proved considerably better than was expected, and the high prices obtained for all farm produce to a great extent, compensated the farmers for any shortage that there may have been in the size of the crops.

In dealing with Ontario conditions, the farmer and raiser of live stock is advised to specialize in certain lines of his particular business, just as the business man in these days of strenuous competition has been forced to do.

The progress of the prairie provinces is noted, and, while the existence of extensive speculation in real estate is not denied, we are properly reminded that an exaggerated impression prevails, particularly abroad, as to its bearing on the commercial prosperity of the country. Few well-informed land men can be found, even among mortgage lenders, who regard western farm land values as at all excessive, although it is important to note that nevertheless the land mortgage companies continue to place an extremely conservative limit on the amount they will lend per acre, even in the most favored sections of the country—a fact which itself acts to prevent inflation of values. If we are to judge by standards prevailing throughout North America, the values of outside business properties in most of the growing cities and towns of the west have, to say the least, discounted a good many years of the future, and sooner or later a readjustment of values must take place, though how long this readjustment may be delayed through the very necessities of so rapidly increasing a population it is impossible to say. This opinion, however, is so widely held among the leading business men throughout the country, and especially among those who have control of the banking institutions, life assurance companies and other loan and investment companies, that the speculation in real estate has been confined in such channels that a serious shrinkage in values could have but an inconsiderable effect on the prosperity of the country as a whole.

In British Columbia the prosperity of the past few years has continued without showing signs of abatement. These satisfactory conditions may be ascribed somewhat to the railway construction which is in progress, and which is likely to continue for some years to come, but there has been a steady influx of population, a continuance of which it seems reasonable to expect.

The London manager of the Bank of Commerce thinks that the coming year does not hold out much prospect of any improvement taking place from the viewpoint of the borrower. Even if European politics are settled in a satisfactory manner, the demand for new capital by the newly arisen States in the Balkans will add to the burden under which the money market is laboring at the present time. He expresses the hope that the securities of the Canadian provinces will be included in the list of those approved by the National Insurance Commissioners of Great Britain.

Sir Edmund Walker discusses in his address so many interesting points that we must content ourselves here by referring readers to its publication elsewhere in this issue. He contends that the proposed central gold reserve will relieve apprehension of a scarcity of currency at a time when the emergency provisions are not operative. He discusses counteracting influences at work against the money stringency. Other matters dealt with in the usual thorough manner are Canadian borrowings in London, the cost of living and the mitigating effect thereon of good roads, and the general development of the country.

FARMERS AND THE BANKS

Little has been heard from the bankers of Canada respecting the proposed amendments to the present Bank Act. Mr. Duncan Coulson, president of the Bank of Toronto, has broken first the official silence. At the annual meeting of the bank, he discussed the feature in the proposed act relating to loans to farmers. A clause has been added to the act permitting banks to make advances to them on the security of grain and cattle in their own possession, enabling a pledge or an assignment to be taken as security. While Mr. Coulson admits it is but right that farmers should have privileges enjoyed by others, he thinks that too much importance should not be attached to the benefits this clause of the act may afford. Such advances, even though accompanied by security under the act, must rest largely upon the responsibility of the individual borrower. The grain given as security remains in his custody, and, therefore, the personal element must be largely considered. At present advances are made to farmers without this security, and as freely, he thinks, as they will probably be made with it, and, considering the number of banking offices there are in the West, and the competition that exists between banks, the cases should be few in which responsible farmers do not receive the accommodation to which they are entitled.

The same clause was discussed this week by Mr. Alexander Laird, who thinks it will undoubtedly be of great advantage in many instances, and will at least legalize the practice already quite common, and probably tend to prevent hasty marketing of produce. As a matter of fact, large advances are made to farmers on the security of notes and actually upon what they possess in the way of products of agriculture, and their reputation of honesty and ability, always an essential consideration when lending money.

Good reputation, to a banker, ranks almost as high as, if not equal to, his security. Mr. J. P. Morgan emphasized that point in his examination before the Money Trust investigating committee in the United States. Honesty in business is a sure way to magnetize bank funds. It applies as much to the farmer as to the merchant.

SILENCE PERSISTS

For more than two months Judge Leet has had under consideration charges made against officials of La Banque Internationale and heard by him in private. Correspondence on the part of *The Monetary Times* with the Department of Finance, the Department of Justice and with Judge Leet has, as yet, failed to penetrate the lengthy silence. The Minister of Finance in a letter to *The Monetary Times* lightly dismisses the matter by stating he has no authentic information as to it. We would respectfully suggest to the Minister that it appears to be time for him to obtain some authentic information. An inquiry addressed to the Minister of Justice remains unanswered, and we would respectfully suggest that the Minister should see that justice is given to the public by the publication of Judge Leet's long-delayed decision.

On November 19th, Judge Leet had the matter under advisement, and "at the moment" could not "say how soon judgment would be rendered." We would respectfully suggest to Judge Leet that two months seems to be a sufficiently lengthy period to have such matters under advisement.

While the Department of Finance has no authentic information, while the Minister of Justice is silent and while Judge Leet continues to have the matter under advisement, wild guesses continue as to what occurred at the bank. While almost unanimous silence persists regarding the charges, gossip as to what might have occurred at the bank is heard day by day. *The Monetary Times* has previously stated that Canadian banking and Canadian credit are injured by this continued silence, and we have previously asked, What really did happen at the bank and what is the judicial finding? We still await an answer.

GROWING FLAX IN CANADA

Flax is one of the most interesting crops grown in Canada. It is a popular crop for the new settler, especially in Saskatchewan, as quick returns are possible and it is the most suitable crop for new broken land. Preliminary estimates of this crop show that in 1912, flaxseed upon a greatly increased acreage of 1,677,800 acres (allowing for deduction of non-productive areas) was expected to yield 23,145,000 bushels, or at the rate of 13.74 bushels per acre, figures which compare with a total of 7,867,000 bushels from a productive area of only 682,622 acres in 1911, when, it will be recalled, so large a proportion of the area sown in the Western provinces was not harvested in consequence of the late and stormy season.

Number one Northwest flax of Canada is generally conceded to be the finest in the world.

The following figures show the rapid increase in the cultivation of this crop in Canada during the past four years:—

	Acres, area.	Total yield, bushels.	Total value.
1908	139,300	1,499,000	$1,457,000
1909	138,471	2,213,000	2,761,000
1910	476,877	3,802,000	7,898,800
1911—Area sown..	1,131,586	12,921,000	19,467,000
1911—Area harvested	682,622	7,867,000	11,855,000

These figures show increases of 390 per cent., 424 per cent., and 713 per cent. in acreage under cultivation, total yield and total value, respectively.

The average price per bushel has increased from 97 cents in 1908 to $1.50 in 1911. In 1910, the figure was $2.07 per bushel.

The yield per acre in the past four years compares as follows:—

Year.	Yield per acre, bushels.
1908	10.76
1909	15.98
1910	7.97
1911	11.52

Saskatchewan is growing the bulk of the flax in Canada. In 1911, that province produced 6,413,000 oushels, valued at $9,639,000 out of the total crop of 7,867,000, valued at $11,855,000.

The increase in flax acreage in Saskatchewan last year was largest in those districts which have the least ailway facilities, as the farmer with a long haul can obtain more money for his load of flax than he can for any other kind of grain. Saskatchewan is likely to nake some attractive records in the matter of flax-rowing during the next few years.

UNITED STATES PLANTS IN CANADA

The proposed establishment of a Canadian plant of he United States Steel Corporation is a substantial eminder that our neighbor still thinks his Canadian inestment policy is sound. British capital has financed ur railroads, governments, municipalities and indusries generally. It has been content to have in return ond interest and confidence. Meantime, it has secured omparatively little control of the enterprises it has nanced.

While remembering that the United States is itself orrowing large sums of money, it is none the less sigificant that its financiers, capitalists and business men re taking a more intimate interest than are Britishers, Canadian development. They are planting branch facories in the Dominion one after another. If the tariff absorbing too much of the profits of goods manufacured in the Republic and sold in the Dominion, they nove a subsidiary plant over the tariff wall. They are ccustomed to the demands of the North American connent, which are similar in Canada and the States. They re accustomed to the prevailing labor conditions. They ke our laws, and they appreciate the substantail gait f this country.

British capital is none the less appreciative, and in ollars and cents it is giving us far more than the United tates. It is, however, less demonstrative, and it is not etting its fingers into the Canadian pie as thoroughly s are our cousins. In short, British capital has not aken seriously the establishment of branch plants in is country. The United States invasion in that respect as become an exceedingly important factor. There is ow such a solid wedge of that country's branch facories in Canada, that it is rapidly becoming an integral part of Canada. In other words, the habit is so general that it is now difficult to distinguish between the Canadian and the United States plant in Canada. This is a subject we should like to see our kinsmen overseas consider more seriously, even at the expense of theoretical discussions as to a change in British preference, food taxes and the tariff. The obstacles are not insurmountable. The United States has proved that.

SMALL CHANGE

The excitement of the day The Mayflower docked at Plymouth is dwarfed by that of the day the Grand Trunk plans landed at Providence.

* * * *

King Alfonso of Spain is looking for a premier. When a minister of agriculture is wanted, Mr. W. F. Maclean, M.P., Toronto, may oblige.

* * * *

A broker has compiled a table showing "what some stocks have done in ten years' time." Everyone has a list of what some have not done in ditto.

* * * *

"How to dress on $40,000 a year," says a New York heading. At that figure, a necklace of cyphers and a high-cost-of-living smile should be sufficient.

* * * *

President-elect Wilson says the United States is caught in a heartless economic system. Plus the soulless corporation, the country may soon hand in its resignation.

* * * *

A New York old-timer worked till she was 100, took four years' rest and then died. The modern way is to work till $1,000,000 or over, and die before reaching it.

* * * *

While newspapermen are busy having Mr. Charles M. Schwab, steel magnate, forming a Canadian-United States combine, a New York man in London says that Mr. Schwab is winning piles of money at Monte Carlo's casino—billion dollar mergers evidently being Schwab incidents.

* * * *

Controller Foster, Toronto, suggests that the filtration plant should be blown up and the city begin again. That would probably be less expensive and more satisfactory than engaging judges, engineeering experts, royal commissions, etc., etc., etc., with a bushel of newspaper advice thrown in as a bonus.

The Canada Starch Company, Limited, has increased the umber of its directors from nine to ten.

The capital stock of the General Produce and Explosive ompany, Limited, has been increased from $500,000 to $1,-00,000, such increase consisting of 5,000 shares of $100 each.

In the accounts of the North Vancouver City Ferries, imited, for the year ending November 30th, 1912, the earngs are shown at $137,794.16 as against transportation arges of $76,376.32, leaving a credit balance gross of $61,-7.84. General charges, which include rent, insurance, xes, lighting and advertising expenses, repairs, depreciaon, etc., total $32,566.37, and office expenses amount to $3,-6.27, inclusive of directors' fees, leaving a balance to profit d loss account of $27,757.60. The general earnings, i.e., nt, receipts, wharfage collected and commissions amounted $2,862.40. Increased capital expenditure amounting to upards of $39,000 has been incurred by the company during e period under review, which together with capital expendire incurred prior to December 1, 1911, and not discharged l after that date, explains the overdraft of $25,216.00 which e company has with the bank. In spite of a revised tariff fares, which reduced charges in certain particulars, the ansportation earnings show an increase of $13,318.55 for e year ended November 30, 1912, as compared with the evious year.

Application will be made to the Manitoba Legislature for acts to incorporate the following companies:—Metropolitan Trust and Loan Company, H. P. Blackwood, Winnipeg, being solicitor for the applicants; the United Empire Trust Company, Messrs. Thomson and Jameson, Winnipeg, being solicitors for the applicants; and Master Builders' Liability Insurance Company, Mr. T. J. Murray, Winnipeg, being solicitor for the applicants.

The Albion Trust Company, Limited, will erect a fine office building at the corner of Government and Wharf Streets, Victoria, B.C. The president of the Albion Trust Company is Dr. Lewis Hall. The vice-presidents include Mayor L. Beckwith, and Mr. R. D. Rorison, of Vancouver. The financial manager is Mr. F. F. Loosemore, who resigned a position with the Standard Bank to take charge of the finance and savings departments of the Albion Trust Company The directors include such well-known Victoria busines men as Mr. John William Spencer, of David Spencer, Limited; Mr. R. R. Taylor, president of the Victoria Finance Company and of the Drake Hardware Company; Alderman George A. Okell, of The Bakeries, Limited; Mr. R. L. Drury, manager of the Mutual Life Insurance Company; Mr. R. H. Thomson, engineer of Strathcona park; Mr. A. A. Belbeck, treasurer of British Columbia Saddleries Company and other others. The company has an authorized capital of $3,000,000.

AT LAST JUDGE LEET SPEAKS

Says it is Useless to Continue Case Against La Banque Internationale Officials—Transactions Stated to be of Ordinary Banking Nature

Judge Leet, of Montreal, after considerable delay, has, according to the daily newspaper despatches from Montreal, said that it is unnecessary to proceed further with the Banque Internationale case, as he does not think a conviction would follow. A sworn affidavit was brought to the judge, stating that, to the best of the knowledge of the signatory, officers of the bank had made and signed a government return which was to his knowledge untrue. Partly because the information was second-hand, and partly because of the important results that might come to pass from the institution of these proceedings, especially if it were found that the information was not correct, Judge Leet suggested that before a warrant was issued evidence be taken, and that it be taken in camera.

Witnesses were heard, but the judge thought he would not have warrants issued, although he "would have been thoroughly justified." He was asked also to withhold his judgment in the case "for a while" in view of negotiations proceeding for the transfer of the bank's business to another institution.

The Monetary Times contends that while this procedure may have been legal, it was none the less extraordinary. It has seemingly had the effect of keeping most of the details of the case in secret. The judge is one of the few who have had an opportunity of examining the evidence. Why should not that evidence be made public? Why was it heard in camera? Why should the judge deem it advisable to withhold his decision because someone suggested such a course? And are we to understand that the plaintiffs' case was heard in camera and evidence for the defence in public?

The Monetary Times is disgusted with the entire conduct of the case and with the official silence of the Department of Finance. Instead of such serious accusations having the full light of publicity, much appears to have been done to make the judicial inquiry a secret investigation, with just enough publicity to give it a brave look.

We would respectfully ask Judge Leet to make public the evidence which was given in camera. We contend that it is a matter of public importance. We are glad to know from Judge Leet's remarks that the accusations would not bring a conviction. But the hearing in camera of such a case is setting a very undesirable precedent. *The Monetary Times* has always fought for legitimate publicity as it has done for nearly three months in this case, and as it proposes to do.

Judge Leet's remarks respecting La Banque Internationale officials accused of making false returns to the government, indicated it would be unnecessary to proceed further with the matter as he felt assured no conviction would follow. His judgment was to be given at Montreal late yesterday.

Judge Leet said: "Considering the importance of this case, the public persons involved, and as a necessary consequence the public interest aroused, I think it proper that I should make a statement, part of which may be regarded as a personal explanation.

"Representatives of two of the leading legal firms of the city came to my chambers with a Mr. Ducout, who is the representative in Canada of the French shareholders of La Banque Internationale of Canada, and Mr. Ducout made a sworn affidavit stating that the the best of his knowledge and belief Mr. Godfrey Bird, the general manager of La Banque Internationale, had, with other officers of the bank, made and signed a government return which was to his knowledge untrue.

Facts Disclosed Were Sufficient.

"Partly because Mr. Ducout's information was second hand, and partly because of the important results that might come to pass from the institution of these proceedings, especially if it was found that Mr. Ducout's information was not correct, I suggested that before a warrant was issued evidence be taken, and that it be taken in camera.

"This procedure was followed and certain witnesses examined. I came to the conclusion that the facts disclosed were quite sufficient to justify the laying of information, and I feel I should have been thoroughly justified in giving instructions that a warrant should be issued, not only against Mr. Bird, but all the others who signed the returns.

"That would not have meant that a commitment would have resulted, much less a conviction, but it would, no doubt, have been the easiest and simplest thing for me to have done and thus have disembarrassed myself of the matter."

Judge Leet went on to explain that he had been informed that negotiations were under way for the transfer of the business of the bank to a Canadian institution, and that if it were possible, he should withhold his judgment for a while. He, therefore, held it until the present time. Recently he had been requested by a counsel for the bank to reopen the enquete. He did not see that criminal procedure would not allow him to make an investigation before issuing the warrant.

"It is the right, however, of the accused after a warrant has been issued and the evidence for the prosecution adduced, before a commitment is signed, to examine witnesses for the defence, for the purpose, of course, of so explaining the case that no commitment will follow. I see no reason why an accused, if he desires, should not have the same privilege in a case like the present.

To Allow Evidence to be Adduced.

"I have, therefore, acceded to the request to allow evidence to be adduced by the defence."

Judge Leet then stated that he was ready to proceed with the hearing. Among the witnesses heard were Mr. J. P. Knight, secretary of the Canadian Bankers' Association, and Mr. J. Gillespie Muir, of the Merchants Bank, who were asked for their opinion, as experts, of certain transactions of La Banque Internationale.

After hearing these two witnesses, Judge Leet decided that it would be useless to continue the case, because Mr. Knight and Mr. Muir said that the transactions complained of were of the same nature as they, or any other bank, would carry on.

ONE MORE CORRECT FORECAST

Monetary Times, December 7th, 1912.	Montreal despatch, January 17th, 1913.
"The Home Bank is awaiting the publication of Judge Leet's decision regarding charges heard by him in private against officers of La Banque Internationale."	"All arrangements for the taking over of the French bank had been completed before, and officials of the Home Bank only awaited Judge Leet's decision before taking it over."

HOME BANK AT LAST ABSORBS INTERNATIONALE

Major J. Cooper Mason, assistant general manager o the Home Bank, states that the Toronto institution has bought the physical assets of the Internationale Bank a fifty cents on the dollar. The paid-up capital of the French bank is $1,361,000, and the shareholders of the Internationa will be paid with $768,000 stock of the Home Bank at $12 per share. This will bring the paid-up capital of the Hom Bank up to about $2,000,000.

Application will be made immediately as is required b the bank act for ratification of the purchase by the Governor General in Council.

The Home Bank has about forty branches, and with th ten branches of the International will now have fift branches.

Mr. Godfrey Bird, formerly general manager of the In ternational Bank, will be general supervisor of the easter branches of the Home Bank of Toronto, and arrangement will be made shortly by which the interests representing In ternational stock from Montreal will be appointed to th board of the Home Bank at Toronto.

BIG BOND ISSUE NEXT WEEK

A $1,000,000 issue of bonds of an important Winnipe concern will be made by a well-known Toronto house ne Wednesday.

LEFT WITH THE UNDERWRITERS

Seventy-three per cent. of the Grand Trunk issue London of a million and a quarter of 4 per cent. bonds ha been left with the underwriters, who will also take 81 p cent. of Queensland's issue of two million 4 per cent. i scribed stock.

MONETARY ARRANGEMENTS OF WESTERN CITIES

Alberta's Premier Talks of Financial Situation—Western Development

Monetary Times Office,
Winnipeg, January 15th, 1913.

Hon. A. L. Sifton, Premier of Alberta, stayed at Winnipeg for two days this week on his way back from England, where he spent some weeks completing arrangements in connection with the new provincial loans. He was accompanied o the old country by the Hon. Malcolm McKenzie, provincial reasurer.

Interviewed in Winnipeg as to his trip Premier Sifton said "My trip to England was wholly one of business. The chief work was the placing of bonds to the amount of a million pounds, which were required for the extension of the telephone system of the province, and for the building of public oads. The funds were, in fact, secured on short term loans uring last year, and a considerable portion spent. The obect on the present trip was to sell long term bonds to replace hese short-term loans.

"The price at which the bonds were sold could not have een obtained for several weeks prior to the day of sale, and ot at any time up to the date of our leaving London. The four per cent. bonds were sold at 97, a little over 4 per cent. The news of the war was good that day. The brokers were optimistic. They made an offer of 97, and it was accepted."

Mr. Sifton added that during a period when the European war was at its worst, the money market in London was exeedingly tight. England had paid a shade over four per ent., for money, and could not have got it at this price had t not been for the fact that Japan had funds on deposit, which were available on call. At the same time Austria had offered even per cent., and had borrowed considerable sums in New York at six and a half per cent.

Many Loans For London.

In addition to completing arrangements for the long term onds, Mr. Sifton arranged for an extension of the loans in onnection with the A. and G. W. matter. It was not the overnment's wish to secure a loan for a lengthy period in his case, and money was borrowed at five and three-quarters. With reference to this case, Mr. Sifton stated that it was anticiated that a decision would be given in February, the only eal ground for this anticipation was that the court was to sit n February. The chancellor had stated when the case was resented that, as the issue was a constitutional one, great are would have to be taken in consideration.

Speaking of general financial matters, the premier stated hat a very large number of Canadian loans would be put hrough in London during the next four or five months. Shorterm notes had been issued by many municipalities, and more ermanent arrangements were now to be made. The prospects were that the market would be easier and that money would e more readily available.

Canadian municipalities must, however, be prepared to ay more for money than they had paid in the past.

Prevailing Conditions in Western Cities.

Mr. Harold Wynne Trenholme, formerly of the Bank of Commerce, and son of Mr. Justice Trenholme, has been apointed manager of the Dominion Trust Company in Winnieg. This company has a paid up capital of three millions nd its headquarters are in Vancouver, where the annual meeting will be held in February. For its Winnipeg office t has bought the fine building of the Eastern Townships Bank n Main Street.

Edmonton wholesalers report both volume of trade and ollections as showing very satisfactory increase, and conditions generally throughout Edmonton territory appear eminntly satisfactory, as also do leading retailers. Owing to iversity of Central Alberta's resources, the unsatisfactory onditions regarding marketing and shipping of grain are not serious factor.

Edmonton's Expenditure.

While Edmonton authorities have decided to pursue a conervative course in regard to civic improvements and extenion of public utilities, the city commissioners have presented or approval of the council estimates covering expenditures on apital accounts aggregating $8,597,450. This expenditure is eemed by the commissioners to be demanded to meet the exanding requirements incidental to the city's rapid growth. uthorization is asked for capital expenditures under the arious departments as follows:—

Health: Equipment	$ 800
ire: Equipment and building	148,574
elephone: Building, equipment and extensions	923,640

43 carloads of rails and similar material have arrived for the Interurban Electric Railway, and the company claim that the line to St. Albert will be in operation in May next.

Laying of steel is proceeding on the Edmonton, Dunvegan & British Columbia Railway, and steel is now 26 miles out. The company expect to have steel laid on the entire 80 miles graded by 1st March.

Six by-laws voted on by the ratepayers of Fort William were carried. The two industrial by-laws; namely, the Maritime Nail Company, Limited, and the Canadian Steel Foundries, Limited, having been carried, means two additional manufacturing industries, and the employment of 450 men.

RAILROAD EARNINGS.

The following are the railroad earnings for the week ended January 7th:—

	1913.	1912.	Increase or decrease.
Canadian Pacific	$2,140,000	$1,602,000	+ $538,000
Grand Trunk	850,889	735,888	+ 115,001
Canadian Northern	341,500	289,200	+ 52,300
Temiskaming & Northern Ontario	26,561	26,622	— 61

AT NIAGARA FALLS

The year 1912 was a good one at Niagara Falls, Ont. Possibly $300,000 worth of residential building and fully $600,000 of factory buildings, mostly additions to present factories, were erected. Six new industries were located there during the year, and prospects for 1913 are exceptionally bright. In addition, the three great power development companies operating there have expended many millions in increasing their plants.

ANNUAL MEETINGS

The following annual meetings will be held during the next two weeks:—

Company.	Time.	Place.
Jan. 21—Monarch Life Assurance	4 p.m.	Winnipeg
" 21—Ontario Power	11 a.m.	Niagara Falls
" 21—Coleman Development	3 p.m.	Haileybury
" 21—Calumet Cobalt Mining	4 p.m.	Haileybury
" 22—Ramsay E. Sinclair, Ltd.	2 p.m.	Toronto
" 22—Nepigon Mining Lands	10 a.m.	Windsor
" 22—Continental Life Ins.	2.30 p.m.	Toronto
" 23—Guarantee of North America	4 p.m.	Montreal
" 27—Metropolitan Bank	noon	Toronto
" 27—Hamilton, Grimsby, and Beamsville Electric Ry.	3 p.m.	Hamilton
" 27—Sincennes—McNaughten Line	11 a.m.	Montreal
" 28—Confederation Life Ass'n.	2.30 p.m.	Toronto
" 29—Canada Starch Co.	noon	Montreal

SEVEN WAYS TO REDUCE THE COST OF LIVING

Seven ways to reduce the cost of living have been discovered by Dean Frank W. Blackmar, of the University of Kansas. They are:—

Let the government check the decline in the purchasing power of gold by taking, automatically, seigniorage of the bullion that is behind the dollar, thus leaving the value of the dollar stable and allowing the weight to vary with the rise and fall of average prices.

Induce more people to engage in the production of raw material.

Introduce scientific intensive agriculture in order to double production per acre.

Revise the tariff by scientific treatment.

Prevent as far as possible, organizations from advancing prices arbitrarily, placing a maximum limit upon prices if necessary.

Introduce simpler and less expensive methods of bringing the commodity to the consumer.

Educate people in the principles and habits of true economy, thus doing away with extravagance and waste.

BONDS AT HOME AND ABROAD

Holders of Montreal Bonds — Regina Has Many Securities to Sell

A return prepared by Mr. John Campbell, city accountant and city stock transfer agent of Montreal, shows that the city's bond issues are increasing in popularity. The statement indicates that there are 400 holders of Montreal bonds drawing annually $200,000 on holdings worth $5,021,667. The following was transferred last year:—

Permanent 7 per cent. stock	$115,500
Terminable 4 per cent. stock	227,866
Terminable 3½ per cent. stock	700
Permanent 3 per cent. stock	315,034
	$659,100

From the Montreal to the London register there was transferred in 1912:—

Terminable 4 per cent. stock	$ 17,032
Permanent 3 per cent. stock	121,667
	$138,699

From the London to the Montreal register there was transferred:—

Terminable 4 per cent. stock	$103,348
Terminable 3½ per cent. stock	1,946
Permanent 3 per cent stock	143,566
	$246,861

The whole of the transactions totalling $1,046,659.

The Bank of Montreal and the National Bank of Scotland in London, are the city's stock transfer agents for Europe.

Only Three Offers.

Three offers were received for the Delisle, Sask., $3,500 6 per cent. 15-year hall debentures. Messrs. W. L. McKinnon and Company, Toronto, were awarded this issue.

Regina will have about $3,000,000 worth of debentures to negotiate during the present year. The city may appoint a financial agent to sell the bonds in England. At present it is proposed to issue debentures for $600,000.

Canadian Northern Quebec Railway.

The Canadian Northern Railway Company has given notice that it is not responsible for and has not in any way authorized or approved of circulars or statements in circulars offering for sale any of the company's 5 per cent. income charge convertible debenture stock, and the Canadian Northern Railway Company and the Canadian Northern Quebec Railway Company also give notice that neither of the companies or any company allied with them is responsible for or has authorized or approved of circulars or statements in circulars offering for sale statutory stock of the Canadian Northern Quebec Railway Company.

The statutory stock forms part of the share capital of the Canadian Northern Quebec Railway Company, and payment of neither principal nor dividend is guaranteed nor is secured by mortgage or otherwise, and it is unlikely, they say, that dividends will be paid on the statutory stock.

The Credit Foncier's issue in Paris of three and a half per cent. bonds to the value of 500,000,000 francs ($100,000,000) have been over-subscribed only about one and a half times. This is less than expected from the results of previous issues. Financiers attribute this to the fact that the French investors are awaiting Chinese, Japanese and other foreign loans announced for issue after the Balkan peace, which, bearing higher interest, would permit investors to meet the high cost of living.

The Credit Foncier bonds, nominally of 500 francs, are issued at 495, payment being extended over three years. There is also a lottery scheme attached to the issue, 324 bonds being drawn for and redeemed during the course of every year at prices varying from 250,000 to 100,000 francs.

◆

The capital stock of the Dominion Ostrich Feather Company, Limited, has been increased from $100,000 to $300,000, such an increase consisting of 2,000 shares of new stock of $100 each.

The following are Welland board of trade officers for 1913: President, Mr. H. J. Hart; vice-president, Mr. J. B. Duff; secretary, Mr. J. D. Payne; treasurer, Mr. A. H. M. Hay; industrial commissioner, Mr. B. J. McCormick; council, Messrs. B. L. Booth, A. O. Beatty, George C. Brown, T. D. Cowper, D. Ross, R. Cooper, T. J. Dillon, W. J. Hickey; auditors, Messrs. T. J. Dillon and F. A. Lount.

VICTORIA'S FIRE CHIEF'S REPORT

Loss Was Less Than the Previous Year — Several Important Recommendations for Modern Apparatus

Victoria's fire loss for the past twelve months shows loss to buildings and contents aggregate $139,596, compared with $142,730 in 1911.

Fire Chief Davis has compiled his returns for the year. The figures compared with those of the preceding year show:

	1912.	1911.
Loss on buildings	$ 46,732	$ 54,269
Loss on contents	92,864	88,461
Total loss	$139,596	$142,730
Insurance on buildings	433,550	205,900
Insurance on contents	128,750	308,725
Total insurance	$572,300	$514,625

During the year alarms totalled 217, compared with 219 the previous year, and in responding thereto the brigade travelled a distance of 565 miles. At fires 84,450 feet of hose was laid, 1,987 feet of ladders raised, 3,864 gallons of chemicals used and 246 hours spent in actual fire fighting. The chief fires during the twelve months were that at the residence of Colonel E. G. Prior, St. Charles Street, on the night of February 23, at which the loss was $15,000, and that at the Canadian Puget Sound Lumber Company on April 25, when a loss of $72,400 was incurred.

Improvement During Past Year.

The year ended with the department in much better physical condition owing to the addition of the new motor apparatus for the headquarters hall, and the opening of the new hall on Duchess Street to serve Oak Bay and the eastern portion of the city. The force now numbers sixty-seven men, the discipline of which is reported by Chief Davis as excellent.

Chief Davis, in his report, makes several important recommendations. He advocates the purchase of a large 80 horse-power motor hose wagon of a capacity of 2,500 feet of two and one-half inch hose for the headquarters station, the present motor hose wagon to be transferred to the James Bay hall where, owing to the large territory to be covered, it is necessary that more rapid response to alarms be provided.

Protection for Thickly Settled Portions.

Also that an 80 horse-power motor tractor be secured for the fire engine at the Yates Street hall, as that hall has a very large territory to cover and the city in that direction is rapidly becoming more thickly settled. In addition the chief urges the erection of a two-story fireproof building at the rear of the headquarters station for the housing of the fire alarm system, at present in an insecure location in the old market building. Fifteen additional alarm boxes for the outside districts are also required to improve the alarm system, and over-hauling of the Yates Street hall and improvements to the headquarters hall are recommended.

◆

DRY DOCK FOR MIDLAND

A floating drydock and building berth will be constructed by the Midland Drydock Company, Limited, at Midland, Ontario. Among those interested in the enterprise are Mr. James Playfair, Mr. D. L. White, Mr. D. S. Pratt and other residents of Midland. The town has granted a bonus of $25,000 to the company, as it is anticipated that the undertaking will cause the expenditure of large sums of money in the town, give employment to a considerable amount of labor and tend to assist and encourage the marine trade in the port of Midland. The town will issue debentures for the purpose. It has made an agreement with the drydock company and with the Canadian Dredging Company, Limited, by which the plant will be erected for the construction and repair of steel and wooden vessels.

The dock will be built in separate units, the first unit having a length of 150 feet by a beam measurement of 72 feet, and having a lifting capacity of 1,200 tons. The first unit is to be constructed and ready for operation before September 1, 1913, and the second unit by May 1st, 1915. The company will operate their machinery by electric power, purchasing the power from the town, which has agreed to place a fixed assessment on the company's property. Mr. H. Calderwood has prepared the plans for the drydock and building berth.

Midland is in Simcoe County, on Mundy's Bay, an arm of the Georgian Bay, and on the Grand Trunk Railway, miles north-west of Orillia, and 120 miles north of Port Hope. The population of the town is about 4,600.

IOW THE PROPOSED GOLD RESERVE WOULD ACT IN TIMES OF PANIC

eading Banks Could Deposit Millions of Gold and Loans Could be Made to any Institutions in Distress

BY H. M. P. ECKARDT.

In the discussion of the good and bad points of the plan the creation of the central gold reserves against bank note ues, which forms a part of the new Bank Act, little or noth- has been said about the part which may be played by the serves during a period of panic.

While it is true that Canada has had no banking panic a generation, that fact cannot be taken as conclusive dence that panics belong altogether to the dead past so far we are concerned.

Notwithstanding the great size and strength of our prin- al banks, we may take it as a practical certainty that the nadian banking system will experience, at sundry times in future, conditions which produce panics in other lands.

Whether or not those conditions produce a panic in the minion depends on how they are met.

It might be remarked in this connection, with refer- ce to the general managers, that the generation of older nkers is slowly passing away.

Only a few of the banks now are under the charge of men o were at the helm when the country had to pass through lly troubled and stormy times.

The new men will undoubtedly experience a testing time oner or later; and, while it may reasonably be expected that ey will uphold the traditions and good name of the Canadian vice, we have to remember that the bank liabilities of the esent day are enormous.

ve Times As Many Liabilities.

The liabilities of to-day are about five times as great the bank liabilities of 20 and 25 years ago.

In a grave or serious crisis a young banker who had ex- rienced nothing but comparatively fair weather might well terrified by the tremendous mass of liabilities confronting n. And if he and one or two of his confreres lose their ads, you have a state of affairs making for a panic.

At any rate it is worth while to study the plan for the eation of the central gold reserves with the object of dis- vering whether it will help or hamper the bankers while ey are struggling with a crisis.

A banking crisis is usually characterized by heavy liquida- n of bank liabilities. Creditors of certain banks desire to nvert their claims into cash or to transfer their funds to puted stronger institutions.

In Canada the note issues of the banks are so strongly sed that it is almost impossible to conceive a state of affairs which the issues of an individual bank would not be freely ken by other banks and the public.

Owing to the fact that the notes of each individual bank e practically guaranteed by the associated banks, it is alto- ther likely that the depositors in a suspected or discredited nk would be ready to take its notes in settlement of their posit claims.

eed of An Acceptable Medium.

So we may presume that in a Canadian crisis distrust uld affect merely the deposits and other credit instruments art from the notes.

If several banks were subject to runs of depositors, there uld be urgent need of a medium aceptable to the depositors rough which it could make its payments.

What are the methods of payment available under the nking laws as at present existing.

The bank might use its notes up to the limits of its thorized issue.

If the crisis developed anywhere between the 1st Septem- r and the end of the following February, the excess and nergency issues would be available. They would furnish the eans of making large payments. With the total of paid up pital at $111,000,000, and the total of the rests at $106,000,- o, something over $30,000,000 of excess issue could be ade.

At the highest point in November about $9,000,000 of the cess issues were outstanding. At that time a balance of 21,000,000 would be available. That would suffice to pay off large amount of deposits, as a considerable amount of the tes received by depositors would go at once into other ronger banks, and would be returned to the issuing banks xt day through the clearing house.

If there was hoarding the available supply of notes would used up more quickly.

But if the crisis developed after February and before September, these excess issues would not be available.

The bank note issues in that period have been near the authorized limit in the past two years. Therefore a further use of bank notes would not be possible to any extent.

The new Dominion "fives," Dominion "fours," "ones" and "twos" could be paid out, but it is a question whether they could be secured in sufficient amounts to cope with a first-class crisis. If not, grave consequences might ensue.

Use Resources From New York.

The establishment of the new central reserves and the granting to the banks of the right of issue against deposits of gold made therein, improves the situation notably.

Suppose a disturbance of a serious nature materialized during the early summer and depositors commenced to run on several banks, at the head offices and at branches.

Four or five of the leading banks could bring in if necessary thirty or forty millions from New York and deposit a part or all in the central reserve.

They would then be empowered to issue their own notes to that amount. Loans could be made to such of the beleaguered banks as could provide proper security.

The loans would be in the form of bank notes which would be available for paying the depositors.

The branches that were besieged could get supplies of notes from the nearest branches of the lending banks. In all probability these notes could be used again and again—for many of them would come back to the issuing banks in the form of new deposits.

So an extra issue power of $30,000,000 or $40,000,000 thus acquired by half a dozen of the stronger banks would suffice to make payments of thrice or four times that amount of deposits.

Keep Large Supplies of Notes.

Again, the fact that the beleaguered banks were paying out the notes of the Bank of Montreal, the Commerce, the Royal, etc., in large amounts, would probably serve as striking demonstration of the fact that these powerful institutions were according their support; and it should help to restore confidence.

With the new central reserve plan in operation, it seems that there need never be a shortage of the circulating medium required for meeting the extraordinary demands thus created by a panic or crisis.

Of course, in order to get the full benefit from the change in the law, the great banks would have to keep on hand, at all times, a large reserve supply of their own notes, ready for issue in an emergency.

◆

POSSIBILITIES OF INVESTMENT

Is such a book practical and of some specific use? This is one of the first questions asked about a book dealing with investment matters. Moody's "How to Invest Money Wisely" is one of the small number to which a positive reply can be given. The plan of the book is based on the ideas of diversified investing of which the author has been making a careful study in his work as financial adviser and analyst.

The divisions are under the captions, Diversifying Investments, Investing for Profit, Classes of Investments. The growth of the field for investment is shown, "Where in 1885 there were but few fields in which the careful investor could safely place his funds with only half a dozen types of high-class security issues, to-day there are many dozens of such."

With such a wide field and such opportunities it is interesting to note that Mr. Moody in his introduction states, "The principles in this volume have been adopted by institutions and many individuals with satisfaction and profit.

Such being so there is reason to believe that any investor who acquires the book, and they should be many, will avoid dangers and pitfalls, and obtain holdings of a satisfactory character by adopting the methods advocated.

How to Invest Money Wisely. John Moody, $2. J. Moody, New York.

◆

The number of directors of the Kaministiquia Power Company has been reduced from seven to six.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Harvey, B.C.—January 2.—Railway boarding car. Loss and cause unknown.

Fernie, B.C.—January 1.—Mr. S. McDonald's tent and contents. Loss and cause unknown.

Kelowna, B.C.—January 2.—Chinese laundry, Lawrence Avenue. Loss and cause unknown.

Brantford, Ont.—January 13.—Brantford Cordage Company. Loss $100,000. Cause unknown.

Silver Falls, N.B.—January 4.—Mr. A. P. Steven's barn. Loss $250. Insurance $140. Cause unknown.

North Sydney, N.S.—January 5.—Mr. J. W. Ingraham's barn. Loss unknown. Cause, lighted match.

Chatham, Ont.—January 8.—Mr. T. Blackburn's residence, Taylor Avenue. Loss and cause unknown.

Smith's Falls, Ont.—January 9.—Mrs. J. C. Clark's residence, Port Elmsley. Loss and cause unknown.

Regina, Sask.—January 5.—Mr. S. Ross's residence, 1827 Montreal Street. Loss $5. Cause, hot ashes.

Summerside, P.E.I.—January 4.—Mr. S. Grady's barn, Water Street West. Loss and cause unknown.

Medicine Hat, Alta.—January 4.—Mr. A. C. Foy's residence, 105 Main Street. Loss and cause unknown.

Penticton, B.C.—January 1.—Mr. Gauber's store, Front Street. Loss slight. Cause, defective stove pipes.

Ottawa, Ont.—January 11.—Mr. J. G. Kilts' bookstore, Rideau Street. Loss $1,500. Cause, overheated furnace.

Jonquiere, Que.—January 10.—Mr. Hicks' residence. Loss unknown. Cause, gasoline lamp exploded. One death.

Leavitt, Alta.—January 2.—Leavitt Threshing Company outfit, separator and two horses. Cause, spark from engine.

Milverton, Ont.—January 4.—Mr. J. Fleischhauer's tailor shop in Harmier block. Loss unknown. Cause, stove pipes.

Portage la Prairie, Man.—January 13.—St. Cuthbert's Roman Catholic Church. Loss $121,000. Cause unknown.

Broderick, Sask.—January 6.—Postoffice, telephone exchange, Graham's store, &c. Loss $1,500. Cause unknown.

Sydney, N.S.—January 7.—Mr. D. McDonald, Victoria Road. Loss $300. Cause, probably matches thrown down by thieves.

North Vancouver, B.C.—January 6.—Forbes block, Second and Forbes Avenues. Loss, building, $600; contents, $100. Cause unknown.

Chilliwack, B.C.—January 1.—Mr. G. M. Hambly's residence, Cheam. Loss $2,000. Insurance $1,500. Cause, defective stove pipe.

Lethbridge, Alta.—January 2.—Mr. Whitney's residence, Third Avenue and 4th Street. Loss $100. Cause unknown.

January 9.—Mr. J. G. Haynes' residence. Loss and cause unknown.

Brandon, Man.—January 7.—37 Ninth Street North. Loss and cause unknown.

January 8.—Mr. Venable's barns north of city. Loss and cause unknown.

Shelburne, Ont.—January 4.—Messrs. T. F. Flynn's carload of potatoes. Loss unknown. Cause, oil heater.

January 6.—Mr. W. J. Fleming's chopping mill. Loss and cause unknown.

Port Arthur, Ont.—Rear 212 Stephen Street. Loss unknown. Cause, playing with matches.

January 9.—Mr. D. Hogarth's residence, Mariday Park Loss and cause unknown.

St. John, N.B.—January 6.—Rear of Mr. W. G. Salmon' tailor shop. Loss slight. Cause unknown. Dockrill building Loss and cause unknown. Masonic Hall, Germain Street Loss slight. Cause unknown.

Windsor, Ont.—January 6.—Residence corner Marentett Avenue and Wyandotte Street. Loss slight. Cause, over heated furnace. Mr. F. Garnier's, 22 Church Lane. Los $20. Cause, curtains set alight.

Winnipeg, Man.—January 5.—Mr. A. C. McCrae, automo bile, William Avenue Garage. Loss slight. Cause unknown 867 Notre Dame Avenue. Loss slight. Cause unknown 427 Pritchard Avenue, chimney fire.

Halifax, N.S.—January 10.—Poor's Association building 27 Prince Street. Loss and cause unknown. Mr. F Kaizer' residence, 180 Pleasant Street. Corkan and Ritcey's ware house, Upper Water Street. Loss unknown. Cause, defectiv flue.

Belleville, Ont.—January 12.—Mr. E. Baveridge's resi dence, 2nd concession Thurlow township. Loss $1,000. Caus unknown.

January 13.—Stables owned Mrs. McMahon and occupie by Mr. W. Ore. Loss building $1,500. Insurance Quee Company $1,000. Contents $800. Cause unknown.

Welland, Ont.—January 9.—Mr. F. Cronmiller's residence Loss $50. Cause unknown.

January 10.—Mr. C. Cameron's cleaning and dyein store. Loss, Mr. Charles Stewart, owner of the building $1,500. Mr. I. E. Wills' barber shop, $500. Messrs Cameron and Son, $500. Fully insured. Cause, gasolin ignited.

Vancouver, B.C.—January 1.—Mr. D. J. Johnson's resi dence, 1424 Point Street. Loss $150. Cause, overheate furnace.

January 4.—Mr. D. Kyersacos' bakery and restaurant, 71 Main Street. Loss $1,500. Mr. J. Thomas' second-han store. Loss $2,000. Cause unknown. 163 Powell Street Loss unknown. Cause, overheated stove.

January 5.—Mr. McFee's residence, 789 Georgia Street Loss $50. Cause, overheated stove pipe.

South Vancouver, B.C.—January 1.—Mr. Armishaw, 10 Forty-First Avenue. Loss $100. Cause unknown.

January 3.—Mr. M. Perry's residence, 1632 Thirty-fourt Avenue. Loss unknown. Cause, overheated chimney.

January 5.—4112 Commercial Drive. Loss and cause un known.

January 6.—Residence, corner Rupert Street and Eucli Avenue, Collingwood. Loss and cause unknown

Saskatoon, Sask.—January 3.—Rear Saskatoon Mutua Fire Insurance Company's building. Loss and cause un known.

January 12.—Western Foundry and Machine Company Loss $25,000. Cause, supposed overheated boiler.

January 8.—Mrs. J. Velvet Ferguson's block, 2nd Avenu Loss unknown. Cause, oil stove.

January 10.—Mr. Perrin's premises, 330 Second Avenu South. Loss $3,000. Mr. Boyle's bowling alley. Loss $2 500. Insurance $1,200. Cause, overheated heater.

Fort William, Ont.—January 7.—Mr. H. J. Varlow's bras foundry, George Street. Loss $25. Cause, overheate moulding flask.

January 8.—Messrs. Garrity and Ferguson's office buil ing. Loss $20. Cause, overheated stove.

January 10.—Mr. M. J. Taney's hotel, Syndicate an Victoria Avenues. Loss, building $100; contents $150. Caus careless smoker.

January 13.—Canadian Pacific Railway carpenter's sho Loss $1,000. Cause, blacksmith's forge.

Truro, N.S.—January 11.—Mr. E. E. McNutt, buildin total loss; insurance $4,000; insurance on stock, $1,00 Messrs. Pitkavitch and Company, total loss of stock an fixtures. Messrs. Davies, dressmaking, loss, probably $50 no insurance. Dr. Kinsman, partial loss of instrument library and stock; amounting to $1,700; no insurance. D McDonald, dentist, partial loss, amounting to nearly $2,00 Kent Block, owned by Estate J. H. Kent, damaged by fire an water. Loss probably $2,000; insurance, $3,800. Roger Novelty Stores, loss by fire and water probably $500. Cau unknown.

Montreal, Que.—January 8.—Messrs. M. G. Hall an Company, Wellington and Basin Streets. Loss unknow Cause, spontaneous combustion.

January 10.—Hughes, Owen Company, Limited, Not Dame, West. Loss $5,000. Cause, incendiary, fourth fi in building in a short period.

January 10.—Mr. H. Lobawich's residence, 57 Der Street. Loss and cause unknown.

January 13.—Mr. S. Simmon's residence, 248 Bannantyne enue, Verdun. Loss $1,000. Cause, overheated stove; one ath.

January 15.—Richelieu Hotel, St. Vincent Street. Loss o,000. Cause, oil stove upset.

Toronto, Ont.—January 11.—588 Clendenan Avenue, West ronto. Loss $100. Cause, overheated furnace.

January 13.—38 Ontario Street. Loss slight. Cause, erturned lamp. 56 Geary Avenue. Loss $10. Cause, gas set curtains alight. 358 Queen Street. Loss $3. Cause, aying with matches. 41 Bain Avenue. Loss $30. Cause, fective furnace. 179 Simcoe Street. Loss $5. Cause, overated grate.

January 13.—13 Cummings Street. Loss $40. Cause, rtains set alight.

January 14.—11 Oak Street. Loss $40. Cause unknown. Gerrard Street. Loss $15. Cause, defective fire grate. 72 ath Street. Loss $10. Cause, gas jet.

January 15.—Canadian General Securities Corporation ces, 39-41 Scott Street. Loss, building $3,000; contents ,000. Cause, supposed live coal.

January 14.—Messrs. Coleman Baking Company, 132-4 clid Avenue. Loss, building, etc., $1,000; 3,000 bags flour, ,800; 28 horses, $5,000. Cause unknown. Premises of G. rgfeldt and Company, 63-71 Wellington Street West. Loss 50. Messrs. Barber and Ellis. Loss $1,000. Canada Cloak mpany, $1,000. Cause, started in pile of waste.

Edmonton, Alta.—December 30.—Mr. C. C. Archer's residence, River and Water Streets. Loss unknown. Cause, hot es. Cameron Company, Limited, corner 3rd Street and abasca. Loss unknown. Cause, overheated stove. Mr. Govenloch, 433 4th Avenue, N.E. Loss unknown. Cause, erheated chimney.

December 31.—Mr. Lee's residence, 233 6th Street. Loss known. Cause, smoking in bed.

January 2.—Spokane Cafe Company, 814 First Street. ss unknown. Cause, defective chimney.

January 3.—Mr. F. S. Watson's residence, 210 Twelfth eet. Loss $100. Cause unknown.

DEATH OF MR. GEORGE F. C. SMITH

After a brief but painful illness in Montreal the Canadian manager for the Liverpool and London and Globe Insurance Company, Mr. George F. C. Smith, has passed away. Few men were more familiar in fire insurance circles than "Uncle George"; few men had a better grasp of underwriting affairs in Canada, and few men were more respected, and with reason.

Coming from the West Indies in 1848, Mr. Smith lived almost ever since in Montreal. For half a century he labored in the interest of fire insurance in this country, and could always be depended upon to forward any scheme for the advantage of prudent underwriting. As was stated in an article in The Annual Review issue of The Monetary Times, he was one of the originators of the Canadian Fire Underwriters Association and was its president. Several of the reminiscences in that article were derived from Mr. Smith not many days before his death, and his generous words about several of his old-time confreres betokened the sincerity and warmth of his heart.

His activities on behalf of philanthropy were a feature of his character. He helped to found the Art Association of Montreal, also the gymnasium, one of the committee of the Hospital and president of the Dispensary. He was a good citizen and a good man.

◆

OPENING FOR BANKS IN SOUTH AMERICA

In view of the fact that the radius of Canadian banking operations is steadily being extended, and that these operations are truly international in their scope, and considering the sagacious boldness of the policy pursued by the leading banking institutions of Canada and the splendid reputation which they enjoy, it is difficult to suppress speculation as to whether one or more of our chartered banks will not one day establish themselves in South America, suggests Canadian Trade Commissioner Poussette, in his report on the Argentine. It would be highly beneficial in its influence upon the future of Canada's trade with this continent. Given one or two branches of a strong Canadian banking institution, and the establishment of direct communication, and it is safe to assume that Canada's attempt to expand her commerce with this continent would assume a seriousness in the eyes of South Americans, which up to the present it lacks. A bank, solid, firmly established, and with an honorable name, seems to carry with it a moral influence out of all proportion to its size, or the volume of its operations.

A strong Canadian bank, possessing its own branches in London and New York should, says Mr. Poussette, if it established itself in Buenos Aires and Rio de Janeiro, be able to secure a fair share of the business in "exchange" which is carried on between North and South America through London. When one finds Canadian banking institutions extending their operations so far south as Mexico and the West Indies, one asks if it might not pay them to enlarge their circle still a little more, in order to include what might prove to be a profitable field.

Mr. Dobe Randall, the tramp who set fire to Mr. Henry Revell's barn near Tyrconnell, Ontario, December 23, and then stayed near to see the blaze, has been sentenced to three months in jail by county magistrate Hunt

TWENTY-SEVEN MILLIONS OF CAPITAL

Is Accredited to One Hundred and Thirty-one Companies Chartered This Week

Quebec's new companies number nineteen, and have a capitalization of over twelve millions, while Alberta is also prominent on this week's list, having granted fifty-one charters. The total number of companies incorporated is 131 and their capitalization is $27,157,400.

The largest companies this week are:—

Western Canada Public Utilities, Montreal	$3,000,000
Griffiths and Company, Montreal	£500,000
Crow's Nest Portland Cement Company, Lethbridge	$2,000,000
Spring Water Company, Montreal	2,000,000
Joliette Steel Castings Company, Joliette	2,000,000
Western Commercial Company, Calgary	1,500,000
Quebec and Orleans Corporation, Montreal	1,000,000
Continental Trust Corporation, Toronto	1,000,000
Faber Investment Company, Calgary	1,000,000

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	19	$12,254,900
Alberta	51	8,162,500
Ontario	20	2,685,000
Saskatchewan	23	1,625,000
British Columbia	10	1,435,000
Manitoba	8	995,000
Total	131	$27,157,400

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Keeler, Sask.—Keeler Club, $20,000.

Elbow, Sask.—Elbow Investment, $60,000.

Tofield, Alta.—Tofield Clay Products, $250,000.

Prince Rupert, B.C.—Northern Fisheries, $25,000.

Stettler, Alta.—Stettler Mining Company, $10,000.

Juniata, Sask.—Juniata Supply Company, $30,000.

Redcliffe, Alta.—Redcliffe Journal Company, $20,000.

Swalwell, Alta.—Swalwell Telephone Company, $10,000.

Battleford, Sask.—Northern Theatre Company, $50,000.

Castor, Alta.—Saunders Creek Coal Company, $200,000.

Wainwright, Alta.—Wainwright Milling Company, $50,000.

New Norway, Alta.—New Norway Farmers' Store, $20,000.

Moosomin, Sask.—Moosomin Development Company, $50,000.

Rosetown, Sask.—Rossum and Hendrickson Company, [illegible]

North Battleford, Sask.—Marlborough Hotel Company, $150,000.

Nanton, Alta. Nanton Curling and Skating Rink Company, $5,000.

Yorkton, Sask.— Contractors and Builders' Supply Company, $50,000.

Humboldt, Sask.—Western Distributors of Imperial Auto-[illegible]

Hamilton, Ont.—Park View, $40,000. H. D. Petrie, R. R. Ferrie, M. D. Judah.

Weston, Ont.—Weston Young Men's Club. F. C. Rowntree, W. E. Pearson, G. H. Gray.

Stratford, Ont.—Stratford City Dairy Company, $40,000. [illegible]

St. Boniface, Man.—Progressive Investments, $60,000. F. Lachance, A. Laurendeau, J. Mondor.

Prince Albert, Sask.—I. C. Fish Company, $100,000. Northern Vaudeville Company, $25,000.

Medicine Hat, Alta.—Dominion Grocers, $150,000. [illegible]

Joliette, Que.—Joliette Steet Casting Works, $2,000,000. G. A. Delisle, S. Vessot, J. L. McDonald.

Plessisville, Que.—Compagnie Electrique Plessis, $30,000. [illegible]

Callender, Ont.—Callender Lands, $100,000. C. T. [illegible]

Port Arthur, Ont.—Diamond Brewery Company, $100,000. A. A. J. Guerard, A. G. Guerard, P. W. Whalen.

Ottawa, Ont.—Pickerel River Lumber Company, $100,000. T. A. Beament, A. H. Armstrong, C. D. Hendry.

Victoriaville, Que.—Compagnie d'Autobus, Victoriaville-Arthabasca, $20,000. O. Gaudet, O. Paris, A. Lambert.

Victoria, B.C.—Island Amusement Company, (moving pictures), $100,000. Macey Office Equipment Company, $25,000.

Regina, Sask.—Knights of Columbus Building Association, $30,000. Deering Electric, $75,000. Regina Turf Club, $100,000.

St. Laurent, Que.—Popular Construction, $49,900. J. E. E. Leonard, St. Rose, L. J. Boileau, St. Anne de Bellevue, L. Rosseau, St. Laurent.

Saskatoon, Sask.—Saskatoon Agencies, $100,000. Leather and Sports, $50,000. Miners Ball and Nelson Lumber Company, $100,000. Morehart Broderick Lumber Company, $50,000.

Moose Jaw, Sask.—Ross Park Country Club, $250,000. Canadian Fruit Company, $50,000. Caulder and Cunningham, $100,000. Utopia Cafe, $25,000. Slattery-Duncan, $100,000.

Lethbridge, Alta.—Empire Club Properties, $3,000. Lethbridge Creamery Company, $25,000. Lethbridge Cold Storage, $100,000. Crow's Nest Portland Cement Company, $2,000,000.

Quebec, Que.—Levis Dry Dock Realty Company, $150,000. E. Baillargeon, J. P. E. Gagnon, E. Trudel. La Compagnie des Terrains Julien, $10,000, E. Julien, F. C. Marquis. L. C. Marquis.

Sault Ste. Marie, Ont.—Tagona Townsite, $40,000. J. A. Furse, D. P. McPhail, J. A. McPhail. Huron Trap Rock Company, $100,000. J. H. Haining, Sault Ste. Marie; J. Lyons, E. Kelly, Steelton. General Insurance Agencies, $100,000. C. T. Adams, C. V. Plummer, J. B. Pardee.

Vancouver, B.C.—Agricultural Settlements Association, $500,000. British American Press Service, $10,000. Columbia Gypsum Company, $100,000. Property Improvements, $500,000. Highland Liquor Company, $50,000. Union Contracting Company, $100,000. F. C. Brown and Company, $25,000, (commission merchants).

Winnipeg, Man.—Liverpool and Canadian Mortgage and Investment Company, $250,000. D. Wilson, E. B. Eadie, J. Ledingham. Winnipeg and Regina Properties, $85,000. J K. Moore, U. D. Clark, T. K. Moore. Winnipeg Church Goods Company, $50,000. A. Vonnegut, F. Gaspard, E. Aubin. Strong-Scott Manufacturing Company, $150,000. E. A. Conde, S. Abrahamson, J. Ptolmey. Shriners Temple Association, $100,000. A. W. Chapman, R. M. McLeod, W. F. Taylor. Canada Sales Company, $50,000. F. Lynde, G. B. Elliott, R. H. Mainer. Dominion Market Company, $250,000. I. Pitblado, J. T. Haig, F. W. Louthood.

Edmonton, Alta.—Carmichael-Cummings, $25,000. Building and Development Corporation, $50,000. Realty Investment Corporation, $55,000. British Canadian Realty Company, $50,000. Hay Lakes Shooting Club, $25,000. D. G. Latta, $100,000. Realty Investments, $5,000. British Union Mortgage Corporation, $200,000. Pioneer Investment Company, $10,000. Hawkins, $50,000. Edmonton Wine and Spirit Company, $10,000. Dostaler-Johnson, $50,000. Namayo Crescent Land Company, $100,000. Tipton Investment Company, $500,000. Peace River Properties, $3,000. Northern Motor Supplies, $25,000. North Edmonton Land Company, $24,000. Pioneer Meat Company, $5,000.

Calgary, Alta.—Western Commercial Company, $1,500,000. Adanac Building and Construction Company, $10,000. Esplanade (Medicine Hat), $87,500. MacIntosh Garage, $15,000. Gridiron, $200,000. Birrell Vibrator Canada, $50,000. Parisian Patisserie Confiserie, $10,000. Calgary Public Abattoir, $50,000. Calgary Wine and Spirit Company, $10,000. Taber Company, $10,000. Bennett Farms, $75,000. American Agencies, $25,000. Cardell, Nutting & Free, $15,000. Birmingham Realty, $15,000. Zenith Mines, $10,000 Johnston Storage and Cartage Company, $100,000. CANADA'S EXTERNAL AFFAIRS

nterests of Empire and International Questions That Have Been Considered During Past Year

The annual report upon the work of the department of xternal affairs containing a brief account of the more imortant matters dealt with in the correspondence with outide governments, arranged as they concern Canada's relaons with foreign powers or with other portions of the Emire, as submitted by Mr. Joseph Pope, Under Secretary of tate for External Affairs, shows:—

The award of the arbitrators left undecided the question the reasonableness of objections raised before the tribunal y the United States to certain Canadian and Newfoundland egulations which it was contended contravened the proisions of the Treaty of 1818. The tribunal desired to have is question first considered by the commission of experts rovided for by Article III. of the Arbitration Agreement, nd steps were taken to assemble that commission; but as result of diplomatic discussion it has been found possible micably to adjust the differences regarding existing regulaons in so far as Canada is concerned.

The arbitrators had further recommended a method of rocedure to provide for the settlement of differences regardg future regulations; but as the suggested procedure was ot altogether acceptable, a formal agreement has been negoated between the two governments whereby the recommendtions have been adopted in a modified form. This agreeent also includes the acceptance by both parties of the reommendations of the tribunal with regard to the limits of e bays contiguous to the territory of the Dominion.

onfirmation and Continuation of Agreements, &c.

The pecuniary claims agreement with the terms of subission and the first schedule of claims to be submitted, was nally confirmed by an exchange of notes between the two overnments on the 26th April, 1912. Negotiations are in rogress for the settlement of a second schedule to include urther claims on both sides. The questions of the personnel f the tribunal to try the claims and of the date when it shall e convened are now under consideration.

The Alaska boundary demarcation work continues to dvance; the line tracing has been carried during the past eason to latitude 69° 20′ within a few miles of the Arctic cean, the triangulation to latitude 68° 54′ and the toporaphy to 69° 04′.

The regulations drawn up by the commissioners under e treaty with United States for regulation of fisheries in aters contiguous to the boundary have not so far been aproved by the United States commissioners. Dr. Jordan, the nited States commissioner, having resigned, his place has een filled by the appointment of Mr. Job. E. Hedges.

The International Joint Commission provided for by the eaty with United States relating to boundary waters, has ow been fully constituted, Messrs. T. Chase Casgrain, .C., H. A. Powell, K.C., and C. A. Magrath having been ppointed as the Canadian members. The United States embers as originally appointed were the Honorable T. H. arter, the Honorable James Tawney and the Honorable rank Sherwin Streeter, but the death of Mr. Carter makng a new appointment necessary, the Honorable George urner was appointed to fill the vacancy.

The commissioners met at Washington early in the year r purposes of organization and rules of procedure to be llowed in cases before the commission were adopted.

Applications have been received by the commission rough the United States government from the Watrous oom Company for the approval of the erection of booms in e Rainy River, and from the Rainy River Improvement ompany for the approval of the erection of a dam at Kettle alls; and a joint reference has been made by the two governments of questions relating to the use of the waters of the ake of the Woods.

est Indian Agreement.

The consideration of the measures to be taken to give ffect to the suggestions of the Royal Commission on trade elations between Canada and the West Indies, gave occasion r the convening of a conference of representatives of the ominion and the colonies concerned. The conference pened at Ottawa on the 29th March, Canada being repreented by the Honorable G. E. Foster, minister of trade and ommerce, the Honorable W. T. White, minister of finance, nd the honorable J. D. Reid, minister of customs. The est Indian Colonies represented were Trinidad, British uiana, Barbados, St. Lucia, St. Vincent, Antigua, St. Kitts, ominica and Montserrat. On the 9th April an agreement as concluded, subject to the approval of the parliament of anada, of the legislatures of the West Indian Colonies conerned, and of the secretary of state for the colonies, by hich preferential tariff treatment in the West Indian Colonies is accorded to a scheduled list of Canadian products in return for similar preferential treatment of enumerated West Indian products and the free entry of others when imported into Canada. The tariff concessions granted by Canada are to be extended for three years to the colonies of the Bahamas, Bermuda, British Honduras, Grenada, Jamaica, and Newfoundland, but may then be withdrawn from any of those colonies which have failed to grant the preferential tariff treatment provided by the agreement to the scheduled Canadian products. The agreement is to remain in force for ten years.

Trade and Resources of the Empire.

In accordance with a resolution adopted at the Imperial Conference of 1911, a commission was issued by the King on the 15th April, 1912, appointing representatives of the United Kingdom, Canada, Australia, New Zealand, South Africa and Newfoundland to enquire into the natural resources, trade and legislation of certain portions of His Majesty's dominions. The Honorable G. E. Foster, minister of trade and commerce, was appointed as the representative of Canada, and Mr. W. A. Robinson was made secretary to the commission.

Meetings of the commission were held in London in June for the purpose of making arrangements to enable it to perform its duties effectively, and the general lines of procedure to be followed were settled.

◆

WHAT THE WEST HAS DONE

In the three prairie provinces of the Canadian West there were in 1912 a little less than 19,000,000 acres under cultivation, and from these 19,000,000 acres $118,528,992 have been realized during the past four months. It is safe to assume that when the final bill for farm produce is made up there will be more than $200,000,000 to credit to the farms. So reports Miss E. Cora Hind, of Winnipeg, the well-known authority. In a year, she says, when prices for grain have been low a gain of nearly $17,000,000 on farm produce speaks volumes for the producing power of the country.

The following table is added to her review:—

	1912. $	1911. $	1910. $
Wheat	66,982,196.72	62,996,517.38	48,181,543.35
Oats	8,511,223.75	6,190,803.12	3,296,471.00
Barley	3,887,975.00	1,861,312.50	581,328.00
Flax	10,510,872.44	4,325,641.25	6,530,990.00
Totals	89,892,267.91	75,384,274.25	58,590,337.35
Cattle, hogs and sheep	9,790,802.70	7,825,797.46	11,301,421.89
Potatoes, hay and roots	15,663,000.00	15,694,000.00	7,818,000.00
Dairy products .	3,182,922.00	2,657,761.56	2,448,155.34
Totals	28,636,724.70	26,177,559.02	21,567,577.23
Grand total of farm products	118,528,992.61	101,561,835.27	80,157,914.58

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Duluth-Superior Traction Company.—Duluth-Superior Traction Company earnings have started the year well. For the first week in January gross earnings were $20,594, against $19,389 in the same week in 1912, an increase of $1,214.

Bell Telephone Company.—The Bell Telephone Company has issued new stock to the extent of three million dollars—the largest individual issue the company has authorized since the original flotation. The new stock was placed at par and was selling this week ex-rights at 10½ bid, 11½ asked. The total issue of stock by this company now amounts to $18,000,000.

Quebec and Saguenay Railway.—"Sir Rodolphe Forget denies it and we deny it. It is not a paying proposition and that is one of the reasons why we have not absorbed it," was the answer given at the office of vice-president D. B. Hanna of the Canadian Northern when questioned regarding the rumored absorption of the Quebec and Saguenay Railway by the Mackenzie and Mann interests.

Kaministiquia Power Company.—The Kaministiquia Power Company, which caters to the industrial wants of Fort William and Port Arthur, has increased its dividend from 4 to 5 per cent. At the annual meeting of the company held at Montreal a satisfactory report was submitted and is reflected in the dividend increase.

Guarantee Company of North America.—A dividend at the rate of 2½ per cent. for the quarter ending December 31st, 1912, has been paid by the Guarantee Company of North America, with a bonus of 2 per cent. on stock. The annual general meeting of the shareholders will be held at the company's head office, Montreal, on Thursday, January 23rd.

Crown Chartered Gold Mining Company.—An order winding up the Crown Chartered Gold Mining Company was made by Mr. Justice Kelly, at Osgoode Hall, on Tuesday, on the application of Mr. Allan Powell, a shareholder. The company has a nominal capital of $2,000,000, of which it is alleged $1,751,666 is subscribed and paid-up. Mr. H. H. Sutherland is president.

Price Brothers.—Price Brothers new Kenogami paper mills are in operation, and within two or three months the plant will be running at its designed capacity of one hundred and fifty tons of news print paper daily. One fifty-ton paper machine is running, a second will be started within a few days, and the third will soon go into operation. The sulphite plant was started about a fortnight ago, and will be up to its maximum capacity in about ten days.

Royal Trust Company.—At a meeting of the directors of the Royal Trust Company on Tuesday, Sir Lomer Gouin was elected to the board, filling the vacancy left by the death of Sir Edward Clouston. Among other offices which the Quebec Premier holds in local financial institutions is that of director in the City and District Savings Bank. Sir Edward Clouston, in addition to being a director, was also vice-president of the Royal Trust. A short time ago Mr. H. V. Meredith was chosen to fill the vacancy in the vice-presidency of the company.

Montreal Trust Company.—The annual meeting of the Montreal Trust Company was held on Tuesday, when the report for 1912 was presented to the shareholders, showing that the company had had a prosperous year. The board of directors was re-elected and consists of: Mr. H. S. Holt, president; Mr. Robert Archer, vice-president, and Messrs. George Caverhill, J. E. Aldred, A. J. Brown, K.C., Fayette Brown, Nathaniel Curry, Hon. R. Dandurand, Geo. E. Drummond, T. J. Drummond, W. Molson Macpherson, C. E. Neil, Hugh Paton, E. L. Pease, Jas. Redmond, F. W. Ross, Hon. W. B. Ross, K.C., T. P. Jones, and Sir Max. Aitken. Mr. V. J. Hughes was re-appointed manager.

Hudson Bay Company.—The sales of farm lands by the Hudson's Bay Company for the quarter-year ending December 31, 1912, amounted approximately to 11,200 acres for £49,300, as compared with 9,000 acres for £36,400, and sales of town lots to £44,300, as compared with £69,300 for the corresponding period of 1911. The receipts are £97,200, as against £83,600 in 1911. The sales for the nine months to December 31, 1912, are 40,000 acres for £211,900, and town lots were sold for £1,232,000, as compared with sales of farm lands 33,000 acres for £124,800, and town lots for £140,000 for the corresponding period of 1911. The total receipts for the nine months ending December 31, 1912, amount to £582,200, as compared with £261,700 for the corresponding nine months of last year.

Montreal Light, Heat and Power Company.—Plans have been approved for the new gas plant which the Montreal Light, Heat and Power Company will construct in Cote St. Paul, and work will start early in the spring. The plant will cost between $2,000,000 and $3,000,000, and when completed in the fall of 1914 will add 12,000,000 cubic feet of gas to the daily capacity of the company's plants. Its construction was decided on to meet increased demands arising from growth of population in the west end of the city. Expenditure for the plant, along with the cost of the annex to be built to the company's headquarters building will come under the head of extraordinary expenditure. As usual, the company is spending this year between $800,000 and $1,000,000 under the head of ordinary expenditure for line extensions, etc.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for week ending January 2, and for the year to date, in tons:—

Company's mines—	Week end. Jan. 2.	Year to date.
Centre Star	3,586	84,576
Le Roi	909	23,239
Sullivan	708	16,028
Richmond-Eureka	32	718
Molly Gibson	.....	1,101
No. 1	.....	153
St. Eugene	.....	710
Other mines	2,003	38,788
Total	7,238	165,313

Montreal Telegraph Company.—The sixty-sixth annual report of the Montreal Telegraph Company was presented at the annual meeting at which Mr. William McMaster, the president, presided.

The balance sheet showed assets as follows:—

Telegraph lines in Canada and the United States	$1,625,890
Telegraph cables in Canada and the United States	33,487
Telegraph offices and equipment of offices in Canada and United States	212,500
Real estate in Montreal, Quebec, Ottawa and Toronto	279,946
	$2,151,823
Cash, accounts receivable, bonds and other securities	155,759
	$2,307,582

The liabilities are:

Shareholders' capital	$2,000,000
Excess in value of property operated by the Great North Western Telegraph Company over shareholders' capital	151,823
Dividend No. 194	40,000
Unclaimed dividends, etc.	1,737
Contingent fund	114,022
	$2,307,582

The company's property in the foregoing statement, valued at $2,151,823.85, is operated and maintained by the Great North Western Telegraph Company of Canada. Its operation and maintenance is also guaranteed by the Western Union Telegraph Company of New York, under an agreement with the company for 97 years from the 1st July, 1881, which also guarantees paymentof the dividends.

Out of the revenue (8 per cent. guaranteed on the company's capital) derived from the operation of the company's property by the Great North Western Telegraph Company, $160,000 were paid out in dividends in the past year.

From the revenue derived from the investment of the company's contingent fund, the eleventh annual bonus, amounting to $5,000.00, was distributed among shareholders with dividend No. 193, on the 15th October, making the total distribution to the shareholders for the year $165,000.

The London and Western Canada Investment Company, Limited, has increased its capital from $50,000 to $150,000.

BOND TENDERS INVITED

onetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Delisle, Sask., requires tenders for $1,000 6 per cent. 15-ear debentures.

Levis, P.Q.—Until January 29th for $28,500 debentures. or particulars apply to Montreal Trust Company, 142 Notre ame Street West, Montreal.

North Battleford Rural Municipality No. 437, Sask.—The unicipality will borrow $15,000 for roads. F. W. Woodward, ecretary-treasurer.

Shoal Lake, Man.—Until February 15th for $12,000 5 per ent. 20-year municipal and fire hall debentures. Frank obbs, secretary-treasurer.

Lestock, Sask.—The village has been authorized to borow $1,500 for streets, fire hall and sidewalk purposes. C. S. obb, secretary-treasurer.

Petrolea, Ont.—By-laws to bonus Petrolea Motor Car Comany to the extent of $10,000 and to set aside $2,000 for maret accommodation have been passed.

Ladysmith, B.C.—Until January 27th for $7,750 6 per ent. 15-year local improvement debentures. N. A. Morrison, ty clerk. (Official advertisement appears on another page).

St. Agnes R.C.S.D., No. 22, Sask.—Until January 25th r $50,000 5 per cent. 40-year school debentures. E. J. aker, Moose Jaw, secretary-treasurer. (Official advertiseent appears on another page.)

Minnedosa, Man.—Until January 31st for $10,000 5 per ent. general debentures, and $16,500 5 per cent. 30-year local nprovement debentures. G. T. Turley, town clerk. (Official dvertisement appears on another page).

◆

DEBENTURES AWARDED

Moose Jaw, Sask.—$80,000 to Messrs. Wood, Gundy & ompany, Toronto.

Delisle, Sask.—$3,500 6 per cent. 15-years, to Messrs. W. . McKinnon & Company, Toronto.

Calgary S.D.—$975,000 4½ per cent. 10 and 40 instalents, to Messrs. W. A. Mackenzie & Company, Toronto.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to orrow money. The particulars are given in order, name and umber of school district, amount required and name of ecretary-treasurer:—

Alberta.

Locke, No. 2730, $1,200. M. Locke, Coutts.
Cosmo, No. 2820, $1,000. H. T. Jutte, Cosmo.
Richdale, No. 2414, $1,250. G. D. Miles, Edgerton.
Breedford, No. 2792, $1,000. L. M. Snow, Greenshields.

Saskatchewan.

Hallsdale, No. 1276, $700. R. Hall, Whitewood.
Kelliher, No. 2254, $500. H. E. Malone, Kelliher.
Reed Rock, No. 1314, $1,600. H. E. Soul, Brock.
Krafton, No. 1074, $2,000. W. Waugh, Fairdale.
Hartz, No. 861, $1,200. F. H. Raymond, Georgina.
Fundale, No. 686, $1,400. M. F. Gilmour, Fundale.
Wynyard, No. 2499, $18,000. R. Denovan, Wynyard.
Maypole, No. 1078, $1,850. D. H. McRae, Droxford.
Weewona, No. 855, $1,300. N. C. Stewart, Rockhaven.
Walter Scott, No. 1217, $1,200. J. Buhr, Great Deer.
Duck Lake, No. 187, $6,000. W. A. Urton, Duck Lake.
Middleford, No. 1165, $1,600. J. E. Patterson, Gooding.
Heathland, No. 1166, $1,500. W. H. Wilson, Glenhurst.
Champlain, No. 1185, $1,500. J. E. Koenders, Englefield.
Ararat Springs, No. 1064, $2,000. E. K. Leep, Cramersurg.
North Battleford, No. 1438, $8,000. H. Maher, North attleford.
Early, No. 1129, $1,150. W. J. Gallagher, Box 237, ull Lake.
North Battleford, No. 1438, $100,000. H. N. Maher, orth Battleford.

◆

The name of the Beresford Realty Company, Limited, has een changed to that of Commerce Freehold Investment Comany, Limited, and the capital stock increased from $50,000 o $200,000.

PERSONAL NOTES

Mr. F. S. Pilling has been appointed as secretary of the Vancouver Chamber of Mines.

Mr. J. S. Norris was elected a director of the Kaministiquia Power Company, Limited, at the annual meeting of the company.

Mr. Alexander Laird, general manager of the Bank of Commerce, has been elected as a director of the Imperial Life Assurance Company.

Mr. A. P. Frigon, of Messrs. St. Cyr, Gonthier & Frigon, Montreal, has just returned from an extended business trip in the old country. Mr. Frigon also visited France, Italy, Belgium, and Holland.

Mr. J. A. Glasford, late superintendent of the terminals, at the Union Depot, Winnipeg, has undertaken the industrial agency for Portage la Prairie. He will work in the manufacturing districts of Ontario and other parts of eastern Canada.

Mr. F. J. Manning, formerly manager at the High River, Alta., branch of the Dominion Bank, has been appointed manager at a branch recently opened at Port Arthur, Ontario. Mr. Gerald Murphy, of Calgary, is now acting manager at High River.

◆

SASKATCHEWAN'S LIFE UNDERWRITERS

The Life Insurance Underwriters' Association of Saskatchewan recently held their annual election of officers. The officers elected are: President, Mr. G. P. Brisbane, of the Continental Life; vice-president, Mr. W. J. Walton, of the Confederation Life; secretary-treasurer, Mr. A. H. W. Phillips, of the Travellers' Life of Hartford; executive committee, Messrs. G. A. Hogarth, of the London Life; H. A. Drope, of the British Columbia Life; W. F. Heim, of the Sun Life; H. W. Husband, of the Manufacturers' Life; and A. L. Vandrick, of the Crown Life.

The insurance men gathered at the Utopia Cafe where the annual banquet took place. The evening was spent in a social way.

Excellent progress is reported in the life insurance business, the returns for the past year in Saskatchewan out-doing all expectations, while the outlook for 1913 is prophetic of a business that will exceed that of any previous similar length of time.

◆

WESTERN RATES HEARINC

At the sessions of the Western freight rates case before the Dominion Railway Commission at Ottawa, Mr. M. K. Cowan, K.C., counsel for Saskatchewan and Alberta, discussed rates on cattle shipments in Canada and the United States. He urged that in its Series B of rate comparisons the Canadian Pacific had compared the commodity rates to the big packing-houses on Canadian Pacific lines with local rates to butchers on the other side of the line, in other words, had compared the most favorable Canadian rates with the least favorable American ones.

Mr. Cowan then submitted a list of comparisons between cattle rates from stations in Saskatchewan and Alberta to Winnipeg, via the Canadian Pacific Railway, and stations in North Dakota and Montana to St. Paul via the Great Northern Railway. The Canadian Pacific rate per carload was anywhere from $7.20 to $24.00 higher than that of the Great Northern.

Flour, grain and grain products were next dealt with, Mr. Cowan presenting figures to show that Canadian Pacific Railway rates per carload to Winnipeg as compared with Great Northern Railway rates to St. Paul for corresponding mileages were from $42 to $108 higher.

A new and reduced through grain tariff governing shipments from Canadian Pacific Railway points west of Winnipeg to points between Winnipeg and Port Arthur will be put in by the Canadian Pacific Railway as a result of a request by Chairman Drayton that the railroads speak to the question why an order to this effect should not go forth.

The new tariff will be a reduction of the former through tariff to the sum of the local rates in and out of Winnipeg. Formerly it was greater than the latter, a fact brought to the attention of the board by Mr. Cowan. Claiming that the tariff was only a paper one anyway, the Canadian Pacific Railway has agreed to reduce it.

Mr. H. W. Whitla, K.C., government counsel, announced that the exhibits he was preparing in answer to those of the Canadian Pacific Railway would be ready in a month. The main issue still remained, what should be a fair rate for the Western Provinces? The Dominion counsel had felt it their duty to show the board what the measure of reduction should be. The government case, he thought, would be ready in six weeks' time.

LETHBRIDGE FIRE LOSSES

Small Net Amount — Causes and Other Details—Adequate Protection Must be Provided

The number of calls received by the Lethbridge fire department for fires or supposed fires was seventy-six (being an increase of twenty-seven from that of the previous year). Of this number seven were false alarms.

The total loss from fire within the city limits was estimated at $6.737, and the value at risk $1,150,454.

Out of the above losses $290 was a total loss which occurred on uninsured property, all the rest being fully covered by insurance.

There was no time during the year that fire got beyond the building in which it originated.

The brigade received 35 calls between the hours of 6 a.m. and 6 p.m., and 41 between the hours of 6 p.m. and 6 a.m.

The distance travelled by machines travelling to and from fires was 114 miles, or an average of 1½ miles per fire. They were engaged 43 hours and 38 minutes, or an average of 34½ minutes per fire, the time being taken from receipt of notice until the return of brigade to station.

At these fires 1,935 gallons of chemical were used, 7,500 feet of hose were laid, and 302 feet of ladders raised.

Details of Fires and Causes

Fire Chief Hardy reports that in conjunction with building inspector Meech he regularly inspected public buildings and places of amusement. On several occasions were recommended alterations to be made for better safeguarding the public which were carried out, and only on two occasions was it necessary to prosecute, two convictions being secured.

The strength of brigade and plant is as follows:—18 permanent firemen, including all ranks; 2 fire engine stations; 2 chemical engines; 2 hose wagons; 1 steam fire engine; 1 ladder truck with 8 ladders; 9 horses; 250 feet of chemical hose; 5,150 feet of cotton rubber-lined hose; 37 fire alarm boxes.

The trades in which fires occurred were:—Automobiles, 2; bake houses, 1; brewery, 1; cafés, 2; dwellings, 23; freight cars, 3; passenger cars, 1; hotels, 3; hospitals, 1; mixing plant, 1; outhouses, 3; offices, 6; power plant, 1; prairie, 5; stores, 8; stables, 3; theatres, 1; vacant lots, 3; vacant premises, 1. Total, 69.

Causes:—Accumulation of soot, 5; boiling over, 1; burning rubbish, 7; children playing with matches, 1; defective flues, 12; defective heating, 2; defective hearth, 2; explosion (gasoline), 1; electric irons, 2; flying brands, 1; friction, 1; hot ashes, 6; lights in contact, 1; lights thrown down, 18; over-heating, 5; spontaneous, 2; sparks from chimney, 2; false alarms, 7. Total, 76.

New Station and Other Needs.

The alarms were received as follows:—Telephone messages, 60; street fire alarms, 6; civilian messengers, 7; police messenger, 1; brigade messenger, 2.

The fire chief recommends the purchasing of a site for No. 3 station in the southeast district.

Also that a five-passenger auto be purchased for a squad wagon.

Also that the fire alarm system be overhauled and brought up-to-date as follows:—One duplicate set of storage batteries; 1 battery rack; 1 punch register; red lights on fire alarm boxes; alarm lines overhauled. This would cost approximately $500, and that the following minor equipment be purchased to bring the department right up-to-date: One life net; 3 Siamese couplings; 1 perfection holder; 4 waterproof covers. Approximate cost for above would be $250.

The estimate for 1913 maintenance follows:—Feed and shoeing for 9 horses, $1,705; uniforms, rubber coats, and rubber boots, $1,000; telephones, $104; fire alarm maintenance, $200; sundries, $1,000; salaries, $17,000. Total, $21,009.

◆

The United States congressional investigation of the New Haven-Grand Trunk traffic deal in New England will not be recommended by the House Rules Committee, which has held several hearings upon the subject. It has become known that the Federal Government's prosecution of railroad officials concerned was one of the reasons for the committee's determination.

As a result of the representations recently made to the Minister of Marine and Fisheries by the Shipping Federation, represented by Mr. Andrew Allan and Mr. Robb, of Montreal, it is probable that a commission to be known as the Pilotage Commission will be appointed shortly to inquire into the pilot system of Canada, but more particularly into the St. Lawrence River and the Atlantic coast.

ST. JOHN SUFFERS FROM FIRES

Some Large Fires—Fire Chief Draws Attention to the City's Needs and Makes Recommendations

St. John, N.B., fire department responded to 210 alarms, including still alarms. One hundred and seventy-two were responded to on the east side and 38 on the west side. The following figures show approximately the insurance losses on buildings, stocks and furniture:—

Total amount of insurance at stake	$1,037,100.70
Losses paid thereon	78,690.70

Divided as follows:

Insurance on buildings	960,600.00
Losses paid thereon	29,704.00
Insurance on stocks, plant and furniture	77,250.00
Losses paid thereon	48,966.70
Uninsured losses (about)	28,291.00
Total fire losses for 1912 (approximate)	108,374.70

The fire damage for the year exceeds that of 1911. In 1911 the insurance loss amounted to $43,462; total fire loss $57,462.03.

Three Serious Fires.

Three serious fires occurred during 1912.

1. On Sunday, 19th May, on Germain Street, in Peters Block. Hutchings Bros.; insurance losses about $10,000.

2. May 26, Charlotte Street. Coffey building; Fraser, Fraser & Company; insurance loss $9,950.

3. August 26. Wilson's foundry. Hon. J. E. Wilson had only about $3,500 insurance. The estimated loss above his insurance was about $25,000. The total insurance loss at the fire was $22,210.

Chief Engineer Kerr describes in detail the department apparatus. Referring to an inventory of the department property he says the total value of the real estate and building plant amounted to $78,107; the personal (including engines, horses, etc.), $141,844, a total of $219,951.

St. John is growing, and it will be necessary in the very near future to increase the supply of fire apparatus, and additional station houses will have to be provided for. This is the condition of affairs which must be faced sooner or later and from which there can be no escape, and our citizens will no doubt insist upon being provided with adequate fire protection.

Necessary Equipment and Repairs.

The fire chief makes the following recommendations:—

1. Procuring a new boiler for No. 1 engine and repairs to wheels. Present boiler 16 years old. 2. The providing of a set of extra wheels and shafts for hose wagons in the south and north ends. 3. The purchase of three Morse Monitor nozzles. One for the north end department and the two ferry boats "Ludlow" and "Carleton." These boats thus equipped could give great assistance in case of fires occurring on wharves and water front. 4. The purchase of a proper ladder truck for use in Garleton. 5. The repairing of the different stations, such as new floors, etc. 6. The general repairing and painting of such of the apparatus as may be found necessary. 7. The installing of new fire hydrants in such localities as may be desirable. 8. The purchase of several new horses for the apparatus. 9. The consideration of reducing the present call force and in the introduction of a small permanent force and the purchase of auto apparatus. These being preliminary to larger expenditures for acquiring efficient and modern apparatus in the near future.

◆

RAP FOR ONTARIO'S HYDRO PLAN

A report advising against the adoption of a plan similar to that in Ontario, of the Hydro-Electric Power Commission, has been submitted to the New York Legislature by the joint committee, appointed in 1911, to investigate and report on the conservation and utilization of water power. The committee recommend for consideration to the legislature the history of the Consumers' Gas Company, of Toronto, where, without competition, but by governmental regulation, gas has been reduced from $1.25 per M. to 70 cents per M., under a statute automatically regulating the price to the consumers and dividends to the stockholders.

"There are a number of very extraordinary statements, for some of which there is no foundation whatever," says Sir James Whitney, commenting on the report.

The number of directors of the Terminal Cities of Canada, Limited, has been increased from five to seven

PEERING INTO PACIFIC PROVINCE'S POSSIBILITIES

Some Demands for Imposition of Duties - Peach-growing—Obtaining a Farming Population

(Staff Correspondence.)

Vancouver, January 11th.

Schemes for harbor improvement are being discussed in Vancouver and in Point Grey, and at a public meeting this week Mr. H. H. Stevens, M.P., outlined what is proposed by the government. There has been criticism from certain quarters regarding a public dock, but notwithstanding it will meet with the cordial approval of the people and of independent shipping interests. Those who take a stand in opposition are representatives of interests who have wharves on Burrard Inlet, and it is natural if the public jumps to the conclusion that they are speaking for the corporations with which they are connected. The south shore of Burrard Inlet has long wanted some piece of waterfront where boats could dock without having to patronize established interests, whether they desired to or not. The government proposes to expropriate a frontage near the sugar refinery and erect a dock, which would accommodate the largest ship coming into this port. Moreover, this would be only the beginning, though the initial expenditure is placed at a million and a quarter dollars. More docks would be provided from time to time in addition to that in the far east end of the city, and a floating crane would also be provided. With these improvements on Burrard Inlet and False Creek dredged, much increased accommodation for shipping will be furnished. It will take time to carry out these works, and it cannot be begun too soon if Vancouver is to get into the same class as Pacific coast cities to the south.

A Vancouver merchant, who has been spending some time in Southern California, reports that Los Angeles is getting very busy in spending money to get into shape for handling all increased trade that may offer, and other coast cities are providing extensive facilities. He urges action in Vancouver, that Western Canada may secure all the benefit that is expected to accrue to this territory.

Farming, Mining and Lumbering.

Why farming in British Columbia is not as profitable as it should be, and other matters bearing on the industry, is the matter of enquiry by a Royal Commission, which began sittings on Thursday. Now that the province is being developed and people congregating in the urban centres, the government is desirous of getting a farming population. To this end the commission will enquire carefully into agricultural and market conditions in the different districts of the province. Its report should be of considerable worth, for it will doubtless take up the conditions that enter into the cost of living, such as the relations between the producer, the consumer and the middleman. Even after the information is laid before the government, it will require ingenuity to frame legislation to meet the case.

The British Columbia Mining Association has forwarded a petition to Ottawa which will ask for the renewal of the lead bounty or for some other adequate protection for the mining industry. This petition was signed by practically every owner of lead mines and claims in the Slocan district.

The lumbermen are also hoping for assistance. In Vancouver the coast and interior manufacturers have been in conference, and decided to memorialize the federal government in the matter of a duty on lumber.

Growing of Peaches.

United States competition also bothers the fruit-raiser. The provincial markets commissioner has issued his report bearing on conditions during the past year, and stated that one of the unfavorable features was the importation of fruit from south of the border. A most important point of the report was that "our peach season is too late to make peach-growing a very profitable proposition from a commercial standpoint." For some years the representatives of the province in the old country have emphasized that peach-growing was the great coming industry of British Columbia, and much money has been outlaid in planting orchards. Mr. Smith might have amplified this point, or rather the whole remarks might have been included in the published report, for all recommendations in favor of peach culture made during the last ten years could not have been entirely at fault. It may be that with the earlier season in the United States the market is flooded with peaches before the local fruit is ready.

The German-Canadian Trust Company is being organized and it will include all the interests of Alvo von Alvensleben, Limited, which comprise also the Vancouver Timber and Trading Company, two coal companies and real estate holdings. Mr. Alvo von Alvensleben is [illegible] on a trip to Europe in connection with the [illegible]. The new company will have its head office in Victoria, with a large office building in Vancouver, and will do business in all the leading Canadian cities.

* * *

CANADIAN POTTERY

Is Made Principally from Imported Clay — Kaolin Deposits at Amherst

The pottery made from Canadian clays has been, hitherto, chiefly of the common grades, such as flower pots, jardinieres, crocks, jars, churns, etc. A number of potters make a higher grade product of stoneware, but the majority of these use imported clays. Sanitary ware is made at St. Johns, Que., and other points; but the raw material including clays and feldspar, is nearly all imported.

The total value of the production of pottery and clay sanitary ware in 1911, according to returns received, was $439,264, of which it is estimated that a value of $336,771 is attributable to imported clays. The value of the production reported in 1910 was $250,924, and in 1909, $285,285.

Divided Into Eight Classes.

The total imports in 1911 were valued at $2,516,536, as compared with a value of $2,283,116 in 1910. These imports are subdivided into eight classes, and in 1911 include: brown or colored earthenware, etc., $52,100; C.C. or cream colored ware, decorated, printed or sponged, etc., $184,291; demijohns, churns, or crocks, $4,933; tableware of china, porcelain, white granite, etc., $1,718,582; china and porcelain ware, N.O.P., $62,025; tiles or blocks of earthenware or stone prepared for mosaic flooring, $123,203; earthenware tiles, N.O.P., $154,351; manufactures of earthenware, N.O.P., $217,051.

Great Britain is the principal source of the imports of this class of products, but quite large supplies are also obtained from the United States, Germany, France, Austria-Hungary, Japan, Belgium, and other countries.

Development of Deposits.

Although there has as yet been no actual commercial production of china-clay or kaolin in Canada, the development of kaolin deposits in the township of Amherst, Ottawa county, and the construction of a washing or refining plant at St. Remi d'Amherst, are worthy of note.

The present operators are the Canadian China Clay Company, with a capital of $250,000. Mr. John C. Broderick, St. Remi d'Amherst, is mine manager, and Mr. Jas. G. Ross, B.Sc., consulting engineer.

The plant for refining the clay is situated two miles from St. Remi d'Amherst and seven miles from Huberdeau station, the terminus of the Canadian Northern Quebec Railway, 94 miles north-west of Montreal.

Development work was begun by the present operators in June, 1911, and the washing plant completed in April of 1912.

The clay is mined by digging, no drilling or blasting being necessary, trammed 600 feet to the plant, washed free from grit and allowed to settle. After the filter presses have extracted the surplus moisture, it is dried in the open air in stacks.

Possibilities of this Industry.

Dry kilns are being built for drying in the winter and wet seasons. After drying it will be pulverized and bagged for shipment. It is expected that an immediate market will be found in the demand of the Canadian paper mills.

The imports of china-clay, ground and unground, into Canada during the twelve months ending December 31st, 1911, were valued at $125,768, as against a value of $142,125 in 1910, and $100,066 in 1909, thus indicating to some extent at least the present actual demand for this product. The imports of earthenware and chinaware, however, valued at $2,516,436 in 1911, and composed chiefly of tableware of china, porcelain, etc., show the possibilities in the development of industries utilizing china-clays, suggests Mr. J. McLeish, chief of the division of mineral resources and statistics, in a recent report.

Kaolin or china-clay is also in considerable demand in the United States, the imports into that country in 1910 being valued at $1,593,472.

* * *

The Real Estate Loan Company, Limited, will apply for authority to increase its capital stock from $1,600,000 divided into shares of $40 each, to $2,000,000 divided into shares of $100 each.

The names of the following companies have been changed:—Windsor Fair Ground and Driving Park Association, Limited, to Windsor [illegible] Limited; [illegible] Limited, to [illegible] Limited; [illegible] Limited; Distilled Water Ice Company, Limited, to Crystal Ice Makers, Limited.

MEXICAN COMPANIES TROUBLED

Northern Power and Northwestern Railway Have Felt the Effects of Political Disturbances in the Republic

Monetary Times Office,
Montreal, January 15th.

That matters are in a chaotic state in Mexico is the statement of Mr. G. F. Greenwood, managing director of the Mexican Northern Power Company, Limited, which is largely owned in Canada. Mr. Greenwood has just returned from a prolonged stay in Mexico, and is none too hopeful of an immediate return to a condition of peace and prosperity. Amnesty has been offered to the rebels but this seems to be having little effect in tempting them to return to their homes and peaceful occupations. The government has tried to restore order, but the past few months have not witnessed marked improvement. Mr. Greenwood thinks matters may gradually improve.

Progress of the Company.

Speaking especially of the progress made by his company, he says that the development in progress should be completed by July 1st, and the company will then be able to deliver power. At the Couchos River dam there are 1,500 men at work and at Boquilla excellent progress is being made, notwithstanding the unsettled condition of the country.

The Mexican and Northwestern Railway Company is also troubled. The bridges of the company have been blown up and the lumber mills are hampered both in output and shipping possibilities. The railway runs through an excellent territory, and were it not for the hostile operations of the rebels would be doing a remunerative business.

May Ask Government to Interfere.

As a result of the heavy losses experienced by the company, it is stated at Ottawa that a movement is on foot to have the Dominion Government memorialize the British Government with the object in view of protecting the property of Canadian and British citizens. Many millions of British and Canadian money are in the Mexican Northwestern and other Mexican concerns, and these funds have been in some jeopardy during the past few years while the political disturbance continues.

◆

MONTREAL AND SHAWINIGAN POWER RIGHTS

Monetary Times Office,
Montreal, January 15th.

An announcement of much interest to shareholders of the Montreal Light, Heat and Power and the Shawinigan Water and Power Companies is likely to be made soon in connection with the rights which are likely to accrue to them through the offering of the new issues of the Cedar Rapids Manufacturing and Power Company. A special meeting of the directors of the two companies first mentioned has been held to canvass the situation and the final details of the issue have been decided. Circulars will shortly be sent to the shareholders of the two concerns advising them of the offering of $8,000,000 of new bonds of the Cedar Rapids Company and the terms upon which the offering will be made. The price may be 90 per cent. of par, a bonus of 25 per cent. of common stock to accompany the bonds. The shareholders of the two companies will likely have the privilege of subscribing in the ratio of 30 per cent. of their holdings of Power or Shawinigan.

It is about a year since the interests in control of the two concerns came to the conclusion that they required the Cedar Rapids power for their future operations and reached an understanding with Mr. D. Lorne McGibbon for the purchase of a controlling interest. The Montreal Light, Heat and Power Company is the distributing agent in Montreal for the power it develops in its own plants as well as that developed by Shawinigan. It will also distribute for Cedar Rapids.

◆

Eastern fire underwriters say that while the fire losses in New Brunswick during 1912 were about the average, the losses in the Maritime Provinces as a whole were unusually large. Several big fires in Nova Scotia ran up the total. Halifax was a big sufferer, the Woodside Sugar Refinery fire alone meaning a loss of a million. While there is no way of telling the exact amount of the destruction by fire in the Maritime Provinces, some of the insurance men estimate that the loss will run well over $2,000,000. In Berlin, which has over twice the population of all the Maritime Provinces, the average annual fire loss is only $150,000. In New Brunswick there were no very large fires, but the number of small fires was very large.

FREDERICTON'S FIRE CHIEF WANTS MOTOR APPARATUS

The annual report of Fredericton, N.B., fire department, presented by Fire Chief Rutter, shows that the alarms during the year (general and still) numbered seventy-six, only two of which were of more than ordinary proportions, namely, those in the Sharkey Block and the Queen Hotel annex. While the losses on these properties were large, the fact that they were not more serious was owing to the good work performed by the members of the department. There was also a heavy insurance loss at the premises of F. B. Edgecombe Company, Limited, but which was almost entirely caused by smoke damage.

The insurance losses for the year total $14,903.94. The losses on building being $8,326.94, and on contents $6,577, the total insurance risk on buildings and contents being $81,550.

Fire Chief Rutter, in his recommendations, said: "I have again to refer to the necessity of increased protection. I cannot too strongly impress upon the board the matter of adding to our appliances and in this line would recommend the purchase of a motor driven combination chemical and hose wagon, as well as a more modern and better equipped ladder truck, also motor driven.

"In order to house the above as well as present apparatus, I would strongly recommend the erection of two stations.

"I would also recommend the purchase at once of 500 feet of cotton rubber lined hose to supplement the 3,800 feet at present on hand, some of which has been in use so long that it cannot reasonably be expected to stand the hardest service.

"The only addition to the appliance during the year were two three gallon chemical extinguishers which have been placed on the ladder truck, and which with the two previously in use have been of great assistance at small fires."

The proposal to have two fire stations was carried by the council by a small majority.

SASKATCHEWAN CORPORATION TAXES

The Saskatchewan Provincial treasurer's bill to amend the corporation tax act was read a first time in the provincial legislature.

The house in committee of the whole fixed the following taxes under the powers of the corporation tax act.

First, every bank doing or transacting business directly or indirectly within Saskatchewan.

(a) In any incorporated city, $300.

(b) In any incorporated town, $100.

(c) For every other branch office of the bank, $25.

Secondly, every telegraph company and every railway company which owns, leases or operates a line or part of a line or lines of telegraph operated in Saskatchewan and does therein or carries on in connection therewith a general commercial telegraph business in Saskatchewan.

(a) For every branch office of company in any incorporated city, $125.

(b) For every branch office of company in any incorporated town, $50.

(c) For every branch office of company in any incorporated village, $20.

Thirdly, every express company doing or transacting business directly or indirectly within Saskatchewan.

(a) For every head office of company in every incorporated city, $250, and for every branch office of company in any city, $50.

(b) For every branch office of company in every incorporated town, $100.

(c) For every branch office of company in any incorporated village, $40.

◆

The Excelsior Brick Company has increased the amount of its capital stock from $150,000 to $250,000, such increase consisting of 1,000 shares of new stock of $100 each.

Fire Commissioner Latulippe, of Montreal, blames insu ance agents for the large number of fires. He urges upon insurance companies the necessity of exercising great care in the selection of their agents, and suggests that the names of all dismissed agents be given to the Canadian Fire Underwriters' Association, and that no such agent be employed by another company. He blames agents for a number of fires of incendiary origin, explaining that some of them force people to take out policies in excess of the value of the goods insured. The report for the past year shows that there have been fewer fires in 1912 than in 1911, there being a difference of ninety-six fires.

WILL HELP THE SETTLER

British Columbia's Premier Outlines Railway Plans—Provincial Government Will Build Wagon Roads

(Staff correspondence.)

Vancouver, January 13th

In extending New Year greetings to the people of British Columbia, Sir Richard McBride, premier ot the province, ecapitulates what has been done in the past year and outlines future developments. Plans for settlement and colonization have been discussed before, but these cannot be carried o successful completion unless adequate transportation facilities are provided, therefore the reference made to railways s significant. The first settlers in any land always live in he hope that the construction of a railway will make things oth convenient and profitable for them, and this has been the ase in British Columbia.

Sir Richard states that he has the promise of the Pacific Great Eastern officials that the construction of that railway will make a record for time in the annals of railroad building, that either this line will be continued to the Peace River ountry, and perhaps eventually to Alaska, or some other line r lines will traverse that route. British Columbia nd the Great Northern Company are more in accord than at any time previously. He points out hat much is expected on the Pacific coast as videnced by the Canadian Pacific Railway expenditures. ut it is the Canadian Northern that will mostly assist in he development of those portions of the province that at present have no railways. It will hurry its construction through nd will go ahead on Vancouver Island, where the Canadian acific Railway is also making extensions. The Grand Trunk acific also will be ready in a couple of years. The Kooteny Central is already operating part of its line. Progress is eported on the Kettle Valley road.

To Help the Settler.

In a year a great difference should be felt in many districts that have awaited transportation facilities. In addition, he government, the premier points out, is appropriating arge sums for the construction of wagon roads. The whole dea is to help the settler.

In this connection, it is noteworthy that the Canadian acific Railway has decided to sell no more land to speculators, but direct to settlers from British North America, the British Isles and Northern Europe. Moreover, to encourage he people to go on the land, the company will advance $2,000 payable in twenty years, and will furnisn live stock and oultry at cost. Schemes like these should do much to help opulate the country. The direct effect will not be felt so much n British Columbia, but it will mean much to the coast cities n time, and may serve as a suggestion to the provincial overnment.

Several proposals for the construction of drydocks on Burrard Inlet are before the government at Ottawa to receive consideration. These are all under the Subsidy Act. t is taken as a certainty that either one or two drydocks will e built.

This will not be the only improvement on Burrard Inlet. n initial grant of $5,000,000 is to be made, to be administered by a harbor commission, wharves are to be built and a overnment elevator erected. It looks as if the government will see that Canada does not suffer from not being able to ake advantage of future development on the Pacific coast.

Mining and Lumbering Returns Show Progress.

Sir Richard McBride, in his message referred to, mentions progress of the mining industry during 1912, the returns being in excess of any previously made. This doubtless has been a good thing for British Columbia. The memorial from the Trail board of trade, adopted at the convention of the associated boards of Eastern British Columbia, oints out that the mining industry labors under great disadvantages, particularly the lead mining branch. The memorial at some length, sets forth the situation and asks for the xtension of the Lead Bounty Act, which expires on June 0th next.

Lumbering is the other large provincial industry, and in his, as well as mining, a new record has been set. The increase for the year in receipts at the timber office amounted o $78,125, while the timber cut in 1912 was a great advance ver that cut in 1911, the figures being 770,000,000 feet and 05,000,000 feet respectively. Mills are all working at present, though this is the off season, and prospects are for a ontinuance of good conditions. The only drawback is the ree entry of lumber from the United States. Not much is eard of the northern part of the province this time of year, ut reports of activity continue to come in. Four hundred men are working at the plant of the Granby Company in the Portland Canal district, and the early construction of a smelter is to be begun. Contracts had been awarded aggregating $500,000, while the total expenditure in connection therewith will be a million and a half dollars. A lead stack will be put in for the custom treatment of northern ores.

French Consul's Suggestion.

M. Duchastel de Montrouge, formerly French consul in Vancouver, is here on a visit. He is of the opinion that trade between France and the Canadian West will increase in the future, especially with the opening of the Panama Canal, and he advocates strongly that the province should have a representative there. Propositions for investment are laid before the French people, and he declares it would be an excellent thing if there were some responsible and impartial representative of the province in Paris to give advice.

Mayor-elect Baxter, of Vancouver, is not unknown to those who have had to do with Vancouver's civic affairs. He is an alderman with several years' experience, and was a member in the council of 1912. The new mayor has had good experience, and is aggressive and capable.

STATISTICS OF BREWERY FIRES

The National Fire Protection Association has tabulated its record of fires in breweries, covering 100 losses. Comparatively few are equipped with automatic sprinklers, as the average brewery is of superior construction. In the cases on record the sprinklers have worked satisfactorily. The record indicates that the prevailing type of construction and the nature of the hazard resulted in much lower losses than is usual in classes so largely unsprinklered. In 42 per cent. of the cases the loss was small and in 28 per cent. the loss was moderate. In only 14 per cent. was there large or total loss.

The hazards common to all risks were responsible for the larger number of fires, accounting for 39 per cent. of all, with lightning, cooking, locomotive sparks and careless workmen the principal causes. Special hazards of the line caused 28 per cent. of all fires, and of these barrel pitching, the chief hazard of the class, was responsible for 39 per cent., malt grinding for 29 per cent., and malt drying for 11 per cent. A tabulation of brewery fire losses for a ten-year period shows that the average loss per fire has been 7 per cent. of the total value of the property involved.

Forty-eight per cent. of the fires occurred by day and 52 per cent. at night. Fifty-four per cent. occurred while the plant was in operation and 46 per cent. while it was not in operation. Fifty per cent. were discovered by an employee; 26 per cent. by a watchman and 21.8 by an outsider.

DANCER IN BURNING MOVING PICTURE FILMS

A few days ago, at Montreal, an explosion followed the throwing into the large oven of the west end incinerator, of a quantity of the celluloid substance which contains guncotton in its ingredients. Luckily, little damage was done. The picture films which were sent to be destroyed by one of the picture show establishments of Montreal, were regarded as ordinary garbage. This has been done before, but the films were in smaller quantities and nothing was thought of the little puff and the report which followed. But this time a genuine explosion occurred, which set fire to the building. The electric light connections were also burned out. The fire was quickly under control, and Superintendent Chenevert informed the board the total loss was only about $15.

Building Inspector Chausse also submitted a report in which he quoted from an authority what the picture films were made of. One of the substances is guncotton, a powerful explosive. A comment cited by Mr. Chausse was to the effect that to attempt to render celluloid non-combustible was like rendering guncotton non-explosive.

In view of the possibility of having a serious accident some day the building inspector made the following recommendation: "I think in view of the dangerous composition of the films the best way to destroy them would be to burn them in a field at least one hundred yards from any building."

The recommendation of the building inspector was noted and will be put into effect. It was resolved to communicate with the fire insurance underwriters regarding the matter.

PLEASED WITH THE PAPER

"We are very much pleased with The Monetary Times and wish it much success during the coming year."

(Signed) M. McCULLOCH,
Treasurer, Town of Kenora, Ont.
January 4th, 1913.

CALGARY'S FIRE RECORD

Shows Loss of Seventy-one Thousand Dollars — Two Large Fires Responsible for About Half of Total

During 1912 there were 380 calls sent to the fire department. The estimated total damage caused was $71,737, as compared with $24,041 in 1911 and $133.735 in 1910. The damage during 1910 was principally confined to two months March and December. Two fires of more than usual magnitude occurred during those two months, during March the fire in the J.O.E., Limited, building was the cause of more than $15,000 damage, bringing the total for that month above $22,000; during December the fire in the garage occupied by the Motor Transportation Company caused a damage of about $20,000, so that the entire damage of the year was chiefly confined to two conflagrations.

The table at the foot of this page, compiled by Fire Chief Smart, shows the total value of the risks affected by the different fires, buildings and contents, insurance and losses.

Largest Number of Alarms.

A comparison of the number of alarms for the last 19 years shows that the number was the largest during 1912, although the total loss was less than during two previous years—1909 and 1910. It will be noticed that 1898 holds the record for the least number of scares during that time, and it is very probable that that particular year will continue to hold the record for all time.

1894	10	1905	44
1895	15	1906	54
1896	10	1907	53
1897	8	1908	116
1898	6	1909	125
1899	8	1910	164
1900	19	1911	274
1901	14	1912	380
1902	19		
1903	22	T'tal number in 19 yrs.	1,411
1904	30		

	VALUE OF RISK		INSURANCE		LOSSES	
Month	Buildings	Contents	Buildings	Contents	Buildings	C'nt'ts
January	$163,250	82,200	99,500	47,000	4,030	1 190
February	163,400	50,600	73,500	26,500	535	235
March	232 225	114,175	151,500	65,500	5,433	16,390
April	376,035	182,700	225,000	46,500	4,885	1,160
May	147,500	143,400	90,900	98,500	128	30
June	277,850	222,350	158,900	132,800	1,545	425
July	137,450	121,400	85,200	78,000	315	960
August	49,450	18,200	30,600	12,000	965	237
September	207,465	115,550	111,500	74,115	1,045	2,315
October	186,625	52,750	108,200	30,300	2,195	1,010
November	548,750	829,250	244,375	144,175	1,232	3,750
December	493,450	213,810	309,650	141,900	7,327	14,400
Total	$2,983,850	2,146,385	$1,688,725	$897,290	$29,635	$42,102

This would represent a total risk of $5,130,235, total insurance of $2,586,015 and total loss of $71,737.

Eight Years' Losses Compared.

The totals as compared with the last eight years is as follows:

Year.	Alarms.	Risks.	Insurance.	Losses.
1905	44	$ 326,543	$ 108,550	$ 10,609
1906	54	513,271	312,450	25,316
1907	93	756,215	281,175	37,378
1908	116	1,188,282	627,500	67,153
1909	125	1,237,190	791,470	82,349
1910	164	1,499,936	869,404	133,753
1911	274	3,254,112	1,445,490	24,041
1912	380	5,130,235	2,586,015	71,737

The California Insurance Company has been licensed to transact fire insurance throughout Canada. Mr. John [illegible] Vancouver, has been appointed chief agent

BROAD PRINCIPLES OF WORKMEN'S COMPENSATION

Case in the British Courts Reveals Important Interpretation of Law

In a case just decided in the British Courts, which was brought under the Workmen's Compensation Act, the judge explained that he had reserved judgment not because there was any doubt in his mind as to whether the applicant was entitled to any compensation, but because he thought it was desirable to draw attention again to the broad principles which governed these cases. It seemed, he stated, to be erroneously supposed that any workman who suffered an accident was entitled under the act to be awarded compensation. But that was not the law.

The act, no doubt, gave compensation to an injured workman, but the amount of that compensation had not to be measured by the severity of the accident, but by the amount he lost in wages in consequence of the accident. Therefore, if a workman suffered an accident which at the time of his application for compensation had not diminished his wages he was not entitled to any compensation at that moment, although he might possibly become entitled to compensation if his wages were diminished at some later time. The question to be tried, therefore, was simply this—was the workman able to earn less wages than he was able to earn before the accident?

Left Eye Damaged.

In the case in question the applicant had his left eye damaged while chipping slag off a ladle on which it had accumulated, and substantially speaking, he was now almost blind in that eye. There was therefore no doubt about the serious nature of the accident, which happened on the 16th of December, 1911. The applicant returned to work on January 29, 1912, and was paid compensation down to that date. He remained at his work and received full wages up to July 6, when he ceased work voluntarily because he could not see to do his work, and the question was whether he was entitled to compensation since July 6. The first schedule of the act said, "In the case of partial incapacity the weekly payment should in no case exceed the amount of the average weekly earnings of the workman before the accident and the average weekly amount which he was earning or capable of earning in some suitable employment or business after the accident."

Plain Straightforward Work.

In the opinion of the court, the applicant was engaged in work which was suitable. It was very plain straightforward work, with no substantial risks, and certainly none which justified him in declining to work—whether he did it well or badly was for his employers to judge. Therefore, as long as they were willing to pay him his wages he was capable of earning the same wages after the accident as before.

The application, concluded the court, must, therefore, be dismissed with costs. His award, however, was not a final one, nor did the employers desire that it should be so, because having regard to the fact that the injury was to the eye, they had consented to a declaration of liability being put on the file.

◆

WAS MONTREAL CITY RESPONSIBLE?

The responsibility of the City of Montreal for damage caused to property on account of inadequate protection against fire, will be the point at issue in the case of Bouchard vs. the City, which is also up for hearing. The plaintiff is one of 35 residents whose homes were burned out some eighteen months ago. It was claimed at the time that it had been found impossible to cope with the blaze because the water supply was almost wholly deficient. The fire arose in the kitchen of a house, which formed one of a row of wooden structures, and it spread with such rapidity that, before the flames were quelled, practically the whole block of houses had been reduced to ashes.

The fate of the suit depends upon just to what extent the court will hold the city responsible for non-fulfilment of pre-annexation agreements. According to the enactment, in virtue of which Longue Pointe became part and parcel of the metropolis some three years ago, it was specified that the city would spend the sum of $300,000 in the installing and equipping of a suitable waterworks system in the ward. This, it is claimed, the city failed to do, with the result that long after annexation had become an accomplished fact, the residents were without adequate protection against fire. What hydrants there were, were far distant, whilst the fire-fighting force maintained in the ward was more or less primitive. Laflamme, Mitchell and Company are appearing for plaintiff, who claims $3,000, the value of the house burned down

MONTREAL'S FIRE WASTE

ewer Calls—Lamps and Coal Oil Poured on Fires Add to Number of Deaths—Largest Fires

Eleven persons were burned or died as a result of fires uring the past year, according to statistics compiled by the ontreal fire department for the year ending December 31st, 912. In 1911 thirteen persons lost their lives by fire.

The total number of alarms turned in during the past ear was 2,665, as against 2,717 in the previous year, or a ecrease of 52. There were 195 false alarms, 26 false automatic larms and 706 useless alarms. There were 24 second alarms nd 4 third alarms.

January was the busiest month in the matter of the numer of alarms turned in, the total being 355. The other totals re as follows: February, 257; March, 185; April, 204; May, 08; June, 208; July, 276; August, 212; September, 151; ctober, 194; November, 189; December, 233.

The most disastrous fires of the year were those of the ichelieu Hotel, on Jacques Cartier Square, which was burned n January 23rd. This was a three alarm fire.

ive Second Alarm Fires.

On January 29th the factory of Sheafer Brown was desroyed after the apparatus called on three alarms had fought r hours. There were five second alarm fires in the same onth, and on January 6th occurred the first death, when ix-year-old Marie Lousie Gingras was burned at her home, 6 Timothee Street, as a result of her three-year-old brother nocking over an oil lamp, which set fire to the infant's crib.

The fire which exacted the heaviest toll of lives was that hich on February 13th destroyed the premises of the Abbeyffervescent Salt Company, at the corner of St. Antoine and raig Streets, when Major John Rogers, manager of the oncern, was burned to death, and G. Woodburn, an employee, ied later of injuries received. The girls employed in the lace were rescued by the firemen by way of the windows.

On the 24th of the same month Miss Elizabeth Moore lost er life in a fire which broke out at 1057 Cadieux Street.

There were four second alarms in April, and in the blaze hich occurred on April 14th Miss Annie Gingras, a teacher, as cut off from the stairway by the flames in her boarding ouse, 13 Metcalfe Street, and burned to death. On May th Toussaint Veillard also died of burns sustained in a fire few days previously.

ifty Houses Destroyed.

In June there were four second alarms, one of them when id was sent to Ste. Scholastique on the 26th, and two days ter to Pointe-aux-Trembles, when some fifty houses were urned. During the course of the later fire Miss Mathieu, an valid, who had to be taken from one of the buildings in lose proximity to the burning area, died from shock.

On August 1st three alarms were sent in for a fire at the ontreal Abattoirs, which resulted in considerable damage. special call also came from St. Paul l'Ermite, where six ouses were destroyed. There were two deaths in this month. rs. Chamberlain, while pouring coal oil on the fire in the tove, was fatally burned on the 24th, and the following day rs. E. McGarr was burned to death in her home, 76 Plessis treet. In connection with this case, upon allegations made y the son of the deceased at the inquest, the woman's husand was arrested on the charge of having thrown a lighted mp at his wife in the course of a quarrel, but at the preminary court hearing, McGarr was honorably acquitted.

On 11th October, Agnes Murren died of burns sustained hree days before, by the explosion of acids when she was diping light mantles. Three of her sisters were slightly burned t the same time.

On December 11th, Rebecca Marslin, 4 years of age, was atally burned in a fire which broke out in her home, 49 Jurors treet. On the 19th of the same month, Fireman A. Laroque, f No. 6 station, lost one eye while operating a hand exinguisher during a fire at 403 Cadieux Street.

eavy Loss in November.

The largest fire in November was that which broke out n the evening of the 3rd, and destroyed the premises of the onsumers Cordage Company at 283 St. Patrick Street, lack f water due to the breakdown of the pump at the city waterorks in Point St. Charles being responsible for the rapid pread of the flames and the consequent heavy damage.

During the year, according to the figures, which for Deember, have not been completed, 1,353 streams were laid, 94,810 feet of hose used. 2,460 salvage covers spread, 67,489 eet of ladder raised, 1,661 babcocks utilized, 1,071 buckets ere called into use, the chemical engine was occupied seven imes and the steamers called into commission 118 times.

The men of the salvage corps, under Captain Taylor, did ood work during the year and saved thousands of dollars orth of property from damage by water. The wagon of No. station, Chaboillez square, in charge of Lieutenant Boucher, responded to 487 alarms. The men used 145 hand extinguishers, four streams and spread 1,855 covers. The wagon of No. 5 station, Berthelet Street, of which Lieutenant Deschamps has charge, responded to 489 alarms. The men used 53 hand extinguishers and spread 1,228 covers. The wagon of No. 7 station, corner of Beaudry and Notre Dame Streets, under Lieutenant Jodoin, responded to 431 alarms. The men used 21 hand extinguishers and spread 786 covers. The men of ten ladder trucks in stations on the outskirts of the city spread 331 covers during the year.

BANK BRANCHES OPENED AND CLOSED DURING DECEMBER

Thirty-two branches of Canadian chartered banks were opened during December and twelve closed. The following table gives details of the branches opened and closed during previous months this year:—

Month.	Opened.	Closed.
January	20	5
February	16	3
March	38	0
April	24	8
May	50	6
June	21	7
July	20	0
August	17	15
September	25	5
October	39	6
November	30	12

Houston's Bank Directory gives the following particulars for December:—

Branches Opened and Closed, December, 1912.

Sussex, N.B.	Royal Bank of Canada.
Assiniboia, Sask.	Union Bank of Canada.
Loverna, Sask.	Union Bank of Canada.
Morse, Sask.	Union Bank of Canada.
Alma, Ont.	Royal Bank of Canada.
L'Epiphanie, Que.	Royal Bank of Canada.
Belize, British Honduras	Royal Bank of Canada.
Lambeth, Ont.	Royal Bank of Canada.
Nuevitas, Cuba	Royal Bank of Canada.
Assiniboia, Sask.	Weyburn Security Bank.
New Port, B.C.	Union Bank of Canada.
Port Arthur, Ont.	The Dominion Bank.
Laurentides, Que.	Banque Provinciale du Canada.
Port McNicoll, Ont.	Canadian Bank of Commerce.
Fort St. Victoria, B.C.	Royal Bank of Canada.
St. Malachie, Que.	Banque Provinciale du Canada.

367 Main Street, Winnipeg, Man.	Canadian Bank of Commerce.
Upton, Que.	Canadian Bank of Commerce.

BRICKS FOR BUILDING AND FIREPROOFING

New Western Plants—Rapid Increase of Imports—Paving and Sand Lime Production

The total production of clay building brick, including the common and pressed varieties, and ornamental, paving fire-brick, and fireproofing brick, is shown in the following statistics.

In 1911 the total sales were 732,901,056, valued at $6,515,472, made up of 645,550,517 common, valued at $5,420,890, or an average value per thousand of $8.37; and 87,350,539 pressed brick, valued at $1,094,582, or an average value per thousand of $12.53. In addition to the common and pressed brick there was a production of ornamental brick of 605,643, valued at $11,281, and a production of fireproofing brick and architectural terra-cotta valued at $409,585.

Demand Has Been Strong.

In 1910 the production was 627,715,319 common brick valued at $5,105,354, or an average value per thousand of $8.13; and 67,895,034 pressed brick, valued at $807,294, or an average value per thousand of $11.89; the total of the two classes being 695,610,353, valued at $5,912,648. The production of ornamental brick in 1910 was 703,345, valued at $16,092; and of fireproofing and architectural terra-cotta, $176,979.

The increase in production of fireproofing has been particularly marked, and is due to the establishment of new plants, including the National Fire Proofing Company of Canada at Hamilton, Ont., and the Alberta Clay Products Company, Limited, of Medicine Hat, Alta.

The demand for brick has been very strong, particularly throughout the west, where numbers of plants are being increased in capacity and many new plants either contemplated or in course of construction.

Exports Are Very Small.

The exports have never been large, averaging for a number of years past about $6,000 in value per annum, but falling in 1910 and 1911 to $2,762 and $3,977, respectively, according to the latest report of Mr. J. McLeish, B.A., chief of the division of mineral resources and statistics. The annual imports for a number of years previous to 1903 averaged only about $20,000 in value. During the past eight years, however, the imports have rapidly increased from $100,000 to nearly $500,000 per annum. During the calendar year 1911 the imports were 51,102,000 brick, valued at $475,865; of which 6,404,000, valued at $72,675, or an average of $11.35 per thousand, were imported from Great Britain; and 44,698,000, valued at $403,190, or an average of $9.02 per thousand, from the United States. The imports during the calendar year 1910 were 29,049,000 brick, valued at $274,482; of which 1,993,000, valued at $26,447, or an average of $13.27 per thousand, were imported from Great Britain; and 27,056,000, valued at $248,035, or an average of $9.45 per thousand, from the United States.

Production of Paving Brick.

The total production of paving brick and paving blocks in Canada in 1911 was reported as 5,220,400, valued at $79,444, as compared with a production of 4,215,000, valued at $78,980 in 1910.

This paving brick is made at West Toronto, Ont., from shale obtained from the banks of the Humber River. The annual production has for a number of years varied from 3,000,000 to over 5,000,000 per season, and the output finds a market chiefly in Toronto. The average price per thousand has varied from $8 to $20.

The imports of paving brick have during the past three years exceeded the domestic production. During the calendar year 1911 the imports were 11,450 thousand, valued at $164,292, or $14.34 per thousand, and included 4,988 thousand, valued at $78,201, or $15.68 per thousand, from the United States, and 6,462 thousand, valued at $86,091, or $13.32 per thousand, from Great Britain. The imports during the calendar year 1910 were 10,503 thousand, valued at $124,994.

Sixteen Firms Produce Sand-Lime Brick.

The manufacture of sand-lime or silica brick, although of comparatively recent origin in Canada, has developed with considerable rapidity during the past five years, for which statistics have been collected.

Returns received from sixteen producing firms showed total sales in 1911 of 51,535,243 brick, valued at $442,427, or an average of $8.58 per thousand, as compared with a production of 44,593,541 brick, valued at $371,857, or an average of $8.34 per thousand, by thirteen firms in 1910.

The total sales by nine firms in 1909 were 27,052,864 brick, valued at $201,650, or an average of $7.45 per thousand.

The number of men employed in 1911 was 337, and wages paid, $166,902.

FARMERS BANK AFFAIRS

At another special sitting in the Farmers Bank enquiry in Toronto, Sir William Meredith heard the evidence of W. R. Travers, Dr. John Ferguson, Alexander Fraser, A. S. Lown, and Accountant Fitzgibbon in regard to the method used in raising a part of the $250,000 deposited with the Treasury Board by loans secured on subscribers' notes, and also in regard to an allotment of stock which occurred subsequently to an announcement of it. In regard to the first matter, Mr. Travers testified that all of the provisional directors were aware that the money had been raised by discounting subscribers' notes, but could offer no light on the second question. He could not recall the circumstances of the transaction. Asked for an explanation of the fact that the organizing expenses, given in the minutes as $44,403.65, were reported to the shareholders as amounting only to $41,291, and in the bank's books as $32,127, he could offer little explanation, but stated that Mr. Fitzgibbon was at the time making adjustments to make the books balance. Neither could the accountant explain the matter.

Mr. A. S. Lown said that he had taken no pains to check the figures of the bank's minutes and reports, and in regard to the money raised upon the notes, stated that he knew merely that it was obtained upon these notes, not the means used of getting it. He had no recollection of a resolution authorizing the endorsement of notes to the provisional directors for the purpose of raising money for deposit with the Treasury Board.

Mr. W. H. Thurston, K.C., assistant Crown prosecutor, states that the case of Dr. Beattie Nesbitt, who is charged with five different offences under the Bank Act, will not be tried for the present. Mr. Thurston declined to say whether or not the Crown would allow Mr. H. Hartley Dewart, K.C., to plead for Dr. Nesbitt in his absence. It is doubtful whether Dr. Nesbitt will be able to appear in court on account of his physical condition. The indictment against him will stand.

A memorial will be presented at Ottawa by the shareholders and depositors of the Farmers Bank. This memorial, which has been prepared by the counsel representing the shareholders and depositors, recites the history of the organization of the bank, and sets forth many reasons why those who lost their savings in the bank should be reimbursed by the government.

North Cobalt—Silver Ore—	
General Mines	32.4

◆

We have reason to congratulate ourselves on the continued prosperity of the country, which shows no sign of abatement. The present outlook could hardly be better. At the same time, we should be cautious in our optimism.—Mr. H S. Holt, at Montreal.

MONTREAL MAN AND JAMAICA DRY DOCK

He Says the Government Will Give Many Concessions, but Government Has Not Much to Say About It

The dock enterprise of one Mr. W. B. Chapman, of Montreal, has attracted some attention in Jamaica, Montreal and elsewhere. According to literature of Mr. Chapman, he proposes to establish at Kingston, Jamaica, a large floating drydock to repair vessels, and also a coaling station, fuel oil tanks, a foundry, machine shops, water hydrants and marine supplies generally. His company is called the Port Royal Floating, Dry and Coaling Docks, Limited. The following are some of Mr. Chapman's optimistic statements:—

"Kingston is bound to be a great port when the Panama Canal open in 1913. There are several big lines, which now converge there, such as the Royal Mail S.P. Company, Hamburg American, Elder Dempster and United Fruit Company, of America. These alone run over 200 large steamers. The business of the canal will probably exceed that of the Suez and Soo Canals in tonnage. Both sides of the Isthmus the coasts are shallow and dangerous, making the percentage of accidents large, especially at first, the surveys and charts at present being very incomplete, inaccurate and unreliable.

"The opening of the canal will divert tonnage from every quarter of the globe to that route, and as a rule the officers will be unfamiliar with those seas, and the coral reefs abounding there, where few pilots are available, and those, poor ones. A vessel coming from Liverpool, Europe, or New York, and going to the Far East or Pacific ports, makes her first port of call for coal at Kingston, and returning, it is her last one. It is 5,000 miles to Liverpool, 4,000 to Gibraltar, ,600 to New York, and from Kingston to Colon (the canal) 580 miles. Accidents will be many, and no facilities exist for prompt assistance to vessels in distress. That steamers require coal after these long voyages, goes without saying.

"The harbor of Kingston, (Port Royal), is one of the inest in the world, being over 7 miles long by 2 to 3 wide vith 10 to 25 fathoms water, a sheltered anchorage, with only 8 inches tide. It will accommodate the British Fleet, and is trongly fortified.

ays the Government Will Give.

"The intention of this company is, to build a first-class loating dock in England and tow it over, meantime building he coaling station and workshops on land given free by the overnment for that purpose. The government will give:—st. A 30-year exclusive franchise. 2nd. A valuable harbor ite free. 3rd. Admit dock and all the materials, duty free. th. Take a block of deferred shares in the company of about 500,000.

"The cost of all, is estimated under $2,000,000, and a ear is required to build and deliver the dock and works. The evenue is estimated to pay 7 per cent. or 8 per cent. on that apital. It is proposed to raise this on bonds and common tock. The legislature meets there in November, when the greement with the government must be ratified, and the conession awarded, so that prompt action is necessary to secure .

"I can give further information if desired, and have had reliminary plans and estimates prepared, which I will be leased to show. They are from information furnished by the amaica Government and other reliable sources. I shall be lad to have you interested in this enterprise, which will unoubtedly be exceedingly profitable."

uestions Asked in the Legislature.

The Monetary Times is informed that the government t Kingston is under no obligation to grant the facilities menoned above. On December 19th, 1912, a Mr. Ronaldson, in e legislative council at Kingston, Jamaica, asked the acting olonial secretary (1) whether the attention of the government as been drawn to a prospectus issued by a company in Monteal, stating that the government of Jamaica will submit to e legislative council a vote of $500,000 for a subsidy for the nstruction by the company of a dock in Kingston harbor?

(2) Has the government entered into negotiations with y company with the object of constructing a dock? If so, ith whom?

(3) Has the government received an offer to construct a ock and open a passage through the Palisados near Harbor ead without subsidy?

hat the Government Said.

The colonial secretary replied as follows:——

1. The attention of the government has been drawn to a ocument issued by Mr. W. B. Chapman, of Montreal, in hich it is stated that this government will take a block of out $500,000 deferred shares in a company projected for the tablishment of a floating dock and other works at Kingston arbor.

2. Proposals have been made by Mr. Chapman to the government for the establishment of a floating dock at Kingston Harbor, and correspondence has passed on the subject.

3. Application was made to the government in the year 1910 for permission to cut a canal through the Palisadoes, and for facilities for making a dock, without subsidy, but with exclusive wharfage rights within a distance of one mile on each side of the canal.

The answers of the acting colonial secretary indicate that the government was very guarded in their reply.

Views From Jamaica.

A correspondent of The Monetary Times at Kingston, Jamaica, thinks that if a proposal were submitted to that government on sound lines and by persons who could give a guarantee of their financial ability to complete their undertakings, the government of Jamaica would be willing to assist by concessions, such as free site, etc., although he does not think they would be inclined to take stock in such an enterprise. In his opinion, the primary requisite for success would be the making of Kingston harbor a free port.

The United States Government are making full provisions on the Isthmus of Panama to take care of any business that may offer in the way of marine repairs, docking and supplies, including coal. It is not therefore, reasonable to suppose that ship-masters or ship-owners will sail their vessels fifty or sixty miles out of their course to get what they can obtain on their direct route with equal facility and equal price.

The proposal of Mr. Chapman, of Montreal, does not appear to be taken very seriously in Jamaica. A letter addressed by The Monetary Times to him on January 3rd, asking for some information regarding his enterprise, remains unanswered.

◆

BANK CREDIT IN RUSSIA

A consul at Kharkov, Russia, writing on the system of bank credit prevailing in that country, states that "the usual form of procedure is for the firm requiring credit to apply to the bank, naming the sum they wish to borrow, and giving such information as the bank may require to enable it to judge of the financial standing of the firm. Printed forms for filling in can be had at the bank for this purpose. In most cases credit is taken from several banks, thus distributing the risk. The promissory notes to be deposited with the bank are endorsed by the person obtaining the credit under the clause "value received from———Bank." About 90 per cent. of the value of the promissory note is generally advanced by the bank. These promissory notes are not circulated, but remain in deposit at the bank, and when they become due are withdrawn and replaced by others payable at a later date. The bank will also take upon itself, if desired, the collection of the money, charging a commission. Generally ½ per cent. above the official bank rate is charged for such credit.

"The system of 'promissory notes renewable at six-monthly intervals up to the termination of the sales' credit' is, of course, an arrangement between the foreign manufacturere and his Russian agent. The former can only use six months' promissory notes for depositing in the bank, while he sells to his agents on eighteen to thirty months' credit (this is a term of credit by no means unusual in the trade with flour milling machinery, gas engines, etc.). An agreement on the following lines is drawn up between the manufacture and his agent or customer—(1) that the sale is made payable on such and such terms—say, one-third every six months; (2) that the agent has to give the manufacturer six months' promissory notes for the full amount (3) that after six months the manufacturer accepts one-third in cash and two-thirds in new promissory notes and returns the original promissory notes; and (4) that these promissory notes will not be circulated, and are solely to be used for the purpose of deposit with a bank.

"This method, of course, requires a certain amount of mutual confidence, but it is frequently practised. The purchaser or agent puts himself at the mercy of the manufacturer, and the manufacturer might be put to very severe straits if the bank refused the exchange of the promissory notes when they become due. It must be borne in mind, however, that all these are working for their mutual interests. It is not in the bank's interest to cripple or bankrupt the manufacturer, and it would ruin the manufacturer's trade if he treated his customer unfairly. It may be argued that the critical time will come, a pause and general ruin, in case of national calamity, such as war, or famine. Russia has passed through all these stages between [illegible] and 1907, and hardly any money was lost through this banking operation; on the contrary, it is extraordinary how little money was lost during these years. Where firms failed they were the financially weak ones who could not get the bank credit, which is limited to businesses of sound financial standing, and these can safely reckon on support from the banks in time of trouble."

FINAL CROP RETURNS

Nearly Two Hundred Million Bushels of Wheat Produced in Canada Last Year

Final estimates of the yield and value of the principal field crops of Canada for the season of 1912 have been issued by the census and statistics office of the Department of Trade and Commerce. Upon a total area under field crops of 32,474,000 acres a harvest has been reaped, the value of which, calculated at average local market prices, makes a total of $509,437,000. The area under wheat last year was 9,758,400 acres, of which 781,000 acres represents the harvested area of fall wheat grown principally in Ontario and Alberta, and also to a limited extent in Manitoba, Saskatchewan and British Columbia.

The total production of wheat was 199,236,000 bushels of the value of $123,522,000. Fall wheat produced 16,396,000 bushels of the value of $13,735,000. Oats upon 9,216,900 acres yielded 361,733,000 bushels of the value of $116,996,000. Barley upon 1,415,200 acres yielded 44,014,000 bushels of the value of $20,405,000, and flax upon 1,677,800 acres yielded 21,681,500 bushels of the value of $19,626,000.

Prices and Yields.

By comparison with 1911 the results of last year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans, and corn for husking, were also lower. On the other hand oats yielded about thirteen and a half million bushels more than in 1911, and the following crops also show more or less an excess yield:—Barley, buckwheat, mixed grains, flax, potatoes, turnips, etc., fodder corn, sugar beet and alafalfa.

Average Yield Per Acre.

The average yields per acre for the year 1912, compared with 1911, are as follows:—Wheat, 20.42 bushels, against 20.87; oats, 39.25, against 37.76; barley, 31.10, against 28.94; rye, 17.44, against 18.89; peas, 14.98, against 15.80; buckwheat, 26.34, against 22.69; mixed grains, 33.67, against 29.78; flaxseed, 12.92, against 11.41; beans, 17.40, against 19.06; corn for husking, 56.58, against 59.59; potatoes, 172, against 144; turnips, etc., 402, against 374; hay and clover, 1.44 ton, against 1.61; fodder corn, 10.26 tons, against 9.92; sugar beets, 10.74 tons, against 8.66; and alfalfa, 2.79 tons, against 2.24.

The quality of the grains of cereals as shown by average weight per measured bushel is somewhat inferior to that of last year in the case of wheat, rye, peas, mixed grains and flax, but is superior in the case of oats, barley, buckwheat, beans and corn for husking.

In the Prairie West.

In the three North-West Provinces of Manitoba, Saskatchewan and Alberta, the production of wheat is placed at 183,322,000 bushels, compared with 194,083,000 bushels in 1911; of oats at 221,758,000 bushels, compared with 212,819,000, and of barley at 26,671,000 bushels, compared with 24,043,000 bushels. The wheat production of 1912 in Manitoba was 58,899,000 bushels from 2,653,100 acres; in Saskatchewan, 93,849,000 bushels from 4,891,500 acres; and in Alberta 30,574,000 bushels from 1,417,200 acres.

Conditions as affecting live stock are reported to have been much the same as those of 1911. Mild weather through the fall and up to Christmas enabled the farmers to economize their feeding supplies, and live stock have entered their winter quarters in excellent condition.

◆

Though the anticipated output of 5,000,000 tons was not reached by the Dominion Coal Company last year, the figures will be quite near that goal. An approximate output for the year gives the total as 4,950,000, or over 700,000 better than the 1911 output. Practically every one of the Nova Scotia collieries will register an increased output in 1912, and the Commissioner of Mines will be able to make up for his government the largest royalty payment yet recorded.

The Transcontinental Railway Commission has made a total expenditure of $116,517,691 since organization in 1904. This does not include any interest on capital expenditure or any refund of expenditure on Quebec bridge approaches. For the past fiscal year the expenditure was $21,110,993. The total grading done to the end of the fiscal year was 1,609.94 miles; track laying, 1,427.02 of main line, and 275.51 of sidings. The contracts for steel bridge superstructures totalled 51,879 tons of steel. The report of Chief Engineer Gordon Grant gives the total length of the line from Moncton to the west side of Water Street, Winnipeg, as 1,804.73.

MOOSE JAW NEEDS MORE FIRE PROTECTION

Rubbish is the Greatest Evil With Which Fire Chiefs Have to Contend—Preventive Legislation

Moose Jaw needs modern fire fighting apparatus and has outgrown its present alarm system, is Chief Baines' announcement to the city council in his annual report. The new central office equipment should be installed at once, also the outside wiring completely remodelled, dividing the city into at least five or six alarm circuits, and more alarm boxes should be installed. The council of 1912 passed a resolution that $120,000 be placed in the first fire protection by-law to do that work. The amount required to build three new stations, provide them with the necessary equipment and apparatus, motorizing the central station, remodelling and perfecting the alarm system, would be about $178,000. That would give the city the fire protection it required, with the exception that South Hill would require a new station shortly to accommodate a ladder truck. He urged the building of the stations at the earliest possible date. That programme would pay for itself in the reduction that would be received in the insurance rates now charged.

The department must have an aerial truck with at least seventy-five feet ladder. The high pressure system would require a special hose wagon. They would require new low pressure hose wagons. The central apparatus was different in many ways from that of the sub-station, and it would not be well to equip central with new out-of-date horse-drawn apparatus.

City's Growth Demands Improvements.

The west end of the city was being built with wholesale houses, factories, lumber yards, oil storage, etc., and heavy fires might occur in that section. The horse-drawn apparatus in the centre should be transferred to the sub-stations and new up-to-date motor driving apparatus installed in the central. The east end has needed a station for some time, as it was well built up. The majority of buildings throughout the city were built of inflammable material which made it necessary to keep the fire department up-to-date to prevent a conflagration.

Moose Jaw had the distinction of being the last city of any importance in the west that had not purchased two or more pieces of motor apparatus. There were several buildings in the city now too high for their longest ladder and several more under construction.

Must Remove Causes.

Through the summer the cellars and yards were kept as free as possible from combustible rubbish, but the excuse given by the occupants was that the people could not get teams. He would suggest that the city put on teams and undertake the collecting and disposing of that rubbish, charging a fee for the same. Combustible rubbish was perhaps the greatest evil a fire chief had to contend with. It was peculiar that the public must be protected against themselves in those respects. The by-laws governing same should be revised and amended.

The building by-law should be amended or enforced. The practice of allowing the erection of frame buildings and shingled roofs, even temporarily in the city should not be allowed. All shingles should be laid on asbestos paper weighing at least 14 lbs. to 100 square feet in all parts of the city. That was a great preventative against fires spreading from burning embers and paid its cost in reduction of insurance.

Provide Fire Escapes.

All buildings three stories or over should be provided with ample fire escapes, and having the outside stand pipe built with private siameses and hose connections at each floor and on the roof for the use of the fire department. All buildings abutting on lanes should have metal sash and wired glass.

More strict regulations governing buildings used by moving picture theatres or any buildings where there were large gatherings of the public should contain a clause providing that before the city issue a license or the building was used, applicants must produce a certificate from the building inspector and chief of the fire department certifying that the building was considered safe for public gatherings.

◆

In Ontario, the fire tax amounts to seventy-three or seventy-five cents per hundred dollars collected, while in Alberta, where rates are particularly high, the rate is $1.04, in Manitoba $1.58 and in Saskatchewan $1.01. In New Brunswick the rates are $2.04 and in Nova Scotia approximately $2,00 a hundred. In Quebec, a stated sum is imposed. The insurance companies have to pay $500 irrespective of the amount of business they do.

CANADA'S STEEL INDUSTRY

Producers, Products and Production — Imports and Exports of Iron and Steel Goods

The production of steel ingots and castings in 1911 was 882,396 tons, as compared with 822,284 tons in 1910 and 754,719 tons in 1909. In 1911 the production of open-hearth ingots was reported as 651,676 tons; Bessemer ingots, 209,817 tons; direct open-hearth castings, 20,163 tons, and other steels, 740 tons. The total increase in production over 1910 was 60,112, or a little over 7 per cent. The production during the five years, 1907-1911, follows:—

	1907. Tons.	1908. Tons.	1909. Tons.	1910. Tons.	1911. Tons.
Ingots — Open-hearth (basic)	459,240	443,442	535,988	580,932	651,676
Bessemer (acid) ...	225,989	135,557	203,715	222,668	209.817
Castings—Open-hearth	20,602	9,051	14,013	18,085	20,163
Other steels	1,151	713	1,003	599	740
Total . ..	706,982	588,763	754,719	822,284	882,396

Statistics showing the quantities of the principal materials used in steel furnaces were obtained for the first time for the year 1910, and it may be of interest to refer to these here. The total quantity of pig iron used in steel furnaces during 1911 was 700,679 tons, of which 640,636 tons were produced by firms reporting, and 60,043 tons purchased. The quantity of ferro-alloys used was 21,359 tons purchased. Scrap, etc., was used to the extent of 278,797 tons, being 198,482 tons produced by the firms reporting, and 80,315 tons purchased. Ores used included 829 tons of manganese ore and 42,892 tons of iron ore, while 130,270 tons of limestone or dolomite flux were used and 8,067 tons of fluorspar. In Ontario a little over 662 million cubic feet of natural gas were used, while in Nova Scotia coke oven gas was used at Sydney, of which a record of quantity is not obtained.

Production and Producers.

In 1910 the total quantity of pig iron used in steel furnaces was 690,913 tons, of which 601,219 tons were produced by firms reporting and 89,694 tons purchased. The quantity of ferro-alloys used was 8,143 tons purchased. Scrap, etc., was used to the extent of 211,453 tons, being 140,913 tons produced by the firms reporting and 70,540 tons purchased. Ores used included 1,317 tons of manganese ore and 39,332 tons of iron ore, while 144,110 tons of limestone or dolomite flux were used and 7,461 tons of fluorspar. In Ontario a little over 600 million cubic feet of natural gas were used.

Statistics of the production of steel ingots and castings since 1900 are given in the following table:—

Calendar year.	Short tons.	Calendar year.	Short tons.
1900....	26,406	1906................	639,396
1901................	29,214	1907................	706,982
1902	203,881	1908................	588,763
1903................	203,296	1909................	754,719
1904................	166,381	1910................	822,284
1905................	451,863	1911..	882,396

Blooms, Billets, Slabs, etc.

Mr. J. McLeish, chief of the division of mineral resources and statistics, shows that while complete statistics of the production of rolled products and of manufactured steel were not available, returns from seven of the largest producers showed a production of blooms, billets, slabs, etc., of 737,261 tons, of which 719,514 tons were used by the producer for further manufacture, and 17,747 tons sold to other rolling mills.

The production of rails was 399.760 tons; of rods, 85,811 tons; of bars, 199,623 tons, and of other rolled products, 65,076 tons. The production of steel rails in 1910 was returned as 399,762 tons, and in 1909, 377.642 tons.

The production of finished rolled iron and steel in Canada from 1909 to 1911, as ascertained and published by the American Iron and Steel Association, was as follows, in long tons:—

	1909.	1910.	1911.
Rails	344,830	366.465	360.547
Structural shapes and wire rods	74.136	80,993	76,617
Plates and sheets	36.241	26.642	14.833
Nail plate, merchant bars, and all other finished rolled forms	207,534	265,711	323.427
Total	622,741	739,811	775,424

Since 1896 a total of $16,785,827 has been paid by the government of Canada in bounties for the production of iron and steel.

Exports and Imports of Iron and Steel Goods.

The total value of iron and steel goods, including agricultural implements, automobiles and bicycles, exported from Canada during 1911 was $9,907,281, as compared with a value of exports in 1910 of $7,895,489, and in 1909 a value of $7,172,413. Of the total exports in 1911, stoves, gas buoys, castings, machinery, and hardware contributed a total valuation of $1,242,006; pig iron, $271,968; scrap iron and steel, $54,618; steel and manufactures of steel, $769,692; agricultural implements, $6,281,929, and automobiles and bicycles, $1,287,068. Particularly large increases are noted in the exports of agricultural implements and of automobiles and bicycles.

The total value of the imports during the fiscal year ending March, 1911, was $85,319,541, as compared with the valuation of imports in 1910 of $59,952,197, and $40,393,431 during the fiscal year 1909. These imports include all classes of iron and steel goods manufactured, as well as those of a crude form. In many cases the imports of manufactured goods are given only in dollars, so that the total tonnage of imports cannot be estimated. In the case of most of the cruder materials, however, the quantities are given, and a compilation of these shows a minimum importation of iron and steel during the fiscal year ending March, 1911, of 1,284,401 tons, as compared with 915,425 tons in 1910 and 565,734 tons in 1909.

The record shows an importation in 1911 of ingots, blooms, billets, puddled bars, etc., of 48,395 tons; scrap iron and scrap steel, 53,824 tons; plates and sheets, 205,690 tons; bars, rods, hoops, bands, etc., 183,865 tons; structural iron and steel, 345,350 tons; rails and connections, 36,690 tons; pipe and fittings, 28.831 tons; nails and spikes, 3,099 tons; wire, 64,850 tons; forgings, castings, and manufactures, 24,523 tons.

The total value of the 1,284.401 tons imported was $33,766,865, or an average value per ton of $26.29. Other iron and steel goods of which the weights are not recorded were imported to the value of $51,552,679, making up the total value of $85,319,541.

Largely from United States.

A very large proportion of these imports is derived from the United States, and it may be of interest here to quote from the records published in the "Commerce and Navigation of the United States," showing the exports of iron and steel goods from that country to Canada.

According to this authority there was exported to Canada from the United States during the twelve months ending June 30th, 1911, 821,526 tons of iron and steel goods, valued at $25,544.421, together with other iron and steel goods of which the weight is not given, valued at $38.738,575, or a total value of $64,282,996.

During the twelve months ending June 30th, 1910, the corresponding exports to Canada were 574,807 tons, valued at $19,673,740, together with other iron and steel goods to the value of $28,153,628, or a total value of $47,827,368. Iron ores are not included in either case.

The imports of some iron and steel products of which the weights are available follow:—

Material.	Twelve months ending March.	
	1910. Tons.	1911. Tons.
Pig iron	159,506	270,102
Ferro-products and chrome steel	15,153	19,182
Ingots, blooms, billets, puddled bars, etc.	36,819	48,395
Scrap iron and scrap steel	28,797	53,824
Plates and sheets	200,575	205,690
Bars, rods, hoops, bands, etc.... ...	117,159	183,865
Structural iron and steel	195,748	345,350
Rails and connections	55,183	36,690
Pipes and fittings	16,705	28.831
Nails and spikes	3,476	3,099
Wire	68,211	64,850
Forgings, castings and manufactures	18,093	24.523
Total	915.425	1,284.401

◆

Mr. James Adams, who was convicted on an arson charge by Judge Macbeth, and whose threats against the lives of the prosecutor, Mr. John R. Waters, a farmer who employed him, and court officials, caused the question of his sanity to be investigated, has been committed to Hamilton Asylum for the Criminally Insane. Adams set fire to Waters' barn following an altercation, and several thousand dollars' loss was occasioned. The police believe that he is the same man who fired the barns of a farmer named Beattie in Westminster Township four years ago.

SOVEREIGN FIRE IN UNITED STATES

State Insurance Department's Report Shows Considerable Improvement in the Financial Condition

A report of an examination by the New York Insurance Department of the United States branch of the Sovereign Fire Assurance Company, of Toronto, has been issued. It shows that an improvement in the financial condition of the company's affairs in the United States has taken place between September 30 and December 31, 1912. On the former date the examiners found that the liabilities exceeded the assets by $14,222, but on December 31 this had been changed to an excess of assets over liabilities of $162,122. This improvement was in part due to remittances from the home office aggregating $79,000. The underwriting experience of the company in the United States as computed by the examiners, shows a loss ratio on earned premiums from December 31, 1910, to September 30, 1912, of 90 per cent. and an underwriting expense during that time of 54 per cent. of the earned premiums. The following are extracts from the report as published in the New York press:—

The present examination was commenced on October 7, 1912, and so serious a financial condition was at once disclosed that a preliminary report was submitted to you under date of October 9, 1912. This report showed, that under the capital statement requirements as provided for in section 27 of the insurance law of this State, the minimum deposit capital of $200,000 had been wiped out and liabilities exceeded the assets by $14,222.34.

The capital statement referred to in the preceding paragraph and which was found on thorough examination to be approximately correct shows the company's condition on September 30, 1912, to have been as follows:

Assets.

	Par value.	Mkt. value.
Securities deposited with the Superintendent of Insurance of the State of New York	$211,000.00	$210,800.00
Securities vested and held by trustees	303,048.21	285,290.28
Total assets in the United States		$496,090.28

Liabilities.

Unpaid losses	$102,374.47
Unearned premiums	348,104.90
Due for reinsurance	51,833.25
Accrued liabilities	8,000.00
Total liabilities	$510,312.62
Excess of liabilities over assets	14,222.34

General Financial Statement.

As previously noted in this report, the company was admitted to transact business in the State of New York in November, 1910, and in due course, pursuant to the regulations of the insurance department, filed with the superintendent of insurance a "general financial statement" for the year ending December 31, 1910. This statement showed a surplus to policyholders of $388,085.96, and by charging the minimum deposit capital as a liability the assets exceeded all liabilities by $188,085.96.

The "general financial statement" as of September 30, 1912, set forth in the foregoing pages of this report shows that the surplus over all liabilities is wiped out and that the minimum deposit capital is impaired in the sum of $129,043.25. It would, therefore, appear that during the period of one year and nine months ending September 30, 1912, the company has sustained a concurrent decrease of assets and increase of liabilities amounting to the total sum of $317,129.21.

Heavy Losses Were Sustained.

In order to ascertain the particular reason for the extinguishment of the company's surplus, as shown by its annual statement for the year ending December 31, 1910, and the impairment of capital as evidenced by this examination, an "underwriting and investment" exhibit has been compiled from the figures contained in the sworn annual statements submitted by the company for the years ending December 31, 1910 and 1911, and the quarterly statements for the first three-quarters of 1912.

A [illegible] ses sustained by the corporation in the United States in the following manner:

Excess of assets over liabilities December 31, 1910	$188,085.96
Impairment of Capital September 30, 1912	129,043.25
Total loss sustained	$317,129.21

Accounted for as follows:

Underwriting income earned		$651,196.29
Losses incurred	$581,429.06	
Underwriting expenses	351,144.06	
Underwriting losses and expenses		932,573.12
Loss from underwriting		$281,376.83
Investment income earned	$41,428.65	
Investment losses and expenses	3,919.21	
Gain from investments		37,509.44
Loss account of remittances to home office		73,261.82
Total loss sustained from December 31, 1910, to September 30, 1912		$317,129.21

It will be noted from the foregoing that the underwriting income earned is $651,196.29 and the losses incurred $581,429.06, representing a loss ratio of 90 per cent.; that the underwriting expenses incurred to the premiums earned represent an expense ratio of 54 per cent. According to the statistical records of this department the average ratio of all companies for losses incurred to premiums earned for the year 1911 was 53 per cent., and the average ratio for expenses incurred to premiums earned was 39 per cent.

The remittances to home office do not entirely represent cash remittances, but include certain charges for payments made by the United States branch on account of losses and expenses of the Canadian company.

Financial Condition at Year End.

The financial condition of the company as of December 31, 1912, has decidedly improved over the financial condition as of September 30, 1912, for the reasons hereinafter explained.

A capital statement showing the condition of the company as of December 31, 1912, under the provisions of section 27 of the insurance law, would appear to be as follows:

Assets.

	Par value.	Mkt. value.
Securities deposited with the Superintendent of Insurance of the State of New York	$211,000.00	$210,800.00
Securities vested in and held by trustees	303,048.21	285,290.28
Total assets in the United States		$496,090.28

Liabilities.

Unpaid losses	$97,148.95
Unearned premiums	221,819.58
Accrued liabilities	15,000.00
Total liabilities	$333,968.53
Capital under section 27 of the insurance law	162,121.75
Total	$496,090.28

It will be understood, however, that the exact amount of certain of the liabilities in the foregoing capital statement at the date of the writing of this report cannot be definitely ascertained, and the statement may, therefore, be subject to modification. It is, however, believed that the foregoing statement is substantially correct.

As to the Assets.

Assets.—The only assets held by the company and permitted in the capital statement under the provision of section 27 of the insurance law are the securities deposited with the superintendent of insurance of the State of New York and the securities held by the United States trustee. The securities have been carried in the foregoing capital statement at the market value of September 30, 1912, as quotations of December 31, 1912, are not as yet available.

The company, however, is in possession of other assets, such as cash in bank and office, interest due and accrued and agents' balances, which, although not allowed in the capital statement, may be considered to have a certain commercial value and a general financial statement would undoubtedly show the company in possession of a small surplus.

Losses.—The books and papers in connection with the losses have been under examination since October 7, 1912, and the amount reported in the foregoing capital statement represents the amount of this liability on December 31, 1912, as shown by the company's records.

During the months of October, November and December, 1912, the company has paid on account of losses and loss expenses the following amounts:

	Loss Payments.	Loss Expenses.
October, 1912	$5,102.97	$708.73
November, 1912	21,203.85	822.42
December, 1912	53,036.13	1,633.28

These payments have been made possible mainly by reason of remittances from the head office of the company in Canada. The amounts remitted from September 30, 1912, to December 31, 1912, were as follows:—

November 13, 1912, remittance from head office	$ 9,000
November 15, 1912, remittance from head office	20,000
December 9, 1912, remittance from head office	20,000
December 26, 1912, remittance from head office	30,000
Total	$79,000

Company Used Reasonable Effort.

In general, it may be said that the company has used reasonable effort to adjust and pay its maturing losses and claims.

Unearned Premium Reserve.—The reserve reported in the foregoing capital statement is $221,819.58, a decrease of $126,285.32 from the reserve reported as of September 30, 1912. This decrease is accounted for by the heavy cancellations, and the expirations and earnings of the months of October, November and December, 1912, and as the one year business of the company approximates 73 per cent. of the total business in force, the earnings and expirations of the three aforesaid months have effected a heavy reduction in the unearned premium liability.

A further reduction in this liability was caused by the cancellation of the business from the Franklin Fire Insurance Company, of Washington, D.C., under the reinsurance agreement dated June 29, 1912. The reinsurance contract between the two companies was cancelled under date of December 31, 1912, and the unearned portion of the premiums on the business in force amounted to approximately $24,000. This amount, less the commission thereon, was paid to the Franklin on December 31, 1912. The reserve charged on this business in the unearned premium fund on September 30, 1912, approximated $47,000.

New York Findings.

Summarizing the foregoing report, we find the following facts:

That during the short period the company has been operating in the State the underwriting losses and expenses have been abnormally large; that the minimum deposit capital was wiped out on September 30, 1912; that the company ceased writing business in October, 1912, and expressed the intention of retiring from the United States; that the maturing losses and expenses have been met by remittances from the head office in Canada, and that the financial condition as of December 31, 1912, has greatly improved over the financial condition of September 30, 1912.

◆

WHERE DOMINION STEEL STOCK IS HELD

Sixty-seven thousand shares of Dominion Steel Corporation common stock are held in England and France. At the close of the buying movement of last spring it was estimated that probably 40,000 shares of Steel Corporation stock had been transferred to Europe. Recently it has been definitely established that 67,000 shares of the stock are held in the name of English and French shareholders. In addition to these holdings it is understood that a good deal of stock is being carried for English and French account in local brokers' offices.

The last annual statement of the Corporation showed a total issue of 356,530 shares of common. Approximately one-fifth of the stock is therefore held in England and France.

◆

HUDSON BAY-PEACE RIVER RAILROAD

Progress is apparently being made with the Hudson Bay, Peace River and Pacific Railway from Winnipeg to Port Nelson. Winnipeg men have sent engineers over a large portion of the territory,. and preliminary plans have been approved by the Minister of Railways and the Railway Comission. The road is to run from Winnipeg to a point on Winnipeg River just east of its confluence wth Lake Winnipeg, thence in a direct line to Port Nelson on the Hudson Bay.

The directors of the company are: Dr. R .M. Simpson, president; Hon. D. C. Cameron, Messrs. F. W. Heubach, D. E. Sprague, R. C. Macdonald, E. W. Drewry, W. Sanford Evans and R. D. Waugh.

Already a large amount of money has been spent in preliminary surveys, purchasing of land. etc., and it is understood that English capitalists have offered to purchase the bonds which the company will issue for construction purposes. The company is arranging to begin construction as early in the spring as possible, it is said, with a view to completing the road to Winnipeg at an early date, and construction from that point to Port Nelson will be carried forward as rapidly as general conditions will permit.

The directors have under consideration the purchasing of a terminal site within the city limits on which an option has already been taken.

KNOWS NOTHING OF SCHWAB MERGER

Mr. J. H. Plummer Tells The Monetary Times That He is Ignorant of Reported Plans

That the United States Steel Corporation will establish a Canadian plant is beyond doubt. That Mr. Charles M. Schwab is arranging a merger of independent steel companies in the neighboring republic and of certain Canadian companies is by no means as definite. Indeed, it seems highly improbable. The shares of the Bethlehem Steel Company have been strong on all kinds of reports as to the result of Mr. Schwab's visit to Europe. Wall Street says there is nothing in the story that he is behind a combination of steel plants to include Canadian companies. The transaction, according to a close associate of Mr. Schwab, is an ordinary one and is not gigantic in character as described by certain newspapers. Mr. Schwab will return from Europe soon and will probably reveal the nature of the transaction consummated with certain foreign interests.

What "They" Say.

On the other hand it is said in Montreal, where many impossible financial stories emanate, that the options on the Canadian stocks desired now reach 63.9 per cent. in the Steel Company of Canada, and 53.11 per cent. of the common stock issue of the Dominion Steel Corporation, and that according to the plans the capitalization of the new company will be made up as follows:—Preferred stock, $500,000,000; common, $400,000,000; and a bond issue of $200,000,000.

This makes a total capitalization of $1,100,000,000, which compares with $621,654,300 bonds, $360,281,100 preferred stock and $508,302,500 common stock, or a total capitalization of $1,490,237,900 for the United States Steel Company.

It is also stated that the underwriting is already under way by one of the largest financial houses in New York.

Mr. Plummer's Denial.

Mr. J. H. Plummer, president of the Dominion Iron and Steel Corporation, tells The Monetary Times that he knows nothing whatever about the reported plans of Mr. Schwab. "The scheme may be going on behind our backs," he said, "but I do not believe it."

Respecting the Canadian plant of the United States Steel Corporation, it may be two years or more before any bond issue can be expected in connection therewith. It will be two years, perhaps three, before the new plant will be in a position to produce steel, so that talk of a bond issue is rather remote. Whether or not the United States Steel Corporation will issue bonds this year, in connection with new construction work outside of the Canadian venture, depends entirely upon earnings.

Wall Street Views.

The announcement concerning the building of a plant by the United States Steel Corporation in Canada is regarded, says the Wall Street Journal, as highly significant, coming at this time when a tariff reduction is in prospect. "Canada's productive capacity," it says, "is now very small, and during rush times, such as the last six months have seen, it is unable to supply more than half the demand. Very little wire, nails, tin plate and other specialties, and comparatively little pig iron are produced in the Dominion.

"The United States ship a large tonnage of steel into Canada every year, upon which a considerable amount is paid in tariff duties. By the construction of a plant of its own in Canada the Steel Corporation will not only save these duties, but will be able to sell at much lower costs in the manufacturing end. From $2 to $2.50 per ton in ore costs will be saved, while considerable economies will be effected in coal and labor costs.

"The Canadian plant will include a rail, plate, structural, and blooming mill, and also a bar and a wire and nail mill. All will be of sufficient capacity to take care of the Steel Corporation's share of Canadian business. In addition to the mills mentioned, the new plant will have four blast furnaces, of 400 tons capacity each, six open-hearth furnaces, blowing engines, and lighting plant."

◆

NEW YORK SAYS WE WILL HAVE PARCELS POST

"Canada is about ready to establish a parcel post system," says Financial America, of New York. Postmaster-General Pelletier has prepared a zone map for Canada following a visit to the United States of several officials of the department to study how the system has been worked out there. The Dominion is divided into five zones, consisting of the Provinces of Quebec, Ontario, British Columbia and the Prairie Provinces. Local zones are also established. Rates have not been finally decided upon, but will probably be similar to thae established in the United States."

OUR PIG IRON MADE FROM NEWFOUNDLAND ORE

Wabana Deposit is the Source of Supply—Except in Canada, There is No Large Pig Iron Production in British Dominions

Some interesting evidence concerning the demand for and supply of iron ore was given before a meeting of the Dominion Royal Commission held in England last year, by Mr. Wallace Thorneycroft. It was stated that most of the ore imported into Great Britain was made into Bessemer hematite pig-iron, which was used for steel making by the acid process. For that purpose the ore must contain very little phosphorus. Great Britain imported in the year 1909, 6,326,000 tons of iron ore, of which nearly 6,000,000 tons was Bessemer ore.

Nearly 5,000,000 tons of this Bessemer ore came from Spain, and the balance from Sweden, Norway, Greece, France, Algeria and Tunis. Except 62,000 tons from Newfoundland, no ore was imported during that period from the Dominions. Cumberland and North Lancashire supplied 1,558,000 tons of Bessemer ore. Therefore the Bessemer pig-iron industry depended upon foreign ore supplies.

Spanish Supply Becoming Exhausted.

It was probable that the deposits of Bessemer ore in Spain would be approaching exhaustion 25 years hence. It was also probable that supplies of this quality of ore would be got from other countries, but at an increased cost of freight. There were large known deposits in Brazil, Cuba, Chili and Venezuela, some of which were being developed.

The Wabana deposit in Newfoundland, from which the bulk of Canada's production of pig-iron was made, was said to contain over 3,000 million tons of ore. But as it contained .75 of phosphorus it was unsuitable for the manufacture of steel by the acid process. It was largely exported to Germany and Belgium, where steel was manufactured by the basic process, by which the phosphorus was extracted from the steel.

Basic steel, it was stated, was not as reliable as steel manufactured by the acid process from Bessemer ore containing less than 0.5 of phosphorus. If the basic principle were adopted in this country there would be a greater demand for Newfoundland ore. The more rapid growth of the pig-iron industry in Germany and the United States was, it was said, entirely due to the invention of the basic process.

Iron in the British Dominions.

Except in Canada there was, so far as is known, no production of pig-iron on a large scale in the Dominions. The governments of the Dominions, it was stated, might, with advantage, provide more money for the geological survey of the territory under their control. There could be no more profitable investment. They should publish the results of the surveys made as rapidly as possible, and communicate advance copies to the iron and steel associations of this country, or abstracts and references to such publications.

It was not suggested that the governments should undertake detailed prospecting work. The geological department of Canada was already very good, but with the vast area it had to cover, progress was necessarily slow.

Deposits in Canada.

The indication of large deposits, especially Bessemer ore, accessible for shipment anywhere in eastern Canada or Newfoundland would promptly be investigated in detail by British makers of iron and steel and ample capital would soon be found if the deposits warranted development.

It would be right for the Dominion governments to encourage the export of iron ore. If the economic conditions around the deposits were favorable, production of pig iron and steel would naturally follow.

◆

The preliminary statement of the Prudential Life Insurance Company for 1912 shows that this western company has issued $2,500,000 business during the year. They will close the year with over $7,500,000 in force. The premium on the 1912 business averages $35.54 per $1,000. The average premium per $1,000 on the total business in force is $32.27.

During the past season of navigation the shipments of butter from Montreal were the smallest on record, amounting to 70 packages, as compared with 134,503 for the season of 1911. The exports of cheese from Montreal show a decrease from those of last year, being 1,723,021 boxes as compared with 1,810,666 for the corresponding period of 1911. Combined shipments from Montreal and Quebec show a decrease of 117,304 boxes.

CANADA IN INTERNATIONAL COMMERCE

New High Record Set Last Year for World's Business—Official Figures of Seventy Countries

The world's international commerce will establish a new high record in 1912, present indications being that the total will aggregate 35 billion dollars, against 31 billion in 1910, 20 billion in 1900, and 17½ billion in 1890, having thus doubled in twenty-two years. These figures are the result of a compilation from the official publications of about 70 leading countries.

This estimate of the probable aggregate of world commerce in 1912 is based upon the official figures of trade of the various countries during such portions of the year as can be shown, covering in most cases the first six months and in some instances extending down to the end of September. Nearly all the important countries show larger totals for 1912 than in 1911 or any earlier year. Reducing the figures to a common basis (the monthly average for such parts of the year as are available) imports into the United Kingdom increased from 265 million dollars per month in 1911 to 286 million in 1912; the United States, from 126 million to 148 million; Germany, from 186 to 203 million dollars; Austria-Hungary, from 51 to 59 million dollars; Belgium, from 67 to 70 million; Canada, from 30 to 52 million dollars; Japan, from 26 to 28 million dollars; Switzerland, from 28 to 30 million; and India, from 34 million to 40 million dollars.

Few Countries Show Decrease

A few countries show a decrease in their monthly importations, France from an average of 132 million per month in 1911 to 127 million in 1912; Argentina, from 31 million to 30 million dollars; Mexico, from 8⅓ million to 7⅓ million, and Russia, from 43⅓ to 42 million. Practically every country increased its exports, the average monthly exportation of Canada, for example, increasing from 20 million dollars in 1911 to 27 million in 1912; France, from 94 million to 102 million; Germany, from 153 to 166 million; India, from 61 to 66⅓ million; the United Kingdom, from 179 million to 192 million; and the United States, from 159 million to 177 million dollars; while that of Argentina decreased from 34 million dollars in 1911 to 31 million in 1912, and that of Russia, from 59 million to 51 million dollars.

Total Value of Imports

The total value of imports into the 70 principal countries and colonies of the world in 1911 approximated 17⅔ billion dollars. Deducing from this the imports of the United States leaves a total of 16 billion dollars as the value of the foreign market in which American products and manufactures may be sold. Of this total of 16 billion, imports from the United States amounted to 2 billion, or one-eighth of their total imports. The countries taking the largest proportionate share of their imports from the United States are: Haiti 69.5 per cent.; Honduras 68.2 per cent.; Canada 61.7 per cent.; Santo Domingo 60.6 per cent.; Panama 56 per cent.; Mexico 54.9 per cent.; Cuba 52.8 per cent., and Costa Rica 51.3 per cent. The United Kingdom takes 17.3 per cent. of its imports from us; Germany 13.3 per cent., and France 8.6 per cent. of her total. The largest markets for American products, measured by their valuation of imports from the United States, are the United Kingdom 572 million dollars; Canada 285 million; Germany 283 million; France 119 million; Netherlands 117 million; Italy 70 million; Cuba 57 million; Mexico 56 million; Austria-Hungary, Argentina and Belgium, between 45 and 50 million each and Australia, Brazil, Russia, and Japan, sums ranging downward from 32 to 27 million dollars.

South American Countries.

Of the South American countries, Columbia, Ecuador, Venezuela and Peru take from 20 per cent. to 30 per cent. of their respective imports from the United States, while the remainder take smaller proportions; ranging from 13.8 per cent. of those into Argentina and 12.8 per cent. of those into Brazil to but 2.8 per cent. of those into Bolivia. Certain other contries take comparatively small portions of their imports from the United States, American imports into China in 1910 constituting but 5.2 per cent. of her total imports; into India 2.7 per cent.; Morocco, less than 1 per cent; Servia, 1.3 per cent.; Turkey, 1.3 per cent., and Roumania, about 1 per cent. of her total imports.

◆

The White House is reported by the fire department of the District of Columbia to be an easy prey of fire because of insufficient water mains and fire hydrants in the vicinity of the historic building. Thus in the "first house" of the United States is represented a condition that is only too general throughout the continent.

HIDES AND SKINS

United States is Buying from Many Countries and Paying Debt in Manufactured Leather—Canada as a Factor

The importation of hides and skins by the United States during the past year will be about 600,000,000 pounds and the value about $120,000,000, against 300,000,000 pounds valued at $59,000,000 in 1904, both quantity and value having thus doubled in less than a decade. This increase in importation of hides and skins, while due in part to increased activity among the manufacturers of the United States, is also, in some degree, the result of a reduction in the number of cattle slaughtered in the United States, since the live-stock receipts at the principal slaughtering centres were in 1911 and 1912 respectively, about 10% below the average of the years immediately preceding.

Canada is Contributing.

A large number of countries, including Canada, are contributing to the requirements of the United States manufacturers of leather, the import figures of the statistical division of their Bureau of Foreign and Domestic Commerce showing the following sources of supply:

Country.	Variety.
Australia	Kangaroo skins.
Canada	Fish skins.
Egypt, India and China	Buffalo hides.
Russia, Germany and France	Horse skins.
Germany, Mexico and S. America	Pig skins.

Sheep skins have been imported from a large number of countries, and goat skins from every grand division of the globe. Hides of cattle went to the United States from practically every country in the world, but especially from Latin America, Argentina, Colombia, Venezuela and Ecuador.

Furs from Canada.

The total value of dressed furs, undressed furs and skins, the produce of marine animals, various undressed furs, and all other furs and skins, exported from Canada to the United States during the past fiscal year, was $2,143,213. This compares with other years as follows:

Year.	Value.
1908	$1,531,912
1909	1,393,499
1910	2,056,102
1911	1,755,596

The value of hides and skins, other than fur, exported by Canada to the United States during the last fiscal year, was $5,068,559, compared with $4,508,916 in 1911, and $3,477,063 in 1908.

Canada's Imports of Leather.

The imports of leather and their manufactures to Canada from the United States have steadily increased during the past few years. Last year, they were valued at $5,157,127 which compared with the four previous years as follows:—

Year.	Value.
1908	$2,824,813
1909	2,516,654
1910	3,188,760
1911	4,048,112

According to the census of Canadian manufactures of 1910, there are in Canada thirty establishments employing $2,046,784 capital and turning out products valued at $2,402,304. These factories employ 1,032 employees drawing wages of $482,822. Tanned, curried and finished leather factories in Canada number 113 and employ capital of $17,068,768. The annual value of their products is $19,972,178. Wages of $2,094,677 were drawn by 3,799 operatives in 1910.

Of the $100,000,000 worth of hides and skins imported into the United States in the ten months ended with October, 1912, $20,000,000 were goat skins, $9,000,000 sheep skins, $1,500,000 buffalo hides, $1,500,000 horse and ass skins, $27,000,000 calf skins, and $38,000,000 hides of cattle. The quantity of fish skins imported is comparatively small, though in some years the total aggregates nearly half a million pounds. They are utilized, in some instances, for making gloves and upper leather; in others, in the manufacture of purses and suspenders, and in still others, for polishing or as a substitute for sandpaper in cabinet making.

How the Debt is Paid.

About one-half of the hides and skins imported are paid for in leather and manufactures of leather exported. The total value of leather and manufactures thereof exported in the ten months ended with October was $53,500,000, against $100,000,000 worth of hides and skins imported; during the ten years ending with 1912 the value of leather and manufactures thereof exported aggregates $460,000,000, against $795,000,000 worth of hides and skins imported during the same period. The leather exportations go to all parts of the world, especially those in the form of United States boots and shoes, which went last year to no less than 90 countries and colonies representing every grand division of the globe.

◆

SUGGESTED BOUNTY ON WHEAT

Sir Joseph Lawrence proposes that a preference on wheat should be given to Canada, and should take the form of a two-shilling bounty on colonial wheat, instead of a two-shilling tax on foreign wheat, such bounty to be paid out of Customs duties collected from foreign manufactures. Further, he would extend the principle after negotiations with the Dominions to meat, butter, cheese and foodstuffs, utilizing the tax levied upon the foreigner for the use of the home markets for the encouragement of the Dominions to grow corn for British consumption. Foreign wheat would come in free at the same time.

Sir Joseph suggests the reduction or abolishing, without waiting for any conference or referendum of the entire duty on tea from British dependencies, like India and Ceylon. Sugar from the West Indies and Mauritius might be admitted free, as well as coffee, raw cocoa and sundry other smaller items, making up the total their other food imports cost.

These remissions in existing duties would, roughly, amount to seven millions sterling.

Great Britain would be justified, he says, in dividing the present all-round ten per cent. scale into three categories, as in some of the Dominions, namely:—

(1) A maximum tariff of fifteen per cent. ad valorem.
(2) An intermediate tariff of ten per cent. ad valorem.
(3) A minimum tariff of five per cent. ad valorem.

◆

Canada spent on railways during the past fiscal year $35,907,972, of which $23,712,098 was chargeable to capital. The aggregate expenditure on the Intercolonial Railway for all purposes was $10,591,035, and the gross earnings $10,593,784, showing a profit of $2,750. The revenue from transportation was 98.36 per cent. of the gross. The number of passengers carried was 3,416,533, an increase of 183,658. Of revenue producing freight 4,539,599 tons was carried, an increase of 435,199. The Prince Edward Island Railway had a deficit of $82,759. The total expenditure on canals was $4,254,609, of which $2,560,938 was charged to capital.

According to one of the largest British firms engaged in the dairy produce trade, Canada for some time past every year has supplied sufficient evidence to prove that, so far as butter is concerned, the Dominion is nearing the end of her export business. On the London market for the year ended June, 1912, Canadian butter was not once in sufficient supply to secure an official quotation. In recent years Canadian butter has been imported into Great Britain, mainly for cold storing to supply winter requirements. In future these requirements will have to be filled from Australia and New Zealand by fresh-landed goods.

SUMMARY OF INSTITUTIONAL INVESTMENTS IN CANADA'S MIDDLE WEST

EFFICIENT LIFE AGENTS ARE SPECIALISTS

They Diagnose Their Clients' Actual Needs and Fit the Policy to the Prospect

Shall the life insurance policy be fitted to the circumstances and needs of the insured? Shall it be one that he can carry without its seeming to be an intolerable burden? Shall it be adapted not only to his actual financial resources, but likewise to his mental state on the theory that if the friction of unsettled convictions is removed that the insured will find ways and means of bearing contentedly burdens that would weigh like mountains upon him were he in doubt as to the wisdom of carrying these burdens? These are questions asked by Mr. F. H. Hardison, Insurance Commissioner of Massachusetts.

Take the case of a life insurance salesman, he answers. He has spent hours in laying his plans to get an application. He has brought all the influence to bear upon the prospect that he could think of. He has talked through the whole vocabulary of arguments and tried a lot of new ones, which came to him in the still watches of the night. He finally gets the application at a great expenditure of effort. It has been at high cost.

For a proper return the prize ought to be a valuable one. The insured, however, begins to realize as the months go on that the burden he has assumed is heavy.

Adapt the Policy to the Subject.

It isn't properly adjusted to his figure. It chafes and irritates. He sees where he would have been better off under his circumstances to have had more insurance for the same or less money, or less insurance for it, with a chance that he would benefit by it in his old age when he might need it rather than some one who had no claim upon him. He concludes, and perhaps wisely, to drop it as not adapted to him.

Now it is evident that the time and effort spent in placing that policy was to some degree an economic waste. The agent may have received his commission and in so doing received over-pay for his time; but that does not change the complexion of the fact that the effort was fruitless.

Had it, on the other hand, been properly directed, giving the applicant a policy that was adapted to his means, adapted to his age, adapted to the family conditions, and withal as flexible as would be consistent with the safety and the prudent management of the company, the chances would have been much better that the policy would have stuck and that its full fruits would be finally gathered at harvest time.

Friction would have been removed by adaptation of the policy to the subject. The course of the policy would have been as smooth as the running of a beautiful machine, the operation of the mind of the trained professional man, the life of a well-ordered family, the co-ordinated work of the Harvard football team of this year of grace.

Specialization is the Remedy.

But how can this self-evident truth, so clear to us in our own observation and experience of material things above and about us—the great things of the universe and the smallest things we can conceive,—how can this self-evident truth, that adaptation is the condition of efficiency, be applied to life insurance? In other words, how can the policy be fitted to the policyholder?

That brings us back to asking the question how can the remedy be fitted to the disease? How the hair spring to the chronometer? How the brief to the case? How the address to the occasion? How the athlete to the team? There is only one answer—specialization,—fitting the man that he may fit the instrument. We recognize this in the professions, in the skilled trades, but in respect to life insurance, why, "anybody can sell that" they say, just as they say that anybody can run a newspaper.

We have too frequently seen men, who have made a failure of about everything else they ever tried, seeking for licenses as agents to sell life insurance.

Enter Into Confidential Relations.

One reason for it is that we have given insufficient weight to the value of getting rid of friction and waste by adapting the policy to the policyholder. When full value is given to that thought in selling life insurance more attention will be given to the agent who sells it, who must, like the physician and the lawyer, enter into confidential relations with the applicant to be of the most service.

When a man applies to a physician for advice he, if he is wise, discloses every symptom to that physician, telling him about things he never breathed aloud before perhaps, and making him a partner in a knowledge of the innermost secrets of his body as far as he knows them. The physician is then in a position to apply his skill by resting his diagnosis on the truth, the whole truth and nothing but the truth. So too in legal matters, the lawyer who does not get the details of the case is in no position to advise wisely. But to what physician and to what attorney does a person give up all this private and secret knowledge? Only to one in whom he has confidence.

Trained and Expert in Insurance Matters.

The wiser the one wanting advice the wiser counsellor he seeks. No youth in his teens will be sought for advice on these subjects. Hence those who wish to practice law or medicine must not only prepare themselves for it by a long course of study, and then pass certain tests of knowledge which the state requires, but must spend years of waiting for maturity in thought and judgment. Then men turn to them and not in vain.

Can you expect that a person will take the opposite course when life insurance is the object of his attention? True it is that he may take a policy from a person whom he has not selected with the same care as he has his doctor or his lawyer; but think how many times greater are the chances of a misfit than would be the case were the agent a person in whom the applicant had as much confidence as in the doctor or the lawyer,—a person whose knowledge and judgment he felt to be sound and to whom he could tell in confidence all his personal, family and business affairs in order that he might obtain insurance fitted to his needs by one trained as an expert in such matters.

But you need not think that a man is going to give his confidence to a boy or girl in his teens such as I have been vainly importuned to license, the importunity coming from agency directors whose thought seemed to be that here was a chance to get perhaps a few applications from the relatives or friends of the agent.

Fitness Tends to Reduce Friction.

Such agents are not suitable for advisers, they cannot give worthy counsel for the one reason if for no other that they will not be given the same full information upon which to come to a conclusion which shall result in a policy which fits the policyholder.

What I have predicated of the youthful agent is almost as true of the unschooled and ill-adapted one whose efforts to fit the policyholder would be bungling at best.

Now what is the moral of all this? Simply that fitness tends to reduce friction which results in loss and waste in every field of which we have any knowledge. To conserve this loss and waste by reducing the friction through fitting the policy to the policyholder should be an aim of every insurance company; but it will be done consistently only by a class who have the ability to judge, the disposition to serve and conserve, and that quality which inspires and holds the confidence of their fellow-men.

Such an agent is not a prize for his company, but for the community in which he lives, for there is no person who can do more for the up-building of its citizenship than he.

◆

A fleet of five ships carrying more than 500,000 bushels of grain left Fort William and Port Arthur on December 11th for Buffalo. The vessels consisted of the Henry Steinbrenner, with 50,000 bushels of wheat; Harry A. Coulby, 50,000 bushels of flax and 5,000 bushels of wheat; George B. Leonard, 160,000 bushels of wheat; Lyman B. Smith, 100,000 bushels of wheat and 30,000 bushels rye; Saxona, 100,000 bushels of wheat. This marked the close of grain shipments from the Canadian head of the lakes for 1912.

Any number of financial, manufacturing and distributing firms and companies in Canada that have never known what it is to show a debit balance at the end of a year's work. I do not want it to be thought that we in Canada never make any mistakes, for of course we do; but the general growth of the country is so rapid and so universal that any losses that we may make are almost at once covered by the gains resulting from the opening up of our natural resources, and these, so far as this question is concerned, are unlimited.—Mr. G. T. Somers, president, Toronto Board of Trade.

The work of grade separation on the western section of Toronto, known as part one, was practically completed last year. On the distance comprised by that section—viz., about four and one-half miles—a comprehensive scheme of level crossing elimination has been accomplished. The original gradients of the track, together with the contour of the territory through which it passed, naturally made the method of grade separation a dual one, so that the railway now passes under some of the streets and over others. Part of this work therefore consists of cutting, the greater portion of which averages 25 feet in depth, and part is embankment, averaging 15 feet high. The new roadway has four main lines of track instead of two as formerly. All bridge work has been substantially built and the slopes of the cuttings are sodded and present a neat and pleasing appearance. The portion of the line between West Detroit and Milwaukee Junction, about five miles, is being elevated for the elimination of grade crossings.

FOREIGN FIRE BUSINESS LESS PROFITABLE

Canadian Experience of Thirty-four Years Shows That Home Business is More Favorable

The experience of Canadian fire insurance companies over a period of years has shown that their home business is more favorable than the business transacted in other countries. Here is a compilation giving the rate per cent. of losses paid as compared with premiums received upon business done in Canada and other countries by Canadian companies since 1878. Taking the whole period the foreign business was, as stated, less favorable than the Canadian underwriting.

Losses paid during the period under review in other countries totalled $54,000,000, being more than double those paid in Canada, namely, $26,000,000. The premiums received abroad, $82,000,000, were also practically double the premiums received in Canada, which were almost $44,000,000. The rate per cent. of losses paid, as compared with premiums received in Canada for the 34 years' period was 60.68 per cent., and in other countries 66.49.

Only in 11 years of the 34 was the percentage favorable to foreign countries. This occurred in the following years:—

Rate per cent. of losses paid as compared with Premiums Received.

Year.	In Canada.	Other countries.
1891	70.84	70.11
1892	77.09	62.46
1893	68.80	66.23
1894	67.61	62.63
1895	63.59	56.99
1896	58.78	58.14
1897	72.97	52.65
1900	95.43	70.23
1904	91.34	72,82
1909	57.74	51.89
1910	57.75	54.58

Needless to say, conflagrations have had a vital bearing upon the fluctuation in the figures in the interesting tables accompanying.

ABOUT A NOTABLE TOWN

The town of Oakville, Halton County, midway between Toronto and Hamilton, has always had interest for other than its own people and those of its province. The county was the birthplace of many prominent Canadians who are now making history in various parts of the country. The Honorable W. T. White, our Minister of Finance, spent his school days within a stonesthrow of Oakville. Lieutenant Colonel Brock, last week elected by acclamation president of the Toronto Board of Trade, was born there, and many other such instances may be cited. A large number of readers of The Monetary Times are either living there permanently or have summer homes in the delightful town. They will be interested in an illustrated booklet on Oakville, published by Griffin and Griffin, Toronto, and for sale by Mr. T. Nisbet, Oakville, at fifty cents per copy. The booklet is well prepared and gives a concise and attractive history of the town and its progressive institutions.

◆

GRAND TRUNK PACIFIC IN THE WEST

The Grand Trunk Pacific Terminals bill is before the Saskatchewan legislature. It provides for a guarantee of bonds by the provincial government of $3,800,000 to enable the Grand Trunk Pacific to get into all four cities of the province and into Swift Current and Battleford as well. The bill guarantees the bonds of the railway to the following extent: Regina, $850,000; Moose Jaw, $850,000; Swift Current, $450,000; Prince Albert, $350,000; Battleford, $100,000, and Saskatoon, $1,200,000.

Mr. Calder, the provincial treasurer, stated that the Grand Trunk Pacific branch lines were unable to enter the limits of the cities at whose doors their lines lay owing to lack of funds, and that as the guarantee of bonds was amply secured and the arrival of the lines in the centre of cities affected would be of great benefit to the people living therein, he felt that the government was fully justified in introducing the resolution, and that it would meet with the approval of all concerned.

The Grand Trunk Pacific Railway has invited applications in London for a new issue of nearly $1,250,000 four per cent. first mortgage bonds, carrying the unconditional guarantee of the province of Saskatchewan and for a similar issue of four per cent. first mortgage bonds, guaranteed by the province of Alberta. The proceeds are to be devoted to the construction of branch lines in those provinces

THE
1913 Annual Review

The Monetary Times 1913 Annual Review, issued last week, met with a most enthusiastic welcome at the hands of financiers, insurance men and men of business generally all over the Dominion.

As usual, however, it has been found impossible to supply the demand for copies, due to the difficulty the publishers experience in anticipating that demand.

Orders for single and bulk copies, newstands, &c., were a good deal heavier than in previous years. As soon, however, as the issue was sent out, and financiers, insurance men and men of business generally realized the current interest and reference value of the Review, we find ourselves unable to fill the many orders that are coming in.

We printed, as we thought, sufficient extra copies to take care of the extra demand prior to publication, and concluded all would be well. We were mistaken.

While we regret our inability to fill many of these orders, we are gratified that the solid business men of the Dominion recognize the informative value of The Monetary Times Annual Review, and promise those who are disappointed in not being able to secure a copy of the 1913 Annual Review, that if we can have a little co-operation on their part to the extent of getting their orders for the 1914 Annual Review in early, we shall do our part and print enough to take better care of them in 1914.

In closing, we desire to express our appreciation to all those who have contributed in any way to the producing of the 1913 Annual Review—whether advertisers, contributors or readers.

Encouraged by the reception this year's Annual Review has had, we are planning even better things for 1914.

The Monetary Times of Canada

Managing Director

OUR NEIGHBOR'S BANKING POWER

Last Year, the Capital, Surplus, Deposits, Profits and Circulation in the United States Totalled Over Twenty Billion Dollars

The banking power of the United States represented by capital, surplus, profits, deposits and circulation, reached during the past year the total of $22,548,707,000, a high record, showing an increase of 5.69 per cent. over 1911 and 27.8 per cent. over 1908. Since 1900, the banking power has increased 111 per cent., or more than doubled. During the last twelve years, the number of banks has increased by over 107 per cent., and their volume of business as indicated by deposits shows an increase of over 127 per cent.

The United States Comptroller of Currency reports that less than 70 per cent. of the total amount of national bank notes which the national banks might circulate under the law had been issued last year. Based upon the September 4th report, the banks might increase their circulation by $321,927,060.

Hold Eighty Per Cent. of Debt.

The national banks, the report indicates, hold over 80 per cent. of the bonded debt of the United States in the way of security for circulation and public deposits and as investments.

During the fiscal year 1912, the national banks paid dividends aggregating $120,300,872, or 11.66 per cent. on capital and 6.93 per cent. on capital and surplus combined. The net earnings of $149,056,603, were equivalent to 8.59 per cent. of capital and surplus. During the last 43 years the banks have paid an average annual dividend of 9.17 per cent. on the capital stock.

Eight national banks, with an aggregate capital of $1,100,000, failed during the year ended October 31st, while eighty-three national banks, with an aggregate capital of $21,605,250, were placed in voluntary liquidation.

Business as Shown by Bank Returns.

"Business in general has shared in this prosperity, as is evidenced by the returns from national and other banks of the country. Reports depicting in detail the items of assets and liabilities of 25,195 banks have been tabulated showing aggregate assets of approximately $25,000,000,000. The capital of these financial institutions amounts to approximately $2,010,000,000 and the liabilities to depositors over $17,000,000,000. Compared with 1911 the current returns show increase in capital of $58,400,000, in deposits of $1,117,000,000, and in aggregate assets, $1,355,000,000. Elsewhere in this report information appears relative to the condition of each class of banking institutions in each state and section of the country.

"Of the 10,285 national banks chartered from 1863 to October 31st, 1912, there are in active operation 7,397 banks, as shown by the reports for September 4th, 1912. The paid-in capital is stated at $1,046,012,580; combined surplus and other undivided profits, $943,756,626; circulating notes outstanding, $713,823,118; due to banks $2,177,488,662; individual deposits, $5,891,670,007; United States deposits, $59,227,328; rediscounts and bills payable, $82,374,789; and aggregate liabilities, $10,963,400,760.

Loans and Discounts.

"About 60 per cent. of the banks' loanable funds is represented by loans and discounts, which aggregate $6,061,009,345. Nearly 17 per cent., or $1,850,584,138, is invested in United States and other bonds and securities, about 7 per cent. of the amount being investments in United States bonds, of which $724,085,520 are on deposit with the Treasurer of the United States to secure national bank circulation, $46,228,460 to secure public deposits, and $7,804,070 held in bank unpledged. The premium account on all United States bonds, as shown by the banks' books, is $7,092,456, an amount which is appreciably less than the market value of these securities.

"Investments in bank premises, furniture and fixtures, and real estate taken for debt total $268,505,340, which is less than 2½ per cent. of the aggregate assets. Credits with other banks, that is the amount 'due from,' are $1,453,069,556; checks and other cash items, including exchanges for clearing house, are $333,350,723; and cash in bank, that is, specie, legal tender notes, bank notes, and minor currency, $947,843,746; these two latter amounts, totalling $1,281,203,469, equal nearly 22 per cent. of the liabilities to depositors, the actual cash means being 16 per cent. of such liabilities.

"With a net increase during the year in question of 96 in number of active banks, there was an increase in capital of $20,571,195, together with an addition of $30,322,080, to the surplus and other profits. The increase in bank-note circulation was $16,841,085. In this period individual deposits increased $401,674,905, and United States deposits $11,979,832. On the credit side of the account the following increases are shown: Loans and discounts, $377,430,197; United States bonds, $11,899,830; other bonds, $38,810,583; cash means, $6,338,039; and aggregate resources, $583,961,376.

"By reference to the abstracts of the returns from national banks made since September 1st, 1911, a steady increase is shown in the volume of loans and discounts, while overdrafts have declined from $35,950,532 on December 5th, 1911, to $20,168,074 on September 4th, 1912. Bonds deposited as security for circulation increased since December, 1911, from $713,619,820 to $724,085,520, while the amount of securities of that character deposited on account of Government deposits increased only from $44,978,000 to $46,228,460.

Security For Public Deposits.

"There was a material increase in bonds other than 'Governments' deposited as security for public deposits, as the rise was from $25,663,796 to $32,479,536. Investments in bonds and other securities, excluding United States bonds, standing at $1,052,219,286 in December, 1911, increased but slightly until June 14th, 1912, when the amount reported was $1,077,783,000, but by September 4th, investments of this character had decreased to $1,072,466,088. Immediately available cash means in banks; that is—lawful money, bank notes, exchanges for clearing house, checks, and other cash items—fluctuated but slightly, as it appears that the amount in bank on December 5th, 1911, was $1,210,780,830, and on February 20th, 1912, $1,276,087,634, or an increase of $65,306,804. By April 18th these items had declined to $1,266,706,820, or by $9,380,814; on June 14th had risen to $1,291,358,223, or an increase of $24,651,403; and by September 4th had again declined—to $1,281,203,469, or by $10,154,754.

"The toal amount of assets increased from $10,443,457,166 on December 5th, 1911, to $10,812,427,983 on February 20th, 1912, but declined to $10,792,149,256 on April 18th. There was an increase by June 14th, to $10,861,763,877, and a further increase to $10,963,400,760 on September 4th.

Capital of Banks.

"Results of the organization of banks and the increase in capital of existing banks are shown in the gradual increase of the paid-in capital stock from $1,026,440,500, on December 5th to $1,036,124,945 on April 18th. By reason, however, of liquidations for consolidation without an increase in capital stock, the June 14th statement showed a reduction of capital to $1,033,570,675. By September 4th, however, there was a notable rise to $1,046,012,580. The surplus fund shows a normal increase from $672,891,252 on December 5th, 1911, to $701,021,452 on September 4th, 1912. The payment of dividends by national banks, generally at semi-annual periods ending with December and June, show marked fluctuations in the undivided profit account, which on February 20th showed a decline to $242,069,421 from $258,906,244 in the prior December. The amount in this account on June 14th was $256,837,095, which was depleted by the June 30th dividend to the extent of reducing the fund on September 4th, 1912, to $242,735,174.

Postal Saving Funds.

"National bank notes outstanding increased only to a nominal extent from $702,647,103 on December 5, 1911, as shown by the subsequent calls to June 14th, 1912, when the amount outstanding was $708,690,593. Between that date and September 4th there was an increase of over $5,000,000, the amount outstanding on the latter date being $713,823,118. Individual deposits increased from $5,536,042,281 in December, 1911, to $5,630,559,231 on February 20th, to $5,712,051,088 on April 18th, to $5,825,461,163 on June 14th and to $5,891,670,007 on September 4th. Deposits of the United States, including postal savings and deposits of Government disbursing officers, increased from $53,000,000 in December, 1911, to $59,000,000 on September 4th, 1912, the increase apparently being mainly due to the deposit of postal savings funds."

◆

The address of Dr. Allen J. McLaughlin, assistant surgeon of the United States Public Health Service, Washington, D.C., last month before the annual meeting of the Association of Life Insurance Presidents, on "The Effect of Safe Water Supplies on the Typhoid Fever Rate," was illustrated by a series of ten charts. Dr. McLaughlin presented an interesting comparative table showing the contrast between the typhoid mortality of fifteen of the largest American cities and fifteen of the largest cities of Europe. The lowest typhoid death rate abroad was 1.3 per 100,000 of population in Edinburgh, and the highest 5.6, in Paris. The lowest death rate from typhoid in American cities was 8.8 per 100,000 of population in Cincinnati, and the highest, 58.7, in Minneapolis. The Philadelphia mortality is 17.5 per 100,000, and that of Pittsburgh, 27.8.

OF INTEREST TO OUR READERS

The Monetary Times has arranged for the publication of many series of and special articles in its issues during the coming twelve months. These, as usual, will be in addition to the regular features of the journal and its up-to-date and reliable news service.

BANKING

This month will be commenced a series of articles from the pen of Mr. M. P. Langstaff, A.I.A., F.A.S. These stories make an excellent synopsis of the practices of the principal banks of the world in respect to several of their most important functions and influences, a digest of great interest and reference value.

INVESTMENTS

At the request of The Monetary Times, Mr. H. M. P. Eckardt has written an article, to be printed in an early issue, on Canada's imports of coin and bullion. This is a factor of unusual interest in our commercial balance sheet. With the article is included a table showing such imports for a number of years past.

COMMERCE

The trade of Canada with the world, and with four countries in particular—United Kingdom, United States, France and Germany—will be treated at length in an attractive article, supplemented by statistical tables of permanent reference value.

INSURANCE

Life insurance topics are to receive special treatment at the hands of one of the foremost actuaries of the continent.

Several series of articles, now being drafted, are to appear during the year, announcements of which will be made later.

The Canadian Bank of Commerce

Report of the Proceedings of the Annual Meeting of Shareholders

---

TUESDAY, 14TH JANUARY, 1913

The forty-sixth Annual Meeting of the Shareholders of The Canadian Bank of Commerce was held in the banking house on Tuesday, 14th January, 1913, at 12 o'clock.

Among those present were:—

J. W. Mitchell, J. A. Fraser, W. R. Houston, H. W. Mickle, W. H. Leishman, W. J. Savage, Milestone; G. R. Warwick, C. A. McGaw, C. Cambie, Ottawa; F. D. Spaulding, Burlington, Vt.; F. M. Gibson, Revelstoke, B. C.; W. V. Gordon, Winnipeg; C. W. Montgomery, Truro; A. H. Allan, Macleod; A. C. Smith, Granby; A. J. Helliwell, F. B. Francis, Winnipeg; G. M. Thompson, Megantic; E. E. Henderson, Winnipeg; J. H. McQuaid, Charlottetown; C. F. Worrell, Souris; H. M. Lay, Walkerton; Rev. B. Taer, Wm. McAdie, Oshawa; R. B. Buchanan, Coleman; H. A. Holmes, Lindsay; K. J. Dunstan, Albert Nordheimer, E. D. Howe, J. H. McKinnon, Angus Sinclair, J. H. Plummer, R. S. Gourlay, W. Spier, Sherbrooke; H. B. Walker, Montreal; W. A. Murray, J. Hale, London; Thomas Gilmour, H. J. Fuller, Montreal; D. B. Dewar, Hamilton; James Hedley, H. Close, J. C. Moore, George D. Perry, Fred. W. Field, Dr. T. Armstrong, Sir Donald Mann, A. E. Ames, C. N. Candee, L. J. Cosgrave, H. H. Fudger, W. H. Lockhart Gordon, John Westren, R. C. Jennings, W. H. Lugsdin, Orangeville; W. C. Johnston, Ingersoll; F. C. Malpas, Portland. Ore.; F. L. Crawford, Victoria; W. E. Rundle, Percival Molson, J. C. Breckenridge, Major J. F. Michie, F. H. Deacon, L. M. deGex, Ladysmith; M. D. Hamilton, Vancouver; Wm. Crocker, J. O. Thorn, C. S. Freeman, Tugaske; Wm. Davidson, W. E. Morehouse, Waterloo, P.Q.; J. Laframboise, St. Hyacinthe; C. H. Niles, Grand Forks; W. Cloutier, Rimouski; L. H. Baldwin, W. S. Hodgens, H. C. Cox, H. S. Morrison, J. A. Morton, J. A. Russell, Windsor, N.S.; J. McLoughlin, St. John's, Que.; John Appleton, H. Beatty, A. A. Bowman, J. K. Macdonald, W. H. Cross, W. Prendergast, R. Cassels, T. A. Rowan, Robt. Stuart, Chicago; Sir Edmund Walker, R. C. Carlyle, E. R. Jarvis, Dauphin; R. Gill, Ottawa; E. R. Wood, W. D. Lummis, C. Hunter, G. A. Somerville, A. J. Mitchell, Sir Lyman Melvin Jones, Wm. McMaster, Sir John M. Gibson, G. S. May, A. K. Brodie, A. Stewart, A. Kingman, Montreal; J. Short McMaster, G. G. Foster, Montreal; Z. A. Lash, J. W. Flavelle, J. H. McKinnon, Sir John Willson, F. D. Smith, Hon. W. C. Edwards, C. M. Gripton, J. O. Ireland, J. B. Ryckman, A. T. Reid, Major H. C. Bickford, T. Warren, H. M. Mowat, Dr. Somerville, S. R. Wickett, Wm. Craig, T. Plummer, M. H. Macleod, Winnipeg; F. W. Baillie, F. P. Wood, R. M. White, F. H. Gooch, Major Keefer, A. Buntin, J. H. Carrique, A. E. Ferrie, Thos. West, Edwin Roach, F. G. D. Smith, Newtonbrook; Mrs. Smith, Newtonbrook; J. L. Watt, M. Sparkhall, W. H. Grant, T. M. Leggat, Hamilton; H. A. Hawkins, Walter Harland Smith, H. Vigeon, Gardner Stevens, Waterloo, P.Q.; G. W. Allan, Winnipeg; William Farwell, Sherbrooke.

The President, Sir Edmund Walker, having taken the chair, Mr. A. St. L. Trigge was appointed to act as Secretary, and Messrs. W. Murray Alexander and A. J. Glazebrook were appointed scrutineers.

The President called upon the Secretary to read the Annual Report of the Directors, as follows:—

REPORT.

The Directors beg to present to the Shareholders the forty-sixth Annual Report, covering the year ending 30th November, 1912. together with the usual Statement of Assets and Liabilities:

The balance at credit of Profit and Loss Account, brought forward from last year, was..	$ 203,394.89
The net profits for the year ending 30th November, after providing for all bad and doubtful debts, amounted to	2,811,806.42
Transferred from Rest Account of Eastern Townships Bank	2,400,000.00
Premium on New Stock	242,180.00
	$5,657,381.31

This has been appropriated as follows:

Dividends Nos. 100, 101, 102 and 103, at ten per cent. per annum		$1,418,622.43
Bonus of one per cent., payable 1st December, 1912		150,000.00
Written off Bank Premises		500,000.00
Transferred to Pension Fund (annual contribution)		75,000.00
Transferred to Rest Account....	$2,500,000.00	
Transferred to Rest Account, premium on new stock	242,180.00	
		2,742,180.00
Balance carried forward		771,578.88
		$5,657,381.31

All the assets of the Bank have been as usual carefully revalued and ample provision has been made for all bad and doubtful debts.

In accordance with an agreement entered into in December, 1911, this Bank took over on 1st March last, the business of the Eastern Townships Bank, with headquarters at Sherbrooke, Que., and ninety-nine branches and sub-agencies, chiefly situated in the Eastern Townships District of the Province of Quebec. In addition to fifty-two new branches and thirty-two sub-agencies in the Province of Quebec, the Bank thus acquired new offices at Coleman and Taber, Alberta; Grand Forks, Keremeos, Midway, Naramata, Phoenix, Summerland and Vancouver (two offices), British Columbia; and Winnipeg, Manitoba. The business of the Eastern Townships Bank branches at Lethbridge, Princeton, Quebec and Victoria, was at once transferred to our own offices, and later in the year the business of their principal offices in Montreal and Winnipeg was also consolidated with our branches in those cities, the change at Winnipeg taking place as soon after the opening of our new building as it could conveniently be effected. The nine months' experience which we have had with the new business has given us every reason to feel satisfied with our purchase.

There were issued to the shareholders of the Eastern Townships Bank in exchange for their stock in that institution 60,000 shares of new stock of this Bank, having a par value of $3,000,000. This has increased the paid-up capital stock of the Bank to $15,000,000. The by-law passed at the last annual general meeting increasing the authorized capital stock to $25,000,000 received the approval of the Treasury Board on 26th February, 1912.

In addition to the offices acquired from the Eastern Townships Bank, the Bank has opened during the year the following branches: in British Columbia—Rock Creek, North Vancouver, Powell Street (Vancouver) and Oak Bay Avenue (Victoria); in Alberta—Athabasca Landing, Hanna, Tilley, Vulcan and Youngstown; in Saskatchewan—Blaine Lake, Laird and Lewvan; in Ontario—Brockville, Cornwall, Ingersoll, Niagara Falls, Port Colborne, Port Stanley, West End (Sault Ste. Marie), Smith's Falls, St. Thomas, Sudbury, Tillsonburg, Danforth and Broadview (Toronto) and Earlscourt (Toronto); in Quebec—Fraserville, Maisonneuve (Montreal), Prince Arthur and Park (Montreal), Nicolet and Three Rivers; in New Brunswick—Fredericton; and in Newfoundland—St. John's. The sub-agencies at Keremeos, B.C., East Angus, Howick, St. Chrysostome, Ste. Elizabeth and Weedon, Quebec, have been equipped as branches. The branches at Bounty, Sask., and Stewart, B.C., and the sug-agencies at Midway, B.C., and St. Constant, Que., have been closed. Since the close of the year branches have been opened at Courtenay and Pandora and Cook (Victoria), B.C., Port McNicoll, Ont., Campbellton and Moncton, N.B.; the Dunham, Que., sub-agency has been equipped as a branch, and the Upton, Que., sub-agency closed.

In accordance with our usual practice the various branches and agencies of the Bank in Canada, the United States, Great Britain and Mexico, and the Departments of the Head Office have been thoroughly inspected during the year.

The Directors again desire to record their appreciation of the efficiency and zeal with which the officers of the Bank have performed their respective duties.

B. E. WALKER,
President.

Toronto, 14th January, 1913.

GENERAL STATEMENT, 30th NOVEMBER, 1912.

Liabilities.

ALEXANDER LAIRD,
General Manager.

In moving the adoption of the Report, the President called the General Manager to address the shareholders.

ıeral Manager's Address.

The General Manager then said:

We have closed another year with a record of uninterrupted sperity, and we take pleasure in submitting a report which l compare favorably with any previous statement in the nk's history.

In reviewing the business of the early part of the year, we e to note a steady development. Great industrial activity, ompanied by large orders for manufactured goods of all ds, gave an impetus to business which at once arrested our ention and produced a feeling of concern lest we should e difficulty in meeting the requirements of our customers. ere was apparently a sound and healthy basis for this activity, and the money market was for a time comparatively y, but we had to look forward to the harvesting of a large p and were naturally desirous of doing our full share in ving it. The necessity for a close supervision of credits was er so obvious, and this period, usually one of dull and inive business, proved to be a time for the exercise of great tion.

We had expected the gradual return of better conditions in great financial centres which, by permitting the marketing a large amount of first-class securities, would enlarge the ply of available capital, but untoward events in Continental rope and the uncertainty surrounding an exciting Presitial campaign in the United States made this impossible. e latter half of the year was therefore a time of great strincy and consequent high rates for money, and it became inasingly difficult to satisfy legitimate demands, notwithstand- the inherent soundness of business generally.

With the amalgamation of the Eastern Townships Bank capital was increased to $15,000,000. The average capital emyed during the year was $14,210,437, and the net earnings this amount were $2,811,806.42, an increase of $506,397 over t year, being at the rate of 19.78%. This result was attained er making the usual provision for all bad and doubtful ots, and a thorough revaluation of the entire assets of the nk.

We are pleased to report that an examination of the accounts of the Eastern Townships Bank leaves us no reason to doubt the value of our purchase, and we record our appreciation of the zeal and hearty co-operation of our associates in the difficult task incident to the adjustment of so important an acquisition.

We disbursed in dividends $1,568,622.43, being at the rate of 10% per annum, and an extra bonus dividend of 1% for the year. The policy of paying bonus dividends until such time as we are confident of being able to maintain a higher rate would seem to be a wise precaution, in view of the extraordinary development of our business and the desirability of making ample provision for any contingency likely to arise.

We had expressed the hope that our building programme could be curtailed, but the acquisition of the large territory covered by our eastern branches, and the continued growth in the west, necessitated the opening of a considerable number of branches requiring the building and remodelling of offices on an extensive scale. We have also a serious problem to face in the changes absolutely essential for the proper accommodation of Head Office and Toronto branch, our present premises having been for several years quite inadequate. Bank Premises account has been increased to $4,423,993.07, which includes premises acquired from the Eastern Townships Bank, and we have written off $500,000, keeping the account at approximately 50% of the value of our properties.

The increase of the staff, now numbering 3,000, required the appropriation of $75,000 for the Pension Fund. We have added $2,742,180 to Rest account and carry forward a balance of $771,578.88 in Profit and Loss. The Bank's Circulation account showed important fluctuations during the year, the minimum reached in January being $10,403,322, and the maximum in November, $16,660,709. We had occasion to take advantage of the emergency provisions of the Bank Act amendment of 1908 early in October, and we closed our statement with a circulation of $1,422,864 in excess of the amount of our paid-up Capital.

If the Bank Act introduced at this session of Parliament should be passed in its present form and a "Central Gold Reserve" established, there will be no apprehension of a scarcity of currency at a time when the emergency provisions are not operative; for with the deposit of gold or Dominion notes in the custody of trustees the banks will have the privilege of issuing their own notes to the full amount thus deposited. This will undoubtedly be a very important step towards ensuring that the business of the country should not be embarrassed through lack of currency. It is evident, however, that there will be no profit to the banks in availing themselves of the suggested privilege, and as we have reached the time when the need of currency is beyond the present limits of the banks' power to supply, it is desirable that in addition to the adventitious aids so wisely provided in the new Bank Act, the banks should anticipate an increasing demand for bank-note currency by the issue of additional capital.

During the year our deposits increased $51,651,727. There was a considerable accession of special amounts which will be withdrawn in due course, and we received $19,111,119 as a result of the Eastern Townships Bank amalgamation. The ordinary deposits show a very handsome increase. Current loans and discounts increased $52,753,947, and call and short loans $2,757,730, compared with last report. Investments in Government bonds, municipal and other securities were increased by $2,821,024, and cash resources by $1,625,271.

You will notice from the report of the Board of Directors the large increase in the number of our branches. We fully realize our responsibility in undertaking to control so many units in a great bank, and the importance of arranging for a complete organization of competent and loyal associates, with geographical divisions which thoroughly cover the field of our operations. We endeavor as far as possible to clothe our Superintendents and Managers with authority for a prompt discharge of the duties of management, and believe we have succeeded in perfecting a system which meets every reasonable requirement. The distribution of branches at the close of the year was as follows:—

Alberta	49
British Columbia	42
Manitoba	23
New Brunswick	2
Nova Scotia	13
Ontario	79
Prince Edward Island	5
Quebec	91
Saskatchewan	53
Yukon	2
Total in Canada	359
Newfoundland	1
London, England	1
United States	4
Mexico	1
Total number of Branches	366

The number of the Bank's shareholders has increased during the year from 4,142 to 5,656, the increase being principally due to the taking over of the Eastern Townships Bank. The stock of the Bank is now quite widely distributed, not only in

Canada but abroad, as will be seen from the following figures compiled as at the close of our year:

	No. of Shareholders	Amount held
Ontario	1,388	$4,087,500
Quebec	1,127	3,213,650
Maritime Provinces	702	1,544,450
Western Provinces	118	242,950
Great Britain	1,569	3,204,400
United States	669	2,549,950
Other countries	83	157,100
	5,656	$15,000,000

We have referred to the provisions of the new Bank Act for increased note circulation, and would like to advert to the proposal that is now being considered, of creating a system of independent audit to supplement what has always been regarded as complete and satisfactory in every well-organized bank. There can be no question as to the importance of a strict supervision of all matters pertaining to our banks, and we should welcome any plan which makes for more efficient management and a proper recognition of the great responsibilities we are called upon to assume. We are disposed to believe that with the co-operation of the Canadian Bankers' Association working through the various Bank Clearing Houses, effective service could be rendered in the correction of abuses and the perfecting of methods for the encouragement of sound banking. We have possibly not taken advantage of our opportunities in this respect.

The Bank Act will probably sanction, under proper liens and assignments, the loaning of money to farmers and ranchers on the security of grain and cattle and other live stock in their possession. This will undoubtedly be a great advantage in many instances, and will at least legalize a practice already quite common, and probably tend to prevent hasty marketing of produce. As a matter of fact, large advances are made to farmers on the security of notes, but actually upon what they possess in the way of products of agriculture and their reputation for honesty and ability, always an essential consideration when lending money. We have no hesitation in stating that our farmer customers are, almost without exception, satisfactory borrowers. Our aggregate advances to farmers run into large figures, estimated at $15,000,000 for the western provinces.

Despite the money stringency during the closing months of 1912, and the fear that we may feel the pinch for some time to come, there are off-setting influences at work. The wonderful revival of trade in every branch, the bountiful harvests throughout the land and the consequent enormous increases in traffic on the railways, afford excellent grounds for the assumption that the unusual prosperity we are enjoying is on a sound basis. There is, therefore, some warrant for the belief that with reasonable care and judgment in measuring our commitments there will be a continuance of prosperous conditions for the coming year. We must, of course, reckon with the adverse circumstances prevailing abroad, for in conducting a world-wide business we are sensitive to these influences. We are hopeful that with the settlement of present difficulties in Europe and the return of trade to normal channels, any apprehension for the immediate future will be dispelled. We are likely to experience on the part of investors a very decided reluctance to pay fancy prices when we come to dispose of the securities now awaiting a favorable market, and we should be prepared for a revaluation which will probably mean a higher yield for the purchaser.

In moving the adoption of the Report the President said:—

President's Address

The area of Canada in which the Bank is directly interested has become so large that we have decided to present the information collected regarding its industrial position in a new form. We shall hereafter include in the statement made to our shareholders reports from those senior officers of the Bank who have charge under the General Manager of the various geographical divisions of the Bank and who are better qualified than we are to set forth the facts regarding such districts.

The year has been one marked, even in comparison with recent years of large expansion, by a continued increase in immigration, in building operations of all kinds, especially in connection with railroads, in foreign and domestic trade, in bank deposits, indeed, in almost everything connected with the prosperity of a country. Our object in stating what is so well known is that we may consider the causes of our rapid growth and whether in the methods of our expansion there is anything which needs to be checked. Our financial requirements are mainly determined by the volume of immigration. It is because of this that we must build so largely, and this also is the main cause of the excess of our imports over our exports. The immigration for the calendar year, December being estimated, was 394,784, an increase over the record year of 1911 of 13 per cent. The immigrants came to us from forty-one countries [illegible] each, averaging 50 persons to each car, would be required. In the last two years we have added nearly 10 new people to each 100 people already in Canada taken as a whole, but as over half of these immigrants have gone to the western provinces, the proportion of newcomers to these provinces in the same peri has been about 20 to each 100. The population of Saskatch wan has increased five-fold in ten years. Clearly this is pr portionately the largest immigration problem ever handled b any country. In order to house, settle, and arrange tran portation for these people, we must borrow very largely, an as long as such streams of newcomers continue we are likel to be borrowers on a large scale, at least for many decades t come. In the excess of imports over exports and in the volum of our securities sold abroad in order to settle that differenc one can clearly see the strain put upon Canada by this enormou accession of new people. The total of our foreign trade fo the fiscal year ending March, 1912, was $874,538,000. Ou imports were $559,220,000, and our exports $315,317,000, th balance against us being $243,903,000, and the figures for th half year ending September, 1912, show imports on an eve larger scale. The imports of iron and steel in various form from raw material to highly complicated manufacturers amoun in value to $95,000,000. Almost all these articles are a ready being made in Canada, but not in sufficient quantitie or not of high enough quality, to satisfy our requirements. I is to the last degree desirable that such articles should be mad at home, and to the extent of say $50,000,000 or $60,000,00 they clearly should be. With the exception of motor cars an parts to the extent of $7,387,000, and a few other items, th whole of this amount may be safely attributed to the erectio of new structures or the opening up of new farm lands. I is this large difference between our exports and imports whic causes us to send so many securities to the London market, an if it were true that we are offering too many securities i would mean that we are importing too many goods or exportin too little, or both. Doubtless, some Canadian securities ar offered which should not have been created, and doubtless ou imports are unwisely increased to some extent by the extrava gance of an unusually prosperous people, but the main caus each year is the same. We need more than ever new mileag of railways, vast quantities of new rolling stock, warehous and port facilities, municipal expenditures in hundreds o new towns and an enlarged scale of improvements in all th older municipalities, the building of ordinary roads, bridge etc., in many new areas of settlement, the creation of plant for new industries and the general increase of existing plant throughout all Canada, the erection of private dwellings i greater numbers and of more permanent construction than i the past, and many other forms of betterment which need no be detailed. But while our needs are mainly measured by ou immigration, we are apt to forget that it is the investor in ou securities who has the power to determine finally the pace o our expansion. For every dollar we wish to fix in permanen improvements somebody should have saved a dollar, and at thi extravagant moment the borrowers throughout the world ex ceed those whose savings take the form of loanable capita It is for us, therefore, to consider not so much our needs a the opinion of the investor regarding our securities, and th condition of the world's money market. If we do this we mus conclude to restrict our building operations as much as possibl for the moment, and we must expect to pay a higher rate o interest for our requirements. Men with business experienc before entering upon building operations, large or small, assur themselves that the needed money is available. It is only o municipalities and reckless promoters who incur large obliga tions before they are sure of the necessary investor in th securities they propose to offer. Many of our towns and citie who have refused to consult the banks find themselves embar rassed as a result, and improvements which may be wise an much needed must be postponed for the moment. The existing securities will doubtless be absorbed in the near future, but a lower prices than heretofore in order to meet the investors expectations of a higher return. Our municipalities, however should seriously consider whether during periods of such rapi expansion the tax rate should not be largely increased. In the days of western expansion in the United States 25 and 30 mills on a fairly high valuation of property were not uncommon rates. Again, should we not pay for local improvements in a far shorter time than we do? The western cities of the United States make their local improvements by the issue of shor term securities, the average life of which is usually not more than five years. Such securities often carry six per cent interest and do not appeal to the same class of investor as do long-term municipal debentures. We can easily see the bad effect on the credit of our municipalities of adding the heavy cost of local improvements, spread over long terms, to the ordinary general debt. Such a system as that followed in the United States would probably not find favor with the sub division promoter because it would be a powerful check on all speculative real estate schemes. At least a year ago it became generally known that there were many Canadian securities in existence which had not been absorbed by the investor and that real estate speculation was proceeding at too rapid a pace Undoubtedly the knowledge of these facts has exercised some restraint upon our people. Transactions in inside city proper ties have probably been larger than ever, but the sub-division [illegible] British [illegible] agricultural lands to be res[illegible] both the east and the west on a large scale.

In common with the rest of the world we are living in [illegible] high prices [illegible] these [illegible] earnings is so heavy as to [illegible] difficulty we [illegible] not attempt to deal fully with a subject which is being studied by government commissions in many leading countries and which will, let us hope, be referred to an international commission. There are some forces which affect the general trend of prices, others which may cause any particular commodity to go above or below the line of the general trend, and again others which are local and produce such apparent anomalies as higher prices for foodstuffs in cities nearer sources of cheap production as compared with more remote centres of consumption. Without, therefore, discussing the effect of an enlarged and cheapened supply of gold, the enormous increase of credit partly made possible thereby, and the effect of many other forces causing a general upward trend of prices, we may profitably consider some local causes which put the people of Canada at an unnecessary disadvantage. One of the most powerful and inexcusable local causes for the high price of food is the condition of our country roads. It must be clear that if a farmer has to travel ten or twenty miles to a city to sell his produce, every hour of delay to himself and his horses and wagon, every bushel or pound less he is able to carry, every day lost in the length of the life of his horses and wagon, cause just so much increase in the cost of the article he has to sell. To the extent that this needless and cruel loss might, if avoided, partly add to the farmers' profits and partly lessen the cost to the consumer, the state of our roads is little short of a crime. If the bad roads around a city cause the price of food to be much higher than it need be, one of the results is to enable producers hundreds, perhaps thousands, of miles away to enter into competition with the farmer in his own county, because the cost in transit over one mile of bad wagon road will cover the cost over many miles of good railroad. This competition may help the consumer by keeping prices from rising still higher, but it will not bring the price below the point fixed by the extra cost from the bad local roads. It will not do any good for those of us who live in well-paved cities to blame the farmers for bad roads. They cannot be expected to build good roads entirely at their own expense, and good roads will not come so long as we wait for anything as unfair as this. It is not that we do not know how to construct good roads. We know fairly well what we should do, but we hesitate to do it. In the excellent report on Highway Improvements in Ontario for 1911 there is a sufficient abstract of the systems adopted by the various countries of the world and by thirty-three states in the United States; of these, that in use in the State of New York seems to be the most complete. Under this system roads are classified as follows:

(1) State roads built at the entire cost of the state.

(2) County roads to which the state contributes one-half, the county 35 per cent., and the township 15 per cent. For maintenance the state collects from the townships $50 per mile per annum, the remainder being contributed by the state.

(3) Township roads, to which the state contributes one-third of the cost of construction.

Can the people of Canada be made to realize that every man, woman and child suffers from the evil of bad roads whether they use the roads directly or not? Have we not as much intelligence as the citizens of these thirty-three neighboring states?

Another cause of high prices is the general inefficiency of most kinds of labor. Employment is so easily obtained and the worker is apt to be so lacking in training for the particular calling it falls to his lot to occupy, that for this reason alone three men are often needed to do the work of two. The necessity of buying food for three families instead of two clearly raises the price of food, and every non-producer of food in Canada therefore suffers from this inefficiency of labor. Still another evil, tending to high prices and growing rapidly in these extravagant times, is the waste in the use of food. As seen in a modern hotel or dining car this shocks most of us, but in countless families the waste is nearly as bad proportionately. If three animals are bought where only two are really needed, the price of meat is raised for everybody. I must apologize for repeating facts which are so palpable, but in our desire to blame someone else for the suffering caused by high prices, we often refuse to see local causes which largely contribute to it and which we could at least moderate if we chose.

We have often spoken of the tendencies of modern life which increase the food consumers out of proportion to the food producers, and it is pleasing to see some slight evidence of a return to the land which may help to correct this disproportion, but while the quantity of fruit, vegetables and cereals grown may immediately be increased so as to affect prices, the state of the cattle industry of North America is so serious that some years must pass before we may hope for a return of normal conditions. It looks as if the United States would soon cease to export beef, and unless we at once change our course we may be in a similar condition. We must increase the number of beef cattle, sheep and swine on the land very largely if our annual consumption is to be supplied without depleting the herds. We shall hope the Commission regarding our cattle ranges will produce good results, and that the assurance of high prices for meat for some time to come may induce mixed farming to a degree not yet accomplished. Since 1908, while there has been a small increase in the number of horses in Canada, there has been a serious decline in the number of milch cows, beef cattle, sheep and swine. There should have been a very large increase, and unless every possible effort to arrest the decrease is made, this class of food will grow steadily dearer in price. The falling off is most noticeable in Ontario, while the only important gains are in Saskatchewan and Alberta.

The Clearing House statements again give ample evidence of our rapid growth. The returns of twenty Clearing Houses for 1911 made a total of $7,391,368,000, while for 1912 the figures were $9,146,236,000, a gain of 23.74 per cent. Once more we have to record a gain in every Clearing House in Canada.

The building permits of the four chief cities were as follows:—

	1911	1912
Montreal	$14,580,000	$19,642,000
Toronto	24,374,000	27,401,000
Winnipeg	17,550,000	20,475,000
Vancouver	17,652,000	19,388,000

The adoption of the report was then moved by the President, seconded by the Vice-President, and carried unanimously.

The President: The Vice-President will now move a resolution dealing with an increase in the number of Directors.

The Vice-President: According to the by-laws as passed in 1909 the number of Directors was fixed at fourteen. When the purchase of the Eastern Townships Bank was contemplated this number was increased to not exceeding nineteen, and it is now our intention to ask the shareholders to authorize an additional increase to twenty-two. For that purpose I am about to move the adoption of the following by-law:

"Be it enacted as a by-law by the shareholders of The Canadian Bank of Commerce assembled at the annual general meeting, held in the Board room of The Canadian Bank of Commerce at the corner of King and Jordan streets, Toronto, on Tuesday, the 14th day of January, A.D, 1913, as follows:

"1. That the number of the Board of Directors of The Canadian Bank of Commerce be and it hereby is increased from not exceeding nineteen to twenty-two;

"2. And that for this purpose by-law No. 1, adopted by the shareholders on 12th January, 1909, and amended by them on 9th January, 1912, be and hereby is amended by substituting the word 'twenty-two' for the word 'nineteen' as the tenth word of the said by-law."

I therefore move, seconded by Mr. Flavelle:

"That the by-law of The Canadian Bank of Commerce increasing the number of Directors read to the meeting by the Vice-President be passed by the shareholders, and that the same be executed under the corporate seal of the bank, and countersigned by the President and the General Manager."

Mr. Flavelle then seconded the motion, which was duly carried.

The President: I have now to ask you to pass a by-law increasing the amount set apart for the remuneration of the Directors from $25,000 to $35,000 per annum. Part of the increase, indeed most of it, is necessary, because of the increase in the number of Directors at the time of the taking over of the Eastern Townships Bank. The by-law is as follows:

"Be it enacted as a by-law by the shareholders of The Canadian Bank of Commerce assembled at the annual general meeting held in the Board room of The Canadian Bank of Commerce at the corner of King and Jordan streets, Toronto, on Tuesday, the 14th day of January, A.D. 1913, as follows:

"1. That by-law No. 5, adopted by the shareholders on 12th January, 1909, be and it hereby is amended by substituting the word 'thirty-five' for the word 'twenty-five' as the eighth word of the said by-law."

I will ask Mr. Somerville to move the necessary resolution.

Mr. George A. Somerville: Mr. Chairman, I beg to move:

"That the by-law of The Canadian Bank of Commerce increasing the amount of the remuneration of the Directors to $35,000 per annum, which has been read to the meeting, be passed by the shareholders, and that the same be executed under the corporate seal of the bank, and countersigned by the President and the General Manager."

This motion really needs no comment. In my opinion the sum of $35,000 is a very modest one, indeed, for the oversight of such a large institution as this, which has increased so rapidly during the last year apart altogether from the amalgamation of the Eastern Townships Bank. I am sure that everyone will concur in the increase, and heartily support it.

Mr. Henry Beatty then seconded the resolution, which was duly carried.

It was then moved by Mr. Alexander Bruce, K.C., seconded by Mr. Thomas Gilmour.

"That the thanks of the meeting are due and are hereby tendered to the President, Vice-President, and other Directors for their careful attention to the interests of the Bank during the past twelve months."

Mr Bruce: This statement, Mr. President, which you have submitted to the meeting, is of such a character that any words of commendation of the Board are unnecessary, and almost seem to be out of place. I think that all the shareholders should be remarkably well satisfied with the results which are shown by the work of these gentlemen during the past year.

The President: On behalf of the Directors it gives me much pleasure once more to thank you for this resolution. There is no question as to the nature of the trust committed to us; it is a very heavy one indeed, as you can easily gather from the figures of our statement. As long as our country grows at the present almost appalling rate we shall have our hands full in endeavoring to do our duty by Canada. That, of course, is what we put forth our best efforts to do. It would be a much easier task if we had two or three years of dull times, and the demands of this development upon the Bank were not so great.

Mr. William Davidson: I beg to move, seconded by Mr. W. E. Rundle, that the thanks of the meeting be tendered to the General Manager, the Assistant General Manager and other officers of the Bank for the satisfactory discharge of their respective duties during the past twelve months.

The very satisfactory statement which has been presented suggests the question of how much of this success is attributable to those who perform the minor duties connected with the Bank. It may be impossible to separate or make any comparison between the work of the various departments, but it is quite clear that the results which have been obtained are due to the loyal, faithful and constant observance of all their duties by those who fill the various positions in this Bank throughout the Dominion and in other parts of the world. From my personal experience, which I believe is also the experience of everyone who does business with the Bank, I would like to testify to the universal courtesy and intelligence which the officers of the Bank display.

Mr. W. E. Rundle: I have very much pleasure in seconding this resolution. In the statement which has been presented to us the fact is revealed that the assets of this Bank amount in round figures to $250,000,000. It is said in some quarters that the Bank has assets that are not revealed in the statement, and there is no doubt that the greatest asset which this Bank has is its organization. Anyone who has travelled very much over this country and has met the various members of the staff of the Canadian Bank of Commerce is at once struck with their efficiency and with the loyalty which they display towards this institution. I have very much pleasure in seconding the resolution.

The President: I entirely agree with Mr. Rundle, and I have very often said to the directors that in the staff we have an asset that cannot possibly be put into the balance sheet. There is no question but that the efforts which have been for years directed towards perfecting the organization of The Canadian Bank of Commerce have met with great success. I declare the motion carried, and will ask Mr. Aird to respond.

Mr. John Aird: Mr. Chairman and gentlemen, it is very gratifying to me, I assure you, to be asked to speak to this motion to-day, and particularly so in view of the very large increase which has taken place in what we term the Bank's family since the last meeting of the shareholders. As you are aware, we have taken over the business of the Eastern Townships Bank, and, as Mr. Rundle suggests, probably the greatest asset which came to us with that Bank was the five hundred men who were trained in banking almost on the lines of our own system. I thank you very much, therefore, on behalf of the staff.

The President: I think Mr. Francis, of Winnipeg, wishes to say something in response to this motion.

Mr. F. B. Francis: Mr. Chairman and gentlemen, it affords me a great deal of pleasure to respond on behalf of the staff of the Central Western District to the vote of thanks which you have just passed. It is gratifying, I can assure you, to receive this expression of your appreciation, and I know that I am voicing the sentiment of the staff generally when I say that the consideration shown them by the shareholders and Directors of the Bank has resulted in developing a spirit of loyalty and pride in the institution which has contributed very largely to its success.

Mr. G. G. Foster: Mr. President, I move that the meeting do now proceed to elect Directors for the coming year, and that for this purpose the ballot box be opened and remain open until three o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the General Manager.

Mr. William Farwell then seconded the motion, which was duly carried.

The motion for the adoption of the report was put and carried.

By-laws increasing the number of Directors of the Bank to twenty-two and also increasing the amount available for the remuneration of the Board of Directors were then passed.

The usual resolutions expressing the thanks of the shareholders to the President, Vice-President and Directors, and also to the General Manager, Assistant General Manager and other officers of the Bank were unanimously carried.

Upon motion the meeting proceeded to elect Directors for the coming year and then adjourned.

The scrutineers subsequently announced the following gentlemen to be elected as Directors for the coming year:

Sir Edmund Walker, C.V.O., LL.D., D.C.L.; Hon. George A. Cox, John Hoskin, K.C., LL.D.; J. W. Flavelle, LL.D.; A. Kingman, Hon. Sir Lyman Melvin Jones, Hon. W. C. Edwards, Z. A. Lash, K.C., LL.D.; E. R. Wood, Sir John M. Gibson, K.C.M.G., K.C., LL.D.; William McMaster, Robert Stuart, George F. Galt, Alexander Laird, William Farwell, D.C.L.; Gardner Stevens, A. C. Flumerfelt, Geo. G. Foster, K.C.; Charles Colby, M.A., Ph.D.; George W. Allan, H. J. Fuller, F. P. Jones.

At a meeting of the newly elected Board of Directors held subsequently, Sir Edmund Walker, C.V.O., LL.D., D.C.L., was elected President, and Mr. Z. A. Lash, K.C., LL.D., Vice-President.

SASKATCHEWAN'S FINANCING

Saskatchewan's main estimates for the fourteen months ending April 30, 1914, shows the estimate of revenue to be $5,542,316.99, while the figure representing the total expenditures is set at $10,205,572.99, five and a half millions being for expenditure. The largest amount on the revenue side of the sheet is the dominion subsidy of $2,035,758.10, made up as follows: Government and legislature, $190,000; on population ($492,432, at 80 cents a head), $393,945.60; debt allowance, three payments, $608,062.50; in lieu of lands, three payments, $843,750.

The credit balance shown for March 1, 1913, is $100,000. Among the other large items of revenue are—School lands funds, $250,000; treasury department, $296,850 (which is inclusive of $25,000 interest on the loan to the city of Regina); attorney-general's department, $989,000; provincial secretary's department, $341,722; public works department, $122,886.89; educational department, $33,000; agricultural department, $379,000; municipal department, $120,000; legislative assembly (private bill fees and casual revenues), $1,600; government printer, $5,000; public health bureau, $500; estimated revenue from telephone system, $475,000.

In the summary of the estimated expenditures, the amount for current expenditure is given as $5,439,572.99 and the expenditure on capital at $4,766,000. This latter amount includes the following items: Public buildings construction, $1,706,000; public improvements, $1,500,000; telephones, $1,060,000. In the total amount for current expenditure the chief items are: Public debt, $673,000; civil government, $345,794.61; legislation, $100,970; administration of justice, $917,469.76; public works, $233,878.64; public improvements, $630,000; education, $701,620; agriculture and statistics, $559,149.38; bureau of public health, $149,120; neglected and dependent children, $28,020; telephones, $50,000; miscellaneous, $75,550.

MEDICINE HAT'S INDUSTRIES

Medicine Hat, Alta., January 3.

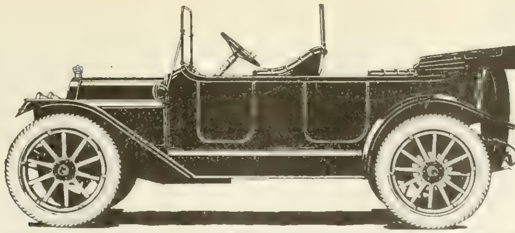
A careful survey of the industrial activity of Medicine Hat during the year 1912 shows that satisfactory progress was made. No less than 18 distinct and separate industries or factories were definitely located in the city during the last year as a result of the combined efforts of the industrial bureau and the city council. These efforts collectively brought industries representing investments from $4.000 up to $1,000,000 each, the total representing an approximate investment of $4,800,000, to employ, it is estimated, 1,285 persons.

The following table shows the names of the industries, the approximate amount of investment, and the estimated number of employees when they are all completed and operating at full capacity.

Name of Industry.	Amount of Investment.	Number of Employees.
Alberta Glass Bottle Company	$ 75,000	50
Medicine Hat Pottery Company	150,000	65
Medicine Hat Steam Laundry Company	30,000	20
Medicine Hat Steel Company	250,000	50
Ogilvie Flour Mills Company	1,000,000	175
Medicine Hat Milling Company	100,000	30
Medicine Hat Crayon Company	25,000	25
Maple Leaf Milling Company	800,000	150
Manitoba & Ontario Milling Company	800,000	150
Wetaskiwin Tent & Mattress Company	30,000	40
Alberta Steel Products Company	15,000	25
Medicine Hat Pump & Brass Mfg. Co.	50,000	50
Alberta-Saskatchewan Paper & Strawboard Company	150,000	50
Matthews & Sleight, Metal Windows and Fire Doors	4,000	10
Hunt Engineering Co., Cement Plant	1,000,000	250
T. H. Tabor, Candy Factory	35,000	25
Medicine Hat Brick Company	250,000	100
Medicine Hat Concrete Products Co.	25,000	20

Of these, 11 have either started construction or have already completed their buildings and are now practically or entirely ready for operation. Three of the largest of these concerns will begin the heavy construction work in the spring. In this table no account whatever has been taken of several new industries which have been carrying on negotiations.

In connection with this industrial activity in Medicine Hat, it is significant that in almost every case the industries located and doing business have found commercial conditions satisfactory, and the demand for the products greater than had been anticipated, that many of them are either contemplating enlargement or already preparing for increasing capacities in the near future.



Russell-Knight "28" Touring Model, $3250 Russell-Knight "28" Roadster Model, $3200
Russell-Knight Seven Passenger, $3500. F.O.B. West Toronto

COMFORTABLE COLD WEATHER DRIVING WITH RUSSELL-KNIGHT "28"

WINTER weather conditions are well provided for by the heating system of the Russell-Knight "28."

The tonneau wind shield, an exclusive Russell feature, gives complete protection from the wind, while the method of heating the body of the tonneau from the exhaust of the engine is quite the cleverest and most successful of all systems.

The heating system neatly concealed beneath the rear seat, gives to the occupants "Pullman" comfort on the coldest of days and makes winter riding both warm and exhilarating.

The Electric Starter is another great adjunct to comfortable winter riding. A carburetor adjustment is provided on the steering column, which closes the air valve when a richer mixture is required for starting the engine. This feature is exceptionally convenient in very cold weather.

The left-hand drive on the "Russell" fully accomplishes its purpose in leaving all four doors accessible. It's unnecessary to go around the car into the snow or mud in order to enter.

A fine range of styles in closed bodies, particularly well suited to Canadian requirements, will commend themselves for their ample equipment, complete refinements and all-round evidence of luxury.

IMPERIAL GUARANTEE AND ACCIDENT INSURANCE COMPANY

Satisfactory increases mark the eighth annual report of the Imperial Guarantee and Accident Insurance Company of Canada. The directors of the company do not think it advisable to enter the arena of workmen's compensation insurance, deeming it a safer policy to build up their business on the lines of accident, sickness, fidelity guarantee and plate glass insurance.

With this object particularly in view, the results attained last year were gratifying. The premiums on business written amounted to $322,085, of which $304,831 was paid for, being an increase on business written of $67,178, and on paid business of $51,963. The interest earnings amounted to $12,334, being an increase of $1,753. The company issued 14,651 policies for $34,174,157, being an increase over last year of 1,633 policies, and of $3,095,818 on business written.

The assets of the company now amount to $386,234, being an increase of $47,682. The surplus to policyholders is $250,741, which, together with the uncalled subscribed capital of $800,000, makes the available security for all contracts $1,050,741.

EIGHTH ANNUAL REPORT
BY THE DIRECTORS OF

The Imperial Guarantee and Accident Insurance Company of Canada

Head Office: 44 King Street West, Toronto, Ont.

FOR THE TWELVE MONTHS ENDING THIRTY-FIRST DECEMBER, NINETEEN HUNDRED AND TWELVE.

The Directors have much pleasure in submitting to the Shareholders their Eighth Annual Report for the twelve months ending 31st December, 1912.

BUSINESS: The Company issued 14,651 policies for $34,174,157.00, being an increase over last year of 1,633 policies, and of $3,095,818.00 on business written.

The premiums on business written amounted to $322,085.86, of which $304,831.69 was paid for, being an increase on business written of $67,178.67, and on paid business of $51,963.07.

The interest earnings amounted to $12,334.06, being an increase of $1,753.00.

ASSETS: The Assets of the Company now amount to $386,234.45, being an increase of $47,682.36.

SURPLUS: The surplus to policyholders is $250,741.93, which, together with the uncalled subscribed Capital of $800,000.00, makes the available security for all contracts $1,050,741.93.

The Directors have not deemed it advisable to enter the field of Workman's Compensation Insurance, believing it a safer policy to build up the business on the lines of Accident, Sickness, Fidelity Guarantee and Plate Glass Insurance.

The Certificate of the Auditors is appended to the Financial Statement as to the audit of the Company's affairs.

E. W. COX, President.

NEW PRESIDENT OF TORONTO BOARD OF TRADE

Lieutenant-Colonel Henry Brock has been elected president by acclamation of the Toronto Board of Trade. For seven years he has been a member of the board's council and in that capacity and as first vice-president and chairman of the conference committee last year, he has done yeoman service.

Colonel Brock is the eldest son of W. R. Brock, one of Toronto's most prominent wholesale merchants. He was born in Oakville in 1859, and received his education at Upper Canada College and Toronto University, receiving his degree of B.C.L. in 1899 and D.C.L. in 1905. As a successful barrister in the city he obtained an enviable reputation, but gave up his profession in 1905 at the request of his father. He is a director of the Standard Granite Quarries Company, and the Dominion Fire Insurance Company.

The election of Colonel Brock to the presidency of the Toronto Board of Trade has been received with general satisfaction.

LIEUTENANT-COLONEL BROCK,
President of the Toronto Board of Trade, 1913.

The British Dominions General Insurance Company, Limited, has been registered in Saskatchewan

WESTERN PORTS WILL GET MORE TONNAGE

The coming year will see the greatest development in transpacific business for the ports of Vancouver and Victoria in the history of Western shipping. The British Indian Navigation Company, which operates from Calcutta to Yokohama, announces an extension of the service across the Pacific, for which four steamships, of 10,000 tons register, are being built; the Royal Mail Steam Packet Company proposes, when its European line via the Panama Canal is opened, to extend its service from the United Kingdom to Yokohama by the Glen and Shire Lines across the Pacific.

In addition to the above, new lines are being planned via Panama, and the regular lines already in the trade to this port will place newer and larger vessels in service next season.

Some of the additions will be the new Empress boats of the Canadian Pacific Railway, the "Empress of Russia" and "Empress of Asia," vessels of 15,000 tons register, to be added to the present fleet of three vessels, and the 14,500-ton liner "Niagara" for the Canadian-Australian Line.

◆

A NEW SIGN IN LIFE INSURANCE

The recent announcement made by one of the life insurance giants of New York strikes a new and clear note in life insurance management, compared with the loud sounding boast of eight or ten years ago, when nearly every other feature of life insurance management was lost to view in the glorification of the new business written by the larger companies.

The present management of the New York Life is thoroughly awake to the influence of public opinion and for the last few years emphasis has been laid in its annual reports upon those features that appeal strongly to its members, and that must bring increased confidence in, and respect for, its managing officials.

In this latest announcement as to last year's business of his company, President Kingsley commences by assuming that the chief interest of its members lies, not in the fact that it has written a larger business than any other company on the earth, nor that its income is the "biggest ever," but rather in the real progress made, and especially in its "efficiency and economy of management." To this end he dwells upon the improved earning power over previous years brought about by the reduction of expenses and the better earnings on the invested funds.

Evidently those responsible for the administration of this company have become strongly impressed with the sense of responsibility involved in carrying out the great trust involved in the administration of its affairs.

They recognize that competition among life insurance companies is centring more and more on the factor of service to policyholders. This service is proved in various ways, but one of these ways appeals strongly to the average man, and that is the amount of dividend which the management is able to declare upon its policies. The company that can remain financially strong and progressive and yet keep reducing the net cost of insurance to its policyholders through the medium of dividends is bound to become more and more popular. Hence, in the very forefront of his last annual announcement President Kingsley, of the New York Life, puts the slogan of "efficiency and economy in management" as the battle cry for his army of agents.

He informs the great host of policyholders that as a result of this policy of efficiency and economy the earning power of the company improved over two million dollars last year, as compared with that seven years ago.

He further states that the total expenses of management for 1912 were only 63 per cent. of what the New York law would have permitted, and that, too, after writing the maximum volume of new business allowed by the law.

We have drawn attention to this charge of emphasis in company management as displayed by a prominent United States company, and it may be taken for granted that it represented a settled drift in public sentiment and one to which Canadian companies will do well to take heed in the shaping of their future policy of administration.

It will be of no little interest to watch the working of this new phase of company management in this country during the next few years.

LA BANQUE NATIONALE.

On and after Saturday, the 1st of February next, this bank will pay to its shareholders a dividend of two per cent., being at the rate of eight per cent. per annum, upon its capital, for the quarter ending on the 31st of January next.

This dividend will be paid according to the list of shareholders of record on the 16th January next.

By order of the Board of Directors.

N. LAVOIE,
General Manager.

Quebec, 17th December, 1912.

MEXICO TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of One and Three-quarters per cent. (1¾%) has been declared on the capital stock of the Mexico Tramways Company, payable on the 1st February, 1913, to shareholders of record at the close of business on the 11th day of January, 1913, and that the transfer books of the Company will be closed from the 13th day of January, 1913, to the 31st day of January, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada, New York City, Mexico City, Mexico, London, England, and its branches.

The holders of Bearer Share warrants, on detaching from their share warrant, coupon No. 15, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, Mexico City, or London, England, on or after the 1st day of February, 1913, will receive in exchange for each coupon the sum of One dollar and Seventy Five Cents ($1.75) representing the amount of the dividend.

By Order of the Board,

W. E. DAVIDSON,
Secretary.

Toronto, Canada, January 6th, 1913.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend of One per cent. (1%) has been declared on the ordinary shares in the capital stock of The Mexican Light and Power Company, Limited, payable on January 20th, 1913, to shareholders of record at the close of business on the 11th day of January, 1913.

The transfer books of the Company for Ordinary Shares will be closed from the 13th day of January, to the 18th day of January, 1913, both days inclusive.

Dividend cheques for shareholders are payable at par at the Canadian Bank of Commerce, Toronto, Canada, New York City, Mexico City, Mexico, London, England, and its branches.

By Order of the Board,

W. E. DAVIDSON,
Secretary.

Toronto, Canada, January 6th, 1913.

ALUMINUM IS IN A RING

The existence of an international agreement covering the aluminum industry was revealed at a session of the House Committee on Ways and Means at Washington. President Arthur V. Davis, of the Aluminum Company of America, admitted that his company, the only aluminum manufactory in the United States, owned the Canadian Aluminum Company, which in turn, had agreements with all of the six or seven foreign aluminum companies. This agreement, he said, covers all the world except the United States, which he admitted was excepted because there is a law there prohibiting it.

Mr. Davis testified that the company's total surplus was $12,000,000, and that the company is capitalized at $30,000,000, on which it is issuing a dividend of four per cent. on the capital stock. It has been earning between 15 and 17 per cent. annually in 1910, 1911 and 1912. Representative Palmer, of Pennsylvania, brought out that of the $30,000,000 of capital, the total amount of cash actually put in was $1,860,000, the remainder representing earned profits.

Mr. Davis testified that he and his London representative wrote the agreement made by his Canadian plant with all the plants in Europe.

The Aluminum Company of America is generally understood to have acquired by ownership or lease more than 90 per cent. of all the known deposits of bauxite, from which aluminum is made, in the United States and Canada, and to produce practically 80 per cent. and consume substantially 100 per cent. of the alumina used in the manufacture of aluminum, and to manufacture substantially 100 per cent of the crude and semi-finished aluminum produced in the United States and Canada. It is also said to control and sell more than 70 per cent. of the aluminum cooking utensils in the United States, over 50 per cent. of aluminum castings and over 70 per cent. of all aluminum goods and novelties of general make manufactured and sold in the United States.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

CANADIAN BANK OF COMMERCE

There were many indications at the annual meeting of he shareholders this week that the Canadian Bank of Comnerce has become a very important factor in the financial nd economic fabric of the country. With assets of nearly 250,000,000, with nearly 400 branches, a representative lirectorate, this bank now possesses a remarkably complete rganization. That organization was characterized by sevral shareholders as one of the most valuable hidden assets f the institution. Tho net profits of the bank for the year nded November 30th, 1912, after providing for all doubtful lebts amounted to $2,811,806. There was available for disribution a sum of $5,657,381. A dividend of 10 per cent. or the year and a bonus of 1 per cent. accounted for $1,68,622. To the pension fund the usual annual contribution f $75,000 was made and $500,000 was written off bank remises. The rest account benefited by an addition of 2,742,180, that account now being $12,500,000, slightly less han the paid-up capital of $15,000,000. The balance carried orward was $771,578.

The average capital employed during the year was $14,10,437 and the net earnings were at the rate of 18.78 per ent. In his address Mr. Laird, the general manager, called ttention to the serious problem to be faced in the changes bsolutely essential for the proper accommodation of the head ffice and the Toronto branch, the present premises having een for several years quite inadequate.

The bank took advantage of the emergency provision of he Bank Act amendment of 1908, early in October, and closd their statement in November with a circulation of $1,22,864 in excess of the amount of their paid-up capital. Mr. aird thinks that even with the establishment of a central old reserve, as suggested in the proposed Bank Act amendnents, the bank should anticipate an increasing demand for ank note currency by the issue of additional capital.

The bank has now 5,656 shareholders, who are distributed as follows:—In Ontario, 1,388; Quebec, 1,127; Maritime Provinces, 702; Western Provinces, 118; Great Britain, 1,569; United States, 669; other countries, 83. The excellent statement and the addresses of the president and general managers and are printed in detail elsewhere in this issue.

The number of directors was increased from nineteen to twenty-two, the new directors named being G. W. Allan, of Winnipeg; H. J. Fuller, of the Canadian Fairbanks Company, and F. P. Jones, general manager of the Canadian Cement Company, Montreal.

◆

At Hamilton the results of the nominations for the officerships of the board of trade were as follows:—President, Mr. F. J. Howell; vice-president, Mr. George C. Coppley; secretary, Mr. Theo. L. Brown; treasurer, Mr. W. G. Bailey. These were all elected by acclamation but there was an election for places on the executive council at the annual meeting last night, as eleven were nominated, as follows: H. L. Frost, R. T. Kelley, A. W. Day, C. W. Heming, C. A. Gray, J. W. Lamoreaux, M. E. Rolston, W. J. Millard, H. C. Beckett, William Gastle and E. B. McKenzie. President Frost spoke a few words to the board on the good work of the secretary, Mr. Theo. L. Brown. Mr. Frost stated that it was due partly to the efforts of Mr. Brown that the board had had such a successful year.

PUBLIC UTILITIES MATTERS IN COURTS

Interesting Suit Has Arisen at Montreal—Power and Tramways Companies Involved

Monetary Times Office,
Montreal, January 16th.

An interesting action at law is being heard this week, in connection with which some of the leading public utility interests and lawyers of the city are giving evidence. The case is that Mr. Ernest E. Vipond and Mr. Herbert S. Vipond versus the Corporation Agencies, Limited, and Mr. H. A. Lovett, K.C.

It would seem that prior to October 22, 1909, plaintiffs were owners of the entire capital stock of the Montreal Electric Company, and also were the owners of an option to purchase the issued capital of the Electric Power Company of Montreal, the former holding the rights to a power site at the Lachine Rapids, a few miles above Montreal, and the latter having a site near Cedar Rapids, some thirty miles from Montreal.

At the time mentioned, plaintiffs were engaged in financing and organizing the companies to enter the field for the supply of power. In this connection, they were called upon by Mr. H. A. Lovett, the defendant, who proposed to undertake the work for them and to carry through the undertaking to the point of developing power and distributing it in the city of Montreal.

Agreement Was Made.

An agreement to this effect was drawn up between the Messrs. Vipond, plaintiffs, and Mr. Lovett, and the Corporation and Audit Company, which latter afterwards became the Corporation Agencies, Limited, defendants. The defendants were to carry out the purposes of the companies as already described, after having examined the powers, rights and franchises, and to this end were to incorporate another company to utilize the combined rights of the two concerns more effectively. Plaintiffs were to receive $50,000 in first mortgage bonds of the new concern and $250,000 of its shares and were to resign their option on the Electric Power Company of Montreal and to make over all the shares of the Montreal Electric Company.

The result of the agreement was that the Montreal Hydro-Electric Company was formed with a capital of $10,000,000. Later, the absorption of the Montreal Hydro-Electric by the Tramways interests took place through the majority shares which were held by the Corporation Agencies, Limited. In this connection, the plaintiffs introduce the Canadian Light and Power Company, which, together with the Montreal Tramways Company and other public service corporations, have been brought into one large holding company known as the Montreal Tramways and Power Company Limited, and which holds the control of all these concerns They allege that defendants did not carry out the spirit o the agreement and that the object and effect of the change which took place were to rid the Canadian Light and Powe of a possible rival, and also that the Corporation Agencies Limited, being trustees of plaintiffs, had no right to han over the control in the manner alleged.

What Plaintiffs and Defendants Say.

Plaintiffs claim that they have suffered damages and as for the recovery of $297,500, being the value of the right and franchises made over by them as described.

Defendants, on the other hand, claim that on the dat mentioned they acquired direct from Mr. Rodolphe Paradi the rights and privileges of the Electric Power Company the plaintiffs, for the sum of one dollar, resigning wha rights they might possess therein and consenting to th agreement between defendants and Paradis. As to the Montreal Light Company, it was organized in 1881 and never carried out its development but engaged in a retail busines amounting to about $2,500 per annum. By organizing th Montreal Hydro-Electric Company and handing over to plaintiffs the bonds and stock agreed upon, defendants clain they fulfilled their obligations. Afterwards, in view o the large developments which were taking place in connection with the power and tramways systems of Montreal, an also as one of the companies of the merged group was developing in the same vicinity as the site of the Montrea Electric Company, they considered the best way of advancin the interests of the Montreal Hydro-Electric Company was to enter the merger. This they accordingly did. They considered that the interests of plaintiffs in the merger were worth several times as much as they had previously been.

Guaranteed Principal and Interest.

Mr. Lovett gave evidence to the effect that the Tramways and Power Company had paid a large sum for the Montreal Hydro-Electric Company and had guaranteed the principal and interest on the bonds of the two small companies. It had also agreed to develop the power at Laprairie, at the foot of the Lachine Rapids, as soon as conditions warranted. By the arrangement with the Tramways and Power Company, Mr. Lovett considered that the smaller concerns were placed in a more advantageous position fo the development and sale of their power when such was developed, as it would have been difficult to finance them on the strength of their ability to develop their power and find a market for it in Montreal in competition with other concerns until the market enlarged. By the alliance with the larger and stronger company, the position of the smaller concerns was much improved.

BUILDING A STATISTICAL ORGANIZATION

It is material that the country in the stages of early nd rapid growth should have proper statistical records. f these there has been in Canada a marked absence. he Dominion has maintained a census and statistics ffice as a sort of incident to government instead of naking it one of the important departments. The various epartments have also kept certain statistics, but insuf-cient time, money, labor and staff have been concen-rated to give the Dominion the statistical organization should properly have. The provincial governments lso collect various statistics, but methods of compilation iffer in almost every province. Municipal accounts and tatistics are not compiled in a uniform way. No one nows how much has been given by municipalities as onuses to industries. No public records are available s to the idle railroad cars in the country on any given lay. There is no compilation showing the stock and ond indebtedness of Canada; and so one might extend he list indefinitely. At a belated date, this dearth of tatistical information has been recognized by the Gov-rnment of Canada. A departmental commission was ap-ointed, consisting of Mr. Richard Grigg, commissioner f commerce, as chairman; Professor Adam Shortt, civil ervice commissioner; E. H. Godfrey, of the census and tatistics branch; W. A. Warne, statistical branch, rade and commerce department; R. H. Coats, depart-nent of labor; and J. R. K. Bristol, department of cus-oms. They have made an exhaustive and valuable inquiry into the statistical work now carried on in the various departments, as to its scope, methods, reliability and the question of duplication.

They admit that the scope of Canadian statistics has been restricted, and that on not a few points of vital interest to the country little or no statistical information exists in a form for practical application. They find that there is considerable duplication, that available statistics are unequal in quality and value, that the restriction of outlook has impaired promptitude in the issue of reports, and that lack of unity and co-ordination prevents true comparisons between Canada and other countries. For these shortcomings, which the commission mildly describes as unfortunate, the commissioners recommend briefly:—

I. The organization of a central statistical office for the co-ordination, unification, extension and general improvement of statistics, involving:—

(1) The creation of a Dominion Inter-departmental Statistical Committee.

(2) The creation of an Interprovincial Conference on Statistics.

II. The following reforms in existing statistics:—

(1) Dominion

(a) The Census.—The taking of a quinquennial census and the limitation of the field of the census proper to the enumeration of population and property, with a thorough re-examination of the methods at present in use in collecting and compiling data and in publishing results.

(b) Production.—The institution of an annual census of production, embracing the chief products of agriculture, forestry, fisheries, mining and manufactures.

(c) Trade.—The co-ordination of the work of the statistical branches of the Departments of Customs and

Trade and Commerce, with improvement in the classification scheme and in other details.

(d) Transportation.—The reorganization of canal statistics. The creation of statistics of coastal trade.

(e) Labor.—Tht creation of wages and consumption statistics.

(f) Emigration.—The perfecting of methods of recording departures.

(g) Miscellaneous.—Improvements in statistics of insurance and the development of price statistics.

(h) Publications.—The enlargement of the Canada Year Book. The co-ordination of other publications.

(2) Provincial

The co-ordination of statistics on the following subjects in the light of matter set forth in the report: Births, marriages and deaths; public health; education; agriculture; local and municipal governments; industrial accidents; various phases of production; finance; public lands; public works; and hospitals and charities.

III. The appointment of all officials engaged in statistical work on grounds of character and capacity.

While the commissioners' recommendation might be extended considerably, it is unreasonable to expect a longer programme as a beginning. Indeed, Canada is so lamentably lagging in statistical organization and records that it would be impossible to amend the omissions of the past in a single effort of reform. The recommendations are excellent, and will afford sufficient work to keep a competent statistical staff busy for some time to come. It is to be hoped that the government and the public will give all assistance possible with a view to placing into effect the recommendations of the commissioners. Their report represents a vast amount of labor, and will be regarded as the real foundation stone of Canada's statistical structure.

CLOSE OF THE BANK CASE

More extended reports respecting Judge Leet's decision in La Banque Internationale case are now available. The evidence taken prior to the public hearing, we are told, will be found in the record under the same conditions as if it had been taken after the issue of a warrant. That disposes of the plea of *The Monetary Times* for the publication of all the evidence.

Mr. J. T. Knight, secretary of the Bankers' Association, stated at the hearing last week that he had investigated the matter of complaint, and after the examination declined to bring the subject to the attention of the executive committee of the Bankers' Association, as there was not enough, in his opinion, to warrant action. Mr. J. D. Muir, chief accountant of the Merchants Bank, with lengthy experience in making bank returns to the government, stated that in his opinion a banker making a statement could not have treated the current note in question other than the general manager of the French bank had done. That disposes of the charge that a false return had been made to the government. It also clears Mr. Godfrey Bird, the general manager of the bank, and who will continue his banking career with the Home Bank.

Judge Leet stated that he was approached by the representatives of both the prosecution and defence and asked to hold his judgment until the negotiations for the transfer of the business of the bank were further advanced. He could not see that a delay would prejudice either the accused or the public interest. While it may not have prejudiced, it certainly has not worked to general advantage. Much unpleasant publicity might have been avoided had the whole matter been allowed to take what might be termed the usual course. The hearing of plaintiffs' evidence in camera and evidence for the defence in public is, we submit, undesirable.

"Our financial institutions," said the judge, "should be above reproach, and also the manner in which they are managed." While the majority of them and their management are above reproach, the history of banking in Canada has proved that some of them have been mismanaged in no uncertain way. When a bank becomes involved in court actions, the best thing possible for the good name of Canadian banking and Canadian credit is to give it proper publicity. That is why *The Monetary Times* has persisted in its requests week by week until satisfaction in that direction was obtained.

BANKING LEGISLATION

The second reading of the bank act at Ottawa this week was the subject of animated debate. So long as Mr. White's proposed amendments are discussed upon their merits and not from the political viewpoint, such discussion is healthy for the country. The bankers, we feel sure, are in favor of free criticism and suggestion. While we have an excellent bank act, moulded from time to time to meet the financial needs of the country, we may have a still better one as the result of co-operation between the public, the bankers and the government.

The public realize that they must be financed by the banks, and the public desire, therefore, fair treatment, as they have generally had in the past. The bankers, recognizing that they enjoy certain privileges, wish to extend legitimate credit, run their business in a businesslike way and satisfy their shareholders and depositors. The government has to regulate the privileges and suggest amendments to the bank act deemed necessary every ten years.

No reason is there why such a serious and important matter should be the subject of acrimonious debate. The proper desires of every factor in Canadian banking can be gratified by a calm and non-political consideration of the act.

The question of government inspection was prominent in this week's debate. Mr. White maintained that it would be ineffectual, and would create a false sense of security and relieve the directors of a sense of responsibility. As he truly pointed out, the very essense of banking is the loan on personal credit as opposed to the loan on securities. *The Monetary Times* feels that the personal factor in banking has not been generally considered as it properly should. Whatever audit or inspection is devised, whatever safeguards are taken, we must, as Mr. White says, always rely in the final analysis on the integrity and ability of the officers and directors. We think it will be pursuing a useless suggestion to advocate government inspection. No government of any political color whatever would attempt to undertake it.

Mr. White has carefully considered English legislation, and the provisions for audit incorporated in the act substantially put it in the same position as the most advanced legislation in British countries. The bank shareholders are the proprietors. The loss falls principally on the shareholders, and they should appoint the auditors. It has been suggested that through proxies the directors would appoint these officials. It is impossible to prevent this, but it is provided that there must be ten days' notification to all shareholders. There is no case on record of collusion between directors and an auditor, and the directors are as interested as the other shareholders. Penalties have been made severe, five years' imprisonment being prescribed for improprieties, and penalties have also been added for negligence.

Double liability has always been an unpleasant incident at the time of bank failures. Mr. White was asked if anything had been done to relieve the shareholders from that. The suggested amendments do not propose any change in that direction, but Mr. White thinks that under the new inspection the liability might be limited to the paid up capital as in the case of a corporation.

SMALL CHANGE

They say Sir James Whitney is an auto crat, not mobile.

* * * *

It costs nothing and means much to be polite in business.

* * * *

The surgeons look serious, the knife is sharp. The United States tariff is to be cut.

* * * *

Canadian flotations in London this year to date total $2,881,200—quite a respectable January nibble.

* * * *

The maladministration of Toronto's engineering problems may yet figure as an adverse factor in the sale of its bonds.

* * * *

Chicago incendiaries, we are told, use gasoline sausages to start fires. That is bad enough, but suppose some of those sausages should revert to type.

* * * *

Having prohibited the sale of "Three Weeks" on the Intercolonial Railway, the Department of Railways may distribute copies of Hansard to passengers.

* * * *

A typographical error has paid a well-deserved compliment to Mr. E. S. H. Flood, the Canadian Trade Commissioner at Barbado. Discussing the finances of Bermuda, the report issued from Ottawa says: "Though the financial statement for last year has not yet been published in official form in Bermuda, your able commissioner, through the kindness of the treasurer, to give a summarized statement."

* * * *

The British Trade Commissioner in Canada, Mr. C. H. Wickes, has girded on his armor to battle for the establishment of a laboratory either in Canada or Engand similar to the fire underwriters' laboratories at Chicago. A synopsis of his report to the British Government is printed in this issue, and next week we propose o publish the comments thereon, obtained by *The Moneary Times*, of fire insurance managers and others who are interested.

* * * *

As the result of a wager, and to test the skepticism of the British public, a man disguised as a peddlar appeared in the west end streets of London and offered genuine £5 notes for a penny each. Although he offered his extraordinary bargains for an hour, flourishing the notes in his hands and crying: "Five-pound notes a penny each," and even permitting people to examine hem, the pedlar sold only two. This delightful jewel of English caution looks well until placed in a setting of certain Canadian offerings overseas.

WESTERN LIFE ASSURANCE COMPANY

Although the Western Life Assurance Company, which has its head office in Winnipeg, has been in business but a short time, it has obtained good results, according to the atest statement issued by the company. At the end of eighteen months' business to December 31st, 1912, applications valued at more than $1,600,000 were received, and $1,320,000 of business issued. The premium income on this was $44,500. The company's assets are $124,000, and there is a surplus security to policyholders of $105,000.

The liabilities, including policy reserves and reckoned according to the Dominion Government standard, are $19,000. The capital stock called is $71,680. The organization expenses of this company are reported to be less than 5 per cent. of the subscribed capital, which is very low. Mr. T. W. Taylor, M.P.P., is president and Mr. Adam Reid is managng director.

VANCOUVER'S BONDS GO TO NEW YORK

More Than a Million Dollars' Worth of Debentures Sold—They Will Keep Away from London

Local improvement debentures to the amount of $1,093,625.93 have been disposed of by the city of Vancouver to Messrs. Brown Brothers and Company, of New York, the city accepting that company's offer made. It is stipulated that these bonds are not to be placed in the London market.

The debentures run 14, 15 and 20 years. The city council desire to make the bonds 4½ per cents. Their fiscal agents advised them not to do this, stating that the present unfavorable market conditions would probably be only temporary.

The sale of this large block of Canadian municipals in New York is an interesting incident and another indication that the neighboring market is broadening towards Canadian securities. At the same time it must not be overlooked that Canada must depend for many years to come on British capital for the majority of its funds. Some Vancouver debentures were sold in New York in 1907 by Messrs. Æmilius Jarvis and Company, Toronto.

There will be a considerable amount of money sought by British Columbia municipalities this year, and it is expected that the market will be in better condition than it has been for some months past. Vancouver ratepayers approved bylaws to the extent of over five million dollars at the recent election.

Although Vancouver will have a large issue this year, it has still a borrowing margin of $6,000,000, and there will be more of an increase a year from now. The borrowing power of the city is based on the assessment for the two years immediately past, the amount being 20 per cent. of the total assessment. It is not required that the city's local improvement bonds be included within this limit, but the city council has always endeavored to do so.

RAILWAYS WILL AMALGAMATE

Application will be made to the Ontario Legislature at its next session for an act amalgamating the North Lanark Railway Company with the Ottawa and St. Lawrence Electric Railway Company under the name of the Ottawa and St. Lawrence Electric Railway Company, and increasing the capital stock from $1,000,000 to $5,000,000 by the creation of 40,000 additional shares of $100 each; and for power to issue bonds and borrow money to the extent of $30,000 per mile of the railway.

BANK OF VANCOUVER

The third annual statement of the Bank of Vancouver shows that at the end of the year, November 30th, 1912, there were available for distribution a sum of $66,699, in which was included the balance at credit of profit and loss $26,304 at the end of the previous year. To the reserve fund $40,000 of this was placed, that being the first contribution to that account, and $26,699 was carried forward to the balance of profit and loss. The net profits for the year were $40,395. At the end of November last the bank had interest bearing deposits $813,009 and non-interest bearing deposits $825,032. The paid-up capital is $846.600. Current loans total $1,913,176.

Turning to the assets as at November 30th last, the cash assets, that is specie, Dominion Government notes, and the equivalent of cash, i.e., notes of, cheques on, and balances due from other banks, aggregate $544,237.23. In addition to this, the bank's investments, comprising good railway and other bonds, readily marketable, amount to $103,568.77, and loans on call in Canada, amply secured by high-grade bonds and stocks, are $300,000, thus the bank's cash and quickly realizable assets amount to $947,806.00, being at the rate of 44 per cent. to liabilities to the public. The ordinary commercial loans, amounting to $1,978,177.37, represent 64¾ per cent. of the total assets.

In reviewing general conditions, Mr. R. P. McLennan stated that under even less than normal conditions the province of British Columbia would continue to expand commercially, and analyzed the situation to prove his assertions satisfactorily.

Mr. C. G. Pennock is now general manager of the Bank of Vancouver, having succeeded Mr. L. W. Shatford, who in turn succeeded Mr. Dewar. The bank has been in operation two years. Mr. E. H. Heaps resigned as a director, claiming that the position demanded more time and attention than he found convenient to give. The officers and directors are Messrs. R. P. McLennan, president; L. W. Shatford, M.L.A., vice-president: Hon. T. W. Paterson, J. A. Mitchell, M. B. Carlin, J. A. Harvey, K.C., George Barbey, A. Istel, and C. S. Douglas.

MONTREAL TRAMWAYS AND SUBSIDIARY COMPANIES

Judge Orders Documents to be Produced and Case is Then Referred to Court of Appeal

Monetary Times Office,
Montreal, January 22nd.

Matters in connection with the Montreal Tramways and Power Company and its subsidiaries are occupying almost the entire attention of financial circles in Montreal and the citizens generally. The Monetary Times last week reviewed the case of Messrs. Ernest E. Vipond and Herbert S. Vipond against the Corporation Agencies, Limited, and H. A. Lovett, K.C. Plaintiffs were suing for $279,500 which they claimed was the value of the rights and franchises of the Montreal Hydro-Electric Company, which had been turned over to the Montreal Tramways and Power Company by defendant, the Montreal Hydro-Electric Company being a holding company or merger formed by Mr. Lovett of two concerns of which the Viponds were apparently the principal owners. They were the entire owners of the Montreal Electric and, they alleged, were the owners of an option on the other company, the Electric Power Company of Montreal, which, Mr. Lovett, in the direction of carrying out his contract to carry the scheme through to an operating basis, had merged into the Montreal Hydro-Electric. This was in 1911.

Fulfilment of Contract.

The Viponds claimed that defendants had not fulfilled their contract in the manner in which it was made but had turned the Hydro-Electric into the Montreal Tramways and Power which was the big concern formed to take in the Canadian Light and Power, the Tramways Company and a number of other smaller power concerns of the city. Their particular objection seemed to be to the inclusion of the Canadian Light and Power in the Tramways and Power Company.

In this connection, came up the name of the Imperial Trust Company, which had officiated in the transfer of the Hydro-Electric to the Tramways and Power Company. It was shown that it was under the same control as the Canadian Light and Power, the Tramways Company, and the Tramways and Power Company. Further connection was attempted by showing that Mr. H. A. Lovett, K.C., was closely associated with this group of companies also, as their counsel. Then was made an attempt to have certain documents relating to the deal produced by the Imperial Trust Company. Argument on this point went on for some hours and resulted in the Judge ordering the production of the documents. The official claimed he would have to consult those in authority first, upon which the Judge read him a lecture and ordered the documents to be produced.

To Court of Appeal.

At this juncture the counsel for the defence announced that under such circumstances he would beg to take the matter to the Court of Appeal. The matter will accordingly be brought before the Appeal next month.

Meantime, the Canadian Light and Power Company has sustained an attack from another direction, certain large contractors having entered suits for amounts aggregating, it is claimed, nearly half a million, on the grounds that contracts completed at the company's plant near Valleyfield had never been paid for and that their engineers had been prevented from making the final estimates necessary to secure the balance of payments due.

Jurisdiction of Utilities Commission.

During the past week, also, the appeal of the Tramways Company on the grounds of jurisdiction was made against the Public Utilities Commission of the province of Quebec. The arguments put forward were much the same as those outlined at Quebec recently, when the company was ordered to appear and show grounds why the Commission should not take other means to obtain the details of information previously ordered, and at the expense of the company. The burden of the appeal was that the government of the province had relieved the company of the jurisdiction of the control of the Commission. The lawyers who were to present the arguments to the contrary were not ready, so that the matter will be heard later.

◆

Mr. Paul Jarvis has been appointed second vice-president of the Canada Industrial Bond Corporation. Mr. Jarvis resigned as secretary of the Toronto board of trade to accept a position with the banking house of Fisk and Robinson of New York, and was later associated with Messrs. Spencer, Trask and Company in their Chicago office. For the past two years Mr. Jarvis has been connected with the bond department of Messrs. A. E. Ames and Company.

CARRIAGE FACTORIES' REPORT

Good Statement Submitted—President Says Company's Operations, Not Selling Prices of Shares, Are the More Important

Monetary Times Office,
Montreal, January 22nd.

The Carriage Factories, Limited, pesented a satisfactory report at the annual meeting of shareholders. The company carried forward a surplus over bond interest and preferred dividends and other appropriations of about 4.6 per cent. on the common stock, the surplus for the year amounting to $55,831. This added to the $38,465 brought forward from the previous year makes a total of $94,297 at the credit of profit and loss account.

The statement shows the following:—

Net sales		$2,199,250
Operating expenses, etc., and depreciation, etc.		2,025,795
Net trading profits		$ 173,455
Interest received		18,289
		$ 191,744
Head office expenses	$10,156	
Bond discount written off	1,701	
Formation expenses written off	10,000	
		21,857
Net profits		$ 169,887
Bond interest		30,000
		$ 139,887
Preferred dividend		$ 84,056
Year's surplus		$ 55,831
From previous year		38,466
Total surplus		$ 94,297

Made Liberal Allowance.

The company made liberal allowance for various write-offs and contingencies. The formation expenses have now been almost deleted, the balance being less than $1,000, the appropriation to that account this year being unusually large. An allowance for depreciation of $21,059 was made, bringing the total at the credit of this account to $49,803. A large sum, $22,893, was placed to the credit of bad and doubtful debts, more especially to provide against certain accounts which have subsequently turned out satisfactorily. The total of this account is now $51,763.

As To Bank Loan.

One feature of the statement which is not entirely desirable is the large bank loan and overdraft, amounting to $979,628. However, the comparison between the current assets and liabilities this year and last is entirely favorable to this year, the figures a year ago being respectively $1,664,708 and $1,036,316, and those of this year being respectively $1,880,342 and $1,179,157.

That it is the intention of the directorate to maintain the company in its present position as was evidenced by the comments of President Tudhope, who remarked that it was not the intention to begin paying dividends on the common stock in the near future. He also said that there was no intention of listing the stock on the stock exchanges, it being the desire of the directors to concentrate upon the operations of the company rather than upon the selling price of the shares. Other directors as well as Mr. Garnet P. Grant, one of the organizers of the concern, expressed satisfaction at the results of the year, the profits being the best in the history of the company, although the sales were slightly less than a year ago.

◆

GRAND TRUNK EQUIPMENT BONDS

Messrs. Blair & Company, New York, are offering the small unsold balance of $3,360,000 Grand Trunk Railway equipment 4½ per cent. gold notes, series B, dated November 1, 1912, and due in semi-annual instalments of $168,000 each to November 1, 1922.

The notes are a direct obligation of the Grand Trunk Railway, which, for the year ended June 30, 1912, had surplus earnings available for dividends of $4,170,706. They are issued in part payment for 100 locomotives, 2,000 box cars, and 50 tank cars. Offering prices for the various maturities give a yield basis of 4.70 per cent.

CHARTERS GRANTED TO NINETY-FOUR COMPANIES

Mining Company Heads List With Three Millions Capital

With capitalization amounting to $20,909,000, new companies numbering 94, were granted charters this week.

The largest companies are:—

Crews McFarlan Mining Company, North Bay...	$3,000,000
Guardian Realty Company of Canada, Toronto ...	2,000,000
Canada Tea Company, Toronto	1,500,000
Dominion Stores, New Westminster	1,000,000
Storage and Forwarding Company, Winnipeg....	1,000,000
Canadian Freehold Securities Company, Winnipeg.	1,000,000
German Canadian Trust Company, Victoria......	1,000,000

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	35	$9,464,000
Quebec	22	3,233,000
Manitoba	20	4,802,000
British Columbia	16	3,210,000
Alberta	1	200,000
		$20,909,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Coquitlam, B.C.—Commercial Hotel, $50,000.

Vernon, B.C.—Hotel Connaught Company, $250,000.

Brussels, Ont.—Pryne Milling Company, $50,000. A. C. Coulson, M. R. Edgar, F. J. Tracey.

Niagara Falls, Ont.—Visor Knitting Company, $40,000. R. L. Rice, C. C. Rice, F. J. Schweitzer.

Milverton, Ont.—H. E. Furniture Company. $40,000. C. R. Honderich, A. Eydt, N. H. Honderich.

Kingston, Ont.—W. B. Dalton and Sons, $200,000. W. B. Dalton, J. A. Dalton, W. B. Dalton, Jr.

Fort William, Ont.—Lake City Realty Company, $100,000. J. Enzer, J. W. Newcombe, R. E. Wright.

Copper Cliff, Ont.—Algoma Amusement Company, $40,000. G. E. Buchanan, L. O'Connor, M. J. Powell.

Guelph, Ont.—John Sutherland and Sons, $10,000. J. Sutherland, James Sutherland, A. H. Macdonald.

Banff, Alta.—Banff Lithia Water Company, $200,000. R. K. McLean, G. H. Anderson, J. B. Watson, Calgary.

Three Rivers, Que.—Sash, Door and Construction Company, $49,000. E. Gauthier, E. Gosselin, E. Boulet.

North Bay, Ont.—Crews McFarlan Mining Company, $3,000,000. W. J. McFarlan, C. F. Warden, H. R. Crews.

Oshawa, Ont.—Vindicator Publishing Company, $40,000. S. King, M. P. van der Voort, J. A. Donovan, Toronto.

Belleville, Ont. — Thompson Kanuck-Kitchen-Kabinet Company, $85,000. J. C. Knowles, H. T. Burton, A. Maclure.

Sherbrooke, Que.—La Compagnie C. O. Genest & Fils (provisions), $150,000. C. O. Genest, A. J. Genest, J. W. Genest.

Gravenhurst, Ont.—Ontario Granite Crushed Stone Company, $60,000. M. J. Ryan, E. M. Fish, A. C. Coulson, Toronto.

La Providence de St. Hyacinthe, Que.—Cie Gladu and Demers, $50,000, (wholesale sugar). A. Gladu, O. Demers, J. R. Rovenelle.

Shawinigan Falls, Que.—Beauchemin and Company, $100,000, (hardware), J. L. A. Beauchemin, C. E. Lymburner, J. P. Lymburner.

New Westminster, B.C.—Walsh Sash and Door Company, $100,000. Westminster Investment Company, $250,000. Dominion Stores, $1,000,000.

Victoria, B.C.—Cameron Bayne Company, $150,000, (financial agents). German Canadian Trust Company, $1,000,000. Western Sign Works, $10,000.

Hamilton.—Ontario Lubricating Company, $40,000. C. C. Goring, J. A. Jones, S. H. Slater. Monarch Motor Truck Company, $350,000. W. J. Rooney, G. A. German, E. S. Ball.

Quebec City.—McCall, Shehyn and Son, $500,000, (dry goods). Hon. J. Shehyn, B. A. Scott, T. Lawrence. Limoilou Land Company, $199,000. Hon. J. E. Roberge, St. Vital de Lambton. A. Galipeault, J. N. Francoeur, Quebec.

Maisonneuve, Que.—Maisonneuve Contracting Company, $100,000. D. McAvoy, Maisonneuve; Y. Lamontagne, E. Bouchard, Montreal. St. Jerome Gravel and Sand Company, $1,000,000. D. McAvoy, Y. Lamontagne, E. Bouchard, Montreal.

Ottawa, Ont.—Capital Office Supply Company, $50,000. G. F. Perley, A. R. Dawson, R. W. Dawson. Galetta Canning Company, $40,000. J. M. Childerhos, R. K. Carnegie, C. L. Bray. Ontario and Quebec Realty, $50,000. J. P. Beaudry, Montreal; L. deMontigny, E. R. E. Chevrier, Ottawa.

Vancouver, B.C.—Vancouver Automobile Owners' Association, $5,000. Vancouver Delicatessen, $10,000. United Ladyware Stores, $50,000. O'Loane Kiely and Company, $25,000. Sterling Security Company, $25,000. Monarch Art Stone, $10,000. Perfect Concealed Bed Company, $25,000. Dominion Powder Company, $250,000.

Montreal, Que.—Mannesmann Tube Company, $200,000. A. D. Fry, J. A. Burns, C. Rinfret. Canal Lands, $250,000. G. V. Cousins, S. B. White, H. R. Swenerton. Herbert Lubin and Company, $100,000. C. M. Cotton, H. Lubin, Westmount; E. W. Westover, Montreal. Canadian Tile Flooring Company, $20,000. R. P. LaRocque, E. Labelle, C. G. Derome. Girardot Agencies, $50,000. P. St. Germain, L. Guerin, B. P. Raymond. Gregory Realties, $50,000. Hon. W. Mitchell, R. Chenevert, F. Callaghan. Standard Paper Box Company, $200,000. H. Moisan, J. Samson, Quebec City; C. N. Moisan, Montreal. Raoul Barrozzi et Compagnie, $40,000, (wholesale millinery). R. Barrozzi, M. Loranger, B. Melancon. Scottish Gowganda Mines, $300,000. J. J. Creelman, G. S. Stairs, P. F. Casgrain. East End Paving and Construction Company, $100,000. L. H. Durand, Montreal; N. Malenfant, Meride St. Hilaire; A. Gilbert, Maisonneuve. Fort Realty Company, $350,000. R. W. Barclay, W. Rorison Church, J. Godbout. Rubber Substitutes, $300,000. J. F. Reilly, J. Quinn, G. Strubbe. Canadian Jewish Times Publishing Company, $25,000. S. W. Jacobs, A. R. Hall, L. Fitch. Societe Anonyme des Editions Illustrees, $10,000. L. Radlaur, R. Valois, R. de Foville.

Toronto.—Guardian Realty Company of Canada, $2,000,000. W. Morley, J. E. Riley, W. B. Sturrup. St. Catharines Land Corporation, $375,000. J. W. Baillie, J. D. McTaggart, Toronto; W. H. Merritt, St. Catharines. Kent Investments, $100,000. F. A. Kent, W. G. Kent, R. D. Hume. McDonald and Willson, $150,000. C. S. McDonald, C. H. Willson, M. W. Galloway. North American Tailors, $50,000. C. F. Ritchie, J. H. Oldham, J. C. M. MacBerth. Davidson, McBean and Company, $40,000. W. Davidson, A. F. McBean, C. W. Vanduser. Forsythe Laundry Company, $40,000. W. S. Forsythe, T. Walker, G. Wilkie. Hargreaves (Canada), $10,000. J. L. Galloway, J. A. Donovan, F. Watts. Willard's Chocolates, $250,000. D. I. Grant, G. Grant, G. A. Urquhart. Proctor-Nixon, $40,000. G. M. Proctor, D. C. Nixon, L. H. Coombes. G. F. Adams Company, $100,000. C. M. Garvey, W. H. Price, A. B. Nind. Ontario Metal Products Company, $40,000. F. J. Schuch, G. M. Miller, J. V. Guilfoyle. Consolidated Agency, $200,000. G. M. Miller, J. V. Guilfoyle, C. H. C. Leggott. Fred W. Halls Paper Company, $40,000. F. W. Halls, H. H. Halls, W. Halls. Sovereign Soaps & Chemicals, $24,000. A. M. Garden, W. Lawr, J. Stewart. Canada Tea Company, $1,500,000. J. S. Lovell, C. D. Magee, W. Bain. R. G. McLean, $200,000. J. F. MacGregor, W. H. Walter, J. E. Riley. Home Specialty Company, $60,000. A. C. Coulson, F. J. Tracey, J. J. Kew. Crowell Sherman Statler Company, $50,000 (general contractors and engineers). J. S. Lovell, W. Bain, R. Gowans.

Winnipeg, Man.—H. J. St. Clair Company, $25,000. (building materials). F. S. Andrews, W. H. Curle, F. M. Burbidge. Winnipeg Listing Company, $5,000. A. C. Miller, N. Munson, A. J. Costigan. Storage and Forwarding, $1,000,000. J. W. Lunney, C. D. H. MacAlpine, M. L. Bell. Canadian Freehold Securities Company, $1,000,000. E. L. Taylor, C. D. H. MacAlpine, A. B. Elliott. British Western Loan and Investment Company, $500,000. C. W. O. Lane, J. L. McManus, E. G. Barrett. Galvin Lumber Yards, $250,000. W. D. Galvin, J. Y. Crawley, G. F. de C. O'Grady. Exhibition Park Company, $350,000. W. Chambers, A. E. Weldon, A. D. Chisholm. MacKenzie, Banning and Company, $50,000. (real estate), L. E. MacKenzie, C. R. Banning, A. W. Vassar. Winnipeg and Canadian Investments, $500,000. T. D. Thompson, R. A. McLean, E. E. Lewis. Canada Estates, $100,000. H. Mackling, W. Q. Burges, W. H. Collum. Winnipeg and Inland Investment Company, $500,000. W. B. Sterling, C. H. Newton, F. W. Peace. Canadian Asphalt Company, $50,000. G. H. Hunt, Chicago; F. K. Hamilton, J. B. Coyne, Winnipeg. Northwestern Automobile Company, $50,000. W. J. Hill, G. M. Scott, A. G. Schilling. Waverley Estates, $100,000. D. Dawson, J. T. Haig, M. Anderson, G. S. Haig. Metropolis Securities, $60,000. W. P. Rodgers, J. A. Rodgers, W. McBride. Canadian Ruby Chemical Company, $100,000. M. Schneider, C. E. Reynolds, A. Schneider. Strathcona Curling Club, $12,000. R. J. Gourlay, J. T. Haig, T. H. Verner. Inland Builders, $40,000. K. Clemens, D. A. King, A. M. Newcombe. Province Security Company, $50,000. C. E. Simonite, G. Burdett, F. Mighton. Victoria Theatre Company, $60,000. J. F. Lawerance, W. H. Irving, W. A. Davis.

POWER PRODUCTION IN NORTHERN ONTARIO

Mines Are Large Users—Rivers and Log-floating—Legislation May be Needed

Steam power has been almost wholly displaced by hydraulic power delivered either by the electric current or in the form of compressed air, for the operation of Cobalt mines and works. Most of the mines formerly using steam retain their plants for use in case of emergency, but the regular employment of steam is now confined to small and isolated properties.

An amalgamation between the companies producing power on the Montreal River has been effected, the Cobalt Power Company and the Cobalt Hydraulic Power Company uniting to form the Northern Ontario Light and Power Company, Limited. This arrangement enables the plant at Hound chute to confine its supply to electrical energy only, while the Taylor compressed air system installed at Ragged chute fills the contracts for compressed air.

Mines Power, Limited, whose development on the Matabitchewan was first in point of time to put electric power into Cobalt, has changed its name to the British Canadian Power Company, Limited.

Insufficient for Year Round Delivery.

On both the Montreal and Matabitchewan Rivers, though the shortage of water was not so marked during the winter of 1911-12 as it was in the previous year, experience has shown the present means of conserving the freshet flows to be insufficient for the steady delivery all the year round of the maximum quantity of power.

The watersheds of the Matabitchewan and the Montreal have both their peculiarities. The former is not extensive, being restricted on the north by that of the Montreal, and being still further narrowed by the tendency of the river to approach the Montreal as it nears its mouth, the actual entrance of the two rivers into Lake Temiskaming being only a few yards apart.

For this reason, strict economy must be practised in the use of water, and the company has found it necessary, in addition to the reservoirs already in existence, to erect dams at the outlet of Bear, Cross and Macdonald Lakes. When these are completed, practically all the natural storage grounds on the stream will be under control.

The Montreal is a longer and larger river than the Matabitchewan, but the area which it drains is lessened by the doubling, tortuous course which it pursues, especially in its southern branches.

It receives a portion of the overflow of Lake Temagami through the northern outlet of that lake, the main discharge of which is to the south by the Temagami River, a feeder of the Sturgeon.

Being thus situated on the height of land, the waters of this large and important lake, if conserved, are capable of considerably augmenting the water power of either or both the streams into which it empties. It is also evident that by adjusting the height of the dams at the northern and southern outlets, a larger or smaller proportion of the total discharge from the lake could at will be diverted into either system.

Hydraulic Development on Both Streams.

There are important hydraulic developments on both streams, on the former for power used mainly in the mines of Cobalt, and on the latter for the operation of pulp and paper mills at the town of Sturgeon Falls, reports Mr. T. W. Gibson, Deputy Minister of Mines, in the 21st annual report of Ontario's Bureau of Mines.

This situation is indicative of the classes of questions to which the rapidly increasing use of water power derived from the rivers of Northern Ontario is giving rise. But there is yet another, and very important, element in the situation.

For many years, these rivers have been used by lumbermen, to float their logs to market, and their right to employ them for such purpose has been repeatedly confirmed by the legislature of the province.

Indeed, notwithstanding the extension of railways into the northern forests, and the increasing use which is made of them to transport logs, pulpwood and other forest products to the place of consumption or manufacture, it is not easy to see how the great lumbering industry of Ontario could be carried on without the free use of these waterways.

Each for Different Purpose.

There is nothing incompatible between the employment of these waters for the carriage of sawlogs and its utilization for the development of power. But it is quite apparent that the presence of two distinct interests, each requiring the use of water but for a different purpose, is likely to be productive of friction

When the spring thaws and rains melt the snow and ice, and let loose the floods, the lumberman seizes the opportunity to get his "drive" to market. His logs in the water, he lifts the "stop-logs" from the dams and gives rein to the torrent that it may hurry his logs to their destination. Every consideration must yield to this—the logs must come down, for to be "hung up" means in most cases that another year will elapse before the logs will reach the saws, and also a loss in interest and the sinking of water-logged timber. The main body past, the rear-guard of his army "sweeps" the "tail of the drive," in other words, gathers up those logs which have stranded in shallow places, or have been caught by the rocks or other obstructions.

This demands a fresh draught on the dammed-up lake in order to carry the "tail" down stream, and the freshet season may well be past, or nearly so, before the lumbermen's use of the river is over for the time.

Co-operation Will Accomplish Much.

It is obvious that the owner of a water power on such a stream will find it difficult to obtain a maximum of power. The water is hurried away, which might have turned his turbines during the dry season, and his chances of equalizing the flow to the best advantage are correspondingly reduced. The situation is one which suitable legislation may be required to meet.

Much may be accomplished by co-operation between water power owners and lumbermen, by improved log-slides requiring a minimum of water to operate them, by deepening river channels, and removing obstructions, etc., but it may also be necessary to provide some means of adjusting the relations between the lumbermen and water power owners, so far as the use of the water is concerned, and also between the various users of power on the same stream, whose interests may conceivably come at times into conflict.

WANT CONTROL OF LAKE OF WOODS COMPANY

Dominion Trust Company Has Asked for Options on Common and Preferred

Another attempt is being made to secure control of the Lake of the Woods Milling Company. The general impression in Montreal is that no change of control in that direction is possible without the consent of the present controlling interests. A circular has been issued to Lake of the Woods shareholders by the Dominion Trust Company, Limited, asking for options on both the common and preferred shares of the company. In the circular $1 is offered for the option which is to date from on or before January 24th to January 30th.

Want to Get Shares.

Mr. A. S. Birchall, manager of the Dominion Trust Company, declined to discuss the offer made through his company, more than to say that some of his clients, regarding Lake of the Woods Company as a strong industrial, desired to acquire a substantial block of the shares.

It is thought probable in some quarters that should the Dominion Trust Company obtain control of the Lake of the Woods Company, an amalgamation with the St. Lawrence Milling Company might follow. The capitalization of the company is as follows:

	Authorized.	Issued.
Common stock	$2,500,000	$2,100,000
Preferred stock	1,500,000	1,500,000
Bonds, 6 per cent.	1,000,000	900,000

In addition to the $900,000 bonds outstanding, $100,000 have been redeemed. The Lake of the Woods Milling Company guarantees the Keewatin Flour Mills Company's bonds, maturing 1916, for $750,000, and interest of 6 per cent.

Profits for the Year.

The profits for the year ended August 31st, 1912, of the Lake of the Woods Milling Company were $457,011. Seven per cent. is being paid on the preferred stock and 8 per cent. on the common. The company owns and operates 80 elevators at various points in Western Canada. The daily capacity of its mills is 10,500 barrels.

The company has power to issue $400,000 new stock to complete its authorized $2,500,000 capital. The directors of the Lake of the Woods Milling Company are: Messrs. Frank S. Meighen (president), William W. Hutchinson (vice-president), Robert Reford, Tancrede Bienvenu, R. M. Ballantyne, Abner Kingman, J. K. L. Ross (Montreal), George V. Hastings (Winnipeg), and Hon. Robert MacKay.

The common stock went as high as 153 in 1910, 152 in 1911, and 145 last year, the lowest being 125.

MINING IN BRITISH COLUMBIA

Progress Reported in Various Parts of Province—Wheat for Japan

(Staff Correspondence).

Vancouver, January 21st.

A mining engineer, points out that the method of concentrating copper ores, evolved at the Britannia mine on Howe Sound, will practically revolutionize copper mining on the Pacific coast, where great low grade bodies of ore exist. Granby, too, is bringing down the cost of production and is able to produce copper now at a cost of 9¼ cents per pound, which, with the present price, leaves a good margin for profit. During the past year, this company's earnings were placed at $1,500,000. The money was used to develop the new holdings in the north, where two millions and a half are being spent or will be spent in development. A few large mining companies operating like this will mean much to cities on the Canadian Pacific coast.

The British Columbia Steel Corporation may erect a plant in New Westminster. A conference has been held between the representatives of the council and the company, and an outline has been given of the proposed operations. In the first year the expenditure will be $500,000, with $1,000,000 in the second year and in five years five million dollars will be expended in the construction of the works. Provision has been made for the supply of iron ore and for limestone.

Encouraging conditions prevail in different parts of the province. In the interior a year ago, lumber manufacturers did not think it worth while to put men in the woods to cut timber. This year, they cannot get men enough, and some of the managers of big companies are making personal visits to cities in the effort to induce men to go into the interior ogging camps. Nelson had a good year in 1912, its building permits being double what they were in 1911. Several new mines have come into the list of shippers. The Consolidated Mining and Smelting Company, of Trail, has purchased the Canadian patents of the new process for the treatment of ow grade zinc ores, invented by Mr. A. Gordon French. If this process is successful a problem will be solved that has bothered mining operators in the Slocan district. Many properties, rich otherwise, have lain idle because of the presence of ores that could not be profitably treated.

Fisheries of Nanaimo.

The value of the fisheries of Nanaimo alone for the past year is placed at $487,930, a round half million. Coal mining is the big industry at Nanaimo. That city has its umbering propositions, too, and with development in Vancouver proceeding as it is, the future is promising.

In the vicinity of Ashcroft, mining is also progressing, and at Highland Valley considerable work is being done.

That the Canadian Pacific Railway is keeping pace with progress on the coast is further shown by the statement of Mr. F. W. Peters, general superintendent at Vancouver. The company has one pier projecting into the inlet, and the contract has been let for the construction of another. As business develops more will be built, and plans have been prepared for as many as six or eight.

Wheat for Japan.

There is a good market for wheat in Japan, and it is not improbable that Canada will get some of the business that has been going to the Pacific coast states. Mr. K. Hori, of the T. Yuasa Company, of Kobe, Japan, is in Vancouver and says that his firm would like to do more trade with Canada. Last year they imported 900,000 bushels of wheat through Portland, Oregon, and are anxious to get some of the Canadian hard wheat. The Japanese expect to trade in return and have quantities of exportable goods that are used in this country.

◆

INDUSTRIAL ACCIDENTS

According to the record of industrial accidents mainained by the Department of Labor, 97 workmen were killed and 357 injured during the month of December, 1912, as compared with 114 killed and 359 injured during the month of November. The greatest number of fatal accidents occurred in steam railway service, building trades and navigation, the figures being respectively 20, 17, and 12. The argest number of non-fatal accidents occurred in steam railway service, there being 131 employees injured, followed by the metal trades with 75 injured. The disasters of the month involving the death of more than one workman were a mountain snow slide at Fernie, B.C., by which six employees [illegible] a coal mine were killed and eight injured; an explosion in a pulp mill at Grand Mere, Que., by which four men were killed; and the drowning of four sailors off Yarmouth, N.S., during a storm.

TORONTO WILL PAY FOUR AND A HALF PER CENT.

So as to Sell Debentures—Point Grey Desires to Dispose of its Bonds Now

Toronto's civic treasury board have decided that the city should have power to borrow money at 4½ per cent. Accordingly, they are recommending to council that legislation be asked for enabling the city to sell its debentures at 4½ per cent. "All the other municipalities in Ontario may borrow money as high as 5 per cent.," said Mayor Hocken. "Toronto alone is limited by law to 4 per cent., and it is often hard to get money at 4 per cent."

South Vancouver's annual report and financial statement for the past year issued by the municipal treasurer, Mr. J. B. Springford, shows a total revenue from all sources of $2,339,057.19, and total expenditure and disbursements amounting to $2,315,001.15, leaving cash on hand on December 31, $2,282.85, and a balance on the savings bank account of $21,773.19.

Point Grey Bonds.

Point Grey bonds should be sold immediately, whatever the condition of the market, said councillor Richardson recently, and the work for the accomplishment of which they were passed should be completed as soon after authorization as possible. More money was lost in letting work wait than in selling bonds in a bad market. He would urge the sale of a million and three-quarter dollars worth of bonds yet unsold, together with the million odd voted upon on Saturday. He believed that the debentures should be sold before $1,000,000 of other municipal bonds were flung on the market.

Mr. Alwyn Taschereau, of Quebec, has entered an action in the Superior Court to have declared null and void the resolution passed at the last meeting of the city council in connection with the borrowing of $1,950,000 for improvements. He claims that the city, according to the powers granted it by the legislature, cannot borrow at more than four and a half per cent. interest, and that with the commission on the proposed loan it would have to pay more than that rate.

Calgary Will Watch Expenditures.

Both Calgary's council and commissioners agreed that there must be careful supervision of expenditures during the coming year, and no expenditure will be recognized unless it has passed through the hands of one of the commissioners at least. All orders for material and supplies must be approved of by one or more of the commissioners, and dates will be arranged by them for the calling of all tenders and other details.

Two bids were received for the Prairiedale Rural Municipality, Sask., $15,000 5 per cent., 20-year road debentures. The award was made to the Flood Land Company, Regina.

For the $975,000 debentures of Calgary, Alta., four bids were received. The offer of Messrs. W. A. Mackenzie Company, of Toronto, was accepted, as previously noted.

The Canada Saddlery Hardware Company have asked Walkerton, Ont., town council to submit a by-law to the ratepayers granting them a loan of $10,000.

◆

NOT NECESSARY TO COPY CANADA'S BANK ACT

Two widely different plans for banking and currency legislation were recommended to the House Currency Reform Committee at Washington by prominent bankers.

Mr. George M. Reynolds, president of the Chicago, Continental and Commercial National Bank and a member of the National Monetary Commission, insisted that some central power similar to the Central Reserve Association proposed in the Monetary Commission's plan, was essential to any sound banking system. Mr. W. A. Nasha, chairman of the board of directors of the New York Exchange Bank and a former president of the New York Clearing House Association, declared a central power was unnecessary and proposed an organization of twenty geographically located clearing houses with power to issue loan certificates converted upon demand into government currency.

Both bankers told the committee that it was not necessary for the United States to copy foreign banking methods, and both opposed the establishment of a central bank similar to the Bank of England. When Chairman Glass asked for an opinion upon regional reserve banks or associations, with a supervising treasury board, Mr. Reynolds said he thought such a plan would work if the supervising board had sufficient power and absolute control over the issue of notes.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Fernie, B.C.—January 10.—Picture theatre. Loss and cause unknown.

Palmerston, Ont.—January 16.—Mansion House. Loss and cause unknown.

Petrolea, Ont.—January 8.—Barrett Pumping Plant. Loss and cause unknown.

Humboldt, Sask.—January 5.—Shoe repairing store. Loss and cause unknown.

Cambie, B.C.—January 3.—Municipal Hall. Loss unknown. Cause, gasoline.

Guelph, Ont.—January 15.—Gibson Engine Works. Loss, $500. Cause unknown.

Kentville, Ont.—January 11.—Mr. L. Meyrick's barn. Loss and cause unknown.

Prince Rupert, B.C.—January 6.—Shack owned by city. Loss and cause unknown.

Hymers, Ont.—January 12.—Mr. R. Vance's barns, etc. Loss, $1,500. Cause unknown.

Manley, Ont.—January 12.—Mr. C. Eckart's drive shed. Loss unknown. Cause, hot ashes.

Galt, Ont.—January 19.—Miss K. L. Wilks' barns at Blair. Loss and cause unknown.

Rosenfeld, Man.—January 13.—Mr. G. Marsch's residence. Loss and cause unknown.

Regina, Sask.—Mr. Vanderven's tailor shop, Scott Street. Loss, $5. Cause, burning cigarette.

Nelson, B.C.—January 9.—Mr. E. Dickson's residence, Six Mile. Loss and cause unknown.

Broderick, Sask.—January 6.—Post office, store, garage, etc. Loss, $15,000. Cause unknown.

Prince Albert, Sask.—January 13.—Mr. W. Ham's residence. Loss, $250. Cause unknown.

Coburg, Ont.—Mr. W. Peterson's barn, Morganston. Loss unknown. Cause, upset lantern.

Laird, Sask.—January 7.—Laird Club House. Loss, $4,000. Insurance, $2,250. Cause unknown.

Allandale, Ont.—January 12.—Mr. W. Houlihan's clothes cupboard. Loss unknown. Cause, children.

December 21, 1912.—The Motor Transportation Company, garage. Loss on contents, $1,000. Insurance, Quebec, $600. Loss on building, $6,000. Insurance, Delaware, $1,000; London Lancashire, $2,500; St. Paul, $2,500. Both ires adjusted by E. A. Lilly, Adjustment Agency, Calgary.

Edmonton, Alta.—December 23.—The Alberta Motor Boat Company. Loss on contents $8,000. Insurance, Liverpool and London and Globe, $6,400; Sovereign, $500.

December 18th.—E. A. Kemp and Son, plumbers. Loss n stock and fixtures $1,560. Insurance, Protector Underwriters, $2,000.

January 6th.—K. K. Pfeifle, dwelling house, Edmonton, Alta. Loss on building and contents $860. Insurance, Alberta Canadian, $1,400. All three fires adjusted by E. A. Lilly, Adustment Agency, Calgary.

St. John, N.B.—January 5.—American Laundry, etc. Of he $19,000 loss nearly $13,000 is covered by insurance. The American Laundry's loss about $16,000. Insurance, $4,000, T. B. & H. B. Robinson; $2,000, White & Calkin; $2,000, A. C. Fairweather, and $1,000, J. M. Queen. The loss to the G. S. Fisher & Company building is about $1,500, insurance, $1,000, Acadia; $800, Western. There is about $500 damage o the stock and this is covered by $400, Acadia; $400, Equity. Mr. W. A. Lordly has a total loss of about $1,500 arries only $600 insurance with White & Calkin. The Tudhope Motor Company is fully covered.

◆

MUTUAL LIFE'S NEW HOME

The head office staff of the Mutual Life Assurance Com any of Canada moved into their new quarters in Waterloo, Ont., in May last. The interior of the building was not then uite finished, and the formal opening was deferred until the gents convention, which was held recently. The new building is monumental in style, and classical in design. It is haracterized by simplicity and dignity. The structure is dmirably adapted to the purpose for which it was intended. During the convention, Mrs. Clement, wife of the president, nd Mrs. Wegenast, wife of the managing director, gave a reception to the visiting agents and a few of the citizens. A anquet was also held.

Six sessions of the agents' conference were held, the arious papers and addresses being excellent and of much ractical worth.

The facilities for business enjoyed by the staff are many, nd with this equipment and an agency staff loyal and enhusiastic, the company expects to make this year the most uccessful in its history.

MERCHANTS FIRE INSURANCE COMPANY

The net profits of the past year's operations of the Merchants Fire Insurance Company were $38,843. This enabled the directors to pay a dividend of 10 per cent. on the paid-up capital stock. The balance was carried forward to the credit of profit and loss account. The total income last year was $157,282, made up of premium income $148,839; interest receipts, $4,292; building rentals, $3,482; commission on reinsurance, $448; endorsement fees, $221.

The expense ratio for 1912 was 38.03 per cent.; the fire loss ratio 32.64 per cent.; and the profit was 29.33 per cent. of the net income, or 53.12 per cent. on the paid-up capital stock. The company has now at risk an amount of $25,809,359. The number of policies in force is 26,872, an increase of 2,319. The average risk per policy is $690.

The assets of the company include blocks of good municipal bonds and stocks in reputable corporations. The head office building is valued at $43,000; mortgages on real estate, $9,500; and cash on hand and in bank, $24,895. Mr. G. H. Hees, president of the company, reminded the shareholders that the revised Ontario Insurance Act became operative on August 1, 1912, and stated that the Merchants Fire Insurance Company has more than complied with every change required thereby. The fund deposited with the Ontario Insurance Department for the security of policyholders is $100,000. All the company's fire claims to December 31st, 1912, have been adjusted and paid.

◆

NATIONAL LIFE INSURANCE COMPANY

Year by year the National Life Insurance Company of Canada makes new records as a result of its operations. The statement submitted to the shareholders recently shows that the new business written last year was nearly $3,000,000 more than in any previous year. While this fact accounted for a substantial increase in expenses, it must be remembered that the new business will produce surplus in years to come especially, as Mr. H. Moir, a well-known actuary of New York, points out, as the renewal charges against such business are abnormally low.

All the important accounts of the company exhibit gains. There was an enormous increase of more than $100,000 in the total cash income, which was $691,297, as compared with the preceding year. The gain in business in force was about $4,000,000. Even the mortality experience was more favorable than in 1911. The figures for the past year were $60,727, which was approximately $2,000 less than in the previous year. Applications for new insurance received amounted to $7,359,950. The policies issued and placed totalled $6,318,123.

The management draw attention to what they deem the most outstanding feature of the company's progress—the way the company's funds have been invested. They state that for a period of fourteen years not a single dollar of interest or principal has been overdue on those funds, and that they have never lost a single dollar of interest or principal on the funds. That is a good record. The financial statement for the past year has undoubtedly proved acceptable to the directorate, management, shareholders and policyholders.

◆

PERSONAL NOTES

Mr. A. J. Shaughnessy has applied for membership of the Montreal Stock Exchange.

Mr. N. A. Leach has been elected as the first president of the new board of trade formed at Courtright, Ontario.

Mr. C. H. Branchaud, partner in the firm of L. G. Beaubien and Company has been elected a member of the exchange.

Messrs. C. C. James, C.M.G., J. F. Gundy and Hon. Nathaniel Curry, have been added to the directorate of the Peace River Land and Investment Company, Limited.

Mr. H. D. Kingston has resigned the secretaryship of the Royal Securities Corporation to become sales manager, while Mr. H. G. Boyle succeeds Mr. Kingston as secretary.

Mr. Thomas W. Learie, advertising manager of the Western Canada Flour Mills Company, was tendered a banquet on leaving for Toronto to assume this week the duties of secretary-treasurer of the Canadian Credit Men's Association.

Sir Edmund Walker, president of the Canadian Bank of Commerce, has been asked and has consented to appear before the Glass sub-committee of the Banking and Currency Committee at Washington, to explain authoritatively and in detail the Canadian system of banking. Soon after he testifies the hearings will be closed.

CORPORATION BONDS

Ashdown Bond Issue—Cedar Rapids Financing—Grand Trunk Act Passed

The first important bond issue of the year has been made by the Dominion Securities Corporation, who are offering $1,000,000 of the J. H. Ashdown Hardware Company, Limited, 5 per cent. first mortgage 15-year sinking fund gold bonds, at 90.20, and interest to yield 6 per cent. The total authorized issue is $1,500,000, of which $500,000 is retained in the treasury.

The J. H. Ashdown Hardware Company, Limited, conducts a wholesale and retail hardware business throughout Western Canada. Warehouses are located at Winnipeg, Calgary and Saskatoon. The company had its inception in 1869. In 1902 it had assumed such proportions that it was considered advisable to convert it into a joint stock company. The authorized capital is now $2,000,000 fully paid, while at December 31st, 1911, there was a surplus of $1,539,876. These results have been derived almost entirely from earnings and the company has in addition disbursed an annual dividend averaging 12 per cent. throughout the period of its existence.

The issuing house draw attention to the following salient points of the issue:—(1) Value of assets $4,431,126.61—consisting of lands, buildings, investments, etc., $1,317,021.04, and net current assets in excess of current liabilities, $3,114,105.57. The appraised value of lands alone is $1,014,310. (2) Average annual net earnings for three years ending December 31st, 1911, $278,161, or over 5½ times the interest on bonds now issued, and (3) an annual sinking fund, beginning January 1st, 1914, sufficient to retire the present issue by maturity at par and interest.

Cedar Rapids Financing.

Arrangements in connection with the financing of Cedar Rapids Power and Manufacturing Company have been completed and a circular issued to Montreal Power and Shawinigan shareholders, announcing the subscription terms. There has been no change in the plan originally announced. Montreal Power and Shawinigan shareholders are to be given the right to subscribe to an issue of about $8,500,000 five per cent. bonds of the Cedar Company, in the proportion of 30 per cent. of their respective holdings. The bonds, as first announced, will be issued at 90, with a bonus of 25 per cent. common stock. If the bonds hold around the issue price, and the Cedar Rapids stock sells at 60, subscription privileges would be worth about $5 on each share of Montreal Power and Shawinigan stock. Cedar Rapids stock sold the other day at 70 in private transactions.

How They Will Share.

The circular states that out of the first instalment of 120,000 horse-power, 60,000 horse-power has already been sold to the Aluminum Company of America and 20,000 to the Montreal Light, Heat and Power Company, and that the profits from this will provide for the operating expenses of the company, the interest on the issue of $8,400,000 bonds now offered, and leave a substantial surplus against the common stock of the company. These earnings will be greatly increased by the sale of the 40,000 horse-power remaining from the first installation as well as from the power to be developed in the second installation. This latter amount will be from 40,000 horse-power to 50,000 horse-power, and according to one statement should provide a profit of about $20 per horse-power.

Of the above bonds and stock the shareholders of the companies would divide as follows:—

	Bonds.	Stock.
Montreal Light, Heat and Power Company	$5,100,000	$1,275,000
Shawinigan Water and Power Company	3,300,000	825,000
	$8,400,000	$2,100,000

Granby Company's Bond Issue.

A special meeting of the stockholders of Granby Company Mining, Smelting and Power Company, Limited, has been called for February 25th, to authorize the issue of not more than $5,000,000 bonds, convertible into ordinary shares at not less than par. The directors have also ordered resumption of the dividend payments by declaration of 1¾ per cent., payable March 1st to stock of record February 4th. For the purposes of dividend and special holders' meeting, the transfer books will close on February 4th and reopen on February 25th.

Grand Trunk Debenture Stock.

The Grand Trunk bill authorizing the issue of 4 per cent. perpetual debenture stock to an amount upon which the annual interest shall not exceed £200,000, was passed by the railway committee at Ottawa this week. Mr. H. H. Stevens, of Vancouver, wanted it specified that the money would not be spent on terminals in the United States, and moved an amendment to that effect, which was lost. "Our president is under indictment in New York for not spending money in the the United States," said Mr. W. H. Biggar, K.C., for the Grand Trunk Railway. "I renew the understanding that the money is to be spent in Canada, but of course, we have railways in the United States."

◆

FOUR PER CENTS. UNPOPULAR IN LONDON

Lessons of Recent Issues — Quebec Government and Toronto Power Company Are Making Flotations

The Bank of Montreal issue in London of £400,600 of Quebec City 4½ per cent. debentures at par has been oversubscribed.

The success of the Quebec city loan has been followed by the issue in London of the prospectus of the Quebec Government loan of £400,600 4½ per cent. registered stock at 102.

Quebec's Financing.

There has been no necessity for a number of years for the province of Quebec to have course to a permanent loan, or to a loan of any kind. On the other hand year to year sees a diminishing public debt. For instance, on July 1st, 1912, the province was able to pay off in the London and Canadian market the balance of the loan contracted in 1882, bearing interest at 5%. Of that loan, debentures for £500,000 ($2,433,333) were issued in London, and for $1,066,500 in Quebec, redeemable at one year's notice by the government, at the expiration of thirty years, which notice was given in June, 1911. Part of the debentures were converted into 3 per cent. inscribed stock in 1897 and 1898. The outstanding debentures, amounting to £351,900 ($1,712,580) of the London issue, and $693,000 of the Quebec issue, were paid on July 1st, 1912. The financial position of the Quebec government on June 30th, 1912, was such that it could pay off this loan from the consolidated revenue without issuing any new loans to provide the means for so doing, a fact which is unique in the history of the province. The cash deposits in banks on June 30, 1912, pertaining to the consolidated revenue fund, amounted to $2,609,493.

Toronto Power Company.

The Toronto Power Company is arranging for the issue in London of £600,000 four and a half per cent. debentures at 97.

This company made an issue in London in November, 1911, of £821,917, 4½ per cent. consolidated guaranteed debenture stock, guaranteed unconditionally both as to principal and interest by the Toronto Railway Company. The price was 96.

Several Cobalt issues are being prepared for the London market, it is said.

Unpopularity of Four Per Cents.

The unpopularity of 4 per cent. bonds was again strikingly emphasized last week. The underwriters were obliged to take 71 per cent. of the Queensland loan. This was a government loan of £2,000,000 in 4 per cent. bonds, and was offered at 99. But slightly better was the result of the offering of bonds of the Grand Trunk Pacific's branch lines, which offered £480,000 4 per cents. at 94. The underwriters in this case were landed with 73 per cent. of the offering.

The city of Bergen's £450,000 4 per cents. at 95 were poorly subscribed, 87 per cent. going to the issuing firm.

Want High Interest.

The explanation, says a cable to the New York Journal of Commerce, is that the public wants high interest to tempt money from active trade, where it is so remuneratively employed. Underwriters claim, however, that the public will buy at higher prices later.

The city of Bahia will issue £1,600,000 5 per cent. bonds in London before the end of the month. The unique feature is being introduced of paying interest free from deduction of the British income tax. The borrowers will pay the tax direct in a lump sum.

Chili is arranging to issue over £1,000,000 in 5 per cent. annuities at 96.

Applications have been received by the London Stock Exchange to list the following issues: Algoma Central Terminals, £500,000 fives; Quebec Central Railway, £571,300 capital stock, and £336,500 second mortgage, and £336,500 third mortgage bonds.

◆

The Cobalt Townsite Mining Company, Limited, and the Casey Cobalt Silver Mining Company, Limited, have been authorized to hold meetings of shareholders, directors or executive committees outside the province of Ontario.

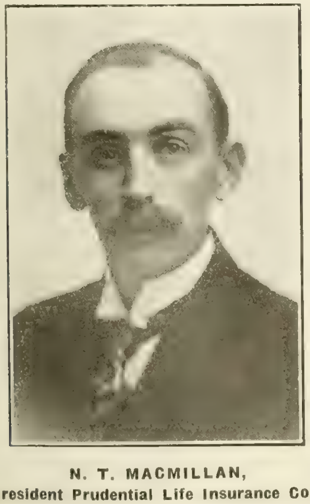
PRUDENTIAL LIFE INSURANCE COMPANY.

There are several outstanding features in the fifth annual port of the Prudential Life Insurance Company of Winni- g, for the year ended December 31st, 1912. The net in- ease in business in force was $1,282,167, and the total busi- ess in force is $7,576,631. This is subject to an annual emium of $244,165. The increase in assets for the year as $133,141. The directors' report shows that the company as all of its authorized capital of $1,000,000 subscribed, of hich $100,000 is paid up. The receipts last year totalled 280,387; cash for premiums, less paid for re-insurance mounting to $152,949, and receipts from all other sources, 81,740; and income on investments $18,152. Death claims ist year totalled $7,326; cash in banks and on hand at the nd of the year amounted to $50,198.

T. D. ROBINSON,
President Prudential Life Insurance Company.

Among the assets are mortgages, $83,103; stocks and onds, $14,686; loans on policies, $25,715, which seems to e a somewhat heavy amount; and real estate and building, 127,068. The surplus to policyholders amounts to $185,166. here is an uncalled guarantee fund of $900,000. The total uarantee to policyholders, excluding reserve of $302,508, is 1,085,166.

The net increase in the investments for the year amounts o $103,506.42. The income for the year amounted to $263,276.16, an increase over the year 1911 of $68,131.28. Investments, especially on farm lands, are made to yield the company a rate interest at 8 per cent. There is a small percentage of school debentures that yield from 6 per cent. to 6½ per cent. The average rate of interest on the mortgages, stocks and bonds is over 7 per cent. The interest and repayments have been promptly met, which shows that the investments have been carefully selected.



N. T. MACMILLAN,
Vice-President Prudential Life Insurance Company.

A full report was presented to the shareholders, and this appears in detail on other pages. Mr. N. T. MacMillan, one of the company's vice-presidents, gave the shareholders an unusually interesting talk on the value of life insurance. The following directors were unanimously elected for the ensuing year:—Thos. D. Robinson, Esq., Winnipeg; C. F. P. Conybeare, Esq., K.C., Lethbridge, Alta.; C. W. Trick, Esq., M.D., Winnipeg; J. T. Huggard, Esq., Winnipeg; N. T. MacMillan, Esq., Winnipeg; Frederick W. Law, Esq., Victoria, B.C.; G. H. Miner, Esq., Winnipeg; W. E. Seaborn, Esq., Moose Jaw, Sask.; W. J. Boyd, Esq., Winnipeg; W. L. Parrish, Esq., Winnipeg. At a subsequent meeting of the directors, the following officers were elected:—President, Thos. D. Robinson; vice-presidents, C. F. P. Conybeare, K.C., N. T. MacMillan; managing director, G. H. Miner; counsel, J. T. Huggard; actuary, F. D. Macorquodale; secretary, C. E. Bowmaker.

WESTERN NOTES

This is the time for clearance sales with many of the merchants in both wholesale and retail circles, as it is found necessary to create a demand after the holiday rush. Merchants in the West report money scarce. Wholesalers state that collections are slightly better this month, and that in thirty to sixty days they will be a good deal better.

The gross earnings of the Winnipeg Electric Railway Comany have nearly doubled in two years, according to the official statement of earnings submitted to City Treasurer Thompson by Mr. G. A. Henson, secretary of the company. The gross earnings for 1912 for street car business alone amounted to $2,114,947.93, details of which are shown in the accompanying statement. In 1910, the gross earnings were $1,265,874. The increase in two years is therefore $849,073.

WEYBURN SECURITY BANK

The annual meeting of the Weyburn Security Bank will be held on April 4th. The bank closed their year at the end of December as before. Although the regular directors' meeting has not been held, a semi-annual dividend of 2½ per cent. has been declared, making 5 per cent. for the year. To the reserve account $50,000 has been placed, making that fund $65,000, and $1,000 has been written off fixture account for depreciation. The past year was a good one for the bank.

PROMOTER SENTENCED

Mr. A. L. Ruthven, promoter of the Dominion Automatic Train Control Company, who was arrested in Montreal early in December in his offices in the Transportation Building, on the complaint of one Napoleon Beauregarde, who alleged that the promoter had fraudulently obtained from him the sum of three hundred dollars, and which case is still under advisement, has been convicted in the United States District Court of using the mails to defraud. Judge Rufus Foster sentenced Ruthven to three years in the Atlanta penitentiary, and to pay a fine of $1,000. Evidences showed that Ruthven used the mails for the promotion of a stock selling scheme, his operations covering considerable territory in the Middle West and South.

YEAR'S TRADE WILL EXCEED A BILLION

During December last the aggregate trade of Canada reached the amount of $94,845,000, as against $76,904,000 in December, 1911. The increase thus is over 23 per cent.

During the nine months ended December 31 last the aggregate trade was $808,460,000, so that Hon. W. T. White's prophecy that the year's trade will exceed the billion mark will be easily fulfilled. The trade during the corresponding period of 1911 was $647,519,000, the increase thus being 24 per cent.

Imports entered for consumption last December were $51,142,000, as against $43,424,000 in December, 1911. The increase thus is 17 per cent. The imports for the nine months were $496,692,000, as against $382,451,000 in the corresponding period of 1911, the increase being 30 per cent.

Exports during December last were $38,658,000, an increase of 25 per cent. over the $30,889,000 of December, 1911. For nine months ending December 31, 1911, the exports of domestic produce were $278,652,000, and of foreign produce $28,873,000. The corresponding figures for the preceding year were $226,895,000 and $17,853,000 respectively, so that here again there has been an increase of over 22 per cent.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Crown Trust Company.—The Crown Trust Company, Montreal, is increasing its capital from $100,000 to $500,000. Mr. Robert Reford, of Montreal, is president of the company.

Twin City Rapid Transit Company.—For the second week of January the earnings of the Twin City Rapid Transit Company were $152,049, an increase over the corresponding period last year of $10,590, or 7.49 per cent.

Nipissing Mines Company.—The Nipissing Mines Company reports as of January 1: Cash in bank, $970,033; ore and bullion in transit, $150,749; ore on hand and in process and bullion ready to ship, $350,136. Total, $1,470,918.

Quebec Bank.—The Quebec Bank has decided to issue 5,000 shares of new stock at a premium of 25 per cent., in the proportion of one share of new to every five shares now held. This will bring the paid-up capital to $3,000,000.

Canadian Cottons, Limited.—Canadian Cottons, Limited, has made an issue of 865 shares of preferred stock to be used in part payment for the acquisition of the Cornwall and York mills. The amount of outstanding preferred stock is brought up by the new issue from $3,575,000 to $3,661,500.

Farrer Transportation Company.—The directors of the Farrer Transportation Company, which operates the bulk freight steamers 'Collingwood' and 'Meaford,' have declared a dividend of 10 per cent. and a bonus of 5 per cent. on the business of 1912. The financial statement shows gross earnings of $173,181 and net profits of $73,338. The company has a paid-up capital of $250,000.

Bell Telephone Company.—The right of shareholders to subscribe to the new issue of $3,000,000 stock of the Bell Telephone Company at par expires February 28. Payments are to be made in four instalments of $25 each on March 31, June 30, September 30 and December 31. Interest will be allowed on instalments at 8 per cent. The right to fully pay for the new stock with the first instalment is not accorded to shareholders.

Timiskaming Mining Company.—Net profits for 1912 of $413,615 are shown in the annual statement of the Timiskaming Mining Company, as compared with profits of $271,423 in 1911. Receipts from ore sales and shipments were $762,653 and total receipts $776,075. Profit and loss account shows $477,441 balance from 1911. $413,615 net profits in 1912. Dividends paid in 1912 were $300,000, and a balance of $590,591 is carried forward to next year.

◆

TORONTO BANKER RETIRING

Mr. Robert Inglis, for the past twelve years manager of the Toronto branch of the Bank of British North America, is retiring on pension, after a service in the bank of over 36 years. Before taking charge at Toronto, Mr. Inglis had been manager for some years at London, Ont., and before that at Fredericton, N.B. His many friends will hope that with relief from work, his health, which has not been good of late, will improve, and that he may enjoy many years of well-earned leisure. He will be succeeded as manager of the Toronto branch by Mr. G. F. Laing, son of the late Mr. J. B. Laing, provincial auditor. Mr. Laing joined the service of the bank at Toronto in 1889, and subsequently served at London, Ottawa, Kaslo, Vancouver, Victoria, Brandon and Winnipeg. In 1903 he was appointed manager at Yorkton, and since 1907 has been manager at Calgary. Mr. Laing will take up his new duties in Toronto about March 1st.

WHERE CANADA'S BONDS WERE SOLD

Over Seventy-five Per Cent. Were Taken in Great Britain

So far, says Mr. E. R. Wood, of the Dominion Securities Corporation, in his latest review of the bond situation, no country shows any marked indications of attempting to wrest from Great Britain the honor—sometimes doubtful—of being chief banker to Canada. The record of 1912 repeats the experience of several years that Great Britain supplies over 70% of our capital requirements. During the present year British investors absorbed securities aggregating $209,086,394 or 76.62% of the total output.

As mentioned in last year's review, many undigested Canadian securities lay heavily on the London market at the end of 1911. Unfortunately, large public and private works already undertaken and partly finished cannot be left to lie fallow for a season while financial troubles blow over, and this is particularly so when our innate optimism has prompted construction, the funds for which have been borrowed from friendly bankers pending permanent financing. Canada was forced therefore to offer securities on an already overloaded market with the natural result of a sharp recession of prices and a further increase in the glut.

Just at a time when it was felt that an extended period of normal business conditions would clear up the situation, the Balkan war broke out with consequent hoarding by the large banks and the inevitable rise in the price of money, followed later by almost distressing scarcity. Taking this situation into consideration, it is at once apparent that during 1912 the British market responded generously to our demand for fresh capital. It was only natural that the return from Canadian investments should during 1912 come into line with the world-wide increase in the price of money.

Canada Not Over-borrowing.

Without indulging in any academic discussion of this subject, it is quite obvious to any careful student of the whole situation that this is not true in any general way. The phenomenal development of Canada has meant commensurate capital outlays. Our wonderful natural resources, made productive by our borrowed capital, will enable us without difficulty to meet our just obligations without by any means exhausting the Treasury. Possibly instances have arisen in which our present development did not seem to justify certain expenditures. Expensive and difficult financing will soon cause such instances to disappear. It cannot be gainsaid that the future of Canada is assured, that our investments are fundamentally sound and will continue to appeal to investors who are generally rated as the shrewdest in the world.

Continental investors took about the same amount of Canadian securities as in 1911. This field in course of time wil slowly but surely become important for the distribution o our securities.

Bond Issues to United States.

The United States during this year has taken 9.56% o Canadian bond issues as against 6.58% in 1911. This constitutes a new high record for the distribution of our securities in the United States. Under the influence of the presen season of political unrest many private investors in the United States are seeking Canadian investments. The tide of immigration is also having its effect, in that a community o interest is created between Canada and the United States—each coming into a better knowledge of the other. Larg institutions in the United States are yearly sending representatives to study Canada as a field of investment. In thes ways the United States as a source of capital supply is annually becoming more important to Canada.

Canada's confidence in local securities is indicated by th fact that $37,735,182, or 13.82% of the total output was absorbed at home during 1912. It is noticeable that those investments returning a maximum of interest found most favo among Canadian investors. In a new and rapidly expanding country the need of a large interest return from investments requires no explanation. Canadians are ready an willing to supply capital as far as possible to develop the industries of the country and do not seek funds abroad for enterprises unworthy of home support.

The following table, contained in Mr. Wood's review shows where Canadian bonds were sold during 1912:—

Issue	Amount	Canada	Un'd States	Gt. Brita
Government	$35,639,700	$ 1,339,700	$ 100,000	$34,200,
Municipal	48,414,982	13,761,482	3,876,406	30,777,
Railway	69,972,320	150,000	8,440,000	61,382
Public Service Corporations	21,555,000	3,060,000	7,325,000	11,180,
Miscellaneous Corporations	55,191,000	18,524,000	2,875,000	33,792,
	$230,782,982	$36,835,182 15.96%	$22,616,406 9.79%	$171,331, 74.25%
Canadian Corporations operating in Foreign Countries	42,155,000	900,000	3,500,000	37,755,
	$272,937,982	$37,735,182 13.82%	$26,116,406 9.56%	$209,086 76.62%

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

[illegible], B.C.—A by-law to borrow $17,500 for building a [illegible] school was carried.

[illegible], Man.—A $40,000 electric light by-law may be shortly submitted to the electors.

Shoal Lake, Man.—Until February 15th for $12,000 5 per cent. 20-year municipal and fire hall debentures. Frank Dobbs, secretary-treasurer.

Victoria, B.C.—By-laws as follows were carried by the electors: Sewers, $700,000; schools, $290,000; waterworks, $50,000; Stadacona Park, $125,000.

Minnedosa, Man.—Until January 31st for $10,000 5 per cent. general debentures, and $16,500 5 per cent. 30-year local mprovement debentures. G. T. Turley, town clerk.

Ladysmith, B.C.—Until January 27th for $7,750 6 per cent. 15-year local improvement debentures. N. A. Morrison, ity clerk. (Official advertisement appears on another page).

Miniota Rural Municipality, Man.—On February 8th the atepayers will vote on a by-law to issue $2,000 school debentures. Wm. Howard, secretary-treasurer, Miniota.

Fort Qu'Appelle, Sask.—Until January 31st for $2,500 per cent. 10-year debentures. N. M. Thomson, secretary-reasurer. (Official advertisement appears on another page).

North Bay, Ont.—The town will apply to the Ontario Legislature for a special act confirming the following money by-laws:—$70,115 for cement sidewalks; and $43,221 for ewers.

Morinville, Alta.—Until February 17th for $10,000 6 per ent. 20-year general improvement debentures. J. A. Nantel, ecretary-treasurer. (Official advertisement appears on anther page).

Belleville, Ont.—The board of education has requisitiond the city council to pass a by-law for the borrowing of $50,oo by debentures for the purpose of the erection of a new ublic school.

Levis, P.Q.—Until January 29th for $28,500 debentures. or particulars apply to Montreal Trust Company, 142 Notre ame Street West, Montreal. (Official advertisement appears n another page).

North Vancouver, B.C.—Money by-laws aggregating 133,000 were passed as follows:—Street by-law, $25,000; water by-law, $30,000; Rice Lake by-law, $30,000; lanes by-aw, $5,000; roadmaking machinery, $15,000; subway, $28,oo.

Estevan, Sask.—Until February 12th for $50,000 5 per ent. 30-year high school; $35,000 5 per cent. 30 year waterworks; $25,000 5 per cent. 25 year manufacturing establishments debentures. L. A. Duncan, secretary-treasurer. (Ofcial advertisement appears on another page).

Midland, Ont.—Application will be made to the Ontario Legislature for confirmation of the following by-laws:—To rant a bonus of $25,000 to Midland Dry Dock Company, Limited, for the construction of a floating drydock and buildig berth; to issue $8,000 debentures for cement sidewalks.

Belleville, Ont.—Application will be made to the next sesion of the Ontario Legislature for an act authorizing the ity to issue debentures to cover overdrafts of the years 1909, 911, and 1912, estimated to be $29,000, and for $4,500, being rant to Hastings County for bridge across the Moira River.

Hamilton, Ont.—Application will be made to the Ontario Legislature for an act authorizing the council to pass by-laws without submitting them to the electors, authorizing the issue f debentures as follows:—$50,000 for extension of parks sysem; $25,000 for hospital; $25,000 for improvements to city all.

Prince Albert, Sask.—Mayor Morton and Alderman Woodward of Prince Albert, Sask., have gone to London in conection with a large bond issue which will shortly be made n order to carry out a number of projects recommended by Mr. E. A. James, consulting engineer, Toronto, who was reained by Prince Albert last autumn.

Saskatoon, Sask.—By-laws to issue $100,000 for purhase of land, etc.; $150,000 for electric light extensions; $20,oo for fireproofing pumping station; $100,000 for street railway extensions; $70,000 for purchase of an incinerator; $50,oo for fire equipment; $20,000 for municipal storehouse; 12,000 for site for Children's Aid building will be voted upon ebruary 11th.

◆

DEBENTURES AWARDED

Duncan, B.C.—$115,000, to Messrs. L. N. Rosenbaum nd Company, Seattle.

Otthon, Sask.—$2,000 6 per cent. 15 years, to Messrs. ay and James, Regina.

Prairiedale R.M., Sask.—$15,000 5 per cent. 20 instalments, to Flood Land Company, Regina.

BANK OF HAMILTON

Substantial profits were made by the Bank of Hamilton during the year ended November 30, 1912. After deducting charges of management and making provisions for bad and doubtful debts, the profits were $495,860. Customers of the bank did not suffer from lack of legitimate credit. Senator Gibson, president of the bank, reminded the shareholders that it had been said the farmer was not upon the same footing with the banks as was the business man. That is not the treatment they get with the Bank of Hamilton, replied the senator. Everything in the power of that institution was done to advance the farmers' money and enable them to carry on their business to the best advantage.

The premium received on new stock was $130,600. That, together with profits and balance at credit of profit and loss account, made available for distribution $816,820. Dividends at the rate of 11 per cent. absorbed $326,965 of it. The reserve fund was strengthened by $200,000 and that account now totals $3,500,000, half a million in excess of the capital stock. Senator Gibson explained that the percentage earned during the year was 16.68 against 16.22 last year. The profits of the bank, he recalled, did not all come directly from the business of the bank, but largely from the money which the shareholders have put into it in the shape of premiums on new stock.

The bank's deposits in 1912 amounted to $38,087,477, compared with $34,738,493 in 1911, an increase of about $3,300,000. The total assets at the end of the year were $48,907,883; a year previous they were $44,732,137. There was therefore an increase of about $4,200,000. Not the least interesting statement in the excellent annual report presented was that the directors thought they saw their way to increase the dividend to 12 per cent.

The number of directors of the Lehigh Cobalt Silver Mines, Limited, has been increased to five.

HOME AND UNION LIFE COMPANIES

Little Information is Available as to Position Since Change of Control

The publication of the financial statement of the Home Life Association for the past year throws little light upon the position of that company since the change of control to the Union Life Assurance Company. The assets include bonds, debentures, stocks and loans on collateral security. It would be interesting to know what is the exact nature of these assets, whether the Home Life's assets were materially changed when control was obtained by the Union Life. This information will naturally be available when the government insurance blue books are published, but that will not be for many months yet.

It is interesting to recall the clauses of the Insurance Act referring to the amalgamations of insurance companies. They read as follows:—

To Reinsure Policies.

"52. Any life insurance company which is within the legislative power of the Parliament of Canada may amalgamate its property and business with those of any other such life insurance company or may transfer all or any portion of its policies to or reinsure the same in any other such company, and may transfer its property and business or any part thereof to any other such company, or may reinsure the policies or any portion thereof of any other such company, or may purchase and take over the business and property or any portion thereof of any other such company, and such companies are hereby authorized to enter into all contracts and agreements necessary to such amalgamation, transfer or reinsurance upon compliance with the conditions hereinafter in this section set forth.

"2. Any life insurance company which is within the legislative power of the said Parliament is hereby authorized to enter into an agreement or agreements with any other life insurance company which has power to make the same; to reinsure the policies or any portion thereof of such other company; or to purchase and take over the business or property or any portion thereof of such other company.

"3. When an agreement for any such amalgamation, transfer or reinsurance has been entered into, the directors of the companies which are parties to such an agreement may apply by petition to the Treasury Board to sanction and confirm the same, and the Treasury Board, after hearing the directors and other persons whom it considers entitled to be heard upon the petition, or giving them an opportunity to be so heard, may confirm the same if it is satisfied that no sufficient objection to the arrangement has been established

"4. Before any such application is made to the Treasury Board notice thereof together with—

"(a) a statement of the nature and terms of the amalgamation, transfer or reinsurance as the case may be; and,

"(b) an abstract containing the material facts embodied in the agreement under which such amalgamation, transfer or reinsurance is proposed to be effected; and,

"(c) copies of the actuarial or other reports upon which such agreement is founded, including a report by an independent actuary;

Served Upon Shareholders.

shall be served on the shareholders and on the holders of all policies in Canada other than industrial policies of each company: Provided, however, that the superintendent may dispense with the service of such documents on the policyholders of the reinsuring company.

"Such notice and documents shall be served by being transmitted through the post office directed to the registered or other known address of each such shareholder and policyholder, and within such period that they may be delivered in due course of delivery thirty days at least before the day appointed for the hearing of the application.

"The agreement under which such amalgamation, transfer or reinsurance is proposed to be effected shall be open to the inspection of the policyholders and shareholders at the principal office of the company or companies for a period of thirty days after the issue of the abstract herein provided for.

"5. A copy of such notice shall also be published in The Canada Gazette at least thirty days before the application is made; but this subsection shall not apply to any company which issues industrial insurance.

"6. The Treasury Board shall not sanction any amalgamation, transfer or reinsurance in any case in which it appears to the Board that the policyholders representing one-fifth or more of the total amount assured in any company which it is proposed to amalgamate, or in any company the business of which it is proposed to transfer or reinsure, dissent from such amalgamation, transfer or reinsure.

"7. No company shall be permitted to amalgamate its business with, transfer its business to or reinsure its business in any other company, if the capital of the combined companies after such amalgamation, or of the continuing company after such transfer or reinsurance, shall be impaired, the policy and annuity liabilities of the combined or continuing company being calculated on the basis prescribed in subsections 2, 4 and 6, respectively, of section 42 of this Act.

"8. When an amalgamation takes place between any companies, or when the business of one company is transferred to or reinsured in another company, the combined company or the continuing company, as the case may be, shall within ten days from the date of the completion of the amalgamation, transfer or reinsure, deposit with the superintendent the following documents, that is to say:—

"(a) Certified copies of the statement of the assets and liabilities of the companies concerned in such amalgamation, transfer or reinsurance; and,

"(b) A statement of the nature and terms of the amalgamation, transfer or reinsurance; and,

"(c) A certified copy of the agreement under which such amalgamation, transfer or reinsurance is effected; and,

"(d) Certified copies of the actuarial or other reports upon which such agreement is founded; and,

"(e) A declaration under the hands of the president and manager of each company that to the best of their knowledge and belief every payment made or to be made to any person whatsoever on account of the said amalgamation, transfer or reinsurance is therein fully set forth, and that no other payments beyond those set forth have been made or are to be made either in money, policies, bonds, valuable securities or other property, by or with the knowledge of any of the parties to the amalgamation, transfer or reinsurance.

Lack of Information.

"9. No company shall amalgamate with another company, transfer its business to or reinsure its business in another company, unless such amalgamation, transfer or reinsurance is sanctioned by the Treasury Board in accordance with this section: Provided, however, that this section shall not apply to the contracts of reinsurance made by companies in the ordinary course of their business."

The lack of information available as to the present position and policy of the companies since the change of control does not tend to strengthen confidence in them.

The matter is not improved at all by the recent failure of the National Land and Fruit Packing Company. Mr. H. Pollman Evans and Mr. T. T. Rolph, president and vice-president of the Union Life and Home Life Companies respectively, are president and vice-president of the packing company.

◆

DRYDOCK FOR SAULT STE. MARIE

The promoters of a drydock for Sault Ste. Marie, Ont., have succeeded in financing the enterprise in England, whereby Messrs. Pethwick Brothers, Limited, of Plymouth and London, one of the largest contracting firms in England, have undertaken the construction of the drydock at an estimated expenditure of $1,000,000. It is expected that the contracts in connection with the construction and financing of this project will be executed in London before the end of the month.

Arrangements are made with the city of Sault Ste. Marie whereby construction will commence not later than April 30th, 1913, and will be carried on continuously thereafter. The drydock must be completed, ready for operation by October 1st, 1914. It will probably be completed much earlier than that date.

The location of the drydock at Sault Ste. Marie is an excellent one and will fill a want which has long been felt in marine circles. The history of the accidents to navigation on the Great Lakes shows that by far the greatest number of these accidents occur in the St. Mary's River, or its immediate vicinity. The proposed drydock will be the nearest to vessels which meet with accidents there. Moreover the industries at Sault Ste. Marie are now of such magnitude and variety that any loaded vessel usually can find at Sault Ste. Marie a market for its cargo, so that it can be lightered or emptied there and go immediately into drydock. In this respect, Sault Ste. Marie affords facilities for loaded vessels similar to the facilities afforded at the extreme ends of the usual lake routes for freight carriers.

◆

The Dominion government is considering the question of increasing the rate of interest to depositors in the post office savings banks from 3 to 3½ or 4 per cent.

PERILS OF ASSESSMENT LIFE INSURANCE

redicament of the Ancient Order of United Workmen —Analysis of the Position

That something drastic will have to be done at the forth-
oming session of the Ontario Grand Lodge of the Ancient
orkmen is apparent. The thirty-fourth annual session
as held in Toronto on March 20th and 21st last. No an-
ouncement has yet appeared as to this year's session by
r. James M'Ewing, the Grand Master Workman, of Dray-
n, Ont., but doubtless the call will appear in the next, or
ebruary number of The Canadian Workman. This journal
issued about the middle of each month from Orillia, at
ty cents per year.

The January number of The Workman shows that not
ly were two calls made, and a double assessment collect-
from all the remaining members during December, but
additional levy is now being paid of 25 cents per member,
make good the shortage in the "organization fund" de-
rtment. This has no doubt been rendered necessary by
e extra expenditure which the officers have had to undergo
defending the recent suit in court, but which went against
em, throwing heavy costs upon the society.

junction as to Rates.

The injunction of the court continues until the forth-
ming meeting of the Grand Lodge, on the ground that,
wever necessary and proper the proposed increase of the
sessments upon the older members may have been, the
oper constitutional steps had not been taken in the mat-
of full notification to the local lodges as to what was pro-
sed to be done; nor was there a carefully recorded entry
the yeas and nays made in the adjourned Grand Lodge.

At the session of the Grand Lodge in March last some
artling figures were presented, fully justifying, one would
ink, the action of the officers, as to the need of the older
embers being required to pay an increased rate, based
on their attained ages in 1905. For instance, there was
deficit during the first nine months of 1911 of $100,-
9.43." Also "at the close of the year we had on our mem-
rship roll, 2,291 members over 70 years of age, with a lia-
ity of $4,582,000." The report then goes on to say:—

Enormous Liability.

"This enormous liability will, in all probability, become
yable in six years, while the average amount we expect to
eive at their present rates from these 2,291 members, will
about $465,460. Between ages 60 and 70 we have 7,051
embers, who will probably become a claim upon our Order
$14,000,000 inside of fifteen years."

These facts led the members to decide, unanimously, to
ve an adjourned session, and to call in the aid of a com-
tent actuary, as to the addition that should be made to the
sessments upon the older members—those who had joined
the inadequate rates in use before 1905. That adjourned
ssion was held in Toronto on June 21st last, when a valu-
le report was received from Mr. Frank Sanderson, whose
mpetency as an actuary no one disputes. After a full dis-
ssion it was decided that the emergency was great enough
call for immediate action

epare for Increased Assessments.

Hence all the older members were required to prepare
increased assessments on and after October 1st, 1912.
e success of the injunction proceedings postpones that
angement for the present, but in the meantime the death
ims continue to greatly exceed the income from calls. So
e reserve fund which has been growing nicely in years
st, has ceased to grow, and is rapidly being consumed.
w the income, and the death claims, and the surplus have
en growing during the past ten years is shown by the fol-
ving table:—

ar.	Death claims.	Income.	Surplus.	Per $1,000.
02	$ 671,450	$ 794,706	$ 334,935	$ 4.63
03	742,800	878,578	447,377	6.18
04	868,079	1,040,840	539,742	7.77
05	882,843	1,070,765	683,981	10.94
06	861,174	1,184,717	974,069	16.26
07	904,314	1,161,443	1,100,237	18.62
08	874,411	1,176,822	1,308,076	23.83
09	953,737	1,189,101	1,511,483	25.85
0	1,034,295	1,210,141	1,595,110	27.48
1	1,082,752	1,167,129	1,597,023	28.14

From this table it will be seen that the growth of the
rplus came almost to a standstill during 1911. In 1906 and
1908, there was encouraging growth in the surplus of
arly $300,000 a year. But in 1910 this fell to less than
4,000, and in 1911 a bare $1,913 was added. This is seen
have been brought about by the death claims having got
the habit of growing faster than the income. The reason
this is plain. The members were rapidly growing older, and therefore dying off faster than formerly. But most of them were allowed to continue paying the old inadequate fixed rate at which they joined many years ago, when all were young and deaths were few.

For the year 1912 just closed, everything has been going from bad to worse, not only with the Ancient Order of United Workmen, but with almost every other assessment concern, as will be seen later on, in the case of the best of them. But as to the Workmen, the record of this disastrous year 1912 is set forth in the following monthly statement, compiled from the published reports made to the members for their information:—

Months.	No. of Members.	Receipts.	Payments.
January	36,866	$ 83,979	$ 81,200
February	36,812	81,817	87,147
March	36,497	81,229	80,255
April	36,036	80,025	105,784
May	35,978	81,803	104,708
June	35,790	80,224	113,551
July	35,485	80,626	110,188
August	34,987	78,927	84,950
September	34,040	76,372	154,046
October	33,368	74,239	178,773
November	31,708	68,848	131,062
December	29,278	129,372	153,474
Totals	.....	$996,761	$1,385,138

Like a water-logged ship, the excess of payments during the last half of the year, show something radically wrong. The pity of it is that many of the brethren have been inducing new members to come in to share their fate, while the total membership is, nevertheless, rapidly decreasing, as is shown by the first column in the above table. From 36,866 in January, only 29,278 responded down to the close of December, a decrease of 7,588, or about one-fifth of the whole number.

Effect Upon the Assets.

Still more alarming is the effect of the year's operations upon the assets of the Order. It began the year with $1,508,483, and it closes it with only $1,112,505, showing plainly that $395,978 has disappeared somewhere along the way, notwithstanding the double assessment collected in December. It would have required double assessments for more than half the year to have prevented the surplus from decreasing In addition to that deficit of $395,978 there is an additional deficit brought down to be adjusted in the January accounts, of no less than $113,492. Apparently, this will reduce the surplus to less than a million dollars, where it was over one and a half millions at the commencement of the year.

Was a Foolish Provision.

That was a most foolish provision adopted a few years ago, by which each member, upon reaching 70 years of age, whether he had been a member for a long or a short time, could retire and take with him, in cash, one-half of all he had contributed as assessments. None but healthy persons, likely to live and contribute to the funds until 80 or 90 in a regular life insurance company, would be likely to accept of that provision. The infirm units continue to pay the assessments. Thus we see that while the large sum of $53,408 was paid in December, to those healthy withdrawing members, and about $137,000 during the months of October and November, the death list does not show any diminution of calls for $2,000 each, but the contrary, on the lives of deceased members who have attained that age or more.

◆

COBALT ORE SHIPMENTS

The following are shipments of ore, in pounds, from Cobalt Station for the week ended January 17th:—Cobalt Lake, 64,535; Trethewey, 58,600; Bailey Cobalt, 42,350; Peterson Lake, 84,299; Drummond, 40,000; McKinley-Darragh, 83,600; La Rose, 174,855; Dominion Reduction, 119,885; Cobalt Townsite, 147,863; Temiskaming, 62,087; Casey Cobalt, 61,000; total, 939,074 pounds, or 469 tons. The total shipments since January 1st are now 2,248,273 pounds or 1,124 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

◆

Application will be made to the Ontario Legislature by the McKinley-Darragh-Savage Mines of Cobalt, Limited, for an act to authorize the directors to declare and pay dividends to the shareholders out of the company's funds and also to repay on account of capital such amounts as they may determine, notwithstanding that the value of the net assets may be less than the par value of the issued capital stock.

FIRST MORTGAGE FIFTEEN-YEAR SINKING FUND GOLD BONDS

Dated 1st January, 1913 Due 1st January, 1928
Interest payable 1st January, 1st July

Principal and interest payable at The Canadian Bank of Commerce, Toronto, Montreal, Winnipeg, and London, England.

Redeemable at par and accrued interest on any interest date on six weeks' prior notice, or annually for sinking fund drawings, beginning January 1st, 1914.

Denominations: $100, $500 and $1,000, with Sterling equivalents.

Bonds issued in coupon form with privilege of registration of principal and in fully registered form. Coupon and registered bonds are interchangeable.

TRUSTEE:

THE NORTHERN TRUSTS COMPANY, WINNIPEG.

The legal opinion of Messrs. Blake, Lash, Anglin & Cassels, Toronto, will be furnished.

The authorized total issue (closed mortgage) is $1,500,000, of which amount $500,000 is retained in the Treasury.

We emphasize the following salient points of this issue:

ASSETS:

(1) Value of assets $4,431,126.61—consisting of lands, buildings, investments, etc., $1,317,021.04, and net current assets in excess of current liabilities, $3,114,105.57.
The appraised value of lands alone is $1,014,310.

(2) Average annual net earnings for three years ending December 31st, 1911, $278,161, or over 5½ times the interest on bonds now issued.

(3) An annual sinking fund, beginning January 1st, 1914, sufficient to retire the present issue by maturity at par and interest.

The J. H. Ashdown Hardware Company, Limited, conducts a wholesale and retail hardware business throughout the entire Prairie section of Western Canada, including the Provinces of Manitoba, Saskatchewan and Alberta, as well as a portion of the Northwest Territories and British Columbia. Warehouses are located at Winnipeg, Calgary and Saskatoon, with every facility for serving all portions of the above territories.

The Company had its inception in 1869. In 1902 it had assumed such proportions that it was considered advisable to convert it into a joint stock company. The authorized capital is now $2,000,000 fully paid, while at December 31st, 1911, there was a surplus of $1,539,876. These results have been derived almost entirely from earnings, and the Company has in addition disbursed an annual dividend averaging 12% throughout the period of its existence.

The general management of the Company's affairs is in the hands of the President, Mr. J. H. Ashdown. The various wholesale and retail branches are in charge of capable and experienced men thoroughly familiar with the needs of the trade, and most of them stockholders in the Company.

Copies of the Trust Deed and of the appraisal certificates may be seen at our offices.
Interim certificates will be furnished pending delivery of definitive bonds.

CLOSE OF BANQUE INTERNATIONALE CASE

Two Defence Witnesses Heard—Disputed Transaction Was Legal

At the first and only public hearing in La Banque Internationale case, against one of the officials, of which certain shareholders sought to take action, Judge Leet declined to issue warrants in the matter, as stated in The Monetary Times last week. That closes the case. The judge said that the case was one of a general complaint that the bank had made false returns to the government, that assets had been included in the returns which should not have been there, and finally it had narrowed down to the question of the D'Aoust note.

Mr. Charles Bernard, K.C., for the defence called Mr. John Knight, who stated that since 1900 he had been the secretary of the Bankers' Association, and that during his tenure of office he had kept before him the government returns of the various banks, and that where there were any complaints of false returns having been made he in conjunction with the department at Ottawa moved to have the matter investigated. He said that he was conversant with the D'Aoust transaction, had seen all the documents in the case and the return made to the government. With full knowledge of the circumstances the note could not have been treated otherwise than it was, as a current loan.

Not Necessary to Advise Bankers.

Mr. Knight said that he had been approached by two Frenchmen who wanted the matter investigated, and he had seen Mr. Bird's books before the complaint was made to the court. After the examination he declined to bring the matter to the attention of the Executive Committee of the Banker's Association. There was in his opinion not enough to warrant action.

Mr. J. G. Muir, chief accountant of the Merchants Bank of Canada testified that for the past twenty-five years he had been making bank returns to the government, and that he had had life-long experience in banking matters both in Canada and abroad. In his opinion a banker making a statement could not have treated the current note of Mr. D'Aoust other than Mr. Bird had done, and that a contingency liability should not have been included in the government return. The contingent account was not called for in the government account and there was no column for it.

What the Judge Said.

In closing the case Judge Leet said that the charge was one of a serious nature, and the circumstances arose out of a transaction, which was subject to criticism, made by two officers of the bank and kept secret from the board.

"After hearing the evidence of Mr. Knight," said Judge Leet, "whose opinion carries conviction both in Canada and throughout the world, and Mr. Muir connected with one of the oldest and most conservative banks in the country that the returns had been made out as they would have done it, I could not let the matter go further as there would be no pratical result."

Conducted in Camera.

"Up till the present," said Judge Leet, "I have conducted the hearings in camera and this has given rise to some criticism, all of which has not been favorable, but I do not care about that. I feel that important things like this could not be stifled. Our financial institutions should be above reproach, and also the manner in which they are managed. For my part this matter should not go further and I will not issue warrants."

The first action in this matter was taken on October 14th last when Mr. Henry Ducout, of Paris, France, laid a complaint alleging that during the months of April, May, June, July and August, 1912, one James Godfrey Bird, general manager of the International Bank of Canada, while acting in that capacity did knowingly and wilfully make false and deceptive statements in certain written returns to the Minister of Finance and Receiver-General of Canada. These alleged statements the complaint outlined consisted in omitting to insert among the liabilities of the bank a considerable amount of liabilities which should have been inserted.

Manager Was Given Orders.

The evidence was to the effect that Mr. Decout, representing the French shareholders, and Mr. De Senn, who had been brought from Paris to enter the bank, went to Mr. Robert Bickerdike and told him that a loan of $200,000 had been made to Mr. D'Aoust. Mr. Bickerdike, vice-president of the bank, said that the report could not be true, and expressed the opinion that everything was going on in the bank as it should be. The two gentlemen still insisted and finally Mr. Bickerdike communicated with his brother director, Sir George Garneau, and they went to Mr. Bird, manager of the bank, who admitted that this had been done against his own better judgment, and when asked why he had done it, he said that it had been done under the orders of Sir Rodolphe Forget, the president.

When asked what he had done, Mr. Bird said that he had discounted a note for $195,000 or $193,000, and he brought out and read an acknowledgment signed by himself and the inspector of the bank, Mr. F. G. Ramsden, which read as follows:—

7th March, 1912.

O. B. D'Aoust, Esq.,
Montreal,

"Dear Sir:—

"Herewith we beg to enclose you our cheque for two hundred thousand dollars, being the proceeds of two notes for one hundred thousand dollars each, signed by you, and payable to the order of this bank on demand, with interest at four per centum per annum, and dated this seventh day of March, 1912. It is understood and agreed between us that payment on account of premiums on the capital stock of this bank, up to the extent of the said amount of two hundred thousand dollars hereafter received are to be applied in liquidation of the above-mentioned two notes for one hundred thousand dollars each, until the same have been fully paid and satisfied.

"The interest at the rate of four per centum per annum payable on the said notes is to be paid to the bank at its head office in Montreal on the last day of every month so long as any balance on said notes shall remain unpaid.

"The said sum of two hundred thousand dollars is now advanced to you in consideration for and payment in full of all commissions, legal expenses, organization expenses, and any other disbursements whatsoever in connection with and on account of the subscription to or sale of the shares of the capital stock of this Internationale Bank of Canada and the organization thereof.

Yours truly,
(Signed) "Godfrey Bird,
"General Manager.
"F. G. Ramsden,
"Inspector."

Said He Exceeded Authority.

At a board meeting, Mr. Bickerdike brought this matter up, making a charge against the manager for having done this thing without the authority of the board. He protested the action of Mr. Bird, remarking that in his opinion, he had exceeded his authority. Mr. Bird's explanation was as follows:—

25th September, 1912.

To the President and Board of Directors Banque Internationale du Canada.

Gentlemen,—

We have a current loan to Mr. O. B. D'Aoust of $193,376.25, which advance was made to him in settlement of an account rendered for organization and other expenses in connection with the bank; the same being secured by the hypothecation of 2 per cent. of the premium when collected.

This advance was made with the approval of the president, Sir Rodolphe Forget, and under the advice and with the approval of the bank's solicitor and director, Mr. J. N. Greenshields.

"If an Error was Made."

If an error was made, in not bringing the matter before the board at the time, we much regret it, but as the advance was made with the approval of the president of the bank, Sir Rodolphe Forget, and the bank's solicitor and director, Mr. J. N. Greenshields, we believed we had all the authority necessary, besides which, we understood, the account rendered was one that the bank would have to pay, as it covered the obtaining of subscriptions for capital of $10,000,000; the expense of which you are aware, cost considerable money. Other organization expenses were paid, such as heavy legal fees, expenses at Ottawa in connection with obtaining the charter and license; advertising; travelling expenses; cost of bringing clerks from Europe; salaries for ten or eleven of the staff for nearly six months while the bank was waiting for its license; and also the expenses during the time of an office on St. James Street, including rent, taxes, light, etc.

This account has not yet been paid, but was settled in the foregoing manner. In the meantime, Mr. O. B. D'Aoust is indebted to the bank and is good for the amount of his note.

(Signed) Godfrey Bird.

At the annual meeting of the Standard Stock Exchange, Toronto, the following officers were elected for the ensuing year: President, Mr. J. A. McCausland (re-elected); 1st vice-president, Mr. S. J. Lorsch; 2nd vice-president, Mr. J. T. Eastwood; secretary-treasurer, Mr. H. B. Smith; directors, Messrs. S. J. Deery, S. G. Jackes, S. B. Dawson, F. D. N. Paterson, and L. J. West.

ANALYSIS OF CANADIAN SITUATION

British Critic Speaks of Alleged Over-borrowing by Our Municipalities

The British Empire Trust Company has issued its annual review of the undertakings with which it is connected. These are all Canadian ventures and include the Canadian Northern Railway, the British Columbia Electric Railway, the Winnipeg Electric Railway, the Monterey Railway, Light and Power and other concerns. Apart from a survey of the progress of these companies, the review deals with the position of the market in Dominion securities generally and discusses the trend of joint stock affairs in Canada. A good deal has been said in recent months about the large amount of capital raised or attempted to be raised in London by Canadian ventures, and the fear has been freely expressed that the country has been over-borrowing. The British Empire Trust review declares that any impression that the market in Canadian securities is in an unhealthy condition is entirely unfounded. "The market generally has not been in such a sound position for a long time past. There is no longer any considerable accumulation of unplaced securities, and there is a good and increasing demand for well-secured investments." The review goes on to examine the causes of dissatisfaction, and classifies them as follows:—First, the alleged over-borrowing or unwise borrowing on the part of Canadian cities; second, the not inconsiderable number of Canadian companies floated during the past eighteen months which have already defaulted; and third, the large number of so-called finance companies recently formed which have introduced, and are introducing to the investing public unsuitable and unmarketable securities, many of which are unsound and even fraudulent.

Over-borrowing by Municipalities.

With regard to the first complaint, the British Empire Trust admits that Canadian municipal securities are a weak spot, "and we believe the only weak spot," in the market. This is due to cities having been allowed to borrow too freely in the past and at too low a rate of interest, whereby extravagance has been encouraged:—

"Municipal bodies have rushed into heavy expenditure on unnecessary public buildings and on ambitious schemes for building tramways, electric light, gas and power plants, instead of confining themselves to necessary water supply, drainage, street lighting and paving, which, in growing cities, call for great and continuous capital expenditure, without the added burden of expenditure on trading concerns requiring continuous and expert direction to achieve success. A stop to this municipal borrowing had to come, and it has come. Canadian municipal securities, issued at high prices during the last 18 months, are practically unsaleable, or are saleable only at a sacrifice, and it is certain that in future Canadian cities will only be able to borrow at from 5 per cent. to 6 per cent., and then only within well defined limits. This is merely a repetition of the experience of English municipalities.

Craze for Municipal Ownership.

During the craze for municipal ownership in this country, one municipal loan succeeded another; all kinds of trading schemes requiring large sums of money were mooted; the investing public became wary, with the result that municipal securities became unpopular, and have never regained favor, and public borrowing has had to be almost altogether abandoned. Lately, this weakness has been accentuated, because various Canadian cities, unable to sell permanent securities, have not only already had recourse to short-dated bills maturing in from 3 to 12 months, which a leading authority stated aggregated £4,500,000 in November, and which have considerably increased since then, but are announcing fresh programmes of large capital expenditure for the coming year. Where is the money to meet these commitments to come from? Recently the bills of a Western municipality, accustomed to rate its credit at 4½ per cent., have not found favor even at a price yielding 6½ per cent."

Hopeless and Dangerous Flotations.

Dealing with the second complaint, the review says that it cannot be denied that a number of absolutely hopeless—and some unscrupulous—ventures have taken advantage of the popularity of Canada in London to raise capital here, but it thinks that the risk of any continued rush of these enterprises gets increasingly smaller:—

"Some of these have already come to grief, and others are likely to follow, but there is now less likelihood of a repetition of these scandals, as the public seem to have learned their lesson in time and to be now able to discriminate between their friends and their foes among the financial institutions or self-styled financial institutions which offer invest[illegible]."

The third complaint is likewise conceded to be well-founded, and in this case the danger is one to be still guard-

"A large number of obscure trust, finance and mortgage companies have recently been formed, with little capital and no status, and have been actively engaged in pushing the sale of various small bond and debenture issues, and of real estate and investment in mortgages which, where not actually fraudulent, are at all events dangerous and unsuited to the requirements of the majority of English investors. We warn our friends to beware of the promises of huge profits to purchasers of real estate, and to beware also of the high rates of interest 'with safety' promised on mortgage investments, and on the unquoted bonds and shares of obscure companies of various descriptions."

Plenty of Scope for Capital.

The rush to buy land in Canada has now almost ceased, says the British Empire Trust, and the public are showing a wiser discrimination in the selection of projects in which to invest their money:—

"The statement that Canada herself has over-borrowed is too foolish to merit serious discussion. A young country, still in the early stages of development, full of energy and prosperity, whose total debt has only increased from £36,000,000 to £50,000,000 during the ten years of its greatest development, and who can point to large increases and surpluses of revenue, can certainly not be accused of straining its credit. What is probably meant is that an excessive amount of capital has been raised for the development of Canada as a whole, but it must be remembered that over 60 per cent. of the capital raised has been for the construction of railways which have opened up and are opening up vast revenue-producing territory of immeasurable wealth. It should also be borne in mind that the period of urgent demand for capital for railway construction will come to an end with the completion of the Transcontinental lines of the Canadian Northern and Grand Trunk Pacific, which is well within sight. Then there will follow a period of moderate capital expenditure and greatly increased revenue for these railways."

The debt referred to above is that of the Dominion Government, and, as the review suggests, the complaints of over-borrowing refer not to federal loans but to the money raised for all purposes in the country both by local, State and Dominion authorities, and by joint stock undertakings. The total of this is a great deal more than the federal debt, for during the last ten years alone Canada has raised in London over £200,000,000 for various purposes.

◆

BIG FIRE LAST YEAR

The statement made in these columns recently that the year 1912 passed without any serious conflagration having occurred was incorrect, as a serious fire took place at Chicoutimi, Quebec, in June last, when the loss was well over $1,000,000.

◆

HAILEYBURY'S FIRES

The fire loss in the town of Haileybury during 1912 was less than $6,000, a record equalled only by the fire record of 1910, reports Fire Chief Quinn, when the amount was less by about $1,000.

The fire brigade was called out on 38 alarms during the 12 months, while in 17 cases water was turned on, and in 21 cases a chimney fire, a false alarm or a very minor fire was the cause of the call. The most serious fires of the year occurred practically at the same time, when M. J. Conkey's house on Little Street was damaged to the extent of $1,200, and as the brigade were returning from this fire, they were notified of another fire in Councillor O. M. Hennesy's house on Broadway Street, where $3,000 damage was done. In the other 36 calls answered during the year the loss was $1,720.

For four months the brigade did not have to respond to a single call.

Compared with the 1911 fire loss, the figures are only a few dollars below the total, while the number of calls was greater.

◆

The Fredericton, N.B., board of trade has elected the following officers for the ensuing year: President, Mr. John T. Jennings; vice-president, Mr. A. R. Slipp, M.P.P.; secretary, Mr. H. S. Campbell; treasurer, Mr. J. M. Lemont. Executive, Mayor Hooper, G. W. Hodge, J. D. Palmer, C. F. Chestnut, F. B. Edgecombe, G. Y. Dibblee, J. W. McCready, James S. Neill, Ald. W. E. Farrell, W. G. Clark, W. A. B. McLellan, Ald. Hugh O'Neill, Archie Fraser, W. J. Osborne and John J. Weddall. Transportation committee, Messrs. C. Fred Chestnut, F. B. Edgecombe, G. Y. Dibblee, J. T. Jennings, J. D. Palmer and R. F. Randolph. Tourist committee, Messrs. J. W. McCready, A. A. Shute, F. B. Edgecombe, W. T. Chestnut, and Mayor Hooper.

CANADIAN-BRITISH TRADE RETURNS

ominion Exported Fifty Per Cent. More Wheat Last Year to Great Britain—Some Large Decreases in Canada's Imports

The government return of the trade of the United King-
om has just been issued. The following statistics have
ecial interest for Canada.

The total amount of wheat imported into the United
ingdom during 1912 was 109,582,539 cwts. Canada sent
,551,100 cwts.; United States of America, 19,973,994 cwts.;
rgentine, 18,783,700 cwts.; British East Indies, 25,379,400
ts. Canada's figures of 21½ millions of wheat sent to the
nited Kingdom are the second largest among the wheat im-
rts. In 1911 she sent 14 millions, and in 1910 16 millions.
e values of last year's Canadian wheat supply was £8,844,-
3.

The number of Canadian cattle imported in 1912 was 6,-
o, value £142,508, against 42,239 (£781,436) in 1911, and
,691 (£1,442,781) in 1910.

Canada last year sent 387,401 cwts. of bacon, value £1,-
5,527. In 1911 the figures were 615,807 cwts., value £1,793,-
6, and in 1910 411,935 cwts., value £1,449,637.

t Two Tons of Butter.

Only 27 cwts. Canadian butter were received as against
936 in 1911, and 16,805 in 1910. Cheese 1,352,570 cwts.,
s figure corresponding pretty closely to those of the two
rs previous.

Canned salmon totalled 211,616 cwts., against 169,070 for
1, and 264,760 for 1910. Canada's imports of canned
sters are far the largest, being 28,764 cwts., against 4,090
ts. for Newfoundland, and only 1,782 from other countries.

Fifty-three thousand loads of hewn wood came from Can-
a and 895,000 loads dressed wood, following (with a big
p) nearly three millions from Russia and 1,200,000 from
eden.

creases in Steel and Iron Imports.

On the other side of the account:—The United Kingdom
t 1,660,260 gallons of spirits to Canada, being only ex-
ded by 2, 406,388 gallons to Australia.

Other United Kingdom exports to Canada include
ns):

	1912.	1911.	1910.
Pig iron	68,024	91,024	127,944
Wrought iron	6,563	8,748	11,366
Rails	737	1,739	3,357
Boiler plates	2,801	6,696	11,730
Galvanized sheets	26,248	22,476	20,799
Tinned plates	7,039	12,426	25,741
Steel bars and shapes.	14,276	28,259	40,497

The value of further exports include:—

	£	£	£
Cutlery	119,880	103,100	113,355
Hardware	117,196	103,208	88,971
Haberdashery	177,323	140,682	126,208
Linen piece goods	346,652	280,115	328,494
Carpets	450,119	370,151	385,324
Waterproof apparel	222,363	100,702	69,515
Glass and earthware ..	468,463	395,124	360,041
Writing paper	14,861	22,597	27,332
Printing paper	146,756	129,732	119.554

RAILWAYS IN SASKATCHEWAN

At the end of the season the Canadian Pacific Railway
414.80 miles of main line and 1,659.45 miles of branch
s, or a total of 2,074.25 miles in Saskatchewan; the Can-
n Northern Railway had 400.67 miles of main line and
3.93 miles of branch lines, or a total of 1,854.60 miles;
the Grand Trunk Pacific Railway had 415 miles of main
and 267.67 miles of branch lines, or a total of 682.67.

This gives a grand total for the province of 4,611.52
es, made up of 1,230.47 miles of main lines and 3,381.05
es of branch lines.

Throughout the whole season there was a shortage of
r, and much time was lost on account of the unsettled
ther. When harvest time arrived the high wages offered
the farmers rendered it impossible to keep the construc-
gangs at full strength. The steel rail mills were slow
making deliveries, on account of the heavy demand for
material. These and other causes all contributed to de-
construction, with the result that the number of miles of
way added during 1912 was much less than in other re-
t years.

AUSTRALIA BUYS CANADIAN IMPLEMENTS

Makers Have Excellent Selling Organization and Manufacture Machines Fitted to the Needs of the Commonwealth

As a result of comparatively good seasons, it is satisfactory to observe that the figures in the Australian returns for 1911 prove that Canada maintains a predominating position in the (importing) agricultural implement and machinery trade of the Commonwealth. The reason is obvious and little comment as to the cause is necessary, says Mr. D. H. Ross, Canadian trade commissioner at Melbourne in a recent report. The leading agricultural machinery manufacturers in the Dominion have, for a period of years, established branch houses in the principal Australian importing centres, and other Canadian makers are represented by capable selling agents who carry stocks of varied magnitude. The selling organization is as nearly perfect as ingenuity can devise, and fair trading, combined with the undoubted excellence of Canadian farming machines, has secured an enviable reputation for the goods.

Manufacturers Meet Requirements.

The lead held by Canadian manufacturers in these lines has been secured by effective local management, causing not only constant vigilance as to recurrent requirements, but also in anticipating the demand for perfected implements adapted to varied farming conditions. To secure the trade, it follows that the machinery imported must be suitable for the country and, in a number of cases the implements are—through climatic and other reasons—of such character as to be unmarketable in North America.

The result achieved is an object lesson to Canadian manufacturers of other lines of merchandise as to what trade can be obtained in distant oversea markets by persistent effort while holding an equally prominent position in the home market.

Three Principal Countries.

For comparative purposes, the value of Australian importations from the three principal countries of manufacture are shown—Canada, the United States, and the United Kingdom—during the last two years:—

Agricultural machinery from:	Canada.	United States.	United Kingdom.
Australian imports, 1910	£258,012	£241,095	£70,376
Australian imports, 1911	260,585	256,712	69,441

CONSOLIDATED MILK COMPANY'S STOCK

An offering of $300,000 7 per cent. preference shares of the Consolidated Milk Company, Limited, is being made at par with a bonus of 5% common stock. The company was organized to handle milk and cream and other farm produce in Montreal and elsewhere, with a capital of $1,000,000, half of which is common and half preferred stock. The Monetary Times is informed that the stock is being well patronized by farmers and others.

FISHING COMPANY'S STOCK ISSUE

A block of $100,000 6 per cent. cumulative preferred stock, and $25,000 common stock of Messrs. Robin, Jones and Whitman, Limited, is being offered by Messrs J. C. Mackintosh and Company, of Halifax and elsewhere. The stock is being sold either at 85 with a bonus of 25 per cent. common stock, or at 80 with 25 per cent. of common stock at 20.

This company in 1910 absorbed three concerns. The operations of the amalgamated concerns, under Robin, Jones and Whitman, Limited, have more than fulfilled the expectations of the directors, says the prospectus. The volume of business both in regard to the company's stores and the export and import business has steadily increased. It is anticipated that the year ended March 31st, 1913, will result satisfactorily and put the company in a position to pay dividends on the common stock. The general store business of the company amounts to $500,000, in addition to which the export and import business approximates $1,750,000, making a total of $2,250,000 per year.

The capitalization is as follows:—

	Authorized.	Issue.
Cumulative preferred stock, 6%	$900,000	$823,000
Common stock	850,000	537,800
Bonds	250,000	216,853

The steamship agency of the White Star and allied lines as carried on by Messrs. A. G. Jones and Company forms part of the business of the new company being carried on under the old firm name.

IMPORTING MILLIONS OF EGGS

Mr. John A. Gunn, of Montreal, Reviews the Produce Situation—Canada No Longer Exporting Butter

Record prices paid the producer of dairy, poultry and live stock products, the constant decrease of the supply as compared with the rapidly increasing demand and the significant fact that Canada last year ceased to be a butter exporting country, only 70 packages being sent abroad, were interesting statements made by Mr. John A. Gunn, president of the Montreal Produce Merchants' Association in his annual report. He suggested that the farmers of Canada should cultivate intensive farming and make a closer study of the demand. Discussing trade conditions last year, Mr. Gunn said:—

"While there has been increased interest shown by farmers and producers in the quantity and quality of poultry kept on the farm as shown by the increased production of eggs, still the quantity falls short of the Canadian consumptive demand.

Bringing Eggs From United States.

"During 1911 a large proportion of the eggs stored in Eastern Canada were shipped to the North-West and British Columbia. Last season this trade was practically lost to the Canadian producer, the United States farmer capturing the business in the face of three cents per dozen duty, yet the 1912 season is closing with only enough eggs in Eastern Canada to supply the current demand until about February first. It is estimated that Canadian dealers have imported into Canada 150 cars of eggs this season, representing nearly two million dozen, upon which a duty of three cents per dozen was paid, equal to $60,000. Why should this be? Is the farmer awake to the possibilities?

High Prices for Dairy Produce.

"The past season has established a new record of high prices for dairy produce, but, while proving the most remunerative in the history of the produce trade as far as the producer is concerned, it has been most unsatisfactory from the exporter's standpoint. While the high prices paid for Canadian cheese were justified at the opening of the season on account of the extreme scarcity, Canadian as well as British operators seemed to lose sight of the fact that the extreme high prices would curtail consumption, and, further, that it could hardly be expected that the same conditions which prevailed last year would occur again this season. Last year the dry weather in England greatly curtailed the make of the English cheese, while the weather this year was favorable throughout the whole season, the result being that the English make of cheese was the largest on record and the price reasonable when compared with the prices being paid for the Canadian produce. As the season advanced the demand for Canadian cheese fell off and Canadian operators have since found the trade dragging and unprofitable.

Passing of Butter Export Trade.

"The season of 1912 will go down in history as the year which saw the passing of the export butter trade, there being only seventy packages exported, and these to South Africa, in 1912, as against 134,000 packages in 1911. The value of the cheese and butter exported in 1911 was estimated at $23,290,395, as against $17,312,844 in 1912, showing a reduction in value of $5,895,551. While our export butter trade during 1912 amounted to practically nothing, our trade with the Canadian North-West and British Columbia showed a substantial increase."

AGASSIZ DESIRES SETTLERS

A board of trade has been formed at Agassiz, B.C., one of the chief functions of which will be to give absolutely correct information as to the value of lands, suitability of same for settlement, markets, transportation facilities, cost of living, opportunities for young men and women for employment, school matters and church matters, price of labor, prices of produce, implements and live stock, and amount of capital required for specific lines of agriculture. Agassiz is situated at the head of the Lower Fraser Valley, some seventy miles from Vancouver, the coming British port of the North Pacific, with the advantage of a market in a city of 120,000 people. The Dominion experimental farm is situated here, the superintendent of which devotes much of his time to giving information to newcomers, and as a government official giving it correctly. The climate is very similar to that of the British Islands. The secretary of the board of trade, Agassiz, B.C., will be pleased to give information as to poultry farming, dairying, horticulture, fruit growing and their possibilities, together with markets available.

ST. JOHN HAS MANY INDUSTRIES

Natural Resources Are Many—Manufacturers' Activities—Bathurst Wants Industries

(Staff correspondence.)

January 23rd.

St. John board of trade recently entertained the Commercial Travellers' Association. One of the features was the reproduction on a screen of photographs of public works and new factories and warehouses and other buildings under construction at St. John during last year, and a map showing that within a radius of 100 miles from St. John are great supplies of coal, iron, lumber, natural gas, petroleum, limestone and other raw materials for manufacture, while there are the Atlantic routes and three transcontinental railways to handle traffic to and from the port. The president of the board, Mr. J. M. Robinson, pointed out that great public works now under way will involve an expenditure within a few years of $45,000,000, while private enterprise will add millions more. Mr. Matthew Lodge was quoted as saying that natural gas would be brought to St. John this year, while the hydro-electric company will also make large expenditures for the development of its purpose of bringing power to St. John. There was a satisfactory increase shown in the general revenues of the province, and the provincial government reports a surplus.

The grain shipments from St. John thus far this season amount to over 2,000,000 bushels, and both the Canadian Pacific and Intercolonial elevators and track space are taxed to the limit. The new year brought the announcement that the first trainload of grain over the Grand Trunk Pacific would be milled at Port Colborne, and the flour brought to St. John for export to South Africa.

Factors and Factories.

The city council have decided to reclaim a large area at the south end for factory sites; T. McAvity and Sons will assemble there a group of thirty buildings to employ a thousand men in iron and brass works. Haley Brothers and Company have also asked for a site, so that they may greatly enlarge their woodworking factory.

The contract has been awarded for the substructure and tenders will close on February 11, for the superstructure of the $300,000 bridge to connect east and west St. John and give a continuous street car service. The work must be completed by June 1, 1914.

T. S. Simms and Company are moving into their new factory, and as soon as they are out of their present premises these will be remodelled by Ganong Brothers, Limited, who have purchased the building as the St. John branch of their confectionery manufacturing business. This will enable them to greatly increase their output. J. C. Mackintosh and Company have moved into the fine building vacated by the Ames-Holden McCready Company, Limited, who are now in their splendid new warehouse. The McClary Manufacturing Company, Limited, and the Petrie Manufacturing Company, Limited, will erect large warehouses at St. John this year.

Weather Interferes With Logging.

Mr. J. Royden Thomson has resigned from the shipping firm of William Thomson and Company to become navigating director of the Maritime Motor Car Company, Limited, whose factory is now nearing completion, and which has already secured orders for one quarter of its first year's output.

The winter season has been most unusually mild and open, with much rain and little snow, and a leading lumber operator says there has not been so unfavorable a season for logging in the last forty years, and estimates the cut of logs will in consequence be reduced fifty per cent.

The exports from this province to the United States showed a large increase last year. From the Fredericton consular district the increase was over fifty per cent., chiefly in lumber, hay and potatoes.

The town of Bathurst is now provided with a good light and power system from Tetegouche Falls, and is looking for new industries. The first will be a flour mill electrically operated for the benefit of local farmers.

◆

Although the premium on a $400 insurance policy taken out in the Gough home at Earlscourt, Toronto, wiped out by fire recently, was not paid, the Hartford Insurance Company has generously decided to pay over the full amount. The policy covered the house and contents.

"Wages in Toronto factories and stores are altogether unsatisfactory, but the dividends are large, and if you are a stockholder and do not know it the manager does. It does not matter whether you are a stockholder, shareholder or director, you ought to ask, 'Have these people received enough to live on?' If not, the dividends ought to be cut in two, and if you cannot give the a living wage you ought to get out of business." Rev. Byron H. Stauffer, at Toronto.

ECEMBER BANK STATEMENT SHOWS FEW CHANGES

Call Loans at Home and Abroad and Circulation Have Decreased—Most Accounts Exhibit Substantial Gains Over Previous Year's Figures

	Dec., 1911.	Nov., 1912.	Dec., 1912.	Year's inc. or dec.	Month's inc or dec.
Deposits on demand	$335,020,693	$376,829,372	$379,777,219	+ 13.3	+ 0.7
Deposits after notice	591,068,932	635,810,703	632,641,340	+ 7.0	— 0.4
Current loans in Canada	774,909,172	874,721,593	881,331,981	+ 13.7	+ 0.7
Current loans elsewhere	37,970,839	40,925,744	40,990,126	+ 7.0	+ 0.1
Call loans in Canada	72,640,526	70,668,521	70,655,661	— 2.7	— 0.01
Call loans elsewhere	92,106,695	111,812,858	105,952,101	+ 15.0	— 5.2
Circulation	102,037,305	115,473,098	110,048,357	+ 7.8	— 4.7

The above are the principal changes in the statement of artered banks, as at the end of December, to the Domin- Government. Demand deposits exhibit a small increase, ile those after notice again show a slight decline. Cur- nt loans in Canada have expanded as well as those else- ere. Call loans at home and abroad have decreased a tle and circulation has declined by 4.7 per cent. With e exception of the declines in call loans abroad and circu- ion, the other accounts are practically the same as in the eceding month. The following table shows the position of rrent and call loans in Canada for the past thirteen nths:—

Loans.	Current in Canada.	Call in Canada.
11—December	$774,909,172	$72,640,526
12—January	775,972,243	71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661

Indicating the steady growth in general business, cur- nt loans increased from 775 millions in December, 1911, 881 millions last month, a gain of more than 13 per cent. ring the year. The conservative attitude of the banks in tending credit is well known and such an extension, there- e, is all the more gratifying. Call loans in Canada have ried but little during the past year, the highest point be- g 75 millions in August and the lowest last month when ey were $7,655,000, a few thousand less than the preced- g month. These loans show a decrease during the year 2.7 per cent. This account throws some light upon the ll stock exchange operations of recent months. The ex- nsion of the loan account both at home and abroad for veral years past is indicated in the following table:—

ecember.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
08....	$511,808,909	$30,351,721	$43,827,771	$97,136,400
09....	592,741,812	40,072,793	63,554,222	138,505,379
10....	677,064,829	40,400,839	63,983,912	90,710,437
11....	774,909,172	37,970,839	72,640,526	92,106,695
12....	881,331,981	40,990,126	70,655,661	105,952,101

Current loans in Canada since December, 1908, have made a steady gain, increasing by 370 millions, or 72.2 per cent. The current loans abroad have fluctuated considerably but last month were 11 millions, or 35.05 per cent. greater than in 1908. Call loans in Canada have made substantial increase, the figures having changed from 43 millions four years ago to 70 millions last month. Similar loans abroad made chiefly in New York, are only 9 millions, or 9.07 per cent. greater than in 1908. They made a high record in December, 1909, when they stood at 138 millions. The following table shows the trend of the deposits accounts for the past thirteen months:—

	On demand.	After notice.
1911—December	$335,020,693	$591,068,932
1912—January	316,936,962	596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,340

Demand deposits have fluctuated during the thirteen months' period, but last month were over 13 per cent. greater than a year ago. Several banks have indicated that special deposits are frequently included in that account and their withdrawal from time to time frequently make sharp decreases in the figures. They did not, however, drop below 316 millions in the period under review. Deposits after notice have shown steady appreciation for a long period. In November, 1912, for the first time in many months, they exhibited a decrease, dropping from 640 millions to 635 millions. Last month they declined still further by 3 millions, or 0.4 per cent. This is probably accounted for by year-end purchases and payments. It will be interesting to watch whether the decline continues. The deposits accounts for the past four years show a remarkable growth, both those on demand and after notice, as the following table indicates:

December.	On demand.	After notice.	Total.
1908	$210,180,147	$420,719,218	$ 630,899,365
1909	261,268,387	499,082,024	760,350,411
1910	280,910.695	544,220,710	825,131,405
1911	335,020,693	591,068,932	926,089,625
1912	379,777,219	632,641,340	1,012,418,559

Demand deposits have grown by 169 millions, or 80.6 per cent. Those after notice have increased 202 millions, or 47.2 per cent. **Total deposits are still maintained at more than one billion dollars.** Since December, 1908, they have increased by 372 millions, or 58.2 per cent. The December bank statement is a typical "between seasons" document.

BANK OF NOVA SCOTIA

One of the oldest and most substantial of our chartered stitutions, the Bank of Nova Scotia, maintains its high sition as is indicated in its eighty-first annual report pre- nted to the shareholders last week. The profits for the ar ended December 31st, 1912, amounted to $970,544, ual to 23.28 per cent. on the average paid-up capital for e year. Deposits and other liabilities to the public, $57,- o,605, show an increase for the year of $5,964,046. Cash, nk balances, sterling exchange and other quickly available sets amount to $33,007,673, equal to 57½ per cent of lia- lities to the public. Total assets, $71,279,298, show an crease of $8,008,108.

The previous statement showed capital paid up of $3,- 4,790. Early in August, not long after the figures had ached $4,000,000, the management announced another allotment of $1,000,000. Of this, the statement just issued shows that nearly $750,000 had been paid up by December 31st.

During the year additions to the reserve fund from premiums on new stock amounted to $1,053,698.80. This and $200,000 transferred from profits bring the total up to $8,728,146, the highest proportion of reserve to capital shown by a Canadian bank.

An auditor's report is attached to the financial statement. The Bank of Nova Scotia was the first Canadian bank to submit its books and annual statements to outside audit, it having inaugurated that policy six years ago.

◆

Hon. Martin Burrell, minister of agriculture, has introduced a bill which provides that the sum of ten million dollars be appropriated for the purpose of aiding agriculture.

T. C. BOVILLE,

Deputy Minister of Finance

NEW BRUNSWICK'S LUMBER INDUSTRY

St. John's Development Proceeds—Railway's Intentions —Dock Proposals

(Special Correspondence).

St. John, N.B., January 20th.

The opening weeks of the new year have brought indications of a progressive movement for 1913. The managing director of the Atlantic Sugar Refineries, Limited, visited St. John with other officers of the company to arrange for immediate work on the foundation of the sugar refinery. The foundation work will be done by an American concern. There will be a group of seven buildings.

The announcement is made that the plans of the Grand Falls Company for the development of electrical power on a large scale, and the erection of a large pulp mill at Grand Falls, are being prepared.

At Taylor Village, near Dorchester, a crew of men are at work prospecting for manganese, and the indications are favorable.

A landscape architect has arrived at St. John from Montreal to plan a model workingman's village for the employees of the Maritime Motor Car Company, three miles from the city.

Hundred and Twenty Miles of Rail.

The St. John Valley Railway Company have given orders for a sufficient quantity of 80-pound rails to lay 120 miles between Gagetown and Centreville, passing through the city of Fredericton. These rails are to be delivered in June and July, and it is expected that this portion of the line will be nearly finished this year.

The Canadian Pacific Railway Company will increase its accommodation for cars on its property at the head of St. John Harbor, where last year it laid extensive tracks and built warehouses.

Spruce Shipped to Ontario.

A member of a large lumber concern in Boston was in the city last week placing orders, and states that he expects to buy 12,000,000 feet of New Brunswick lumber. Speaking for the lumber interests of the United States, he said they did not look for any change in the lumber tariff and did not want any.

There have been notable increases in the last year in the quantity of spruce shipped from Northern New Brunswick to Montreal, and a number of cities in Ontario, Toronto included. This market has been of great value at a time when ocean freights for lumber were practically prohibitive.

The present winter has been almost the mildest on record, and quite the worst for lumbering operations in the history of the trade. There has been more water in the swamps, and the absence of snow has greatly impeded work, and the cut of logs will, therefore, be very much smaller than usual.

May Extend Drydock.

The Dominion Coal Company made plans last year for the extension of their plant for handling coal at St. John. It is stated that this work will be carried out this year.

Norton Griffiths Company, Limited, are asking some financial concessions from the city and province with a view to making the new drydock 1,150 feet long instead of 900 feet, and offer in return to reclaim a site for steel works and shipbuilding plant, and to bring about the establishment of these industries.

CANADA'S PULP RESOURCES

An attractive and practical magazine dealing with one of Canada's largest natural industries is the Pulp and Paper Magazine. The first number of a new volume contains many valuable articles relative to the development of the pulp, paper and allied interests, among them being, The Year Among the Mills; Canada's Pulp Wood Resources; The Workmen's Compensation Act (Quebec); Preservation of Paper, etc.

An illustrated article on Price Bros. & Company, Limited, Kenogami paper mills shows the possibilities of large enterprises in this particular branch of industry.

This journal is now published semi-monthly, Mr. A. Gordon McIntyre, B.A., B.Sc., being editor and Mr. F. Page Wilson associate editor, and the publishers are the Industrial and Educational Press, Limited, Toronto.

A branch of the Quebec Bank has been opened at St. Johns, N.B., under the management of Mr. W. C. Hazen.

HALIFAX IS GAINING TRADE

Nova Scotia's Numerous Resources — Shipping — Commerce Generally

(Special correspondence.)

Halifax, N.S., January 21.

The year just closed has been one of large increases in trade statistics at the port of Halifax. The exports show an increase of $3,311,251—double of the increase shown at Montreal, while St. John and Quebec show a decrease for the same period. The total exports were $15,467,270 for 1912, as compared with $12,156,019 for 1911. When it is understood that of the 1912 exports, $3,927,512 only, was made up of goods emanating outside the province of Nova Scotia, it will convey some idea of the strides the province is making in her manufactures and natural products for export; Halifax, unfortunately, at the present time, has no direct rail connection with the West, but is dependent on a wonderfully rich province in natural resources for her yearly increase in trade.

Fish is the largest item of export; including lobsters, the total sum from this port was $5,242,070—a slight decrease when compared with 1911. Apples showed a large increase—the exports amounted in value to $3,419,050; other farm products totalled $2,069,271 in value; manufactures in miscellaneous articles, including the output of mines, but not coal, valued $2,595,645; coal, $149,023; lumber and manufactures thereof, $1,281,753; animals and animal products, $710,457—in all, $15,467,270.

Imports and Custom Receipts.

In imports, Halifax also made considerable gain—during 1912 they totalled $11,512,546, as compared with $9,836,974—an increase of $1,675,572. The principal items of import, and their values, were:—Sugar, $3,427,091; molasses, $321,253; cotton and manufactures thereof, $161,058; fruits, $195,514; gun powder and other explosives, $725,832.

A very marked increase in customs receipts was made for the port; during 1911 they totalled $1,774,986, as compared with $2,117,609—an increase of $342,623. This increase is almost double the increase of any other eastern port, outside of Montreal.

The greatest gain was in shipping tonnage; during 1912, it totalled 3,111,535, as compared with 2,479,029 in 1911—an increase of 632,505. Some idea of this very great increase will be gained when it is known that the increase for Montreal was 115,244, while two other prominent eastern ports showed a decrease.

Conditions Indicate Growth.

Both the wholesale and retail trade of the city report a large growth in trade two large factories are increasing their plants to cope with their increased orders.

The Acadia Sugar Refinery is building one of the largest sugar refineries in Canada, and will represent an outlay of upwards of $3,000,000; the North Atlantic Fisheries, Limited, are having plans completed for an increased capacity—three times their present. Two new industries are negotiating to locate in Halifax.

Buildings, &c., involving many millions, including the new terminals, which represent an outlay of some $30,000,000, and improvements and increases to the present terminals of upwards of $3,000,000, are proposed.

Two new lines of steamers will make Halifax their port of call this year.

PRICES SLIGHTLY UPWARD

The Department's index number of wholesale prices rose slightly during December, standing at 135.2 as compared with 134.8 in November, and 129.4 in December, 1911. Commodities advanced slightly in nearly all groups, the only decline of importance being in grains and fodders. In retail prices the upward movement was not as strong as during the past few months, nor at the corresponding period of 1911, meats and dairy products being steadier.

The Canadian Pacific Railway during 1912 hauled more grain than any single railroad in America.

The amount in the sinking fund of St. John, N.B., being at present $1,046,580.02 for the redemption of the city debt, this amount is in excess of all legal requirements; $102,485 net cash received from disposal of city properties was added to this fund during the year 1912. The total bonded indebtedness at close of 1912 being $5,028,705.51 as against $4,999,105.51, an increase of $29,600.

FIRE UNDERWRITERS' LABORATORIES CRITICIZED

British Trade Commissioner in Canada Files Report With the Imperial Government—Shows How Matters Work to the Disadvantage of British Manufacturer

An interesting report on the Underwriters' Laboratories f Chicago has been made to the Imperial Board of Trade y Mr. C. Hamilton Wickes, the British Trade Commissioner n Canada. After dealing at length with its formation and cope of operation, Mr. Wickes discusses its effect on the importation of British manufactures into Canada.

"The experimental work carried out by the Laboratories t Chicago," he says, "their method of drawing up reports nd labelling approved articles, followed by inspection, aleady dealt with, is no doubt advantageous, not only to the ire insurance companies, but also to the American manufacurer carrying on business in the United States. I would lso be prepared to concede that the Underwriters' Laboraories, Chicago, are desirous of not placing difficulties in the vay of the foreign manufacturer (which includes British) utilizng the facilities offered by them. It is nevertheless an inolerable state of affairs that the British manufacturers, as vell as the Canadian, should be compelled to send samples nd particulars of their goods to a foreign corporation, to be approved or rejected,' before they are able or permitted to lo business in a portion of the British Empire, namely, the Dominion of Canada.

Operate Against British Manufacturer.

"I will briefly outline some of the more salient points vhich operate to the disadvantage of the British manufacturer lesiring to do business in the Dominion:—

"1. The British manufacturer has to incur the expense of acking and freighting the articles forwarded to the Laboraories at Chicago, with the consequent delay. Whether the article s approved or otherwise, he is still unable to ship the goods o the Dominion, as no means exist of examination and abelling at the factory in the United Kingdom, which the Laboratories properly insist on.

"The suggestion has been put forward that such goods hipped to Canada might be examined and labelled, as the Laboratories require, at 'the port of discharge' in the Dominion. The objection to this course is that besides the exense of maintaining a qualified inspector, there is a real risk ncurred of the goods not being passed (rightly or wrongly), vith consequent loss to the British shipper, in all probability ollowed by the return of the goods to the United Kingdom, vith the great expense thereby entailed.

"2. The Laboratories are officered by consulting and other ngineers expert in regard to various lines, as has been hown. It may be conceded that they exercise a wise and iscriminating care in the carrying out of their duties in reard to American manufactures, but when it comes to experimenting and testing articles of British or European manufacture devised on different lines and manufactured to tandards other than the rules, requirements or standards laid own by the National Fire Prevention Association, under vhich the Laboratories carry out their work, the technical taff, without any experience in regard to the reliability of he article submitted in actual use, not infrequently find themelves obliged to withhold their authorization. To this the British manufacturer very properly objects, and he feels the nore indignant when he is aware that his manufactures in very way meet the more stringent requirements in other parts f the world. I think he should be supported in this objecion unless, indeed, we are prepared to concede that the United States engineer is the repository of all the wisdom of he world in regard to every class of article, appliance, system r device dealing with fire hazard, which has been, or is to e, invented in the world.

As To System of Inspection.

"3. The system of inspection amounts, in practice, to the nspectors appointed seeing that certain labels or tabs are apended to articles. In time, no doubt, they become more or ess experienced, but the idea is to throw the responsibility of he real inspection of the article on the Laboratories at Chiago. The inspector is, apparently, expected to work on rulef-thumb lines. He is, I gather, not expected to do otherwise han see that labels or tabs of the Underwriters' Laboratories, Chicago, are properly attached to the article, device or system o be installed in the various buildings.

"The tendency is for this attitude to become accentuated; pressure has been, and is being, exercised by the Laboratories n the Canadian Fire Underwriters' Association not to allow ny article to be installed, within their jurisdiction, without he Laboratories' label or tab. In Winnipeg the use of the Laboratories' label has been made the rule by the Western Canadian Fire Underwriters' Association. In Montreal they have been, I am informed, not quite so strict up to the present, but Mr. Hadrill, secretary of the Canadian Fire Underwriters' Association, confesses that their inclination is to draw the line tighter and only permit goods with the label or tab of the Underwriters' Laboratories, Chicago, to be utilized.

"I might mention in this connection that complaints, difficult to prove or disprove, are made by British manufacturers or their representatives of prejudice on the part of inspectors against British goods, and of the necessity, as they allege, of gaining the inspector's goodwill by means of a douceur in order to facilitate the passing of material submitted. This difficulty is probably in respect of articles without the customary Laboratories' label or tab.

Guidance of Inspector.

"I would refer to what has been stated before, and that is, that the inspectors' skill and judgment is called for in regard to the application of the rules and requirements, e.g., the workmanship of the wireman or electrician generally regarding the design and lay-out of the installation, taking into consideration the particular kind of building in which the work is being carried out.

"I would also repeat that I understand there are no regulations to guide the inspector with reference to "danger to life" in the event of fire breaking out; in other words, that the wiring and other matters which he inspects are looked at purely and only from the point of view of fire hazard to the building, without regard to the matter of hazard against life (shock fatality, and so forth).

"4. It will be readily recognized in view of the manufacturing and other Mercantile Associations which are 'active' members of the National Fire Prevention Association and the American composition of the council, and the experience practically based on American practice, so far as I know it, of the technical staff of the Laboratories, that the introduction of new methods or fresh standards might meet with considerable opposition, and, in addition, there would probably be a natural reluctance to give a definite finding in respect of articles which may be practically unknown either in respect of their form or in regard to their reliability.

Regarding Discrimination.

"5. It should be mentioned that particulars are filed in this office of instances in which the parties alleged discrimination and unfair treatment, in respect of both electrical and other classes of goods submitted to the Laboratories. Personally, I find it hard to believe that any discrimination has been shown beyond what may be easily explained by the composition of the Laboratories, the council and the associations under whose direction the work is carried on. An incident which happened in Montreal in August last illustrates another phase of the difficulty met with by British goods sent to Canada. A sample of wire was sent to Chief Electrical Inspector in Montreal, and I have a copy of his letter in which he stated, "the samples of wires enclosed are acceptable." In Toronto the following month, in regard to the same article, I have a copy of the original letter from the Chief Electrical Inspector, in which he writes as follows:—We beg to advise that neither of the two pieces comply with new code requirements. Of course, in the latter instance, the reason was that the wires were not labelled and tabbed with Laboratory labels.

"The above is a sample of a number of similar instances which it can be readily understood cause considerable heartburning to the parties injured, particularly where the goods are of high class, and, in fact, manufactured to a much higher standard than is required by the Laboratories themselves. Nevertheless, the inspector must reject them in many parts of Canada if they have not evidence of the approval of the Underwriters' Laboratories, Chicago.

Insurance Approvals for Canada.

"I will close my remarks on this heading by an extract from a letter from Mr. W. C. Robinson, chief engineer, after his visit to England, to Mr. Merrill, manager of the Underwriters' Laboratories, Chicago:—"As a result of all my conferences in England with manufacturers, insurance men, and others, I am of the belief that in a considerable number of cases English manufacturers will be likely to object to sending their products to any authority in the United States in order to secure insurance approvals for Canada."

"The chief engineer of the Underwriters' Laboratories, Chicago, was in England as recently as August-September last, and saw the managers and representatives of a number of British insurance companies while staying in London—Mr. Robinson having also visited Manchester, Liverpool and Birmingham, in accordance with Mr. Merrill's desire that he should endeavor to ascertain the attitude of English manufacturers towards the Underwriters' Laboratories. I give the following extract as stated above, in London:—

"The following was presented for the consideration of the insurance managers, and was discussed to some extent:—

" '1. The possible desirability of in some way establishing the Underwriters' Laboratories in England in order to facilitate its business with English manufacturers and avoid misunderstandings relative to the approval of goods shipped into the United States and Canada.

" '2. The question of what connections could be made and the best method for the conduct of the business in case it was considered desirable to establish the Underwriters' Laboratories in England.'

"I am of the opinion that there is a genuine desire on this side, both by the Canadian Fire Underwriters' Association and the Underwriters' Laboratories, Chicago, to remove any cause for complaint which the British manufacturer labors under, but the insurance companies are not going (I think rightly) to permit uninspected goods to enter and be used from the United Kingdom or elsewhere, because they consider the risk is too great; an alternative method, therefore, safeguarding the insurance companies operating in Canada, should be evolved.

Some Suggested Solutions.

"The solution might be by—

"1. A laboratory in Canada on the lines of the Underwriters' Laboratories, Chicago.

"2. A purely British laboratory.

"3. A laboratory in England, to be practically an offshoot of the Underwriters' Laboratories, Chicago—run on similar lines, utilizing the experience gained at Chicago, employing equally competent but British consulting and technical engineers. 'The article,' approved by label or tab, to be accepted by both the British and Chicago Laboratories. The same system of careful experiment and tests to be followed by careful consideration of reports before they are issued, and the adoption of the same or a similar system of 'labelling and tabs,' accompanied by some similar system of inspection.

Inaugurate a Laboratory in England.

"I am of the opinion that the last, No. 3, would be to the advantage of the British manufacturer (No. 1 is open to many of the objections raised against the Chicago Laboratories); it would throw open to our British manufacturers not only the Canadian but the American market, as the labels or tabs would carry equal consideration by inspectors throughout North America. Moreover, the policy should be extended, I believe, and made operative in Australia, New Zealand, South Africa, India—in fact, throughout the Empire, wherever British insurance companies operate and are in a position to insist on its adoption.

"I venture to believe that, if our leading manufacturers are wise, they will join with the insurance companies and contribute towards the initial cost of starting such a laboratory and by annual subscription assist towards its upkeep. An understanding between our manufacturers on the one hand, and the insurance companies on the other, should lead to the happiest results. It should bring about the extension of the trade to British manufacturers of articles, appliances, materials, devices or systems dealing with fire hazard in the oversea markets, and be of advantage to British insurance companies in the direction of reducing the risks of 'fire hazard.' "

STEEL MERGER A MYTH

The reported steel merger embracing United States and Canadian plants is denied from all quarters. Mr. J. H. Plummer told The Monetary Times last week that he knows nothing whatever about it. This week Mr. C. S. Wilcox, president of the Steel Company of Canada, Limited, says that his company has had no negotiations on the matter with any syndicate, individual or company. He knows nothing about the source of information which has appeared in the daily press.

Mr. C. M. Schwab, who was supposed to be the guiding spirit of the matter, has just returned from Europe, and says:—"There is nothing in that report. It is true, I have been approached in regard to consolidating the Bethlehem plant with other concerns, but I have not seriously entered into any such proposition. My time and thoughts have been engrossed with obtaining a property in Chile in which I have been successful."

FURTHER IMPROVEMENT IN STRIKE RECORD

There was a marked decrease in the number of labor disputes in existence in Canada during December as compared with the preceding month. The Department of Labor's record of strikes and lockouts shows there were thirteen disputes in December, and while this number is greater by five than that of the corresponding period last year it represents only about half as many as were in existence in November, when twenty-five were reported to the Department. There was also an improvement over November conditions from the standpoint of working-days lost, about 65,200 being the approximate number for December as compared with about 68,200 for November. The important disputes in existence were those of coal-miners on Vancouver Island, miners at Porcupine, and freight clerks, etc., on the Canadian Pacific Railway, all of which commenced before December and continued throughout that month. Two disputes only commenced during the last month of the year, neither of which involved a great number of employees. Three disputes of the month were among classes coming under the jurisdiction of the Industrial Disputes Investigation Act compared with four such disputes during November and one during December, 1911. About 3,500 employees were affected by disputes in December, 1912, compared with 3,900 in November, 1912.

MUTUAL AND CASH MUTUAL FIRE COMPANIES DOING BUSINESS IN QUEBEC PROVINCE 1911

*Not stated. †Includes $2,785, losses of previous year. ‡Includes $9,822 net losses of previous years. ¶Includes $15 losses of previous year. (a) Includes $4,269 losses of previous year. (b) Includes $800 losses of previous years.

The above table shows details of the operations of insurance companies transacting business in Quebec province in 1911, the latest official figures available. The Missisquoi and Rouville and the Stanstead and Sherbrooke have large holdings of high class securities among their assets. The figures show that on December 31, 1911, the Missisquoi and Rouville held such investments of a market value of $108,821 and the Stanstead and Sherbrooke similar securities with a market value of $148,450. The purely mutual companies are generally satisfied to look for reserves to unassessed notes. December 31, 1911, of their total assets of $1,060,430 (excluding the two companies mentioned), $890,191 is represented by unassessed notes. The tangible assets of some $160,000 are offset by liabilities amounting to $115,5[illegible]4

The Fourteenth Annual Statement

OF

The NATIONAL LIFE

ASSURANCE COMPANY OF CANADA

Submitted at the Annual Meeting of the Company, held on the 8th day of January, 1913.

ELIAS ROGERS, *President*

HON. J. J. FOY,
WILLIAM STONE,
ALBERT J. RALSTON, } *Vice-Presidents*

ALBERT J. RALSTON, *Managing Director*

F. SPARLING, *Secretary*

ALBERT A. MACDONALD, *Medical Referee*

The outstanding features of this statement are as follows:—

1. The total cash income was ....$ 691,297.50
which is an increase of over $100,000.00 by way of comparison with the preceding year, 1911.

2. Applications for new assurance received, books closed 14th December, 1912 .... 7,359,950.00
Policies issued and placed total 6,318,123.00

3. The total volume of business in force on 9th day of January, 1913 ....18,604,515.00
which is an increase in business in force over 1911 of over $4,200,000.00.

4. The mortality experience for the year was 60,727.00
which is in round numbers $2,000 less than in 1911.

5. The interest earnings, plus profits on sale of securities, was 104,020.48

6. The Company received from shareholders on account of unpaid capital stock $2.50 per share, making a total of $25,000 received from shareholders on the uncalled portion of their shares, and this brings the paid-up capital to 250,000.00
as against $225,000.00 at the end of last year.

7. The total assets of the Company, including uncalled capital is 2,896,899.00

8. The surplus to policyholders is 458,323.31

The surplus to policyholders after providing for the following:—

Special reserve in 1911 voluntarily maintained	$35,000.00	
Special reserve in 1912 voluntarily maintained	10,000.00	
Written off office furniture and equipment	11,561.08	
Agents' ledger accounts	7,741.85	
Cancelled premium notes	3,706.90	
The net surplus after these deductions is		390,253.48

The most outstanding feature of all is the way the Company's funds have been invested, for covering a period of fourteen years the Company has not had a single dollar of interest or principal overdue on its invested funds; further, it has never lost a single dollar of interest or principal on any of its invested funds.

From an actuarial point of view, the following should be of interest:—

ALBERT J. RALSTON, ESQ.
Managing Director, The National Life Assurance Co. of Canada,
TORONTO.

NEW YORK, 4TH JANY., 1913.

DEAR SIR,

I have examined your Statement as of December 31st in particular (1) your mortality rate, (2) your interest earnings, (3) your expenses, and the growth of your surplus, which reflects the effects of these three.

Your Mortality continues to show the same favorable results which have characterized your Company for many years, and your selection of risks is evidently of the very best. Your Interest rate, derived from high grade securities, continues excellent, and the increase in your expenses is to be attributed to the large volume of new business written (nearly $3,000,000.00 more than in any previous year), which will produce surplus in years to come, especially as your renewal charges against such business are abnormally low.

Your gain in surplus of $50,000.00 shows that the Company is making progress in soundness, as well as in size, so that policyholders and shareholders alike should be pleased with the Statement now submitted.

Very truly yours,

(Signed) HENRY MOIR, F.I.A., F.F.A., F.A.S.

THE PRUDENTIAL LIFE INSURANCE COMPANY

Head Office - - WINNIPEG

Fifth Annual Report, for the Year Ending 31st December, 1912

NEW BUSINESS SECURED FOR YEAR......	**$2,731,832.00**
LEAVING TOTAL BUSINESS IN FORCE	**7,576,631.00**
SUBJECT TO ANNUAL PREMIUM OF	**244,165.45**
INCREASE IN ASSETS FOR YEAR	**133,141.23**

The Fifth Annual Meeting of the Prudential Life Insurance Company was held at the Head Office, Keewayden Building, Winnipeg, on Thursday, the 16th January, 1913.

There was a large attendance of Shareholders and Policyholders.

Mr. Thos. D. Robinson, the President, occupied the Chair.

After the usual resolutions, the Managing Director, Mr. G. H. Miner, presented the Financial Statement.

DIRECTORS' REPORT.

Authorized Capital	$1,000,000.00
Capital Subscribed	1,000,000.00
Capital Paid Up	100,000.00

Receipts.

Cash in Banks and on Hand......		50,198.05	
			$ 549,815.10

Liabilities.

Premiums Paid in Advance	$ 954.90	
Claims Awaiting Proof	2,000.00	
Instalment Claims	6,429.65	
Real Estate, balance owing, due 24th April, 1914	52,046.58	
Suspense Premiums	708.98	
Reserve on Outstanding Insurance as per Actuary's Certificate based on the Hm. 3½% table with deductions on Dominion Government standard	302,508.00	
		$ 364,648.11
Surplus to Policyholders..		$ 185,166.99
Uncalled Guarantee Fund		900,000.00
Total Guarantee to Policyholders, excluding Reserve of $302,508.00.		$1,085,166.99

AUDITOR'S CERTIFICATE.

We have audited the accounts of The Prudential Life Insurance Company for the year ending December 31st, 1912, and certify the surplus as shown on the foregoing Statement of Assets and Liabilities, together with the Uncalled Guarantee Fund, to exhibit a correct view of the total guarantee to Policyholders at that date.

The Cash on Hand and in Banks has been verified, and the Securities examined and found in order.

(Signed) VERNON PICKUP & COMPANY,
Chartered Accountants (Eng.), Auditors.
Winnipeg, January 11th, 1913.

To the President and Board of Directors of the Prudential Life Insurance Company.

I herewith beg to report that I have valued the insurance in force of the Company at the 31st December, 1912, according to the Hm. Tables of Mortality, with interest at 3½%, and find the liability thereunder as follows:—

	Amount.	Hm. 3½% Reserve.
Insurance in force	$7,576,631	$349,041
Deduction allowed by Section No. 42 sub-section No. 3 of Dominion Act, 1910		44,907
		$304,134
Less reinsured policies	318,000	1,626
Net amount at risk	$7,258,631	
Net Reserve Liability		$302,508

(Signed) F. D. MACORQUODALE,
Actuary.

The President, Thos. D. Robinson, in moving the adoption of the Report, said:—

Your Directors have much pleasure in presenting the Report and Financial Statement of the Company for the year ending 31st December, 1912, which has been duly certified to by the Auditors. It will be noted that a splendid increase over the preceding year is shown in every Department.

INCREASE IN BUSINESS.

Great care has been exercised in the consideration of applications for insurance, and no special efforts were, this year, made to write big business, yet the net increase in business in force after allowing for rejections, lapses and terminations, amounted to $1,282,167.00, making the total business in force $7,576,631.00.

PREMIUM INCOME.

The business now in force is subject to an annua premium of $244,165.45, as compared with $189,756.95 a yea ago, representing an increase for the year of $54,408.50. The class of business on which this increase was secured is very satisfactory, as the average premium on the business written during 1912 amounted to $35.74 per thousand, while the average on the total business in force is $32.23, as compared with $30.15 a year ago.

DEATH CLAIMS.

The Company has been exceptionally fortunate in the low mortality. The expectancy during the year 1912 should have entailed claims amounting to $34,908.56, while the actua calls on the Company were $2,000.00. Our statement wil show that we paid $7,326.40 during the year. The greate percentage of these claims, however, were then waiting adjustment, and shown in our liability of 31st December, 1911 The total claims that have been presented to the Company since its organization amount to $33,645.05. This speaks well fo the care exercised by our Agents, Actuarial and Medical Department, as the selection of risks has been most carefully looked after, and quality has not been sacrificed in our effort to secure business.

ASSETS AND SURPLUS.

During the year our assets have grown from $416,07 to $540,815.10, making an increase of $133,141.23. Ou surplus to policyholders now amounts to $185,166.99, which together with the reserve of $302,508.00 set aside for thei protection, brings the total protection up to the substantial igure of $487,674.99. In addition to this large amount, which is held by the Company in tangible assets, we have an Uncalled Guarantee Fund of the shareholders amounting to $900,000.00, making the total guarantee to policyholders $1,387,674.99.

RESERVE.

The Reserve, which is based on the Hm. 3½% Table, with deductions as per Dominion Government Standard, amounts to $302,508.00, as compared with $201,054.00 on 31st December, 1911, making a net increase for the year of $101,454.00.

RECEIPTS AND INVESTMENTS.

In the foregoing paragraph we state that our Reserve increased $101,454.00, and we are pleased to inform you that he net increase in our investments for the year amounts to $103,506.42. Our income for the year 1912 amounted to $263,276.16, an increase over the year 1911 of $68,131.28. Investments, especially on farm lands, are made to yield the Company a rate of interest of 8%. We have a small percentage of School Debentures that yield from 6% to 6½%. The average ate of interest, however, on the mortgages, stocks and bonds s considerably over 7%. The interest and repayments, we are pleased to say, have been promptly met, which clearly shows that the investments have been carefully selected.

HOME OFFICE PROPERTY.

Your Directors have considered it advisable to look into he future, and were especially fortunate in securing a property on Garry Street in Winnipeg, which is ultimately intended to be the site of the Head Office of the Company. The building is under lease until the 1st of March, 1915, at a rent sufficient to net the Company 6% on its investment. We have been asked for a further extension of the lease for five years t a rental to net the Company 10% on its investment. The Directors, however, considered it advisable not to enter into such a long contract, as the property may be required for our own use at the expiration of the present lease.

DIVIDEND.

In view of the favorable financial position the Company has now attained, your Directors, after careful consideration, have decided to recommend the declaring of a dividend of % upon the paid-up Capital.

DOMINION CHARTER.

Your Directors have found it advisable to take steps for securing an Act of Incorporation from the Dominion Government, with an authorized capital of $2,000,000.00. This we expect to attain within the next two months, after which it is proposed to carry on the Company's business under a Dominion Charter and License.

The Vice-President, C. F. P. Conybeare, K.C., in seconding the resolution adopting the Report of the Directors, said:

The Statement presented by the President on behalf of the Directors shows that the financial position of the Company s a healthy one. Our assets are in tangible shape, nearly $375,000.00, including the real estate recently purchased, and without considering notes given for premiums on insurance being interest producing. I am pleased to say that no Director of the Company is now indebted to it on stock notes.

The management has not considered it wise during the past year to make any special effort to write a large volume of business. In past years it was considered advisable to get business rapidly, for the purpose of building up our income from premiums and investments. The success of that policy s evidenced by the fact that, allowing for 308 working days n the year, our daily income for 1912 averaged $854.00.

To write insurance entails not only a large outlay of money, but also responsibility and the transfer of expenditures from the credit to the debit side of the balance sheet to form a Reserve. These expenditures must be made out of the income, and, as long as our total income was expended n writing new business, there could be no dividend paid out. Whilst no special effort was made, our insurance in force has been substantially increased during the past year, and our premium income for 1913 should be larger by approximately $55,000.00 than it was in 1912. In connection with this premium income, the class of business written is worthy of notice. Our average premium on new business is $35.74 per thousand, while the average on all business in force is $32.23, a showing of which any Company might be proud.

The President has referred to our application for a Dominion Act. In the past we should have experienced great difficulty in complying with the Dominion requirements and would have been unable to progress as rapidly as we have done had we been working under their restrictions. The Company has now, however, attained such a position that the Dominion regulations will neither handicap nor impede it; but the obtaining of the Dominion License will remove a prejudice which has frequently been urged against us to our disadvantage in the past.

In speaking to the motion, Mr. N. T. MacMillan said:

It certainly affords me a great deal of pleasure to attend this meeting and as one of the Directors having a very small part in the administration of its affairs, to be able to present a statement such as we present this morning.

It has been the policy of this Company, and the Directors have realized, that their first duty was to the policyholders. While we are administrating the affairs of the Company for the shareholders, still we must consider that we are administering a sacred trust. Every dollar that is invested in the Company by way of premium on a policy is money that we have to look upon as sacred—money that goes to support widows and orphans should anything happen to the breadwinner.

I can remember well, when I was a boy, reference being made to a certain man whom the people spoke of as "only an insurance agent." Insurance has now been placed on a different basis, and the insurance business is, I think, one of the most important callings there is in all the different lines of our business activities. It is looked upon to-day, in many quarters, not so much as a protection (although it is a great protection), but as an investment, and I, personally, take that ground.

In Canada to-day, and especially Western Canada, there are so many opportunities for making money and where a great many people carry heavy liabilities, that Life Insurance becomes an absolute necessity. While a man has his health, he is, in most cases, able to provide for his Life Insurance premium, and should anything happen, the most important thing to his estate is to have ready cash.

I have also said that Insurance is a protection. I have in mind a case which happened here recently. A young man had reluctantly, and at the strong solicitation of the canvasser, taken out two insurance policies, one for $1,500.00 and one for $2,000.00, on which he paid the first premium. This young man, apparently in the best of health, dropped dead on New Year's day. He had a wife, a small boy and a little girl, who would have been left utterly destitute, if it had not been for this protection.

I would feel, if I were a life insurance agent, that every time I wrote a man I was doing something for posterity, for the widows and orphans. I believe in insurance myself and I carry considerable life insurance, amounting to $100,000, $35,000 of which I have placed with our own Company since my connection with it. I think what we ought to do is always to bring the feature of the investment end of insurance before the man you are selling it to. He is sure of a good investment, the Company takes all risk, and the man that is being insured takes none.

I intend my remarks to be more to the managers, agents and office force; the Directors have nothing to direct unless the business is brought in.

We are very sorry that during the last year, Mr. Miner's health was not of the best, and the Directors insisted that he take a holiday and recuperate, knowing that it was absolutely necessary, under the doctor's orders, for Mr. Miner to have a complete rest.

We show this year a splendid increase in business of $1,282,167. Now, gentlemen, that shows that there is an organization connected with this Company, not only in the Agency Force in the country and on the outside, but also in the office. It is so organized that it runs automatically. That is a great thing in any business. We must give Mr. Miner credit for having built up such a loyal and efficient organization under his direction, to be able to produce such a gratifying statement as we have before us to-day.

I must pay a compliment to the Agency Force for the class of business which they have produced. The premium income, as our President pointed out, was something over $35.74 per thousand. That, gentlemen, speaks well of the ability of our agents. They have produced a splendid class of business.

Further than that, in regard to our Death Claims, if we had experienced the deaths called for by the mortality table we would have paid this year $35,000.00. Instead, our total claims were $2,000.00. I think this is a remarkable showing. Of course, we can never tell when there might be a cycle of events, which would raise our death claims. I think that with the hearty co-operation of the Directors and Shareholders of the Company, we can make this young Company of ours one which we will all feel proud to be connected with. The best way to do this is, as I said, by hearty co-operation. "In union there is strength." If you shareholders or your friends wish to take insurance, take it in the Prudential Life—by so doing you are bringing "grist to your own mill." If we all work with hearty co-operation, from the Manager down through the office staff, the Agency Force, the shareholders, to the policyholders, we will be able to show an even better increase than we have this year.

The Directors have unanimously agreed on a dividend this year. As I said at the outset, we always feel that in the first place, we must protect the policyholders, but the shareholders, when we have profits at our disposal, such as we have now, are entitled to a return on their investment.

The records of the Company will show that the Directors have given their time to the administration of its affairs as though it were their sole business. And whoever you may elect as Directors for the ensuing year, will, I am sure, carry out the same policy.

The following Directors were unanimously elected for the ensuing year:—Thos. D. Robinson, Esq., Winnipeg; C. F. P. Conybeare, Esq., K.C., Lethbridge, Alta.; C. W. Trick, Esq., M.D., Winnipeg; J. T. Huggard, Esq., Winnipeg; N. T. MacMillan, Esq., Winnipeg; Frederick W. Law, Esq., Victoria, B.C.; C. H. Miner, Esq., Winnipeg; W. E. Seaborn, Esq., Moose Jaw, Sask.; W. J. Boyd, Esq., Winnipeg; W. L. Parrish, Esq., Winnipeg.

The meeting then adjourned.

At a subsequent meeting of the Directors, the following officers were elected:—President, Thos. D. Robinson; Vice-Presidents, C. F. P. Conybeare, K.C.; N. T. MacMillan; Managing Director, G. H. Miner; Counsel, J. T. Huggard; Actuary, F. D. Macorquodale; Secretary, C. E. Bowmaker.

STATE WORKMEN'S COMPENSATION

Bill Introduced in Albany Legislature — Act Made Elective in Form

A workmen's compensation bill has been introduced in both houses of the New York Legislature by Senator Foley and Assemblyman Walker. The measure represents the result of an expert study of the subject made by the State Insurance Department. Superintendent of Insurance William T. Emmet consulted a number of authorities and legislators in preparation of the bill. Among those who participated in the discussions at the conferences held—in addition to Superintendent of Insurance Emmet and Deputy Superintendent Hoey—were Senators Wagner, Foley, Blauvelt, Assemblyman Walker and H. B. Bradbury, a well-known authority on the subject.

To Meet Objections.

The act was made elective in form in order to meet the objections raised by the Court of Appeals to the compulsory compensation act. Every employer and employee is brought presumptively within the operation of the act unless they have given notice to the Insurance Department of their intention to reject its provisions. Experience has shown that this method brings in a number of people who are in doubt and cannot reach a decision in the matter. Employers who decide to come within the act are required to either insure their liability for compensation with stock or mutual insurance companies or give satisfactory proof to the Insurance Department that they are financially solvent and will be able to meet their obligations.

Lifetime of the Employee.

The compensation schedule contemplates payments, in cases of total and permanent disability, during the entire lifetime of the employee. In fatal cases the schedule of compensation is graded according to the number of dependents. Non-resident aliens are also covered by the act. The act gives the Superintendent of Insurance the authority to establish a bureau within the department, consisting of a board of examiners for the purpose of passing upon and approving each settlement. In disputed claims the litigants have the alternative of either submitting their cases to courts of law or having them decided by the the board of examiners in the Insurance Department. Employers who refuse to come under the act are deprived of the three common law defences.

Another Feature of Act.

Another feature of the act which is regarded as particularly important is the provision covering cases where employers have not given any notice of intention to reject the compensation act and who have also failed to insure under the plans provided by the act. As against such employers, the claimants have an election of remedies—that is, they may either sue under the common law or under the compensation act. It is believed that this method will be effective in compelling the employers to insure their liability. The Insurance Department is also given the authority to approve premium rates charged by stock and mutual casualty companies for compensation insurance. This provision will be effective in maintaining the solvency of the insurance corporations and in assuring an economical administration of the funds collected for compensation purposes.

Atlantic Sugar Refineries to Produce 2,500 Barrels a Day

PROPOSED NEW SUGAR REFINERY AT ST. JOHN, N.B.

Great interest is being shown in the progress being made by the new Atlantic Sugar Refineries, Limited, the announcement of the formation of which was made a short time ago. This is the plant which Messrs. D. Lorne McGibbon and Mr. F. H. Anson contemplate operating at St. John, N.B., and which will be by all odds the finest and most up-to-date sugar refinery in Canada. Despatches from St. John last week reported the completion of arrangements with the Government and the city authorities. The promoters of the scheme are now in a position to go right ahead with the preliminary plans of the various structures.

It is proposed to erect a refinery to cost $1,750,000, with a capacity of 2,000 to 2,500 barrels a day. The company has an ideal site. The property fronts on the harbor on three sides. It will have the advantage of enabling vessels to go alongside the refinery and unload automatically, which will result in a great saving of cartage and handling charges. The same applies to the delivery of coal and other essentials. The company will be able to get its raw sugar by water from the West Indies all the year, despite the seasons. In regard to shipping facilities to consumptive points in Canada, the company will have the services of four railways, at advantageous rates. The through rates from St. John are governed by the Boston rates, so that the rates for all points to Winnipeg (with the single exception of a radius of 15 miles around Montreal) are in favor of St. John as against Montreal as a shipping centre. It is pointed out by the promoters that as no sugar refinery has been built in the past 20 or 25 years, there has been a vast improvement in the machinery applicable to the process of refining. It is to be expected, therefore, that the new company will have the most modern plant on the continent. Arrangements have been made for the services of an expert sugar refiner in the United States to build the refinery, equip it and put it into working operation. It is also expected that the St. John location will enable the company to handle an export business. The refinery will be built and equipped under the supervision of one of the leading refinery experts on the continent. The designer has to his credit the large refineries of the Arbuckle, Warner and Havemeyer companies.

It is interesting to note the consumption of sugar in Canada is 7,000 to 8,000 barrels per day, considerable of it being imported. As it will be more than a year before the new plant is producing, it is reasonable to suppose that the increased consumption will easily take care of the comparatively small increase in production, so that the future of the company is well assured.

Messrs. N. B. Stark & Company, of Montreal, and Murray, Mather & Company, of Toronto, have had charge of the financing of the new refinery, and as there was considerable demand for the securities, it took but a short time to get the physical plans for the property under way, and this despite the fact that the market for both old and new securities has been particularly heavy. The responsibility of N. B. Stark & Company does not cease, however, with the successful flotation of the new issue, and they are following up the development plans with a great deal of care.

NOTE: When the unmatured calls on subscribed capital are paid, the Paid Up Capital will be $5,000,000 and the Reserve Fund $9,100,000. The average Paid Up Capital for 1912 is $4,168,126.

H. A. RICHARDSON, General Manager.

AUDITOR'S REPORT

We hereby certify that we have verified by actual count the cash on hand at Halifax, St. John (Prince William Street), Montreal, Toronto (King Street), Winnipeg, Vancouver (Hastings Street), Chicago and Boston branches and New York Agency, as at close of business on December 31st, 1912. We have also verified the investments owned by the Bank at that date.

Having examined the above General Balance Sheet as at December 31st, 1912, and compared it with the books kept at the General Manager's Office, Toronto, and the certified returns from the various branches, we hereby further certify that, in our opinion, it presents a fair and conservative statement of the Condition of the Affairs of the Bank as at that date.

MARWICK, MITCHELL, PEAT & CO.,
Chartered Accountants.

DIVIDENDS AND NOTICES

CARRIAGE FACTORIES, LIMITED

PREFERENCE STOCKHOLDERS' DIVIDEND, NO. 10

Notice is hereby given that a dividend of 1¾ per cent. for the quarter ended 15th January, 1913, being at the rate of 7 per cent. per annum, on the paid-up Preferred Stock of this Company, has been declared, and that the same will be paid on the 31st day of January to the Preferred Shareholders of record on the said 15th day of January, 1913.

By order of the Directors.

W. F. HENEY,
Secretary.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

The Annual General Meeting of the Shareholders of this Bank will be held at its Head Office, St. James Street, on Monday, the Tenth day of February next, at 12 o'clock noon, for the reception of the Annual Reports and Statements, and the election of Directors.

By order of the Board,

A. P. LESPERANCE,
Manager.

Montreal, January 8th, 1913.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-half per cent. upon the paid up Capital Stock of this Institution his been declared for the three months ending 31st January, 1913, and that the same will be payable at its Banking House in this City, and at its Branches, on and after Saturday, the First Day of March next, to Shareholders of record of 31st January, 1913.

By order of the Board,

H. V. MEREDITH,
General Manager.

Montreal, 21st January, 1913.

LA BANQUE NATIONALE.

On and after Saturday, the 1st of February next, this bank will pay to its shareholders a dividend of two per cent., being at the rate of eight per cent. per annum, upon its capital, for the quarter ending on the 31st of January next.

This dividend will be paid according to the list of shareholders of record on the 16th January next.

By order of the Board of Directors.

N. LAVOIE,
General Manager.

Quebec, 17th December, 1912.

MEXICO TRAMWAYS COMPANY

NOTICE IS HEREBY GIVEN that a dividend of One and Three-quarters per cent. (1¾%) has been declared on the capital stock of the Mexico Tramways Company, payable on the 1st February, 1913, to shareholders of record at the close of business on the 11th day of January, 1913, and that the transfer books of the Company will be closed from the 13th day of January, 1913, to the 31st day of January, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada, New York City, Mexico City, Mexico, London, England, and its branches.

The holders of Bearer Share warrants, on detaching from their share warrant, coupon No. 15, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, Mexico City, or London, England, on or after the 1st day of February, 1913, will receive in exchange for each coupon the sum of One dollar and Seventy Five Cents ($1.75) representing the amount of the dividend.

By Order of the Board,

W. E. DAVIDSON,
Secretary.

Toronto, Canada, January 6th, 1913.

THE SOVEREIGN BANK OF CANADA

Notice is hereby given that a Special General Meeting of the Shareholders of the Sovereign Bank of Canada will be held at the hour of Twelve o'clock noon on

TUESDAY, THE FOURTH DAY OF FEBRUARY, 1913,

at the Head Office of the Bank, 930 Traders Bank Building, in the city of Toronto, Ontario, for the purpose of considering the present position of the affairs of the Bank.

By order of the Board.

F. G. JEMMETT,
General Manager.

Toronto, 11th December, 1912.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

(Continued from page 260).

INDIA'S GOLD IMPORTS

London advices give the net import of gold into India in t December at £2,506,667, compared with £1,979,800 in cember, 1911, an increase of £526,867. These figures, ile approximate, have differed but little in the past from final revised returns of the Indian government. Ignoring £1,876,000 sovereigns transferred from India to London government account in October last the net private gold ports into India for 1912 have amounted to £29,468,865, npared with £20,909,442 in 1911, an increase of £8,559,423. muel Montagu & Company, of London, estimate that of 1912 total about £9,000,000 went into the gold serve of the Indian currency, the remainder being sorbed by the Indian people. As the output of the Transal, Rhodesia, etc., in 1912 was about £41,000,000, it is dent that nearly one-half of the gold production of South rica was taken by the great British Dependency.

Taking the fiscal year of the Indian Empire (beginning ril 1), the first nine months of the current fiscal year compres with the corresponding nine months of the previous cal year as follows:—

	1912.	1911.
April	£ 1,985,866	£ 1,703,512
May	2,354,133	1,802,607
June	2,868,333	1,047,814
July	1,172,867	1,005,432
August	2,230,000	660,825
September	1,627,733	670,016
October	1,346,934	1,887,040
November	1,066,066	2,000,958
December	2,506,667	1,979,800
Total, nine months ...	£17,158,599	£12,848,004

For the first three-quarters of the fiscal year the increase er the corresponding period of the previous year amounts £4,310,595. Substantial shipments of sovereigns from Egypt to India in the last week of 1912 and the first week of 1913 indicate that there is no abatement in the Indian demand for gold. On January 8, London advices says £608,000 gold left Port Said for India.

◆

THESE COMPANIES WILL INCREASE CAPITAL STOCK

The capital stock of the McAlpine-Richardson Company, Limited has been increased from $40,000 to $100,000, by the creation of 600 shares of new stock of $100 each.

The capital stock of the Provincial Motors, Limited, has been increased from $70,000 to $150,000 by the creation of 800 shares of new stock of $100 each, of which 500 shares are preference shares.

The Bruce Mines and Algoma Railway Company will apply at the next session of the Ontario Legislature for authority to change the name of the railway to the Lake Huron and Northern Ontario Railway Company, and to increase the capital stock from $300,000 to $12,000,000. Messrs. Young and McEvoy, Toronto, are solicitors for the applicants.

A special general meeting of the shareholders of the Landed Banking and Loan Company will be held at the company's office in Hamilton on February 3rd for the purpose of considering the increase of the company's capital stock to $1,050,000.

◆

In a general reorganization of the transportation department of the Grand Trunk Railway, under the supervision of Vice-President H. G. Kelly, Mr. D. Crombe has been made superintendent of transportation; Mr. C. G. Barber, general superintendent of eastern lines, including Montreal terminal; Mr. H. E. Whittenberger, superintendent of the middle division and Toronto terminals; and Mr. W. E. Gillen, superintendent of the western division. The office of superintendent of car service and records has been abolished.

STOCKS AND BONDS—TABLE NOTES.

(u) Unlisted.

†Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1,000. Steel Company of Canada, $100, $500, $1,000. Sherwin Williams, $100, $500 and $1,000. Penmans, Ltd., $100, $500 and $1,000. Canadian Cottons, $100, $500 and $1,000. ‡Quarterly

Quotations for Coniagas, Crown Reserve, La Rose, Nipissing and Trethewey will be found among the Toronto Exchange figures.

Quotations of Cobalt and Porcupine Mining Stocks are those of Standard Stock and Mining Exchanges.

Montreal Steel Stocks are commonly termed "Switch" on the Exchange. They are quoted as Montreal Steel in our tables.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

*Also a bonus of 10% per annum for 1911.

**Trethewey pays no regular dividend. They have paid:—1906, 4%; 1907, 4%; 1908, 15%; 1909, 25%; 1910, 10%; 1911, 20%; to June 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Co., 12 St. Sacrament Street, Montreal.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Feb. 1-10.
(6) Jan. 2-22.
(9) Dec. 31-Jan. 18.
(17) Jan. 8-Feb. 5.

EDMONTON, REGINA AND TORONTO BONDS

Option Given on One Block, Bids Refused on Another, and Toronto Sells

Bids for the city of Edmonton debentures were to be in by January 18th. All tenders were to be net, Edmonton delivery, and the delivery to commence about February 15th, 1913. The interest is payable half-yearly at Lloyds Bank, London, England, or at the Imperial Bank, Montreal. The following are details of the debentures:—

Twenty years, 4½ per cent.:—

Amount.	Purpose.
$100,253.34	Isolation hospital.
225,813.34	Civic office building.
75,433.34	Building for police purposes.
$401,500.02	

Twenty years, 5 per cent.:—

$25,100.00	Bridges.

Forty years 4½ per cent.:—

$ 76,406.67	Site civic office building.
26,280.00	Land for park purposes.
310,006.67	Land for park purposes.
50,126.67	Land for telephone central.
60,346.67	Land for park purposes.
$523,116.68	

Forty years, 5 per cent.:—

$ 50,126.67	Land for car barns.
21,900.00	Land for telephone exchang
150,380.00	Land for parks driveway.
66,000.00	Land for warehouse.
$288,406.67	

The Monetary Times understands that an option c these bonds has been given to a Toronto house.

Regina Has Refused Bids.

Regina has refused all bids received for its debenture presumably thinking that the offers are too low. The debe tures are as follows:—Pavements, 15 years, $488,000, 5 p cent.; sidewalks, 20 years, $61,000, 5 per cent.; collegia institute, 30 years, $100,000, 4½ per cent.

An issue of £1,189,000 4 per cent. bonds of the city Toronto has been underwritten in London by Lloyds Ba at 92½. While the price received is satisfactory in view market conditions, it is several points lower than offers ma by Toronto bond houses to the city early last year.

Advised to Sell.

Toronto has about $10,000,000 in unsold bonds fr last year—six millions pledged in London, England, a four millions on hand in Toronto. What looked like t right time to sell came two weeks ago, when Lloyds Bank London, the city's agents, advised Toronto to make the c fer at once. The issue is to raise money already spent account of the Hydro-electric system, schools and local i provements.

"INVESTMENT BONDS"

A new edition of our 24-page booklet "Investment Bonds" for the quarter January to March is now issued Full particulars are given of Government and Municipal Securities and Corporation Bonds yielding from 3.90% to 6% and including the representative denominations:— $100, $500, $1000.

We shall be pleased to mail a copy on request.

MUNICIPAL FLOTATIONS

Those responsible for municipal financing have been atching developments in the London market with nxiety for several months past. The reception accorded our municipal flotations during the latter part of 1912 as cool, not because Canadian municipal credit had een impaired, but through a combination of circum- ances in the world's money markets. The extensive emand for money emanating from many countries, the uropean situation and the call for higher rates of in- erest on the part of investors were three of the impor- ant factors. The fiscal agents of the city of Saskatoon nd that city's authorities were among the first to recog- ize the inevitable. They placed their issue of 5 per ent. consolidated stock at 99½. By the offering of hose terms the issue was over-subscribed. A sharp ontrast was the flotation of £256,300 4½ per cent. onds of New Westminster at 96. In that case, the nderwriters took 40 per cent.

The first Canadian city to borrow in London this ear was Quebec. It placed £400,600 4½ per cent. de- entures at par and the issue was over-subscribed. Que- ec has been financing its needs by temporary loans, and ts fiscal agents thought that the time had arrived for successful flotation. The result proved they were ight. This has had the effect of stirring matters in muni- ipal circles. The city of Toronto was advised to make ts issue of £1,189,000 4 per cent. bonds at 92½ at nce.

That city having lost several points by refusing eally good offers early last year—but not so considered y the municipal authorities—accepted the counsel. Montreal has been advised by the Bank of Montreal, its fiscal agents, to place its large civic loan in London as soon as possible. It is thought that after the Balkan war is over, important operations in the money markets will tend to increase the rate of interest, which will probably be higher than 4½ per cent., at which the city can borrow now. That fact, together with the fact that at least $30,000,000 of Canadian municipals are ready for marketing, having been held back by the issue of treasury bills and certificates, will probably create an avalanche of Canadian municipal bonds in the London market—at any rate, just as much as that market will stand. It is unlikely that all the Canadian cities on the waiting list will be able to achieve a result similar to that of Quebec. Many others should meet with success, but the situation is influenced largely by Balkan war factor and the demand for capital from other countries. It will be interesting to watch how the next three or four issues fare.

Vancouver has just disposed of over $1,000,000 worth of its bonds to a New York house. The stipulation was made that the issue would not be placed in London. Vancouver's latest flotation, therefore, will be absorbed by United States investors. At the same time, it relieves the London market to that extent. Both Edmonton and Regina have large blocks of securities to sell. In the former case, the amount is $1,238,123 and in the latter $649,000. In neither instance do the civic authorities appear to be pleased with the prices offered by Canadian bond houses. Regina has rejected all the offers received.

Last year the securities issued by Canadian municipalities amounted to $48,414,962 compared with $47,159,288 in 1911. Of the former total, 28.42 per cent.

was sold in Canada, 8 per cent. in the United States and 63.58 per cent. in Great Britain. Last year's experience should be taken as a lesson by our municipalities. Many of them, although receiving reasonable bids for their bonds, preferred to speculate with them, or to hope that matters would improve. They did not improve, the market declined, and they had either to sell or to make temporary arrangements. It has yet to be proved that the advice given by any of our banks, or reputable bond houses to civic authorities was incorrect. Indeed, experience has shown that had such advice been accepted when given, a large number of cities throughout the country would have had their debentures sold and at prices which perhaps they will be unable to obtain this year.

KNIGHTLY FINANCE

Parliament heard this week debates which indicated that politics and high finance are dangerous companions, first, because high finance in itself is objectionable, and secondly, because an Opposition is always looking for trouble. A perusal of the debates will enlighten the investor, and especially the French investor, in Canadian securities. Mr. Lemieux precipitated matters by asking for the production of papers in connection with La Banque Internationale and other Forget enterprises. These papers will be brought down by the government, and Mr. Lemieux predicts that if the investigation he wants is granted, "the revelations will stagger the Dominion." The ex-Postmaster-General is somewhat given to superlative speech, and the staggering, therefore, is not likely to be very pronounced.

As is usual at Ottawa, the discussion took the form of a fierce party argument. The Liberals said that when they ran the Treasury Board they had refused a certificate to La Banque Internationale. The Conservatives replied that the Treasury Board of the late government had not refused, but had only postponed consideration of the application during its official existence. The documents brought down will, we think, prove Mr. White, Minister of Finance, correct in that statement. The Treasury Board undoubtedly saw that all the requirements of the Bank Act had been properly fulfilled, and that nothing was in the possession of the Treasury Board to justify them refusing the certificate to Sir Rodolphe Forget and his associates. The Liberal Treasury Board may have worked, too, on the assumption that it was poor policy to shoulder any doubts when they could be loaded on to an incoming Board of a different political complexion.

Mr. Lemieux discussed the Quebec Railway, Light, Heat and Power Company, the Quebec and Saguenay Railway, the Quebec and Eastern Railway and La Banque Internationale. With heavy blows he pounded the Forget financial fabric till it looked like pulp. It was not to be expected that Sir Rodolphe Forget would remain quietly in Montreal reading Judge Leet's decision or some other work of interest. As soon as possible he appeared in the House at Ottawa and for over an hour spoke on a question of privilege. Sir Rodolphe, who probably has a fine sense of discrimination, thought that the name of Canada had been besmirched by the Liberal organization in Quebec Province rather than by his financial operations. He explained the payment of the much-discussed bank note of $200,000, and considered the transaction absolutely legal.

Neither the accusations nor the reply make edifying reading. They cannot be considered as helping the cause of foreign investments in Canada. The government can scarcely be blamed for Forget misfortunes, although it would be unfortunate if political mist had dimmed their eyes. But even though the Banque Internationale certificate was granted after all conditions of the Bank Act were complied with, the publicity respecting the D'Aoust note of $200,000 and regarding Forget enterprises generally, and the dissatisfaction of many of their shareholders will make it difficult for Sir Rodolphe to pose in future as an eminent financier or banker. We would have thought, too, that he is too busy a man to act as a member of the parliamentary banking and commerce committee, as he is doing, helping to shape the banking and financial legislation of this country.

LIABILITY OF CANADIAN RAILWAYS

During the year ended June 30th, 1912, $21,251,664 was added to the stock liability of Canadian railways and $38,996,661 on account of funded debt, representing a total addition of $60,248,325. That increase over the figures of 1911 brought the total capital liability of Canadian railroads up to $1,588,937,526. These figures in themselves are of interest, but more so because considerable railroad construction has yet to be undertaken in the Dominion. The railroad stocks last year totalled $770,459,351 and the funded debt $818,478,175, so that stocks and bonds are about equally divided. It is interesting also to examine the division of the funded debt. This is set forth in the excellent volume of railway statistics compiled by Mr. J. L. Payne, Comptroller of Statistics of the Department of Railways and Canals, at Ottawa. The figures are as follow:—

Funded debt.	1912.
Bonds	$772,532,108
Miscellaneous obligations	12,608,718
Income bonds	17,119,466
Equipment trust obligations	16,217,883
	$818,478,175

The constant call of the Canadian roads for new equipment is reflected in the equipment trust obligations for the past few years. The amount for 1910, 1911 and 1912 exceeded $42,000,000. The Grand Trunk Railway for the first time adopted this form of financing last year.

Mr. Payne calculates the capitalization per mile of our railways. If the total capital liability of $1,588,937,526, as given above, be divided, he says, by the 26,727 miles of operating line shown on a preceding page, the result would be $59,454 per mile of line. It would be quite misleading, however, to make such a calculation. Neither the divisor nor the dividend is correct. The mileage, for example, includes Government owned and operated lines, to which no capital liability attaches. On the other hand, the capital figures embrace the liability of unfinished lines, such as the Grand Trunk Pacific, which do not appear in the mileage column. The deductions under this head amount to $134,321,020. Then there is considerable duplication. It has not been practicable to ascertain the exact amount thereof, created chiefly by the issue of stocks and bonds for the purchase or control of smaller roads by the larger, but it is known to be not less than $210,000,000. Joining these two sums, and subtracting the total from the $1,588,937,526 already indicated, the remainder is $1,244,616,506. For immediate statistical purposes that might be regarded as the proper capital liability of Canadian railways.

The elimination of Government owned lines, and such other lines as should not figure in the mileage column, reduces the total to 24,485. Using these factors, it will be seen that the capital liability of railways in Canada amounts to $50,832 per mile. This is a relatively low figure.

The net capitalization per mile of line in other countries is as follows:—

Country.	Net capital per mile.
United States	$ 59,345
United Kingdom	275,166
France	94,933
Germany	111,737

The cost per mile of the government owned railways n Canada has varied considerably. The Intercolonial vith 1,463 miles of line has a cost per mile of $64,761; he Temiskaming and Northern Ontario Railway, $58,-95; the Prince Edward Island, $32,296; and the New Brunswick Coal and Railway, $33,398.

The capital liability of Canadian railways has grown normously in the past few decades. In 1876 railway tocks totalled $181,000,000 and the funded debt $76,-00,000, an aggregate of $257,000,000. In 1900 the tock indebtedness had expanded to $410,000,000 and unded debt to $373,000,000, a total of $784,000,000. n 1908 the funded debt for the first time exceeded the tocks, the figures being respectively $631,000,000 and 607,000,000, or a total sum of $1,238,000,000. Last ear, as mentioned above, the stocks had reached $770,-00,000 and funded debt $818,000,000. The growth in tocks since 1876 has been $589,000,000, or 325.4 per ent.; in funded debt $742,000,000, or 976.3 per cent.; n total capital liability $1,331,000,000, or 517.9 per ent.

The relationship of dividends and net earnings to hare capital have shown some interesting fluctuations uring recent years. In 1907, the percentage of dividends paid to share capital was 2.17, and this percentage hanged year by year as follows: 1908, 2.11 per cent.; 909, 2.97; 1910, 3.16; 1911, 4.08; 1912, 4.04. The ercentage of net earnings to share capital in 1907 as 7.30. In 1908 it declined to 6.51, and in the folowing year to 6.24. In 1910 it increased to 7.78 per ent.; next year it declined to 7.70 and last year rose 8.91. Of the total dividends paid in 1912 amounting $31,164,791; on common stock, $18,487,000 was aid; and $12,677,791 on preferred stock.

A SMALL C

> Mr. Lemieux: When the people of Canada know these facts, in spite of the warmth of my right honorable friend the Prime Minister, and in spite of the warmth of my honorable friend the Minister of Finance, in answering the very modest remarks I made about the whole case—
>
> Mr. White: Too modest.
>
> Mr. Lemieux: Yes; far more modest than the remarks which he read himself, I am sure, in *The Monetary Times*, which I would say is a Conservative paper.
>
> Mr. White: I do not think it has any politics.
>
> Mr. Lemieux: Well, it is a financial paper, and it must be a Conservative paper. Anyway, it is an old paper—it is an old landmark.

The above is part of the debate respecting the affairs f La Banque Internationale in the House at Ottawa is week. Those who have read *The Monetary Times* or any period will know that Mr. White, the Minister f Finance, was right in his suggestion that this paper as no politics. Mr. Lemieux's error was in using a apital "C" in the word conservative. *The Monetary Times* is a weekly journal of finance and public opinion. For nearly half a century, it has steered its course egardless of politics, and proposes to do so in the future.

SMALL CHANGE

Exit Sir Rodolphe.

* * * *

Parliament is dividing time between Navy Bill and Bank Act Tom.

* * * *

The latest London market music is "The March f the Municipals."

* * * *

The fresh air movement seems to have spread to financial spheres.

* * * *

These columns feel quite restful without the usual weekly appeal to Judge Leet.

* * * *

Sir Rodolphe Forget: "La Banque est mort." Colonel Mason: "Vive la Banque."

* * * *

Some of those English pessimists on Canada should visit us and taste of development.

* * * *

The United States apparently feels that it has been Quebecked in this pulp and paper question.

* * * *

If the Suffragettes burn London and kidnap Asquith, we may not be able to borrow any more money.

* * * *

Turkey has secured a $10,000,000 loan, which indicates that someone has a corner in Turkish confidence.

* * * *

Montreal will tickle the sensitive fancy of the London market with the request for a loan of $14,000,000.

* * * *

Great Britain bought 76.42 per cent. of our bond issues last year, a material way to cement those much-discussed ties.

* * * *

The French State Railway lost $14,000,000 upon operations last year and the Intercolonial hastens to extend its sympathy.

* * * *

The heavy fire losses this month are a tax on the individual, and usually omitted by him from the high-cost-of-living data.

* * * *

The Ontario Sandwich, with the United States Steel Corporation as meat, will be a tough one for Canadian steel companies to bite.

* * * *

The solution of Toronto's water problem is not so much calling water from Scarborough Bluffs as calling its advisory engineers' bluffs.

* * * *

A bank in Connecticut offers a pass book and a dollar deposit to every child born in the town this year. Quebec province has not yet followed suit.

* * * *

Professor Fernow may have done justice, in a sightseeing hand-car, to a few hundred acres of Northern Ontario, but he missed the attractions of the remaining 20,000,000 acres.

* * * *

A Toronto steeplejack ordered $90 worth of materials, painted half of the cathedral steeple and disappeared—another case of high finance which "blue sky" laws failed to prevent.

* * * *

Several hundred words were cabled from London this week recording some poor vaudeville jokes on Canada. About two dozen words were devoted to the Toronto and Quebec province loans. Thoughts of our borrowings rest lightly on the brow.

* * * *

They have appointed President-elect Wilson's cabinet. They have published his Panama Canal legislation. They know in Wall Street who and what he will hit. They have said how the tariff will be changed. Meantime, Wilson waits to March 4th.

BRAZILIAN STOCK LISTED AT MONTREAL

Listing is for the Entire Amount—Terms of Exchange —Reported Earnings

Monetary Times Office,
Montreal, January 29th.

During the past week considerable interest was aroused around here by the listing of Brazilian Traction Light and Power on the Montreal Exchange. Heretofore, the stock was being dealt with on the unlisted department, and while there is really no essential difference so far as the trading facilities are concerned, the absence on the ticker, of quotations from the unlisted department and the lack of the official recognition are generally considered drawbacks to the best trading interests of a stock. The listing was of $104,500,000 of the stock, being the entire amount issued.

Brazilian Traction Light and Power came into existence during somewhat stormy times, so far as the stock markets were concerned. It was some time ago that the terms upon which the Rio de Janiero Tramway Light and Power, the Sao Paulo Tramway Light and Power and the Sao Paulo Electric stocks might be exchanged for the shares of the Brazilian Traction, were announced. Later these terms were altered somewhat, the proposal to issue preference shares being abandoned and Sao Paulo Tramway receiving in all $2,500,000 more in the holding concern than at first proposed.

At an Inopportune Time.

This and the slowness with which the exchange of shares took place, to say nothing of the period of tight money and European war threats which were then entered, had the effect of depressing the Brazilian shares when they came on the market. From a little above par they fell to not far above eighty but have now recovered to around par once more.

The three companies taken in are all doing business in Brazil. Two of them, namely, Sao Paulo Tramway and Rio de Janeiro Tramway, have been in business for some years past, Sao being the elder. It possesses the franchise for the various public utility services for the city of Sao Paulo while Rio stands in a similar relationship to the city of Rio De Janeiro.

At the time of the merger, Rio was paying a dividend at the rate of 5 per cent. per annum, while Sao Paulo Tramway paid a dividend at the rate of 10 per cent. per annum. Sao Paulo Electric paid no dividend at all, being only in the construction stage. However, it was claimed that the outlook for the latter company was in every way encouraging. Taking the results of the two going concerns, it was claimed that these would be able to show earnings of 6 per cent. per annum on the capitalization of Brazilian as at first proposed.

Have Shown Large Increases.

During the time the stock of Brazilian was declining, it was stated freely that the earnings actually were sufficiently large to justify the payment of a dividend at the rate of 7 per cent. and that such would be done if necessary to bring the stock to a proper price level. Subsequently, the earnings reported for Brazilian from week to week have shown large increases so that the future of the stock would appear to be quite encouraging.

The basis of exchange was 1 3/5 shares of Brazilian for each share of Rio, 2¾ Brazilian for each share of Sao Paulo Tramway and one share Brazilian for each share of Sao Paulo Electric. The exchange worked out as follows:—

	Former capital.	New capital.
Rio de Janeiro	$45,000,000	$72,000,000
Sao Paulo Tramway	10,000,000	27,500,000
Sao Paulo Electric	5,000,000	5,000,000
Unissued		15,500,000
Total	$60,000,000	$120,000,000

◆

A branch of the Royal Bank of Canada has been opened at Limoilon, Que.

The officers of Kentville, N.S., board of trade for the ensuing year are:—President, Mr. E. B. Newcombe; vice-president, Mr. T. P. Calkin; secretary-treasurer, Mr. W. E. Porter; council, Hon. J. P. Chipman, Messrs. W. B. Moore, M.D., A. E. Calkin, W. P. Shaffner, Prof. W. S. Blair, H. G. Harris, R. S. Eaton, and William Yould; auditors, Messrs. T. A. Lydiard, and T. Weaver.

There is a movement on foot to form a fire investigation bureau in Montreal to assist the fire commissioners in their work. While it is not thought that any "arson trust" exists here, such as that which has become famous in New York, the fire underwriters are of the opinion that many of the fires that occur in this city should be closely investigated

MONTREAL'S BOARD OF TRADE

Mr. R. W. Reford on Export of Power—Transportatio and St. Lawrence Insurance Rates

Monetary Times Office,
Montreal, January 29th.

The annual meeting of the Montreal Board of Trad brought out some remarks by the retiring president Mr. Robt. W. Reford, on a point of much economi interest and importance. He referred to the sellin to industries on the other side of the international boundary line of power generated in Canada. He questioned whether it was wise to permit the export of power develope near Montreal as the growth of the city depended to such a extent upon cheap power. He also regretted the failure o the provincial government to appoint a hydro-electric commission for the purpose of fixing electric power rates. H asked the members of the board to consider whether th manufacturers were not paying too much for power by generating it by steam when a great heritage in water power la at the very doors. He said that notwithstanding all the wate power at the doors of the city the companies which had acquired he powers had been selling the power out at a pric apparently governed by the cost of power when generated b coal.

Promoters and Illegitimate Profits.

Mr. Reford also referred to the high cost of living, saying that one of the factors was the permission enjoyed by th public utility companies to issue as much capital as they sa fit or as they had prospective power to pay dividends upo at the rate of five or six per cent. All this was increasin the cost of living. Cheap electrical power, cheap transportation and other public utility services would place the manufacturers in a better position to compete and to pay highe wages. After all the capitalizing and re-capitalizing had take place, the stock eventually found its way into the hands o shareholders who would be the sufferers when the power t charge high rates was curbed. Meantime, the promoter were left to enjoy their illegitimate profits without any inte ference whatever.

Mr. Thomas Harling discussed the question of transportation, partly in view of the coming opening of the Panama Canal. Although the crop of the Northwest was now te times as great as it was in 1890 and the facilities of the po had been improved, the amount of grain passing through th port was not much larger. The freight carrying capacit of the ships visiting port was not greatly larger although th passenger capacity was.

St. Lawrence Insurance Rates.

Mr. Harding placed much of the responsibility for th state of affairs on the high rates of insurance on vesse coming to the St. Lawrence, saying that over $3,000,000 p annum was being paid in insurance by shippers from S Lawrence ports, and yet the loss had never reached 50 p cent. of this amount. Montreal paid three times as mu insurance on cargoes as was paid by United States ports. H declared it was impossible for the St. Lawrence to secure i fair share of the carrying trade with such a handicap again it.

A motion was then adopted in which the incoming coun was requested to memorialized the Dominion governme with a view to meeting the situation as respects the exce insurance rates and also to continue the improvements to t ship channel. Also, the council was asked to communica with other boards of trade in the Dominion with the obje of securing such united action as may be necessary in t matter.

◆

DOMINION BANK ISSUES MORE STOCK

Shareholders of the Dominion Bank receive valua privileges by the issue of $1,000,000 new stock at 200, whi was announced at the annual meeting of that institutio The new stock will be issued to shareholders of record F ruary 15 in the proportion of one new share for every five n held. As the stock which is now selling in the market around 240 bears interest at the rate of 14 per cent., the yi on the new stock subscribed for at 200 will be 7 per ce This issue is part of the $5,000,000 new stock authorized th years ago, which made total authorized capital $10,000,0 The bank's total paid-up capital will now be increased fr $5,000,000 to $6,000,000.

The directors were increased from nine to eleven, the n members appointed being Mr. E. W. Hamber, of Vancou and Mr. H. W. Hutchinson, of Winnipeg. The appointm of these directors is in view of the bank's increasing busin in the West.

FORGET FINANCING

Rodolphe Forget Talks to the House at Ottawa for an Hour and Replies to Lemieux

Sir Rodolphe Forget replied to his critics in the House ttawa this week. His arguments were divided between ics and finance. He stated that the reason why a license ommence business was not granted to La Banque Inter- onale by the Treasury Board under the late Liberal ad- stration was because he was running in Montmorency nst the son of Hon. S. N. Parent, a friend of Sir Wilfrid rier's. Sir Wilfrid denied this, stating that the certificate refused because one of the directors was not properly ified. This led to a warm passage between the two hts, during which Sir Wilfrid told Sir Rodolphe he was le to accept the truth of the latter's statement.

Sir Rodolphe said that the Quebec Light, Heat and er Company had acquired the stock of all the companies d absorbed, and that Mr. Lemieux erred in saying that ssue of that company had at the outset been made in ce. Later an issue of bonds had been disposed of in ce. The bonds were quoted on the Paris Bourse and the est had been regularly paid.

bec and Saguenay Railway.

The Quebec and Saguenay Railway was not commenced ng the last election, as had been asserted. It was begun teen months earlier, and the work on construction had continued. The securities which were floated in Can- were placed on the market and paid interest, and every r was expended on the road.

No bank, he said, could have kept its doors open in face tatements such as had been made with regard to the que Internationale. Some people had come over from ce and had desired to open a bank with $10,000,000 tal, $7,000,000 of which was to be subscribed in France the balance in Canada.

rns From Paris.

An office was opened in Paris, and it was found that the rns from that office did not conform with the Canadian Consequently Sir Rodolphe went to France to have this tice changed. Sir Rodolphe said that prior to the gener- eeting of September last the French administrators had ined proxies from shareholders for representatives by a lar which seemed to come from the bank itself, and did indicate any intention of an effort to oust the Canadian ctors. Three gentlemen had come to the meeting and asked an adjournment, after filing their proxies.

Some of these proxies were unauthenticated, and others from women and not authorized by the husbands. Four ent jurists held that they were invalid, and they were wn out. The French representatives were not ejected the meeting, as Mr. Lemieux had said. Not a five cent e was lost by the bank in Canada, and the loss in Paris only about $150,000. The Home Bank, or the syndicate h took over the Banque Internationale, was therefore ing a good bargain. Few banks, indeed, had succeeded ad the Banque Internationale.

ing of Returns.

Sir Rodolphe said that Mr. Bickerdike, the vice-president he bank, had signed the return upon which the trial be- Judge Leet had been based. Had he been in Montreal member for Charlevoix would have signed it, because he eved the transaction complained of was legal. Mr. oust's notes for $200,000 had been discounted, and when bank decided not to make further calls on the stock Mr. oust was notified and paid the notes.

Sir Rodolphe said that Quebec and Saguenay debentures not issued in Paris, because they were taken up by the bec Light, Heat and Power Company, which had issued wn securities.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from alt Station for the week ended January 24th:—O'Brien, oo; Coniagas, 87,000; Drummond, 85,200; City of Co- 65,576; Nipissing, 64,000; Trethewey, 50,187; Cobalt nsite, 61,000; La Rose, 62,419; McKinley, 66,916; Kerr e, 63,300; total, 651,498 pounds, or 325 tons. The total ments since January 1st are now 2,899,771 pounds, or 9 tons.

In 1904 the camp produced 158 tons, valued at $316,217; 005, 2,14, ons, valued at $1,437,106; in 1906, 5,835 tons; 007, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,041 s; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 s.

NATIONAL TRUST COMPANY

Substantial profits were made by the National Trust Company during the past year. The statement presented at the fifteenth annual meeting of the shareholders at Toronto this week revealed not only that fact but indicated also that considerable progress had been made by the company during 1912 in several directions. There was an increase, for instance, of $10,345,156 in the assets under the administration of the company. This is the largest gain in any one year in the history of the corporation. More than 90 per cent. of it is due to estates and trust funds committed to the company's care. In 1908 the assets under their administration totalled $17,021,994. Last year they had reached $38,598,768.

Enlarging upon these figures the president, Mr. J. W. Flavelle, stated that the public is more and more coming to recognize the advantages of a trust company over an individual as executor and trustee in the management of estates, and it was gratifying to know that this company was participating so largely in the growth of this most important branch of trust company work. It was important to bear in mind, he said, that the funds of each estate were ear-marked in the books of the company and kept separate from all other estates and trust funds, and from the company's own funds, while the sole remuneration or profit which the company received from any estate was the fee allowed for administration and management, and which was no greater than that allowed to a private executor.

Mr. Flavelle also stated that the company continued to place money on mortgage loans for the company and for its clients in the provinces of Manitoba, Saskatchewan and Alberta, where the company has four branch offices, and where rates of interest are higher on the whole than they are in the East. Loans in these provinces have been made principally upon the security of farm property. Whatever may be the view which is held with regard to real estate values in the cities and towns of the Dominion, it is agreed that, speaking generally, there has been no undue or unwarranted increase in the value of improved farm lands. The company's farm loans in these provinces average $6.27 per acre, exclusive of the value of farm buildings. When it is borne in mind that the Canadian Pacific and Canadian Northern Railways are receiving more than twice this mount for undeveloped lands in the provinces mentioned, the safe character of the National Trust Company's loans will be appreciated. Interest payments continue to be well met.

Trade conditions in Canada, added Mr. Flavelle, were seldom, if ever, as active as they are at the moment, and the general business outlook for 1913 promises well, provided the country continues to secure fresh capital for its various activities. If no substantial disappointment is experienced in this regard, the present year should prove a satisfactory one.

The net profits last year totalled $242,942. Adding to that the sum of $21,823 brought forward from 1911, there was at credit of profit and loss account a sum of $264,765 available for distribution. Quarterly dividends at the rate of 10 per cent. per annum accounted for $150,000 of that sum, $14,765 was carried forward in profit and loss account and $100,000 was transferred to reserve fund, which now stands at $1,400,000. The financial statement is an excellent one. The management and directorate of the National Trust Company are recognized as among the strongest in the Dominion.

DOMINION TAR AND CHEMICAL COMPANY

The timber preserving plant at Sydney of the Dominion Tar and Chemical Company, Limited, is far from being unable to accept orders, but is ready and anxious to treat all classes of timber, railroad ties, bridge timbers, piling, sheathing, etc.

It is not the only plant of its kind in Canada, as the Dominion Tar and Chemical Company, Limited, has a larger plant at Transcona, near Winnipeg, where they have three large treating cylinders operating, creosoting ties and other timbers chiefly for use of the Canadian Pacific Railway. The treating plant at Sydney is an adjunct to a large tar distilling plant of the company which produces in large quantities the creosote oils used in the preservative treatment of timber.

The company has another large tar distillery at Sault Ste. Marie, Ont., engaged in the same operations, except that there is no timber treating plant at that point.

◆

The petition for a writ of quo warranto to restrain Sir Rodolphe Forget from sitting as president of La Banque Internationale has been withdrawn by the French shareholders who made it.

FORGET'S BANK AND FRENCH INVESTMENTS

They Form the Topic of a Hot Debate in the House at Ottawa—Papers Will Be Brought Down

Banque Internationale incidents and the investments generally of French capital in Canada were the topic of a warm debate in the House at Ottawa on Monday. Both Mr. Borden, premier, and Sir Wilfrid Laurier, took an active part in the discussion, and editorials appearing in The Monetary Times on the subject were read to the House.

Hon. R. Lemieux asked for the production of papers relating to the licensing of La Banque Internationale. He complained that the pooling of the stock of Canadian shareholders under an agreement guaranteeing a return of one hundred per cent., should have called for the government's action. It was also stated that Mr. Fielding, as Finance Minister, had refused to issue the certificate to the bank. This Finance Minister White denied. The rest of the day was occupied in discussing the circumstances under which the securities of a number of enterprises in the province of Quebec were disposed of in France, Mr. Lemieux charging that the credit of Canada had been seriously injured in the French money market. He moved for papers relating to the Quebec merger, the Quebec and Saguenay Railway and the Banque Internationale, French capital having been invested in all of these institutions, with, as he alleged, serious results to the French investors.

In both cases the government agreed to the production of the documents requested.

Government Cannot Guarantee.

Premier Borden stated that if any representations were made to the government by the French bondholders' committee or the French government they would receive such courteous consideration as might be possible in view of the position of the government in relation to such an undertaking. Mr. Borden pointed out that it was impossible for any government to guarantee investments made in Canada by Canadians, and would hardly be in a position to go further in regard to investments in foreign countries.

Mr. Lemieux stated that the men behind the Quebec and Saugenay Railway Company were appealing to the government night and day for a guarantee of bonds. Mr. Cochrane, Minister of Railways, said no application for a bond guarantee had been made.

Mr. White, Minister of Finance, replied at length to Mr. Lemieux, who had made, he said, recklessly untrue statement when he had alleged that the late government and Hon. W. S. Fielding had refused to grant a certificate to the Banque Internationale to commence operations. He read the minutes of the Treasury Board to the effect that that body had left the matter for consideration of the new government "without expressing any opinion upon the merits of the application."

Incorporation of the Bank.

The Banque Internationale, he continued, was incorporated in April, 1911, and had applied for a certificate in July of that year. At the latter date it had had ten million dollars of capital subscribed for and $936,000 cash paid up, and the required deposit of $250,000 paid into the hands of the Receiver-General. The law only called upon new banks to have $500,000 stock subscribed and $250,000 to deposit with the Receiver-General.

The old Treasury Board had investigated the standing of shareholders and directors. Mr. White pointed out that the directors of the bank included such men as Sir George Garneau, Hon. Mr. Taillon, postmaster of Montreal; Mr. Bickerdike and J. M. Greenshields.

What Sir Wilfrid Thought.

Sir Wilfrid Laurier said that there was as much reason for an investigation of the Banque Internationale as of the Farmers Bank. He thought that the fact that the subscribed capital of the former institution will be larger than the law required was a subject for enquiry. Some of the stock had been subscribed "in trust," and this should have been investigated with a view to its bearing upon the application of the double liability provision of the Act in case of a failure.

There had, he said, been some question of the qualifications of one of the nine directors elected and also a technical difficulty had been raised because some of the French shareholders had subscribed by proxy. Both points he admitted had been disposed of satisfactorily.

As to Pooling Arrangement.

Facts which had recently come to light, for instance the pooling arrangement among the Canadian shareholders, should be investigated. Sir Wilfrid said that two French shareholders had complained to Mr. Bickerdike, alleging that general manager Bird had made a false return to the government by omitting a loan of $200,000 made to Mr. D'Aoust. Mr. Bird had said that the money was lent on two notes of Mr. D'Aoust's on the orders of Sir Rodolphe Forget. On the other hand Mr. D'Aoust claimed that the money was for services rendered. The directors had not known of this transaction, and it should be scrutinized.

Right Hon. R. L. Borden said the leader of the Opposition and the member for Rouville appeared to ignore that the Banque Internationale was a going concern when they wished the government to take action to recover $200,000 of which they alleged the bank had been defrauded.

The government would have no right to use the name of the bank for recovering that money, but the bank had a perfect right to go into the courts in its own behalf.

The Prime Minister said that the situation of the Banque Internationale was quite different from that of the Farmers Bank. The latter was a defunct institution, the former was a going concern, and could take steps to recover commissions alleged to have been wrongfully paid.

Transfer of Bank Stock.

Mr. Borden said there was nothing in the Bank Act to prevent the transfer of bank stock to a person living outside of Canada or to make the sale of stock to a person outside of Canada invalid.

There had been a difficulty urged, namely that the subscription of a million dollars had been made "in trust." Subscriptions to the capital stock in banks or other institutions were often made in that way. Moreover putting aside that subscription there had been still another $9,000,000 of stock subscribed, $936,000 paid up and deposited to the credit of the Receiver-General of Canada.

As to the pooling of the Canadian stock Mr. Borden said that had the bank gone into liquidation the subscribers would have had to pay their calls, just as would other contributors, and would merely have had recourse against those who guaranteed them against further payment of calls.

BIG FIRE COMPANIES BARRED FROM MICHIGAN

Becoming effective immediately, Commissioner of Insurance Palmer has barred seventeen of the world's largest fire insurance companies from doing business in Michigan, says a dispatch from Lansing. Every one of the seventeen are declared by the commissioner to have broken the laws of Michigan, and the barring of them from the State is the penalty he inflicts. Among the companies ordered out of the State are the following: Liverpool and London and Globe Insurance Company, Liverpool; North British and Mercantile Insurance Company, London and Edinburgh; Norwich Union Fire Insurance Society, Limited, Norwich, England; Phœnix Fire Insurance Company, Paris; Scottish Union and National Insurance Company, Edinburgh; Sun Insurance Office, London. Every one of the above companies is declared to have violated the laws of the State of Michigan in that it wrote higher risks than the laws of this State permit.

TORONTO'S FIRE RETURNS.

According to the annual statement of Fire Chief Thompson there were more alarms pulled in Toronto during the past year than ever before. In 1911 there were 1,573 alarms rung in, while in 1912 the number had increased to 1,607. This is a record for Toronto.

The total loss by fire during the year amounted to $1,103,684. This is $655,696 above that of the previous year. This is accounted for partly by the heavy loss sustained at the Toronto Railway Company's fire on King Street and the fire at the Allen Manufacturing Company at the corner of Simcoe and Pearl Streets. The combined loss of these two fires alone amounted to over half a million dollars.

The chief says the high pressure system has proved its efficiency in stopping the spread of fire on a number of occasions. This was particularly noticeable at the Boyd Brumell and Allen fires.

The insurance on buildings and contents in which fire occurred amounted to $5,395,566. Losses and insurance on buildings and contents as follows:—

Losses on buildings	$ 215,571.80
Losses on contents	888,112.60
Total loss on buildings and contents	1,103,684.49
Insurance on buildings	2,367,500.00
Insurance on contents	3,028,066.00
Total insurance on buildings and contents	5,395,566.00
Insurance paid on buildings	199,555.80
Insurance paid on contents	861,578.69
Total insurance paid on contents and buildings	1,061,134.49
Loss over insurance paid on buildings and contents	12,450.00
Loss on buildings with no insurance	10,782.00
Loss on contents with no insurance	10,318.00

Overhead wires are dangerous to life and property as well as an obstruction to the department in their work. Chief Thompson repeats his plea for their removal.

'RUST COMPANIES IN WESTERN CANADA

ir Growth and Outlook—Business Needs are Assisted—Population and Wheat Growing

The year 1912 passes into history as one of rapid ex-
ion and development, not only in respect to trust com-
es, but also in respect to the general growth and well
g of the western provinces and their wonderful wealth
ucing areas. In the wake of the latter there have arisen,
a night, healthy young towns, which in a marvellously
t time have sprung into the world's notice as cities, with
he adjuncts and improvements that go to make up, in
twentieth century of bustling life, the modern homes of
virile forceful people.

The Canadian west is indebted to Great Britain and the
ed States largely for its present sharp increases in popu-
n, as witness the immigration returns showing about
oo from the former and 100,000 or more, from the lat-
in the space of the past twelve months, and the stock
e best Anglo-Saxon origin we can wish for. With this
mass of humanity, the powers that be are straining
y nerve and fibre to bring about the correct mould.
writes Mr. W. Harvey, B.L., managing director of the
dard Trusts Company, Winnipeg, in "Trust Com-
es." 'Twill take time, care, money and wise govern-
t to fuse it all properly, but that the federal and provin-
governments will not be fully alive to the enormity and
importance of the task, no one doubts.

ers Usually Conferred on Trust Companies.

An excellent object lesson has been afforded Canada al-
ly by her neighbor in the United States on the subject of
on building, and it will behoove her to profit by the suc-
es and the failures of the latter in her present effort at
ilding. "Righteousness exalteth a nation" and with
excellent educational system, a proper enforcement of
and the churches performing their duty, there need be
ear as to the outcome or the result. Those basic features
erly applied must necessarily do it.

Arising out of this flowing human tide there are notable
ences, not the least important of which is the marvellous
th of bank capitalizations and the number of trust com-
es that have sprung into being. The latter, in the
, do not encroach here upon the business and domain
e banks, preferring, as they do, to adhere more strictly
e functions of trustee, executor, administrator and such
r powers as are usually conferred on trust companies,
the least important of which is acting attorney and
t for clients, individual or corporate, in the investment
unds on mortgage, the field for which is illimitable, re-
erative and safe where the customary caution is exer-
d.

idity of Growth.

Winnipeg, which, as old Fort Garry, boasted in 1870 of
opulation of something like a couple of hundred souls,
-day a throbbing active centre of 200,000 people, is the
est wheat market, not only on the American continent,
in the world; owns its hydro-electric power plant; has
t thirty railway lines radiating from it, 200 miles of
kage in her railway yards, three transcontinental lines
ailway bisecting it, of which one, the Canadian Pacific
way, is a double track; the head of river navigation,
ecting it with the freighters of Lake Winnipeg, and
ugh it to the other waterways to the Hudson Bay; in-
ries and factories employing over 20,000 hands; schools,
e forty-five in number, of the best construction and equip-
t; five colleges affiliated with the University of Mani-
, and finally, the Halls of Justice and Legislation which
oth instances are soon to give place to magnificent edi-
s now in course of erection.

With such rapidity of growth (1912 building permits
g over twenty million dollars) it is not a matter of sur-
e, but rather of satisfaction, that the citizens have been
d equal to the task of laying broad and deep foundations
the future. Even human vision, however, is short and de-
ive at times. Industrial and financial institutions which
e erected structures large enough in their judgment for
requirements of several decades, have found by the sub-
ent growth how short their judgment had been, and we
e witnessed handsome buildings pulled down after five
rs, to give place to larger or, in the alternative, going
ward.

lizing Trust Companies' Value.

Wherefore this growth and the feverish haste to keep up
it? Half a million people a year, pouring through this
eway of the Canadian Northwest, soon to swell into a
fuller tide, is the answer. The manufacturers of the
t as well as of the West have to provide for the wants of
se peaceful invaders, who bring, besides, their own capital
ch has to be cared for and invested in various ways. The wholesaler and retailer are busy beyond their wildest dreams of a few years ago; each one shows the line of growth by the new brick work in his building, compared with the old; the banker is meeting new customers daily, new lines of credit are being sought and not always granted. More people are beginning to realize the value of the trust company in the expansion of their businesses. An issue of debenture stock is requested and with it a trustee for the debenture holders. Having obtained his financial needs the merchant or manufacturer bethinks himself of his trust connection for certain advice in the disposition later of his valuable personal estate, which the trust company, in many instances, has been instrumental in developing, if not creating. A will naturally is discussed, and the idea of continuity and permanency of the trusteeship or executorship in the form of the trust company, becomes well rooted. He learns of many cases where the trust company has proved the wise and disinterested counsellor of the family, where it has economically and capably evolved a tangled estate into one arranged on clear well defined business lines affording steady income derived from safe investments.

Outlook Has Bright Hue.

These are some of the pleasant trust company results arising out of the present growth of the Canadian Northwest, and which must continue while the present "invasion" lasts, which it is confidently expected will be for many years to come, for this is in reality the last great west. The world offers no other similar field for immigration, and with about two hundred million acres of wheat land with less than eight per cent. of it under cultivation, countless homes, with unrestricted freedom are being offered to the tenant farmers and unemployed of Britain, the downtrodden and oppressed of Continental Europe, and those of the United States who can no longer acquire homesteads in the best grain growing and stock raising areas of the Middle West and Western States.

The average Canadian trust company conducted on average lines of policy, with average care and conservation, cannot fail in 1913 to eclipse what has already been proved to be the best year in the Northwest, and that through the marvellous growth in population and concomitant wealth.

◆

SCOPE IN CANADA FOR LOAN COMPANIES.

That there was plenty of scope for loan societies in Canada, making it superfluous to want to lend money outside the Dominion, was the opinion expressed by Hon. W. T. White, before the banking and commerce committee the other day when the bill to incorporate the General Loan Company of Canada was under consideration. Clause 18 of the bill (for which Mr. Knowles, of Calgary, was sponsor) would have empowered the directors to extend their business outside of Canada; but Mr. J. A. Aikins (Brandon) took exception to the clause, arguing that there should be at least restriction of the amount to be loaned outside Canada. In this he was supported by Major Currie (Simcoe), who alluded to the losses sustained by the Sovereign Bank by lending in Alaska. The minister of finance stated that generally speaking, loan companies did not carry on business outside Canada, as there was a better field for them here than anywhere else. He did not see why such companies should want to have buildings outside of the Dominion. The clause was therefore held over.

Another matter of discussion was the eleventh clause under which the company sought power to borrow and receive money provided that the total of the company's liabilities to the public outstanding from time to time should not exceed four times the amount of paid-up and unimpaired capital; also that the amount held on deposit should not at any time exceed the aggregate amount of paid-up capital and cash in hand. Mr. Aikins contended that loan companies should not be given power to receive money on deposit without satisfactory margin in the shape of quick assets.

The minister of finance pointed out that some of the most successful loan companies were taking deposits and enjoyed a high degree of credit. No institution was prepared at any one time to liquidate all its liabilities but most of them were able to rely on quick assets and on a line of credit with banks both Canadian and overseas. He agreed, however, that due notice should be required of depositors for withdrawal so that societies should not be embarrassed. The clause was adopted without amendment.

In regard to the securities on which money might be lent, Mr. McCurdy moved to omit a clause which mentioned stock of any chartered bank in Canada. Major Currie strongly objected to any interference with this provision, which he said was found in all such acts and would not be opposed even by the rankest Fabian in England. Mr. Knowles also took this view, saying that no objection had ever been raised before. The amendment of Mr. McCurdy was lost and the clause adopted.

◆

The Royal Bank of Canada has opened a branch at Regina, North End, Sask.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Dashwood, Ont.—January 13.—Flax mill. Loss, $5,000. Cause unknown.

Estevan, Sask.—January 20.—Town Hall. Loss, $3,500. Cause unknown.

Delisle, Sask.—January 7.—Masonic Hall. Loss slight. Cause unknown.

Mikado, Sask.—January 9.—Roe Bros.' residence. Loss and cause unknown.

Parrsboro, N.S.—January 19.—Mr. A. Sear's store. Loss and cause unknown.

Duck Lake, Sask.—January 23.—Queen's Hotel. Loss, $50. Cause unknown.

Deseronto, Ont.—January 27.—Bayley's drug store. Loss, $4,000. Cause unknown.

Alask, Sask.—January 11.—Mr. B. L. Stanton's mill. Loss and cause unknown.

Sydney, N.S.—January 22.—Mr. I. Green's store, Victoria Road. Loss, $3,500.

Constance, Ont.—January 20.—Mr. W. Cook's residence. Loss and cause unknown.

Nanaimo, B.C.—January 16.—Mr. Mahon's residence. Loss and cause unknown.

St. Catharines, Ont.—January 22.—Ellis House stables. Loss, $500. Cause unknown.

St. Thomas, Ont.—January 18.—Mr. G. V. Abdey's shed. Loss, $40. Cause unknown.

Berlin, Ont.—January 26.—Berlin Leatherette Company's works. Loss and cause unknown.

West Bolton, Que.—January 18.—Mr. C. Goram's residence. Loss and cause unknown.

Morden, Man.—January 16.—Midland Railway's water tank. Loss and cause unknown.

Knowlton, Que.—January 24.—Mr. C. Gorham's residence. Loss and cause unknown.

Ferrybank, Alta.—January 13.—Mr. W. Herrick's residence. Loss and cause unknown.

Moncton, N.B.—January 16.—Mr. J. B. Magee's residence. Loss and cause unknown.

Raymond, Alta.—January 3.—Mr. E. Davis' residence. Loss, $100. Cause, defective flue.

Morrisburg, Ont.—January 27.—Morrisburg school. Loss, $1,000. Cause, overheated furnace.

Swan River, Man.—January 15.—Dwelling car, occupied by Mr. S. Pico. Loss unknown. Cause, stove.

Carman, Man.—January 18.—Mr. R. Emmond's residence. Loss, $2,000. Cause, unknown.

Brussels, Ont.—January 18.—Grey Township school house. Loss slight. Cause, incendiary.

Ottawa, Ont.—January 20.—Woodroffe public school. Loss unknown. Cause, overheated stove.

Rapid City, Man.—January 21.—Mr. E. Hill's residence. Loss unknown. Cause, child carrying light.

Eburne, B.C.—January 13.—Mr. A. Andrews' residence, Shannon Place. Loss and cause unknown.

Edmonton, Alta.—January 20.—Mr. F. Belter's residence, Fraser Avenue. Loss and cause unknown.

Yarmouth, N.S.—January 21.—Yarmouth Trading Company's premises. Loss and cause unknown.

London, Ont.—January 25.—Canadian Pacific Railway box car of ale. Loss, $600. Cause unknown.

Lytton, B.C.—January 13.—School house. Loss unknown. Cause, probably overheated furnace.

Chatham, Ont.—January 18.—Mr. W. Drader's residence, 17 Cloverdale Avenue. Loss and cause unknown.

Portage la Prairie, Man.—January 24.—Hudson Bay Company's store. Loss, $95,000. Cause unknown.

Olds, Alta.—January 16.—Mr. G. Hall's residence. Loss, building, $1,000; contents, $500. Cause unknown.

McLean, Sask.—January 21.—Lake of the Woods Milling Company's elevator. Loss, $8,700. Cause unknown.

Victoria, B.C.—January 21.—Pacific Garage Company's premises. Loss unknown. Cause, engine back-firing.

Church Point, N.S.—January 21.—Mr. L. Melanson. block and barn. Loss, $5,000. Cause, lamp explosion.

Wiarton, Ont.—January 22.—Mr. T. J. Moore's novelty Works. Loss, $4,000; partially insured Cause, furnace.

Leslieville, Alta.—January 17.—McKinnon Bros.' store. Loss, building, $6,000; contents, $6,000. Cause unknown.

Souris, P.E.I.—January 14.—Messrs. A. Currie & Company's store. Loss, $4,000. Insured. Cause, lamp exploded.

Chicoutimi, Que.—January 20.—Messrs. Xavier and Gognon's store. Loss, $4,000; partially insured. Cause unknown.

Dundalk, Ont.—January 17.—Mr. S. McDowell's residence. Loss unknown. Insured in Dufferin Farmers' Mutual.

Orillia, Ont.—January 16.—Canadian Refining a Smelting Company, Atherley Road. Loss and cause known.

St. Scholastique, Que.—January 26.—Mr. J. Beaucham residence. Loss, $2,500. Cause, coal oil explosion. C death.

Belleville, Ont.—January 13.—Mrs. Smith's residen Mill Street. Loss, building, $50; contents, $100. Ca unknown.

Cayuga, Ont.—January 17.—Norfolk Fertilizer Pla owned by Messrs. Jaques and Son. Loss, $5,000. Ca unknown.

Lake Edward, Que.—January 24.—Quebec and Lake John Railway station. Loss unknown. Cause, gasoline us to light fire.

South Vancouver, B.C.—January 13.—Dr. Bride's re dence, 46th Avenue and Fraser Street. Loss slight. Cau overheated furnace.

Port Maitland, N.S.—January 10.—Mr. H. Crosby's re dence. Loss unknown. Insurance, Atlantic Mutual Co pany, $1.000. Cause, chimney.

Port Arthur, Ont.—January 17.—Mr. M. Read's re dence, Algoma Street South and Dufferin Street. Lo $1,000. Cause, overheated stove pipe.

New Westminster, B.C.—January 15.—Mr. C. Harve residence. Loss, building, $200; contents. $50. Buildi insured for $1,500. Cause unknown.

Haileybury, Ont.—January 28.—Leslie block. Loss, $ 000, divided among Messrs. F. Leslie, D. Jacobi, C. Graves, S. Lynch and others. Cause, overheated stove.

Quebec, Que.—January 21.—Warren's store, St. Urs and St. John Streets. Loss and cause unknown.

January 24.—25 Patrick Street. Loss and cause known.

Smith Falls, Ont.—January 24.—Steam Laundry and deau Theatre. Loss, $3,000. Cause unknown.

January 27.—Messrs. James Bros.' butcher shop. L unknown.

Maple Leaf, Alta.—January 8.—Mr. J. Old's residen Loss and cause unknown.

January 10.—Maple Leaf mine wash-house. Loss cause unknown.

Burlington, Ont.—January 20.—Mr. W. Greer's ho Loss, $530. Cause unknown.

January 24.—Dalton's basket factory. Loss, $15, Cause unknown.

Fort William, Ont.—January 23.—Mr. A. Paul, 6 Simpson Street, owned by McCall and McGillivray. L building, $2,000; contents, $9,000. Insurance, $9, Cause unknown.

Manitou, Man.—January 26.—Normal School. L $3,000. Insurance, Commercial Union and Hartford, $3 each, and Queen and British America, $2,000 each. Ca defective furnace.

Forthill, Ont.—January 18.—Mr. Smith's residence. L building, $500; contents, unknown. Messrs. Romp Savigny's premises also damaged. Loss unknown. Ca supposed defective chimney.

Regina, Sask.—January 18.—Mrs. Corley's reside Loss slight. Cause, thawing out pipes.

January 22.—Massey-Harris building. Loss unkn Cause, can of japan exploded.

North Vancouver, B.C.—January 14.—Mr. Dawson's residence, St. Andrew's Avenue. Loss, $1,200. Cause known. Mr. Burmester's residence, 15th Street, and North Vancouver Esplanade had small fires. Loss and ca unknown.

Brandon, Man.—January 21.—Canadian Northern way's nine box cars. Loss, $8,000. Cause, suppose cendiary.

January 25.—137½ Colborne Street. Loss, $50. C defective stove pipe.

Galt, Ont.—January 27.—Fraser Hardware Compa store. Loss, $40,000, distributed as follows: Building o by the Fraser Hardware Company at $12,000, and stock 000, insurance about one-half; J. Peard, loss $5,000, co by $5,000. Cause unknown.

Woodstock, Ont.—January 18.—Messrs. Whitelaw Company's foundry. Loss, building, $25; contents, Insured. Cause, overheated mould.

January 24.—Canadian Pacific Railway refrigerator Loss, $600. Cause unknown.

Trenton, Ont.—January 25.—Sutcliffe's store, J Haines, boots and shoes, Hooey's liquor store, Shuric's store. Loss, $75,000. Cause unknown.

January 27.—King George Hotel and other pren Loss, $1,000. Cause unknown.

Vancouver, B.C.—January 17.—355 Harris Street. unknown. Cause, defective flue.

January 20.—Earlscourt Hotel. Loss, $5,000. C stove overheated. Mr. A. J. Robinson, 1347 Seventh A East. Loss, $2,000. Cause unknown.

Moose Jaw, Sask.—January 14.—Rear of City Hotel, er pile. Loss, $10. Cause, live coals in ashes.

anuary 15.—Samuel Gordon's residence, 110 Athabasca t. Cause, stove pipes on fire. No damage.

anuary 17.—Charles Baker's residence, 37 Lillooet t. Cause, stove pipes on fire. Damage slight.

anuary 19.—W. M. Lowe's residence, 41 Clifton Avenue. $10. Cause, joist built into chimney.

anuary 20.—M. Swailes' residence, 183 Thirteenth Ave- Loss, $125. Cause, using gasoline to light fire, gaso- exploded. Mr. Swailes is likely fatally burned.

Winnipeg, Man.—January 20.—Mr. J. Patterson's store, et Square. Loss, $2,000. Cause unknown. Canadian ic Railway shops. Loss, $300. Cause, overheated stove.

January 22.—Mr. W. Gibson's residence, Ottawa Street, nan. Loss, $800. Insurance, $650. Cause, overheated

January 24.—Manitoba College. Loss slight. Cause, of kindling set alight. 334 King Street. Loss, $150. e, lamp set decorations alight.

January 27.—818 Main Street, Harrison Bros.' drug Loss, building, $6,000; Messrs. Harrison, $12,000. e unknown.

Toronto, Ont.—January 24.—Stable, rear 98 Dowling ue, owned by Grand Trunk Railway. Loss, $1,500. e, supposed tramps.

January 24.—Messrs. J. P. Reed, E. Boyce, John A. Eby D. McGill's residences, Danforth Avenue, owned by Mr. ucas, 377 Spadina Avenue. Loss, buildings, $2,000; ents, $1,400. Cause, overheated furnace.

January 25.—332 Adelaide Street West. Loss, building, ; contents, $200. Cause, lamp exploded.

January 27.—Mr. J. B. Laidlaw's automobile. Loss $300. se, engine back-firing. 332-334 Adelaide Street West. , $250. Cause, upset lamp.

Montreal, Que.—January 22.—Mr. E. Donadieu's pre- s, 9 Lagauchetiere Street East. Loss unknown. Cause, ed gasoline.

January 23.—507 Guy Street. Loss and cause unknown.

January 24.—Mr. J. B. Girrard's residence, 7 Place Fen- Loss unknown. Cause, overheated stove.

January 25.—Mr. J. S. Teskey's store, St. Catharine et West, Westmount. Loss and cause unknown.

January 26.—864, 864A, 866, 868, 870 Victoria Avenue, treal. Loss, $25,000, divided as follows: The Misses Tait, oo; Mr. Norton, $1,000; Mr. Rodgert, $1,500; Miss rson, $7,500, and Mr. Tighe, $7,000. Cause unknown. St. Dominique Street, occupied by Mr. D. Cohen. Loss, oo. Cause unknown. 278 Sanguinet Street. Loss, oo. Cause, match or candle.

January 27.—795 St. Dominique Street. Loss, $3,000. se unknown. 278 Sanguinet Street. Loss, $2,500. Cause nown.

Saskatoon, Sask.—January 5.—1228 Avenue J South. s slight. Cause, overheated stove.

January 6.—520 Avenue H South. Loss, $100. Cause, ing apparatus. Canadian Northern Railway box car. s unknown. Cause, overheated stove.

January 7.—Office and apartments 203 Second Avenue th. Loss slight. Cause, Coal oil stove exploded.

January 9.—515 Fifth Avenue North. Loss slight. Cause, rheated stove pipe.

January 10.—Poolroom, 320 Second Avenue South. Loss cause unknown.

January 11.—224 Fourth Avenue South. Loss slight. se, overheated stove.

January 14.—1021 Avenue B North. Loss slight. Cause, hen range.

January 15.—802 Broadway. Loss slight. Cause, gaso- explosion.

January 17.—Garage, 19th Street and Avenue E. No Cause, chimney.

January 20.—Cushing Bros.' lumber mill. Loss un- wn. Cause, thawing out pipes.

PERSONAL NOTES

Mr. J. L. Bowman, of Messrs. Harvey and Bowman, has been elected president of Dauphin, Man., board of trade.

Mr. H. W. Murray, of Murray, Mather and Company, has left for England and the continent. Mr. Murray will probably be gone about six weeks.

Mr. W. F. Learmont, joint manager of Messrs. G. A. Stimson and Company's London office, will be at the head office at Toronto for a few weeks.

Mr. James Manchester and Dr. W. W. White, both of St. John, N.B., president and vice-president, respectively, of the Bank of New Brunswick, have been added to the board of the Bank of Nova Scotia.

Mr. W. Cavendish Macneill, of Messrs. G. A. Stimson and Company, Toronto, will shortly visit San Francisco en route for Honolulu. His tour will be an extended one and he will probably not return to Toronto until May.

Mr. J. B. Morgan, president of Edmonton Life Underwriters' Association who for over four years has been district agent at Edmonton for the Great West Life Assurance Company, has been appointed manager for Vancouver Island. Mr. Morgan was the recipient of a valuable desk from the agents and staff on his leaving for Victoria. The Great West Company's office being at 109 Union Bank Building, Victoria.

Mr. F. H. Ward has resigned the position of vice-president of the Canadian Consolidated Rubber Company, but will remain a member of the executive committee and a director of the company. He will in future be associated with Mr. D. Lorne McGibbon in the latter gentleman's many enterprises. Mr. T. H. Reider, also vice-president and treasurer of the rubber company, will become general head of the consolidated company.

OPPOSED TO GOVERNMENT BANK INSPECTION

Premier Borden Speaks on Bank Act—Question of Shareholders Audit

Premier Borden expressed himself opposed to government inspection of banks this week during the second reading of the bill respecting banks and banking at Ottawa. He did not think the government should be called upon to supervise transactions of the chartered banks for which the shareholders and directors should be held responsible. It should take precautions to protect the public and depositors. It should be possible for the shareholders to appoint competent auditors who would be above suspicion of collusion with the directors.

Mr. E. W. Nesbitt thought it would be unwise for the government to undertake the inspection of all the banks and their branches, and suggested the appointment of an inspector by the Bankers' Association, and of a government inspector to decide any dispute between the former official and a bank.

Minister Should Prepare Table.

Much had been said about the large profits of the banks, said Mr. Borden, and he thought that the Minister of Finance would do well to have prepared a table showing just how much those profits were and to what extent shareholders had contributed to reserves. He believed, from his knowledge of a bank with which he had formerly been connected, that about 80 per cent. of the amount of reserves of banks had been paid in by shareholders. He thought that no shareholder was paid more than 4 or 4½ per cent. on his investment in a bank, while investors in other enterprises received 8, 10 or 12 per cent. on their money.

Reference had been made to the desirability of establishing a great central bank in Canada. He did not know that there was any necessity for such an institution. It had been asserted that there was too great a tendency toward amalgamation. Some member had spoken of the question of inspection of audit of banks, and had asserted that the majority of frauds had occurred in head offices.

To Prevent Frauds.

The Premier agreed that steps should be taken to prevent such frauds and to ensure the stability of banks. It had been suggested that the government through the Department of Finance should undertake the control of the actual operation of banks, dictate the amount of loans, and the interest to be paid. Such matters should be left to the officers of the banks. The affairs of the banks as they referred to the shareholder should be left to the officers and directors, subject to the conditions that there should be some precautions in the interest of the general public and of the depositors, and to ensure the carrying out of the provisions of the Bank Act.

Mr. Martin, of Regina, differed with the Premier as to the profits of banks. He said that the Bank of Nova Scotia last year earned 23 per cent. on its paid-up capital, the Bank of Commerce 11, the Merchants 10, and the Bank of Montreal 12 per cent. Depositors should receive higher interest on their money. The banks should be forbidden to ask or receive on loans a greater rate of interest than that fixed by parliament.

He suggested that banks be required to register warehouse receipts in their possession for the protection of other creditors. He also expressed the view that the clause of the bill permitting banks to make loans on the security of farmers' grain and cattle would not prove of any great value, advocated government audit of the head offices of the 24 chartered banks, and asked for an investigation of the affairs of the Banque Internationale.

◆

BIG LUMBER COMPANY WILL ENTER QUEBEC.

Mr. John Hall Kelly, M.L.A., for Bonaventure, acting on behalf of the St. Lawrence Pulp and Lumber Corporation, a company formed under the laws of the State of New York, filed with the secretary of the province of Quebec the necessary documents in order to authorize the company to do business in that province. The authorized capital is four millions, paid up, two millions of which will be immediately invested in the province in pulp and paper mills and in the lumber business. For the requirements of the Quebec Joint Stock Company Act, the head office of the new company will be at New Carlisle County, Bonaventure, with Mr. Kelly as the Canadian legal representative.

◆

Mr. F. A. Brodie, who has been manager of the Vancouver branch of the Bank of Toronto, has been appointed manager of the banking and trust departments of the Northwest Trust Company, Limited, Vancouver.

BRITAIN'S PRODUCTION STATISTICS

First Returns Are Now Available—Various Groups—Summary of Results

There has just been issued a 1,000-page blue book whic
is the result of the Census of Production Act, of 1906, in England.

The delay in its issue is pardonable, considering th enormous bulk of the statistics that had to be collated, th fact that the machinery set up for their collection was new and the circumstances that several powerful trade interest were opposed to the innovation.

For the purposes of the enquiry the trades of the countr have been classed in the following groups:—

Mines and quarries; iron, steel, engineering and shipbuilding; metal trades, other than iron and steel; textile clothing; food, drink and tobacco; chemical and allied trades paper, printing, stationery, and allied trades; leather, canva and india rubber; timber, clay, stone and building; miscellaneous, and public utility services.

Gross and Net Output.

In summary form the results of the census are shown a follows:—

Gross output (selling value or value of work done)—England and Wales, $7,450,000,000; Scotland, $1,040,000,000; Ireland, $335,000,000—United Kingdom, $23,725,000,000.

Materials used (cost)—England and Wales, $4,340,000,000; Scotland, $585,000,000; Ireland, $215,000,000—Unite Kingdom, $5,140,000,000.

Work given out (amount paid to other firms)—Englan and Wales, $95,000,000; Scotland, $25,000,000; Ireland, $5,000,000—United Kingdom, $125,000,000.

Net output (excess of gross output over cost of material and amount paid to other firms)—England and Wales, $3,015,000,000; Scotland, $430,000,000; Ireland, $115,000,000—United Kingdom, $3,530,000,000.

Persons employed (except outworkers, average number)—England and Wales, 5,808,269; Scotland, 885,403; Ireland 291,304—United Kingdom, 6,984,976.

Important and Valuable Returns.

Net output per person employed—England and Wales £104; Scotland, £98; Ireland, £78—United Kingdom, £102

Horse-power of engines at factories, mines, etc.—(Abou one-quarter is used in the production of electricity for powe and lighting)—England and Wales, 9,097,860 horse-power Scotland, 1,397,733 horse-power; Ireland, 259,407 horse power—United Kingdom, 10,755,009 horse-power.

To the sum of $3,560,000,000 shown above as the valu of the net output may be added $250,000,000 in respect o about 1,000,000 to 1,250,000 persons whose occupations cam within the scope of the census, but about whom returns wer not furnished.

This is the first time in British commercial history tha such particulars have been available, and their importanc and value is unquestionable.

◆

KINGSTON'S FIRE WASTE

Kingston's, Ont., loss from fire during the year wa $41,053.08, the loss on buildings being $8,247.83, and o contents, $32,805.25. The total insurance on the building and contents was $1,169,200, divided as follows: Building $157,600; contents, $269,200; buildings and contents together, $900,000.

The causes of the fires were: Chimneys, 19; electr wires, 12; rubbish burning, 11; smoke mistaken for fire, 8 sparks from chimneys, 5; false alarms, 5; oil lamp ove turned, 5; thawing frozen water pipes, 4; unknown cause, 4 children playing with matches, 4; lighted matches breakin 4; grass on fire, 3; defective chimneys, 8; hot ashes, 2; r call to previous fires, 2; lightning, 2; gasoline, 2; spark from forge, 2; asphalt melting kettle, 2; lighted match carelessly thrown away, 2; spontaneous combustion, 1; usin hot iron to enlarge hole in wood, 1; automobile, 1; incendia (boys and old building), 7; coal oil stove, 1; Chinese la tern, 1; marsh on fire, 1; stove too close to partition wall, 1 dog scratching matches, 1.

Fire Chief Armstrong draws attention in his report the need of more hydrants, dangers accruing from buildin used for bazaars, etc., the obstructing of windows by a vertising signs, and to danger to firemen through roadwa being opened up without notice being given to fire depar ment.

The British Dominions General Insurance Compan Limited, of London, England, has been licensed to transa fire insurance in Saskatchewan.

OVERNMENT SAVINGS BANK INTEREST

ıld Rate be Raised?—Community Loses Use of Money—Previous Changes

BY H. M. P. ECKARDT

A dispatch from Ottawa, covering questions asked in louse of Commons, contained one item possessing inter- or the banking community and for those who have sion to borrow from banks. Replying to Mr. Verville. abor member for Maisonneuve, the postmaster-general d that the government had under consideration the mat- f increasing the rate of interest paid to depositors in ost office savings bank.

Seeing that the question of a change in the government is under consideration it will be well to review the tion as now existing and to trace the causes of the ges made in recent years. The rate now in force as re- s deposits in the two branches or departments of the nment savings banks, is 3 per cent. That rate has pre- d for the past 15½ years—since July 1st, 1897. For y eight years prior to July, 1897, the government rate 3½ per cent.; and prior to October 1st, 1889, the deposit- the government banks received 4 per cent.

ts of Government Action.

n 1889 and 1897 the government was a strong competitor e chartered banks for the available deposit fund of the try; and while this competition served to help the fin- s of the public treasury what the treasury gained was bly more than counterbalanced by what the business ests of the country lost. In order to hold their deposits hartered banks were obliged to pay the same rate of est on deposits as the government allowed. Thus the nment's action in paying a high rate of interest had a ble effect in forcing the farmers, merchants, and other es who borrowed from the banks, to pay high rates of est on loans and discounts. Taking the 4 per cent. rate prevailed before 1889 it is easy to see that 4 per cent. posits necessarily meant 7½ and 8 per cent. on loans and unts. The annual interest cost on $1,000,000 deposits at rate would be $40,000. Supposing a bank used the s in discounting at 7½ per cent., it could only use $750,- t that rate, as 25 per cent. would be required as cash ve. At 7½ per cent. $750,000 would give an annual re- of $56,250; and the apparent profit would be $16,250, or le more than 1½ per cent. on the $1,000,000 of deposits. t is to be remembered that the bank has to pay salaries other expenses incidental to the operation of the numer- deposit accounts footing up to the aggregate of $1,000,- and incidental to the working of the discount accounts loans comprising the $750,000 used. And the expense oring and guarding the $250,000 reserve money is also taken into account. These items of expense would inly absorb $6,000 or $7,000 per year; and the actual al profit of the bank through taking deposits at 4 per and lending at 7½ would therefore be limited to 1 per or a fraction of 1 per cent.

Hence we see that the effect of the high rate paid by the nment on deposits was to force the farmers and busi- men to pay 7½ and 8 per cent. on money borrowed from anks; and in that way it served to discourage enterprise ghout the country.

be Used for Local Purposes.

The government in power in 1889, and the government was in power in 1897, gave due consideration to these s; and probably because of this consideration the rate out down to 3½ per cent. in the first instance and to 3 per in the second. There is another point which is to be into consideration. It is that when the funds of a community go into a local branch bank on deposit, are available there for the purposes of all good farmers, hants, and other parties who have occasion to borrow. money can thus work for the development and upbuild- of the locality. But when any funds are deposited in ost office the community gets no benefit—for they are ferred to Ottawa and expended for government pur- s. In other words the funds deposited by a given com- ty in the government bank cannot be borrowed by the le of that community or of any other community; they whisked away at once.

Per Cent. Only Paid.

The United States government was obliged to take cog- nce of this when establishing its system of post office gs banks. The law in the States requires every post depositary to redeposit at once in local banks all eys received on deposit; and in this way the funds re- at the service of the community to which they belong. her thing to be noted in connection with the United s system is that the government was careful to pay a of interest full one per cent. lower than the rate ordinarily paid by banks. All the United States government pays is 2 per cent.

If the authorities at Ottawa should now decide to pay 3½ per cent. while the chartered banks were paying 3, their action would constitute a reversal of the policy followed in the recent past.

Happenings at Previous Changes.

It is not clear whether the banks would be thereby forced to raise their rate; but if they were forced to follow suit, it would mean higher discount rates for the farming, mercantile, and industrial interests. If the banks did not follow suit and a movement of funds ensued from the banks to the government, it would mean the curtailment of bank advances to the extent of three-fourths of the amount of deposits lost. In either case the country at large would suffer injury.

It is interesting to note the course of the government deposits after the former changes of the interest rate. In the first case the rate was changed October 1, 1889. The balance of deposits June 30th, 1889, was $42,950,000; June 30th, 1890, $41,010,000; June 30th, 1891, $39,400,000; June 30th, 1892, $39,530,000; June 30th, 1893, $41,840,000. And after that it continued to increase. The second change was on July 1st, 1897. The balance June 30th, 1897, was $48,930,000; June 30th, 1898, $50,110,000; June 30th, 1899, $50,240,000; June 30th, 1900, $53,140,000. Thus the reduction to 3½ per cent. caused rather extensive withdrawals of deposits; but after the reduction to 3 per cent. the increase of deposits continued.

LETHBRIDGE EXTENDS LIMITS.

Lethbridge is expanding, due to a natural growth, and the provincial legislature has been invoked to approve of a new commission form of charter, which provides for three paid commissioners and also for the extension of the city limits to include some 2,000 more acres, taking in Stafford village, a mining settlement of 600 people adjacent to one of the large coal mines. The new limits will also include the industrial site owned by the city. To assure competitive railway service the city contemplates constructing its own spur tracks and switches and forever control them within the limits of the industrial territory.

Lethbridge is becoming the centre of a great mixed farming section and will have its first annual fat stock show in April.

Contracts were let this week for the Lethbridge creamery, the building to cost $4,000 and the machinery $6,000. The construction will begin at once, and the plant in operation by March 1. The milk contracts warrant the manufacture this season of 150,000 pounds of butter, while pasteurized milk will be supplied the public by an up-to-date delivery system.

Magrath breeders of blooded swine contemplate making that district the centre for pure-bred hogs in Southern Alberta. Mixed farming is increasing, and scores of farmers have been buying pigs this winter to engage in the hog industry.

BRITISH COLUMBIA UTILITIES DEVELOPMENT

(Staff correspondence.)

Vancouver, B.C., January 27.

The British Columbia Electric Railway Company plans the construction of additional repair and car-making shops in Burnaby municipality, in addition to the shops they already have at New Westminster. The shops will employ about 500 men. The company's system on the mainland, as well as on Vancouver Island, is constantly growing greater, and the car question is now a big one with it.

The new line to Eburne over Oak Street is now in operation. This line runs directly south from Broadway to the Fraser River, Oak Street being five blocks east of Granville. The ultimate plan is to have a double track down Granville to Eburne, when a belt line will be run around Oak, Broadway, Granville and Eburne.

The public service corporations are doing what they can to keep pace with progress in the districts, and the fact that they are kept busy shows the development that is taking place. The British Columbia Telephone Company during the past year modernized its systems in Nanimo and New Westminster and built a fine new exchange in Victoria. All its small town exchanges were put on a basis unsurpassed by those of any small towns on the continent, the object being to be prepared for future growth. Now it is proposed to carry out much construction in the neighborhood of Vancouver and in the city itself. Estimates have been approved for construction in outlying districts, and expenditure this year will be very large. In Vancouver, the company expects to have a six-story concrete building in place this year for its plant department, and it is also proposed to erect an eight or ten story building for a new down town exchange in place of its present structure. The site has been bought for the latter exchange. These are only the outlines of the principal improvements proposed.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Abitibi Pulp and Paper Mills, Limited.—The organization of the Abitibi Pulp and Paper Mills, Limited, was completed when the following directors were elected:—Messrs. F. H. Anson, Shirley Ogilvie, Victor E. Mitchell, D. Lorne McGibbon, Sir Thomas Tait, all of Montreal; Mr. James Playfair, Midland, Ont.; Hon. George Gordon, Cache Bay, Ont.; Mr. J. A. McAndrew, Toronto, Ont.; Mr. George E. Challis, Toronto.

The following officers were chosen:—Mr. F. H. Anson, president; Mr. Shirley Ogilvie, vice-president and treasurer; Mr. J. McAndrew, secretary; Mr. E. C. Morris, assistant secretary and treasurer.

The company started construction work some time ago, and at present has a force of over 200 men at work on the company's property.

The underwriting of the company's securities is being taken up privately and a public announcement will be forthcoming shortly. The authorized capital is $1,500,000 bonds, $1,500,000 preferred, and $3,500,000 common stock. Of the bonds and preferred stock, it is proposed to issue $1,000,000 each immediately.

Crown Reserve Mining Company.—The annual meeting of Crown Reserve Mining Company was held recently when a large number of shareholders attended.

According to the annual statement given the shareholders the surplus for 1912 totals $821,392.90, as compared with $764,851.76 in 1911.

The statement in detail is as follows:—

Assets.

Mining lands, minerals and mining rights, building, plant and equipment, etc.	$2,076,102.72
Stores and supplies	11,667.13
Ore on hand	50,000.00
Due from smelters	251,528.11
Cash on hand and in bank	352,896.62
McEnaney purchase price payments, and development, etc.	269,080.97
	$3,011,275.55

Liabilities.

*Capital stock	$1,099,957.00
Royalty accrued and accruing, Ontario Government	72,018.96
Accounts payable	29,465.99
Dividend due 15th January, 1913	88,440.70
Surplus	821,392.90
	$3,011,275.55

Mexican Light and Power Company.—For the year 1912 net earnings of the Mexican Light and Power Company were $6,478,088, an increase over 1911 of $884,905. The Mexico Tramways Company had an equally successful year, net earnings being $3,606,146, an increase over 1911 of $431,528.

Following are the statements for December and for the year:—

The Mexican Light and Power Company, Limited, statement of combined earnings and expenses:—

December—

	1911.	1912.	Inc.
Gross earnings	$ 766,285	$ 809,484	$ 43,199
Net earnings	565,021	615,931	50,910
Gross earnings from January 1	8,246,349	8,918,790	672,441
Net earnings from January 1	5,593,183	6,478,088	884,905

Mexico Tramways Company, statement of earnings and expenses from traffic only, as advised by cable, for the month of December, 1912, (Mexican currency):—

	1911	1912	Inc.
Total gross earnings ...	$ 565,629	$ 652,102	$ 87,473
Operating expenses .	270,703	296,000	17,206
Net earnings .	$ 285,836	$ 356,103	$ 70,267
Ag. gross earnings from January 1	6,176,070	6,813,046	636,076
Ag. operating expenses from January 1	3,002,352	3,206,900	204,548
Ag. net earnings from January 1	$3,174,618	$3,606,146	$431,528

National Breweries, Limited.—At the fourth annual general meeting of shareholders of the National Breweries, Limited, the old board was re-elected with the exception that Mr. E. C. Pratt retired and Mr. Lionel A. Ekers was elected to take his place. The directors are now: Messrs. A. J. Dawes, Veasey Boswell, G. R. Hooper, G. E. Amyot, N. J. Dawes, H. A. Ekers, D. Robertson, W. O. Ryde, C. Strangman, T. Cushing, C. E. A. Boswell, A. J. Grubert, Gordon Cushing and L. A. Ekers. The following officers were elected for the current year: President, Mr. Andrew J. Dawes; 1st vice-president, Mr. Veasey Boswell; 2nd vice-president, Major George R. Hooper; managing director, Mr. Norman J. Dawes; comptroller and secretary-treasurer, Mr. James D. Hudson; sales manager, Mr. Ernest A. Scott. Captain Hudson, the new comptroller, has been with the company since its organization in 1909 as chief accountant and secretary-treasurer, and is now advanced to the higher position, in which he succeeds Mr. E. C. Pratt, who has rejoined the Molsons Bank. The annual statement presented to the shareholders was considered satisfactory.

Price Bros. and Company, Limited.—Net profits of 4.34 per cent. on the capital stock of $5,000,000 are shown in the annual statement of Price Bros. and Company, Limited, for the year ended November 30th last. The general results of the year's business compare with those of the preceding year as follows:—

	1912.	1911.	Inc.
Profits	$463,716	$393,964	$69,752
Bond interest	246,775	213,708	33,067
Net profits	$216,941	$180,255	$36,686

Net profits in 1911 were equal to 3.65 on the capital stock.

The consolidated surplus account on November 30, 1911, was $718,185. With the net profits from 1912 added to this sum, after deduction of $82,662 for reorganization expenses, which have now been entirely written off, the sum at credit of surplus account at the close of the last year was $852,463.

In commenting on the statement, Mr. William Price, president of the company, says, in part:

"The directors consider these earnings most satisfactory, particularly as the new pulp and paper plant at Kenogami did not commence operations until after the close of the company's fiscal year.

"The directors have not considered it necessary to carry anything to reserve for depreciation on fixed assets, in view of the low figure at which these stand in the books and considering the fact that a considerable part of the cost of improvements to the properties has been charged to revenue.

"During the year $2,557,848.92 has been expended on additions to properties, principally on account of the construction of the company's pulp and paper plant at Kenogami. At this plant operations were commenced on December 1st last, and it is expected that the plant will be running to its full capacity of 150 tons of paper daily May 1st.

"Since the last report, the company has issued $243,333.33 five per cent. first mortgage bonds, making the total issue to date, $5,110,000 of the authorized issue of $6,000,000."

The balance sheet of the company shows some changes owing to the fact that while in previous years the entire share capital and bonds of the [illegible] Pulp Company, Limited, and the Price-Porritt Pulp and Paper Company, Limited, (which are owned by Price Brothers and Company, Limited), have been shown as investments, this year the balance sheet consolidates the affairs of the three companies. The capital surplus (which is the increase in book values of capital assets upon valuation at 10th July, 1910), has been reduced by the amount of goodwill which arises in the consolidation.

The assets of the company are given as $15,[illegible] of which $1[illegible] is in real estate, plant, water powers, etc. The liabilities consist of $5,000,000 capital stock; $5,110,0[illegible] bonds; $1,072,837 accounts and bills payable, etc.; $303,8[illegible] reserve funds; $2,556,681 capital surplus; $852,463 surplus account.

UNITED STATES BUYING OUR MUNICIPALS

The United States continues to patronize Canadian bond ssues. As noted in last week's Monetary Times, $1,093,-25 worth of Vancouver bonds are being sold in the neigh-oring republic, Messrs. Brown Brothers and Company, of ew York, having purchased the issue.

Messrs. W. A. Reid and Company, of Boston and New ork, have bought $950,000 city of Calgary 4½ per cent. chool district debentures, and will offer them on a 5 per ent. basis.

Mr. J. L. Rosenbaum, of Seattle, has purchased $115,000 f the debentures of Duncan, B.C.

It is not unlikely, however, that the buying of our munici-als by the United States during the current year will be large n the aggregate. Last year Canada absorbed 28.42 per ent. of its municipal issues; Great Britain 63.58 per cent.; nd United States 8 per cent.

◆

The Canadian Pacific Railway has refused to join the orth Atlantic Steamship Conference and a rate war may esult.

The Toronto Board of Trade will ask the co-operation of hambers of commerce in Great Britain and the boards of rade in Canada to fight the alleged ocean steamship combine.

BANK BILL GOES TO COMMITTEE

After Mr. White, Minister of Finance, had suggested several compromise amendments to the bank bill, it was referred to the banking and commerce committee for full discussion. Mr. White suggested that in regard to the provision enabling banks to loan to farmers and ranchers on the security of grain and cattle the bill might be amended so as to provide for registration of these loans, thereby guarding against a secret security by the banks, while in regard to the matter of external audit he intimated that the clause might be so moulded as to specify that the auditors appointed by the shareholders shall be men of such standing and capacity as to place them above the suspicion of any collusion with the directors or managers. He further suggested that the committee might well consider the question of making it also compulsory for a representative of the minority shareholders to be appointed if demanded.

◆

TITLE AND TRUST COMPANY'S REPORT

The annual report of the Title and Trust Company, Toronto, as presented at the annual meeting, showed a very satisfactory year's business, the net earnings being at the rate of 19.9 per cent. on the average paid-up capital for the year.

A half-yearly dividend at the rate of six per cent. per annum was paid and the amount of $15,453.47 was added to the reserve, leaving a balance unappropriated to the credit of profit and loss account of $760.02.

The addition to reserve account increased the reserve to over thirty per cent. of the paid-up capital.

In view of the satisfactory showing and the progress that the company had made, the shareholders approved the decision of the directors to call up the balance of the subscribed stock.

BAD NEWS FOR LAND COMPANY

Errors in Design and Miscalculations Were Made by Engineers—Further Money Must be Spent

A considerable further expenditure of time and money is necessary to remedy errors in design and miscalculations made by engineers, is the statement made in a circular issued to the shareholders of the Southern Alberta Land Company. "On October 12th, 1912," it says, "the board instructed Mr. L. H. Taylor, formerly inspector of irrigation to the United States Government and now consulting engineer to a large irrigation enterprise in Mexico, to examine in detail the existing works and the proposed plans for their completion, and to advise the board as to the best means of rectifying any defects which might be found in the work already done, and of improving the plans for the completion of the project.

As to Ultimate Success.

"Mr. Taylor spent three weeks in going over and examining the whole irrigation scheme on the ground, and subsequently discussed the results of his investigation with Mr. R. G. Kennedy, C.I.E., late chief engineer for irrigation, Punjab, India, and now resident in British Columbia. Owing to illness and other causes, Mr. Taylor was unable to complete his report for some considerable time. It was then submitted at the instance of the board to Mr. Kennedy for his opinion. The directors are thus enabled to inform the shareholders of the position of the company's undertaking, and, while they regret that a considerable further expenditure, both of time and money, is apparently unavoidable to remedy the errors in design and miscalculations made by the engineers hitherto employed, they are glad to be able to reassure the shareholders that, subject to the adoption of various suggestions which have been made by Mr. Taylor, there does not seem to be any reason to be apprehensive as to the ultimate success of the enterprise, as both Mr. Taylor and Mr. Kennedy are of opinion that if prompt action is taken water should be available for partial distribution in 1914.

"Mr. Taylor has divided the irrigation works under different heads, showing the defects which he considers to exist in the present construction, his suggestions as to the proper method and his estimates of the probable cost of rectifying such defects.

Two Years' Work Ahead.

"To carry out Mr. Taylor's recommendations will," continues the circular, "it is estimated, occupy a year and a half to two years, but, in view of the steady appreciation which has for years past been taking place in lands in this district, it is not unreasonable to suppose that the additional cost of 3.75 dollars per acre will be more than covered by the natural appreciation in the property during that time. Without, therefore, in any way wishing to minimize the serious character of the mistakes that have been made, the board have every confidence in the ultimate success of the undertaking, and they feel that the shareholders should not allow themselves to be unduly alarmed by the delay and expense entailed upon the company. The delay which must supervene in the completion of the irrigation system can be advantageously used by the company in perfecting its arrangements for the sale of the lands and in negotiating with the Dominion Government with a view to the re-subdivision of the lands on the lines suggested by Mr. Taylor, and the variation of the company's existing water rights.

Will Establish Local Management.

"On this subject Mr. Taylor has pointed out that it would be desirable in the company's interests to get certain modifications made in the present license with a view to enabling the company to draw water from the river at times other than those at present specified. While the directors regret the circumstances which have arisen, they would remind the shareholders that the enterprise was not undertaken until it had been approved by Mr. G. G. Anderson, who had had an extensive experience of irrigation in the United States. The employment of Mr. Grace, to whom the work was entrusted, was most strongly endorsed by Mr. Anderson, and until the failure of the intake nothing occurred to occasion any misgivings as to the works. They fully appreciate that recent events, coupled with the resignation of Mr. J. D. McGregor, who has for six years past been the managing director of the company, necessitate the establishment of a strong and efficient local management, and they are considering what course to recommend in this respect."

◆

Trolley lines of Canada have placed orders for about 5,000 tons of girder rails with the United States Steel Export Company, for delivery at Calgary and Regina. It is understood the Canadian Northern has placed another order for 30,000 tons of rails with United States mills.

INSURANCE AGENTS ARE DIRECT REPRESENTATIVES

State Should Insist on Those Holding Agents' Licenses Being Fit Persons and Qualified for Transaction of Business

A policy of requiring certain qualifications for agents is being generally advocated for all lines of insurance. The agent handles trust funds. He is the direct representative of the company with the insured, and quite generally the insured gets practically all his information, both with regard to the company and with regard to his contract, from the agent, states commissioner H. L. Ekern, of Wisconsin, in his report. He depends upon the agent to aid him in deciding upon the form of policy which he needs. In most cases this decision is shaped almost wholly by the agent. Often the insured does little but pay the premium leaving all the rest to the agent.

Contracts of insurance may affect vitally the entire property of the insured. In life insurance such a contract is more often than not the largest single transaction of the insured and runs through a longer time than any other contract he makes, and is the principal provision for dependants left at his death.

Agents Should Show Fitness.

To entrust this work to men who have betrayed their trust with other companies or who are notoriously slow and unsatisfactory in accounting for funds handled by them or who have little or no knowledge of the contracts they write or how these contracts are affected by the conditions in any particular case, is an imposition upon the public, who rightfully look to the state for protection in regard to their insurance.

Companies do attempt to meet this problem. They often find that necessary information is not at hand. In other cases competition for business leaves little opportunity or inclination to make use of information available. In any event, in actual practice, little can be done to improve conditions unless it can be undertaken through some central agency.

The license issued to the agent, while in fact purely a public record of authority to act for the company, is generally construed by the intending policy-holder as a certificate of fitness and competency. This impression it is difficult, if not impossible, to successfully counteract. Fair dealing with the public, therefore, demands that the state should insist that persons who hold agent's licenses shall have some degree of fitness and qualification for the transaction of the business and that persons who are obviously unfit and unqualified should be barred.

Examination of Candidates Proposed.

The next legislation should make provision for the examination of all candidates for appointments as agents to solicit any kind of insurance, such examinations to be held in connection with the regular examinations conducted by the state civil service commission, on questions to be prepared and passed upon by an appointive non-salaried board, or two or three such boards, upon which persons experienced in life, casualty and fire insurance should be fairly represented. The department of insurance should be charged with the duty of co-operating with such board and performing the necessary clerical work. The issue of licenses should be confined to persons who are approved by such board after examination, and such licenses should be subject to revocation in proper cases for misconduct or violation of law. Provision should be made for the continuance of the rights of present agents under such regulations as shall be fair to them and to those thereafter licensed.

◆

TORONTO SAVINGS AND LOAN COMPANY

The gross earnings of the Toronto Savings and Loan Company last year amounted to $267,501, and after the payment of interest on deposits and debentures, and all expenses of management there remained a net profit of $146,811. To this amount was added $46,421, the balance carried forward from last year, which makes a total sum for distribution of $193,232. This amount was disposed in the following manner:—Payment of four quarterly dividends at the rate of t per cent. for the year, amounting to $100,000; addition to the reserve fund, $40,000; and amount carried forward to profit and loss account, $53,232.

The addition to the reserve fund increases that account to $800,000, making it now 80 per cent of the present paid up capital of $1,000,000.

All payments maturing during the year on the company's investments were satisfactorily met, and the rentals from the property owned by the company were also promptly paid.

The following gentlemen were elected directors for the ensuing year:—President, Hon. George A. Cox; vice-presidents, Messrs. W. G. Morrow and Richard Hall; directors, Messrs. E. W. Cox, D. W. Dumble and H. C. Cox.

CANADIAN CHARTERED COMPANIES

Newest Incorporations Include Varied Interests and Industries—Large Power and Lighting Company

Toronto is the head office of the largest aggregation of capital receiving incorporation this week, namely, the Dominion Traction and Lighting Company, which has a capitalization of $12,500,000. Other large companies are:—

North Alberta Coal Company, Toronto....	$2,000,000
Windsor Arcades, Montreal	2,000,000
McLaren Lumber Company, Toronto	1,250,000
Toronto Structural Steel Company	1,000,000
Anglins', Montreal	1,000,000

The total number of charters granted was sixty-five.

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	26	$19,280,000
Quebec	14	4,546,000
Saskatchewan	9	1,067,000
British Columbia	9	330,000
New Brunswick	7	183,980
	65	$25,406,980

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Ceylon, Sask.—Eby and Stewarts, $4,000.

Prince Albert, Sask.—Saskatchewan Mines, $500,000.

Cranbrook, B.C.—Mountain Pine Agencies, $50,000.

Regina, Sask.—Western Canada Finance Company, $20,000.

Victoria, B.C.—Rogers and Company, $50,000, (investment agents).

Ritchie, J. H. Oldham, J. K. Paul. Toronto Structural Steel Company, $1,000,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock. Ocean Freight Line, $100,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock. McLaren Lumber Company, $1,250,000. R. C. LeVesconte, V. J. Callen, H. Dreamy. Dominion Traction and Lighting Company, $12,500,000. W. A. J. Case, J. B. Taylor, C. G. Lynch. North Alberta Coal Company, $2,000,000. C. B. Lindsey, A. F. White, R. T. Thompson.

◆

DOMINION SAWMILLS COMPANY REORGANIZED

The receivers, managers and the liquidator of the Dominion Sawmills and Lumber Company, Limited, announce that the following have been appointed as the board of Forest Mills of British Columbia, Limited, successors to the business heretofore carried on by the former corporation:—Messrs. J. M. Savage, of Victoria, chairman; R. S. Lennie. barrister; W. J. Blake Wilson, T. Frank Patterson, all of Vancouver, and W. A. Anstie, of Calgary.

Mr. Anstie will occupy the position of executive agent of the board with headquarters in Vancouver. The receivers express their appreciation of the support accorded them during the period of their management of the business which has now terminated.

The Forest Mills of British Columbia, Limited, owns extensive timber tracts in the interior in proximity to its five sawmills located at Three Valley, Taft, Comaplix, Cascade and Nelson respectively, as well as an organization for selling the output in the local and prairie markets.

The bonds of the Dominion Sawmills, Limited, were practically all sold in Great Britain, and the failure of the company did not help the cause of British capital in Canada.

◆

The officers of the board of trade of the combined districts of Matsqui and Sumas have been elected as follows:—President, C. Hilltout; vice-president, H. Alanson; secretary, S. A. Morley; treasurer, B. Gernary.

THE TRAVELLERS INSURANCE COMPANY

The Travellers Insurance Company is as well known in Canada as in its own country. Its headquarters are at Hartford, Conn., but it is doing an extensive business in the Dominion. Its record for the past year shows that the total cash income was $24,172,000. New life insurance issued was $48,462,000. Policyholders were paid $11,431,000. There was an increase in assets during the year of $5,704,000, and in surplus of $909,000. The reserve fund to protect policyholders was strengthened by $4,640,000 and now amounts to $70,901,144.

Among the assets are the following:—Railroad bonds, $26,750,027; first mortgage loans, $25,879,665; loans secured by company's policies, $8,674,159; government and other public bonds, $7,743,975; railroad stocks, $3,907,754; other bonds and stocks, $3,130,053; cash on hand and in bank, $2,442,194; real estate, $1,637,550; bank stocks, $1,409,978.

The total assets amount to $85,628,857. The company's capital is $2,500,000 and surplus $10,453,240. Its record to the end of 1912 is a remarkable one. It has paid to policyholders more than $123,000,000, and has life insurance in force of $280,150,000. The total number of accident policies issued is 6,162,000 and the number of accident claims paid is 607,000. The manager of the company for Canada is Mr. F. F. Parkins, Montreal.

MONTREAL'S TRAMWAYS QUESTION

Monetary Times Office,
Montreal, January 29th.

That the tramways question is greatly interesting the people of Montreal is attested by the fact that, beginning with the campaign made by one of the afternoon papers, the other two English speaking afternoon dailies have fallen into line and now all three devote no inconsiderable space to the discussion of the project.

One of the papers has obtained the consent of Mr. Duncan McDonald, formerly general manager of the street railway, to act in the capacity of critic and to make a report upon the whole situation. The other paper is making an effort rather to have outside experts called in and the city council seems apparently disposed to compromise.

Meantime, the Builders' Exchange demand that the Tramways Company obtain the privilege of carrying freight, it being declared that unless this is done the cost of building will be greatly increased. The proposal does not appear to meet the views of the city council which is evidently of the opinion that the Tramways Company will not be prepared to pay a proper price for the privilege. And the public have to put up with the growing inconvenience.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended January 14th:—

	1913.	1912.	Increase or decrease.
Canadian Pacific	$1,996,000	$1,349,000	+ $647,000
Grand Trunk	860,353	758,685	+ 101,668
Canadian Northern ...	359,000	241,000	+ 117,600
Temiskaming & N. Ont.	27,151	25,397	+ 1,754

The Canadian Pacific Railway earnings for December, 1912, were as follows:—Gross earnings, $12,219,279; working expenses, $7,823,559; net profits, $4,395,720. For the six months ending December 31st, 1912, the figures are as follows:—Gross earnings, $73,526,191; working expenses, $46,395,039; net profits, $27,131,152. In December, 1911, the net profits were $4,105,730, and for the six months ending December 31st, 1911, the net profits were $24,470,248. The gain in net profits is therefore for December $[illegible],000, and for the six months ending December 31st, $2,660,904.

Canadian Northern Railway's statement of earnings and operating expenses is as follows:—

For December, 1912:—

	1912.	Increase.
Gross earnings	$2,132,000	$300,600
Expenses	1,551,000	223,400
Net earnings	581,000	77,200
Mileage in operation.... .	4,297	441

	July, 1912, to Dec. 31, 1912.	Agg. Inc.
Gross earnings	$12,239,000	$1,905,200
Expenses	7,786,000	1,307,300
Net earnings	3,453,000	507,900
Mileage in operation	4,297	554

NORTH AMERICAN LIFE ASSURANCE COMPANY

Age does not impair the strength and substance of the North American Life Assurance Company. The shareholders received the thirty-second annual statement the other day and the result for the year ended December 31st, 1912, indicated a maintenance of the strong position of one of our leading insurance corporations. While maintaining the good position reached in the previous year, still further progress was made during 1912. New insurance issued including policies revived totalled $7,630,336. Cash for premiums amounted to $1,775,542. The income on investments was $671,346. The expenses, commissions and agents' fees were comparatively small being only $445,247. Claims paid under policies accrued in 1911, were $76,406 and under policies for 1912, $345,658, a total of $422,064. Matured endowments amounted to $165,901; surrendered policies, $94,011; and matured investment policies surrendered, $258,316. Dividends of $166,367 were paid to policyholders and disbursements of $10,246 were made to annuitants.

Among the assets, mortgages on real estate total $4,152,410 and real estate including the company's buildings are placed at a value of $120,836. A large amount of good bonds, debentures and stocks are held. Their value in the financial statement is placed at $6,559,407. The actual market value of these investments is $6,664,600. There is a substantial sum of $73,089 cash in banks. Outstanding and deferred premiums total $307,778; and interest due and accrued, $179,363. Loans on bonds and stock amounting to $155,125 and loans on policies amounting to $1,672,629 were made during the year.

The heaviest item in the liabilities is naturally the assurance and annuity reserve funds, amounting to $11,354,590. Death losses awaiting proofs amount to $72,638. The guarantee fund totals $60,000. The net surplus stands at a gratifying figure, viz., $1,576,045. Of this $105,193 is in excess of market value of bonds, etc., over book value and is not included in the net surplus. Some idea of the importance of the North American Life Assurance Company in our life insurance spheres is gathered from the fact that at the end of 1912 the company had insurance in force amounting to $49,469,581.

RICHELIEU AND ONTARIO FINANCING

The Richelieu and Ontario Navigation Company has secured the endorsation by the commons private bills committee at Ottawa of a bill authorizing the company to increase its capital stock from $10,000,000 to $15,000,000, and also authorizing the company "temporarily" to invest its surplus funds in securities other than those relating to the undertakings of the company as authorized by charter.

This provision caused a brief discussion in the committee. Mr. L. T. Marechal, K.C., who appeared for the company, told the committee that surplus treasury funds not immediately needed for the regular business of the company had in the past been temporarily invested in securities of various kinds, though this had been done perhaps without legal charter sanction. The company now desired formal authorization for such investment. Sometimes, he said, the company had as much as a million dollars in its treasury uninvested. The increase in capitalization was needed for new boats and terminals, and for further extension of the company's business.

Sir Rodolphe Forget said that the company intended to add to its present fleet and to construct extensive new terminals. He added that the investment power sought was intended to be applied only to call loans, and was not for any permanent outside investment.

Major Sam Sharpe, M.P., objected to giving a navigation company unlimited authority to invest in speculative stocks and bonds.

After a short discussion the investment clause was amended so as to provide for temporary investment only of surplus funds.

In the event of certain plans of re-financing of the Richelieu & Ontario Navigation Company being carried out it is understood that the capital stock will be changed from $10,000,000 common stock as at present to $12,000,000 preferred and $3,000,000 common. By this plan the 100,000 shares of the company now outstanding would be exchanged for 100,000 shares of preferred stock and an additional 20,000 preferred shares would be issued. With every four shares of the preferred stock would go one share of common, making a total of 120,000 preferred and 30,000 common shares.

Officers of the Chase, B.C., board of trade, for the ensuing year are: President, G. G. Chase; vice-president, T. J. Kinley; secretary-treasurer, A. S. Farris.

TORONTO BOARD OF TRADE

Mr. G. T. Somers, president of the Toronto Board of Trade, in retiring from that position last week, gave a resumè of the work which the board had done during the past year. Under his energetic presidency the following movements and work were encouraged and transacted: Encouraged good roads movement; worked for the improvement of the Welland Canal; supported harbor commission scheme; advocated viaduct; protested against sale of St. James' Square; dealt with high cost of living problem; favored parçels post system; favored tax reform; appointed traffic expert and organized department; favored Technical School plans; assisted High School of Commerce and Finance; dealt with housing problem, commission government, federal square; advocated Bloor Street viaduct in accepted form; sounded note of warning respecting reckless real estate speculation; fought for widening and extension of Teraulay Street; dealt with Panama Canal question; sent representatives to many important conferences; secured for Toronto next Congress of Chambers of Commerce of Empire; Entertained British manufacturers; banqueted Right Honorable Mr. Borden on his return from Britain, and conducted important membership campaign.

At the close of the address the names of the successful candidates elected to the exhibition board and council were announced as follows:—

Representatives on the Canadian National Exhibition Board: Messrs. W. H. Alderson, D. O. Ellis, George H. Gooderham, M.P.P, Noel Marshall, Joseph Oliver.

Council of the Board of Trade: Messrs. John Aird, Eric N. Armour, J. E. Atkinson, Hugh Blain, W. F. Cockshutt, M.P., K. J. Dunstan, Charles McD. Hay, Arthur Hewitt, George W. Howland, Jno. G. Kent, Hugh Munro, George T. Somers, Jno. Turnbull, D. O. Wood, J. W. Woods.

MANITOBA INSURANCE INSPECTOR'S REPORT

The seventh annual report of Mr. A. E. Ham, the Manitoba inspector of insurance, deals with the various insurance companies licensed to transact business in the province of Manitoba, for the year ending December 31, 1911.

On that date there were 75 licensed insurance companies and fraternal societies doing business under the Manitoba Insurance Act, classified as follows: Fire insurance companies, 39; life insurance companies, 5; hail insurance companies, 5; plate glass insurance companies, 1; accident insurance companies, 1; fraternal societies, 24; total, 75.

There were 131 registered insurance companies and fraternal societies doing business under the Manitoba Insurance Act, classified as follows: Fire insurance companies, 62; life insurance companies, 35; guarantee and accident insurance companies, 21; Registered mail insurance companies, 2; fraternal societies, 4; weather insurance companies, 1; plate glass insurance companies, 4; live stock insurance companies, 1; steam boiler insurance companies, 1; total, 131.

New companies admitted by license in 1911 were: Fire Insurance Company of the State of Pennsylvania, North-Western National Insurance Company, Niagara Fire Insurance Company, Western Union Fire Insurance Company; life: Western Life Assurance Company; fraternal: Loyal Order of Moose.

Transferred from licensed to registered companies in 1911: The Hudson's Bay Insurance Company, National Fire Insurance Company; liquidation: Pioneers' Fire Insurance Company, Brandon, Man.; change of name: Brandon Fire Insurance Company to Canadian Phœnix Insurance Company, February, 1911.

Withdrawals from the province: Michigan Millers' Mutual Fire Insurance Company, Ohio Millers' Mutual Fire Insurance Company.

New companies admitted by registration during 1911: Life—British Columbia Life Assurance Company, Travellers' Life Assurance Company of Canada, Fire—Continental Fire Insurance Company, New York; Employers' Liability Assurance Corporation, Limited; L'Union Fire Insurance Company; Factories Insurance Company. Weather—Canada Weather Insurance Company.

Companies which ceased doing business in 1911: Dominion Plate Glass Insurance Company; London and Lancashire Plate Glass Insurance Company; Montmagny Mutual Fire Insurance Company; Royal Victoria Life Insurance Company; State Life Insurance Company.

Special brokers licensed during 1911: Messrs. Victor W. Odlum, J. H. Hines, Edwin C. Ryan, A. H. C. Carson, W. R. Allan, J. Vincent Nutter, Alan M. Stewart, J. Y. Reid, and W. J. Christie.

◆

Provincial control and operation of telephone systems in Ontario was advocated by the representatives of the Trades and Labor Congress in their annual call upon the Ontario Government.

SUBSTANTIAL GROWTH

During the past year, among the buildings erected at Edmonton were: 2,611 dwellings, $5,490,130; 11 apartments, $434,200; 171 stores and offices, $3,021,235; 16 churches, $91,300; 15 schools, $403,200; 1 car-barn, $50,000; 2 telephone buildings, $43,800; Royal Northwest Mounted Police barracks, $45,000; Canadian Pacific Railway station, $200,000; 1 brewery, $490,000; 2 brick works, $35,000; 1 creamery, $20,000; 1 packing plant, $200,000; 12 other factories, $61,500; 101 warehouses, $915,260; 4 theatres, $301,000; 1 hotel and theatre, $270,000; 4 hotels, $1,112,000.

◆

ADVOCATING A BANKRUPTCY ACT

The agitation continues for a bankruptcy act for Canada. In an address to the Institute of Chartered Accountants at Toronto, Mr. A. C. McMaster stated there is now a great deal of difficulty, not only with dishonest debtors desirous of holding their assets as long as possible for improper purposes, but also with honest debtors, who, fearing to incur the imputation of disgrace cast upon those who make an assignment for the benefit of creditors, struggle on long after not only in the creditors' interests but in his own interest he ought to have abandoned his assets.

"For either the honest or dishonest debtor there should be a bankruptcy act," he said, "to enable a transfer of assets to be forced and to enable the creditor in a proper case to lay his hands upon them. Nearly all the objections to our old bankruptcy act have been met in the present English legislation, and any other objections that can be made I feel certain can be met."

Mr. McMaster reviewed the entire subject, going back to the time of the first bankruptcy act in 843, and showing the improvements and amendments that have been made up to the present time.

Dealing with the practice of a debtor continuing in business after he is insolvent, he said that in this country it was far too common. The debtor lived off the assets at his creditor's expense, probably borrowing money off his friends and getting his wife to endorse his paper. He goes from bad to worse, until finally, being absolutely cornered, he proceeds to try to cheat his general creditors for the benefit of his friends and family by disposing of some of his assets.

This would not be possible under the English Act, Mr. McMaster declared, and he further pointed out that in that legislation an opportunity is afforded the debtor to compromise with his creditors before the absolute winding up of his affairs becomes imperative.

◆

MONEY TRUST IN FIGURES

Charts and tables prepared by Mr. Phillip J. Scudder, statistician employed by the Pujo Committee, commonly known as the Money Trust Investing Committee, show that seventeen financial institutions in New York, Chicago and Boston through interlocking directorates influence the management of 134 corporations with an aggregate capital or resources of $26,933,000.

The seventeen concerns, with the number of corporations in which their directors are represented and the amount of capital or resources of these corporations, are as follows:—

Firm or Bank	No Directorships	No Corporations	Capital or Resources of Crop
J. P. Morgan & Company	63	39	$10,036,000,000
First National Bank of New York	89	48	11,393,000,000
Guaranty Trust Company of New York	160	76	17,342,000,000
Bankers' Trust Company of New York	113	55	11,184,000,000
National City Bank of New York	86	47	13,205,000,000
Kuhn, Loeb & Company	15	12	3,011,000,000
National Bank of Commerce	149	82	18,165,000,000
Hanover National Bank	37	29	7,495,000,000
Chase National Bank of New York	67	48	11,527,000,000
Astor Trust Company	74	47	12,408,000,000
Blair & Company of New York	12	11	1,784,000,000
Speyer & Company of New York	10	10	2,443,000,000
Cont. and Com. National Bank of Chicago	49	27	6,969,000,000
First National Bank of Chicago	55	28	9,021,000,000
Illinois Trust & Savings Bank of Chicago	28	22	4,599,000,000
Kidder, Peabody & Company Boston	8	6	2,395,000,000
Lee, Higginson & Company of Boston	11	..	3,100,000,000

WINNIPEG LIFE UNDERWRITERS

Winnipeg Life Underwriters' Association elected the following officers for 1913: Honorary president, Mr. Geo. H. Miner; president, Mr. Ed. Johnson; vice-president, Mr. J. G. Stephenson; secretary, Mr. D. J. Johnston; treasurer, Mr. M. Jones. Board of Management: Messrs. J. St. Claire Clark, Angus Elliott, R. S. Rowland, H. B. Andrews, H. R. McCabe, and the officers ex-officio, at their annual meeting and banquet. Mr. G. H. Allen, general manager of the Travelers' Life Insurance Company of Canada, in his address on "Salesmanship," remarked that "the only way a salesman could be really successful was by being thoroughly optimistic. In making sales," the speaker contended, " the salesman should explain properly and then seize the pyschological moment to sell."

Mr. William McBride was awarded the prize presented by Mr. George McCuish, for securing the largest number of members and renewals.

MUNICIPAL BOND PRICES COMPARED

A comparison of the prices and yields of municipal bonds in January, 1912, and January, 1913, has been compiled by Messrs. Goldman and Company, of Toronto. Much has been written lately regarding the prevailing low price levels for municipal securities. The following table is, therefore, of considerable interest:—

	January, 1912.		January, 1913.	
Municipality.	Price.	Yield, %	Price.	Yield, %
Toronto, Ont., 3½s, 17 years..	93.75	4.00	89.38	4.38
London, Ont., 4½s, 10 years....	101.00	4.38	98.03	4.75
St. Thomas, Ont., 4½s, 10 years	100.00	4.50	97.59	5.00
Windsor, Ont., 5s	102.05	4.50	100.00	5.00
Guelph, Ont., 5s, 20 years	108.27	4.38	102.55	4.80
Brockville, Ont., 4½s, 20 years..	101.32	4.40	93.72	5.00
Fort William, Ont., 4½s, 20 years	100.00	4.50	93.72	5.00
Owen Sound, Ont., 4½s, 20 years	101.30	4.40	96.17	4.80
County of Simcoe, Ont., 4½s, 20 years	100.00	4.50	95.80	5.00
York Township, Ont., 5s, 20 years	104.20	4.50	102.15	4.75
Windsor, N.S., 5s, 30 years ...	108.19	4.50	100.00	5.00
Amherst, N.S., 4½s, 30 years..	100.00	4.50	96.00	4.75
New Glasgow, N.S., 4½s, 20 years	100.00	4.50	96.80	4.75

Nanaimo, B.C., 5s, 20 years ...	100.00	5.00	96.97	5.25

The list is representative and demonstrates that there has been an average depreciation of about four points in prices during the last twelve months with a consequent average increased interest yield of practically ½ per cent.

The opinion is held that prices will decline but little, if any further. While no great improvement in prices is anticipated in the immediate future, it is believed that with the settlement of the European trouble and easier money in Canada, municipal debentures should show an advance from prices prevailing at present.

◆

Winnipeg's percentage of the Winnipeg Electric Company's earnings for 1912 amounts to $105,748, an increase of $24,048. Previous amounts received were: 1909, $53,489; 1910, $63,293; 1911, $81,700.

A proposal that representative farmers from various parts of Canada be summoned to appear before the Commons Banking and Commerce Committee and give their views upon the bill respecting banks and banking recently introduced by the Minister of Finance, has been made by Mr. Sam Sharpe (N. Ontario).

Collingwood's board of trade officials for the ensuing year are: President, Mr. M. P. Byrnes; vice-president, Mr. F. W. Bryan; secretary, Mr. H. A. Currie; treasurer, Mr. E. R. Carpenter; council, Messrs. W. T. Toner, T. P. Long, Capt. F. Scott, Capt. P. M. Campbell, W. Carmichael, Capt. W. J. Bassett, J. A. Caslake, H. Duncan, R. Gilpin, and W. A. Hogg. Board of arbitration, Messrs. W. T. Allan, D. G. Cooper, R. Hughes, W. A. Copeland, A. Qua, F. F. Telfer, C. C. Begg, J. H. Collins, W. Williams, H. Pochlman, R. E. Fair, and W. T. Toner.

BLACK FOX INDUSTRY

There is still great activity in the black fox industry in Prince Edward Island. At a meeting held at Summerside, an association was formed to advance the general interests of the business and to secure some needed legislation. A leading ranch manager stated his belief that more than half the increase in young foxes due to arrive in March to May next had been already sold or optioned for September delivery, at prices which fully equalled those of 1912, say $10,000 per pair.

There are thousands of resident shareholders in the different fox ranch companies, associations and partnerships, and nearly all of them got handsome returns last year for their investments.

WANT SHIPBUILDING ENCOURAGED

A deputation, representing shipbuilding interests from coast to coast, has waited on Premier Borden. They state that the Canadian shipbuilding industry, in which twenty million dollars are now invested, will go out of business unless protected against British and United States competition, and encouraged by way of a government subsidy or bonus on a tonnage basis.

The government were asked to take prompt action to prevent the practical disappearance of the industry in Canada, and the deputation maintained that under existing conditions of competition with Great Britain a government encouragement to the extent of about 20 per cent. of the cost of building iron and steel vessels in Canada should be given either by way of subsidy or by way of tariff protection.

Premier Borden promised careful consideration of the written brief submitted by the deputation, coupled with a suggestion that the government might well adopt a policy of having all government vessels built in Canada, even if the cost was a little more than if the orders were placed in Great Britain.

The English shipbuilding firm of Swan, Hunter and Wigham Richardson are considering entering the Canadian shipbuilding trade, according to the statement of Mr. Clarence I. DeSota, Canadian director of the firm.

ALBERTA'S CATTLE IMPORTS

Statistics compiled from official reports by Mr. W. F. Stevens, of Edmonton, live stock commissioner for Alberta, show that ranchers in that province imported more than 100,000 head of cattle from Montana for feeding and breeding purposes in 1912. Mr. Stevens estimates that the importations will be doubled during the coming year.

While the beef cattle industry is growing rapidly the most notable feature is the interest that farmers of Alberta are manifesting in dairying. Aided by the efforts of the provincial government, the farmers are acquiring herds of utility cattle. The raising of hogs and sheep on the big grain farms in Southern Alberta is becoming an important adjunct to farming, and the ranchers are paying more attention to the raising for breeding purposes than formerly. A marked improvement in the condition of hogs and sheep placed on the market is noted.

Mr. Stevens said that thousands of small ranchers are ready to go more largely into the stock business provided they can get suitable leases on grazing lands, and it is hoped that some alterations in the manner in which land is leased to ranchers will be made to suit the small ranchers as a result of the commission which recently sat in Alberta, and at which strong recommendations were made by Hon. Duncan Marshall, Minister of Agriculture, and Mr. Stevens.

The high prices prevailing for beef cattle and other live stock is responsible for the animals being sold off the ranches much earlier than formerly and few animals are now left to run until they are four or five years old, as was the case a few years ago. Most of the animals being sold now are required by the local trade, which demands stock of medium weight.

◆

There were 36 fire calls with a total of damage amounting to $410 at Kamloops, B.C., during 1912.

Calgary's new board of trade officials are: Mr. J. W. Campbell, president; Mr. W. H. Birkenshaw, first president; Mr. A. McKillop, second vice-president; Mr. J. A. Valiquette, third vice-president. Councillors: Messrs. E. A. Dagg, A. Price, M. D. Geddes, A. W. Pryce Jones, T. A. Hornibrook, R. J. Hutchings, E. L. Richardson, D. G. Campbell, W. C. Nancarrow. Commissioners, A. G. Graves, L. P. Strong, D. J. Young, W. J. Tregillus, J. W. Davidson, W. G. Fowler and E. M. Saunders.

GRAND TRUNK IN NEW ENGLAND

till Talking of Cessation of Construction—Mr. Fitzhugh Resigns Presidency of Central Vermont

Grand Trunk affairs continue to attract considerable at- ntion in the United States. When President Chamberlin of e Grand Trunk suspended the construction of the Provi- nce line, he said, "To be frank, the difficulty is to raise oney. Mr. Fitzhugh used all the money that we received om the sale of bonds and we could not seem to get any ore during the state of apprehension that exists in the oney market over the uncertainty of what the Balkan war ay lead to."

The money markets have now improved. There is a ssening in the financial tension in London and the bankers ntured last week to offer at 94 the Grand Trunk Pacific 4 r cent. branch line loans of £479,300. The public subribed to £130,000, or less than $650,000, and the underwrit- g bankers took about three-fourths, or exactly 73 per cent. the loan. This holds up the Grand Trunk credit until e London markets are more propitious.

rand Trunk is Vindicated.

President Chamberlin is now vindicated in his declaration at money, and nothing else, caused the cessation of the rand Trunk construction in New England, thinks the Wall reet Journal. The Grand Trunk people say to-day, as they ve said since the stoppage of the work, that construction s only temporarily suspended, and that when they can raise e money they will build into Providence.

Perhaps New England people will sometime be able to swer the question whether the proper way to raise money r railroad construction in New England is to get a New rk grand jury to indict London bankers, Canadian railroad icials, and the New England railroad system, because work s stopped as the money gave out. According to justice as w dispensed from Washington, through New York, for New gland, the Egyptians must continue to make bricks after e straw has been used up, says our contemporary. A new and jury has been impanelled at New York. But can Wash- gton and New York combined force bricks without straw, wever willing may be the hands of the Canadians or the yptians?

hat a Boston Banker Says.

Major Henry L. Higginson, Boston's leading banker, ys: "There need be no occasion for surprise in the prac- al failure of London bankers to sell Grand Trunk securi- s. I think Chamberlin told the truth when he stopped con- uction hereabouts. He stopped because he had to.

"We are getting a lot of outside assistance to help New gland commit suicide by indicting the railroads, the bank- s, the constructing men, and the very capital that we need re.

"It is amazing to note the insanity of the public that re- sed to consider in the houses of legislation, or elsewhere, e question of the financial backing or the credits of the rand Trunk when it entered New England.

"The public and some Rhode Island and New York pa- rs are running a race to have the best friends of New Eng- d indicted—the only men who can raise the capital for New gland railroad construction and development.

"What we need is to make the best out of the present uation and build up rather than tear down. Not only the rand Trunk but the Boston and Maine needs credit to be of rvice to the public. How are we helping credit by these acks? Mr. Hays did not know where the $200,000,000 was ming from when he allowed his associates to promise new ilroad construction to Providence and Boston, and Mr. amberlin had to stop when the money gave out. The oblem now is to get more money into New England, not drive capital and enterprise and construction away."

r. Fitzhugh Resigns.

Mr. E. H. Fitzhugh, who was active in promoting the uthern New England project, resigned the presidency of the ntral Vermont Railway. Mr. E. J. Chamberlin, esident of the Grand Trunk Railway, was chosen to suc- ed him. After service with Western United States rail- ys, Mr. Fitzhugh joined the Grand Trunk in 1896, and rved as superintendent of the Middle division, with head- arters in Toronto, until 1899, when he became vice-presi- nt and general manager of the Central Vermont, which is ned by the Grand Trunk Railway. In 1901 he became as- stant to the president of the Southern Pacific Railway, but signed in a few months, and in February, 1902, returned to s former post on the Central Vermont Railway.

Mr. Fitzhugh explains his resignation on the ground that was not in accord with the Grand Trunk Railway Com- ny, concerning the Central Vermont and Southern New gland companies. The Grand Trunk is a majority stock- lder of the Central Vermont road.

BRITAIN'S LUMBER TRADE

Last Year's Tonnage Was Much Larger—Importers Had Profitable Period—Canadian Supplies

The timber trade of Great Britain, if one may judge of it by the statistics of Liverpool, other Mersey ports, and the Manchester Canal, was fairly successful in the year 1912. The tonnage employed in this trade, which in 1910 was 769,000 tons, and in 1911 only 737,000 tons, rose in 1912 to 821,000 tons in volume, which is the largest in five years.

Light stocks and a firm market characterized the opening of the season. But the lockout in the cotton trade and the strike in the coal trade were disturbing elements, and hampered movement. Later on, with increased confidence, business became fairly active, and prices advanced. Consumption kept pace with moderate imports, and stocks remained moderate. Indeed the season closed with rather a short supply of some of the leading articles, says Farnworth and Jardine's Yearly Review, issued on 10th January. Freights advanced in an extraordinary degree later in the year, tonnage being scarce in the autumn and difficult to obtain. Rates of freight were often 50 and in some cases even 60 per cent. in advance of 1911. Values of wood, however, also advanced strongly, and the conclusion reached is that the season has proved, on the whole, not an unprofitable one for the importers.

Canadian Woods Used.

Among Canadian woods sent to the River Mersey, pine and spruce deals have for years bulked largely. Imports of spruce deals were this year about the same as last, namely, 84,000 standards, divided 57 per cent. to the Manchester Canal and 43 per cent. to Liverpool, Birkenhead and Garston. Owing to high freights in the latter half of the year stocks were reduced and prices went to high figures. It is to be remarked that Riga white deals of the cheaper qualities have been supplied freely, and have come into strong competition with spruce deals for making packing-cases, etc.

Of Canadian yellow pine timber, not much has come into Liverpool, but at Manchester the imports have increased and have sold at high values. Money has also been in request at good prices. Oak came into Manchester to the extent of 140,000 cubic feet against 80,000 the previous year; stock is light and values steady. For square rock elm the demand has been good and the stock is low, good prices ruling; there is a fair demand for round. Square-hewn ash is but seldom asked for, but a good deal has come from United States ports and been sold. Quebec birch came in more freely (242,000 feet compared with 227,000 feet the previous year), stocks are low and prices improving. Round logs of maple in limited demand, if large; maple flooring, planed, has been in fair request. Sycamore and chestnut in only nominal demand.

Pine from British Columbia.

Pitch pine was imported in larger degree than in 1911 at both Liverpool and Manchester, and the advance in freight rates increased prices to an unusual point. First-class wood is in request and stocks are now light. Total stock of sawn in both cities is only 640,000 feet; values firm. Of deals and boards stocks are sufficient, as demand is only for better grades.

British Columbia and Oregon pine logs and planks—one entire cargo reached the market from Bellingham, Wash., the remainder coming in liner parcels; stocks are double last year. Over 130,000 feet of spruce has been imported and sold freely, largely because of advance in rates of pitch pine. California redwood in steady but not large demand, stock sufficient. Kauri pine from New Zealand in limited request, values steady. Jarrah and Karri are bought as usual by the railways. United States oak freely imported, stock limited and prices improved. Of walnut, stock is light and prices higher than in previous year.

◆

SAULT STE. MARIE DRYDOCK

Substantial interests are backing the enterprise of the Sault Ste. Marie Drydock and Shipbuilding Company, Limited, particulars of which appeared in The Monetary Times last week. The shareholders in the company consist of the estate of the late Mr. W. H. Plummer, Messrs. J. O'Brien, J. J. McFadden, J. O'Boyle and D. P. O'Boyle, all of whom are well known throughout Ontario; Sir Alexandre LaCoste, Messrs. Ernest Marceau and F. H. Clergue, of Montreal; A. Simpson, of Ottawa, and other Canadian interests. Among other strong financial European interests are Mr. Robert E. Pauwells, of Brussels, Belgium; Mr. William Brice, of London, England; Dr. Charles Casoretty, of Paris, France; and Messrs Pethick Brothers, Limited, of Plymouth and London, England.

FIRE UNDERWRITERS' LABORATORIES

Manager Merrill Favors Establishment of Branch in England—Views of Managers

Last week The Monetary Times printed a synopsis of the report on the underwriters' laboratories of Chicago, made to the Imperial Board of Trade by Mr. C. Hamilton Wickes, the British Trade Commissioner in Canada. Mr. Wickes discussed the effect of the operation of the laboratories on the importation of British manufactures into Canada. He suggested several solutions for his complaints and favored the establishment of a laboratory in England, to be practically an off-shoot of the underwriters' laboratories, Chicago, run on similar lines, utilizing the experience gained at Chicago, employing equally competent, but British consulting and technical engineers.

Mr. W. H. Merrill, the manager of the Underwriters' Laboratories at Chicago, was asked by The Monetary Times for his opinion of the report. "We are in accord with the views favored by Mr. Wickes in his third recommendation," says Mr. Merrill, "that is, the establishment of a laboratory in England. The Chicago laboratories sent their chief engineer, Mr. Robinson, to England last summer with the end in view of developing inspection and label service in England, to cover principally goods shipped into Canada and the United States.

"The place to inspect and label fire protection and fire prevention wares," says Mr. Merrill, "is at the factory where they are made."

Advocates Laboratory in Canada.

The Monetary Times has also obtained the views of fire insurance managers and others interested regarding the report. Mr. W. B. Meikle general manager of the Western Assurance Company, says that the question of a more convenient laboratory for passing upon electrical fire alarm and automatic sprinkler and other extinguishing appliances is under consideration. The stock fire insurance companies only, he says, provide the expense of the Chicago laboratories and if one were started in Canada it is not likely that the mutual and non-board companies would contribute to the expense.

"The suggestion by the British Trade Commissioner in Canada," continues Mr. Meikle, "that the leading manufacturers should join with the insurance companies and contribute towards the initial cost and by annual subscriptions towards its up-keep would enable the stock companies to start a laboratory in Canada, and the stock companies would be glad to have details of the proposed support by the British manufacturers.

"To provide a laboratory in England would be a way out of the difficulty, but the British manufacturers would find an English laboratory utilized by the Canadian and United States manufacturers and the former would thus have to meet new sources of competing goods having the approval of the same laboratory as the British home goods.

English Manufacturers Must Decide.

"The present system has been indirectly a method of protecting Canadian manufactured electrical and fire alarm and extinguishing appliances from those made in Great Britain, and it is reasonable for manufacturers in the Old Country to protest. Whether they will be better off by a laboratory in England to stamp goods intended for Canadian use is a matter for themselves to decide. It may unintentionally give Canadian and United States like goods the one thing essential to find a ready sale in Great Britain.

"However, the fire companies are really only doing—and at their own expense—what we conceive it is the duty of a government or other public body to do, and when a public body will do the work, the insurance companies will be glad to stand aside."

Not Under Serious Handicap.

Mr. E. P. Heaton, manager of the insurance department of the Canadian Manufacturers' Association, thinks that while the evident purpose of Mr. Wickes' report is to demonstrate that British manufacturers cannot take advantage of the Canadian market or of the means supplied at Chicago for testing their products, it is on the whole a very fair and just criticism from the British point of view.

"It is manifest," says Mr. Heaton, "that the adoption of standards is in the interests of all the people and that to insure the use of standard materials some testing authority requires recognition, and it is equally manifest that Canada is not able to maintain its own testing station, and even were it possible to establish one in the Dominion it is very questionable if, with the excellent work being done by the Underwriters' Laboratories at Chicago, such at the present time [illegible]. The fact that many standard devices are now manufactured in Canada and that they are sent out under the label of the only testing authority in existence is of itself evidence that our manufacturers in Canada are not under any serious handicap because we have no testing station of our own.

"I am not without hope that some time in the near future the pressure of our necessities may lead to the establishment of a branch testing station in Canada either autonomous in its character or affiliated or connected with or directly under the auspices of the Underwriters' Laboratories at Chicago as has been done in New York and I believe when such necessity really exists means will be found to meet it.

Uniformity is Desirable.

"Mr. Wickes suggests that if the British manufacturer is to compete for certain lines connected with construction and fire prevention they should organize a testing station in England which suggestion seems to be a wise one, and such a course seems to be the only one that will ever put the British manufacturer in a position to take advantage of the Canadian market; but if this suggestion be adopted some measure of co-operation with the laboratories at Chicago will be advisable as the necessity for the standards of the National Fire Prevention Association will likely prevail for the whole of the North American Continent. This does not mean that Canada will never be in a position to lay down its own standards, but that uniformity is very desirable particularly when such can be secured with adequacy and general satisfaction.

"Possibly the National Fire Prevention Association has up to this period been too insular and have viewed matters too much from the standpoint of the people of the United States, but the tendency is to broaden that body into a really international one, and I think it would be foolish to contemplate any independent organization in Canada so long as we can get recognition in and form part of a continent-wide body engaged in the creating and maintaining of standards that should be common to the whole of the continent."

◆

MIDLAND LOAN AND SAVINGS COMPANY

The toal earnings for the past year of the Midland Loan and Savings Company amounted to $83,767, which will appeal as a most satisfactory record to the shareholders of the company. After deducting interest paid and reserved on deposits and debentures, government and municipal taxes, cost of management, there remained a net profit of $39,610, to which was added $8,657, the balance brought forward from 1911. That made for distribution a total of $48,267. Dividends at the rate of 7 per cent. per annum and a bonus of ½ per cent. absorbed $27,000; to the reserve fund $10,000 was added to $11,267 was carried forward. That fund and undivided profits now amount to over 60 per cent. of the paid-up capital, the reserve fund being $210,000 and capital stock $360,000.

Loans on mortgages on real estate and accrued interest total $1,293,039. Interest payments have been satisfactory, being in excess of the total interest earnings. A large percentage of the mortgage loans have been reduced by yearly and half-yearly instalments.

Among the other assets of the company are Ontario municipal bonds and accrued interest valued at $56,242; call loans on municipal bonds, $15,850; office building, $5,000; cash on hand and in banks, $67,419.

◆

WASHINGTON ISSUES CURIOUS ORDER

The text of Washington's Treasury Department order, instructing collectors of customs to continue to collect duties from the products of Quebec Crown lands, is as follows:—"The department is informed that certain manufacturers of paper in the province of Quebec are claiming the right, by virtue of an order-in-council dated December 31, 1912, to state in their declarations upon invoices that the wood from which the merchandise was manufactured, though cut on Crown lands, is free from all restrictions of manufacture, exportation, etc.

"Pending further instructions, collectors are hereby instructed to continue to collect duty on all importations of pulp, paper, or paper board manufactured from wood cut on Crown lands in the province of Quebec, notwithstanding statements in such declarations relating to the freedom of the wood cut in such lands from restrictions as to manufacture, exportation, etc."

The understanding among paper companies in Quebec province affected by the recent order-in-council of the Quebec government is that the order issued at Washington is temporary and that the whole question raised by the action of the Quebec government will be considered within the next two weeks. The order means that at least for the present the four Quebec companies affected by the order-in-council will not have the expected benefit of a remission of United States duties.

ONTARIO'S FIRE INSURANCE ACT

ısh Mutual Company Formation—Changes Regarding Written Applications

No cash mutual companies can hereafter be formed, and itual companies can be formed only to undertake farm and n-hazardous business, stated Mr. J. H. Hunter, barrister, in aluable paper before the Insurance Institute of Toronto. In United States the mutual principle has been successfully plied to the insurance among themselves of owners of such ks as cotton mills, departmental stores, and lumber mills, d by specializing on inspection and fire prevention, they ve been able to show remarkable results from what are dinarily considered undesirable subjects for insurance. In tario, however, the door seems to be closed to any experi- ents along this line. Under the old act, Lloyds brokers ght be registered to transact marine business. By the pre- nt act this privilege is extended to all classes of insurance on such terms as the minister deems expedient. Provision made for licensing brokers to place surplus lines in un- ensed companies. A broker wishing to be licensed must isfy the minister that sufficient insurance cannot be ob- ned with registered companies at ordinary rates, and must t up security to the amount of $5,000 or more as required the minister. For each risk a broker must file a state- nt by the assured specifying the rate at which the insur- ce has been offered to named licensed companies and must ke sworn monthly returns of lines offered by him, and st pay the regular taxes on the premiums. The license is $25 per annum and the license expires on June 30th ch year.

The arrangement appears to be unfair to the registered mpanies and defective, as no provision is made for pub- ation of risks going outside as in the case, for instance, in New York Surplus Line Law.

Unless the superintendent is expected to make a special idy of rates and to devote a large amount of time to veri- ng the statements furnished to him the sections seem to er a temptation to evasion.

It is understood that the authorities are dissatisfied with working out of the provisions and are prepared to con- ler suggestions for an improved treatment of the difficulty.

ıen Delivered Contract is Binding.

As formerly the owner of property may himself place his urance anywhere he pleases without making any return or ying any taxes to the province, provided that he complies th Section 139 of the Dominion Insurance Act, 1910.

An important change has been made with regard to the ect of written applications for insurance.

Under the former act the application was to be consider- with the contract and the courts were to determine how the company was induced to enter into the contract by any srepresentation contained in the application. The rule w laid down is that the application shall not be considered th the policy except so far as the court may determine that application contains a material misrepresentation by ich the company was induced to enter into the contract.

The company is now bound to furnish assured with a py of his application upon request. A rather unsatisfac- y attempt has been made to take away from companies defence of non-payment by the assured of the premium. section provides that where the contract of insurance has en delivered it is binding on the company, although the emium has not been paid, and even if delivered by an of- er or agent of the company who had no authority to de- er it.

The company, however, may recover the premium or duct the amount of it from a loss, which latter is a doubt- l consolation. If, however, the assured gives a worthless eque or a promissory note which is not met at maturity, contract, at the option of the company, is void. Possibly company in the latter case can treat the insurance as id from its inception, but in view of the silence of the act this point a nice question may arise as to liability for a ss occurring during the currency of the note which is dis- nored at maturity. Part two of Section 192, dealing with newal receipts, seems to conflict with Section 159 in that it parently makes a renewal receipt valid only on payment the premium. A wise insured person will therefore pay up omptly on renewal, or if that is inconvenient, will take out new policy.

andard Policy Law.

Another section carries into the new act some traces of proposed standard policy law.

The application of the provisions of this section has oc- sioned some difference of opinion between companies and department when preparing policy forms for use under new act. For example, certain of the companies who erate under the Safety Fund Law of the State of New York are required by the law of that State to print a reference to the safety fund provisions on every policy issued by them, but the Ontario department under this section doubted the propriety of a company printing the necessary formula on the face of the policy. The difficulty was met by the department consenting to the necessary wording being inserted at the back of the policy. Among the more striking changes in the conditions themselves, the following may be mentioned:

Under the old conditions, the provisions as to cancellation were unsatisfactory in that it was apparently necessary to tender a return premium in all cases where the company wished to be relieved of a risk. In many instances when a company desired to cancel, the assured had not actually paid any premium at all, but nevertheless a doubt existed as to whether cancellation was complete unless accompanied in every instance by a tender of return premium. The query seems to be set at rest by the inclusion of words requiring the company to return merely a proportion of premium paid. Seven days is now fixed as the necessary notice for cancelling.

◆

CALGARY WILL SELL BONDS SOON

How the City's Finances Stand—Montreal Will Raise Fourteen Million Dollars

City comptroller W. C. Wood, of Calgary, suggests that arrangements should be made as early in the year as possible to borrow funds necessary for various purposes and to sell the available debentures. The unsold debentures are reported by him as follows:—

1. General by-laws	$ 683,500.00
Less by-law 1170, Calgary College, not yet available for sale, $150,000.00; less by-law 1126, asphalt plant No. 1, 15-year by-law, $20,000; less by-law 1295, asphalt plant No. 2, $20,000; less by-law 1298, add city stables, $12,000	202,000.00
Total available for sale	$ 481,500.00
2. Waterworks extensions by-laws 1375-1362	468,000.00
3. Street railway extensions by-law 1399	500,000.00
4. Electric light extensions by-law 1322	200,000.00
Total	$1,649,500.00
5. Local improvement (approximately) 1912 work	2,350,000.00
Total available for sale early in 1913 ...	$3,999,500.00

Purchased out of Sinking Fund.

By-laws 1126-1295-1298, mentioned above, should be purchased out of the city's consolidated sinking fund; by-law 1170 is not yet available for sale.

The above list does not include: New bridge by-law now passed, $900,000; new electric light by-law (now passing), $400,000; and new waterworks by-law (contemplated), $1,000,000.

A sum approximating $155,822.50, expended for unfinished local improvement work done in 1912 which could not be assessed, will have to be carried on the credit of the city for another year.

Should all work already provided for in local improvement preliminary by-laws be completed during 1913, it would require a sum of $2,256,957.12.

This amount also does not include any new local improvement work.

Montreal Wants Money.

The Montreal board of control has been given authority to float $14,000,000 of the city's debentures. The controllers will report their progress in the flotation of blocks of this loan from time to time.

A letter has been received by the Walkerville town council from the Canadian Bank of Commerce as follows:—"Owing to the present financial stringency," says the bank, "a rate of 6 per cent. will be charged on future loans instead of the 5 per cent. rate which has heretofore existed." It will be necessary for the town to amend the by-law passed at the last meeting to borrow money for current expenses before further loans can be effected.

◆

At a meeting of the Guelph light and heat commission it was decided to reduce the minimum charges of 50 cents a month for gas consumers to 25 cents, and the $1 charge for setting meters was deleted. This puts the gas on the same footing as the electric light.

BRITISH COLUMBIA MAY CREATE MUNICIPAL DEPARTMENT

Royal Commission Makes Important Recommendations —Debentures and Trust Funds

A new ministerial department of the government to supervise municipalities generally in the direction of uniformity in administration and increased economy is one of the recommendations in the report of the Royal Municipal Commission of British Columbia. The appointment is advised of a commission with ample powers to enforce reasonable action in all such cases, notwithstanding the powers granted the corporations interested under their private acts, such a tribunal being either permanent or from time to time appointed by the government, to deal with specific cases as they arise. Power would also be possessed by such a commission to compel public service corporations to give adequate service to the public and at reasonable cost.

As to Public Utilities.

Legislation is further recommended under which municipalities may take power to establish and operate such public utilities as telephone systems, motor 'bus lines, etc., within their respective boundaries. With the object of safeguarding municipal financing, the creation is proposed of a municipal department under which would be one or more inspectors whose duty it would be to see that all municipality books are properly kept, including school accounts, that these are duly audited at least once annually, and that uniform system is established in municipal accounting.

Government action is advised which will result in the sister provinces of Ontario amending their laws so as to permit of British Columbia municipal debentures being available in future as securities in the other provinces in connection with the investment of trust funds. The power possessed by municipalities in this province to invest their sinking funds in realty mortgages (but little exercised) it is held should, in the interest of safety, be abrogated; while upon the weight of evidence presented during its investigations, the commission advises that the present exemption of churches and church sites from taxation be abolished.

Regarding Government Supervision.

Touching the subject of government supervision, the report continues: "We firmly believe in municipal home rule, but, like everything else, this can be carried to excess. The province at large, as represented by its government, cannot afford to be indifferent to what is taking place in the municipalities. Cases have occurred in Canada where a province has had to go to the assistance of municipalities which had bankrupted themselves by recklessly bonussing railways. In this province there is not even a government office where information can be obtained regarding the financial affairs of municipalities. In England there is a department of the government called the Local Government Board, which exercises a very real control over municipal bodies. Before a local government can contract debenture indebtedness, we understand the scheme for which the loan is intended must receive the approval of the board. While we do not think it is advisable to establish such a system in British Columbia, we do think the government should have full information as to what the municipalities are doing.

Creation of Municipal Department.

"We, therefore, would recommend that the government establish a municipal department similar to those in Manitoba and Alberta. Under this municipal department there should be one or more inspectors, whose duty it would be to see that the books of each municipality, including the school accounts, are kept in a proper manner, that they are duly audited at least once a year, and that a uniform system of municipal accounting is established. It should also be the duty of each municipality to transmit annually to the municipal department a full statement of its financial position. The municipal commissioner of the government could also certify the validity of money by-laws and debentures issued thereunder, as is done in Ontario by the railway and municipal board, and in Manitoba by the municipal commissioner, thus preventing any attack upon debenture by-laws or debentures.

Investment of Sinking Funds.

Regarding the investment of sinking funds, the report says: "Sections 222 and 223 of the Municipal Act authorize the councils of municipalities to invest their sinking funds in a large number of excellent securities, but they also empower them to invest these funds upon the security of first mortgages on lands. Experience has shown that investment in mortgages is, or in some cases may be, a dangerous form of investment for municipalities. Even when the security is good there is often great difficulty in compelling an influential ratepayer to make prompt payment of interest. We were much pleased to find that few municipalities in the province have availed themselves of this power. In our opinion it would conduce very much to the safety of sinking funds if this power were taken away from municipalities. In this connection we might add that it might well be made the duty of a government inspector of municipalities to report upon the investment of sinking funds."

Debentures and Trust Funds.

As to debentures as investments for trust funds, the commissioners say: "Many British Columbia municipal debentures are marketed in Ontario. The Ontario act respecting the investment of trust funds provides that the debentures of municipalities in the provinces of Ontario, Manitoba, Saskatchewan and Alberta are legal investments for trust funds, but does not include the debentures of the municipalities in the Province of British Columbia. The fiscal agents of some of the municipalities in British Columbia have represented to us that it would help the market for our municipal securities if British Columbia debentures were placed in the same class as the debentures of the municipalities of these other provinces, and have asked us to recommend that your government open negotiations with the government of Ontario with a view to having the Ontario act amended to cover this. We concur with these representations, and also suggest that the governments of other provinces of the Dominion might very well be approached with the same end in view."

A large number of other matters are dealt with in the report as to the form of government, taxation, etc. The commissioners were Messrs. W. H. Keary, New Westminster; H. A. Maclean, K.C., Victoria; and A. E. Bull, Vancouver.

MAY DEFER LIFE LOANS

A Minnesota state department bill soon to be introduced, and one which Insurance Commissioner Preus has favored ever since taking office aims at decreasing loans and life insurance policies. The change in the law is a couple of lines addition, providing the policy contract shall have an addition to its loan provision—"which provision shall further provide that such loan may be deferred for not exceeding 60 days after the application therefore is made."

GUARANTEE COMPANY OF NORTH AMERICA

The report presented to the shareholders of the Guarantee Company of North America at its annual meeting shows the following results:—Total income for the year, $296,924; total amount of risks in force (less reinsured), $67,125,630; total amount of claims paid and provided for, $2,449,761; surplus as regards shareholders, $1,283,359; surplus as regards policyholders, $1,587,959; total resources, $2,166,530.

A bonus of 2 per cent. was declared, payable on January 15th, with a quarterly dividend of 2½ per cent. The sum of $103,879 was added to surplus to shareholders. The directors have decided to erect a ten story building to occupy the entire vacant upper portion of the company's property adjacent to its present building in Montreal at a cost of $200,000. The company has been granted a license to issue bonds in the State of Pennsylvania. The directors have applied to the Dominion Parliament to amend and consoldiate the company's charter. The object in view is to facilitate the administration of the company and to further its interest without however in any way affecting the conservative policy it has pursued in the past.

There are thirteen companies in Canada, and thirty in the United States, issuing bonds of suretyship, so that competition is exceedingly keen, and, as a result of the efforts in this regard of directors and shareholders—shading of rates and other influences brought to bear by competing companies—some of the business of the Guarantee Company of North America at renewal, has been placed elsewhere, notwithstanding which the results of its underwriting for the calendar year, through the increase of amounts of renewals and the acquiring of new business heretofore transacted by other companies and from new fields, has been satisfactory.

The following directors were elected for the ensuing year: Messrs. Hartland S. MacDougall, William Wainwright, Henry E. Rawlings, George Hague, Henry W. Cannon (New York, N.Y.), Hon. E. C. Smith, (St. Albans, Vt.), H. V. Meredith, James B. Forgan, (Chicago, Ill.), and Philip Stockton, (Boston, Mass.).

At a subequent meeting of the board, Mr. Hartland S. MacDougall was re-elected president, Mr. William Wainwright, vice-president, and Mr. Henry E. Rawlings, managing director, for the ensuing year. Mr. Richard B. Scott was reappointed secretary and treasurer, Mr. Henry Frost, superintendent, Mr. W. S. Chadwick, assistant secretary, and Mr. Walter T. Rawlings, was appointed superintendent of buildings and supplies.

CORPORATION BOND FINANCING

ranby Consolidated Bond Issue—Mexico Northwestern Railway—Grand Trunk Pacific in Western Canada

Of the £479,300 4 per cent. first mortgage Sterling bonds fered in London at 94 by the Grand Trunk Pacific Railway London, £240,700 will rank pari passu with the previous sues, and will be guaranteed by the Saskatchewan government, under the provisions of an act passed in the last session the provincial parliament, being at the rate of $13,000 per ile in respect of the following additional mileage of branch nes, viz.:—Biggar Calgary, 54 miles; Biggar Battleford, 2-10 miles; Prince Albert, 1 5-10 miles; Yorkton Canora, 3-10 miles; total, 90 miles.

The remaining £238,600 bonds offered will be guaranteed the Alberta government, under the provisions of an act assed in the last session of the provincial parliament, thorizing the guarantee at the rate of $20,000 per mile on e bonds of a branch line known as the Alberta Coal branch, tending from Bickerdike in Alberta in a southerly and esterly direction for a distance of 58 miles.

ileage in Saskatchewan.

Power is reserved in the mortgage and bonds guaranteed the province of Saskatchewan for the issue by the comny of additional bonds up to $2,000 a mile, making an ggregate of $15,000 a mile, and also for the issue up to 15,000 a mile of bonds for the construction of additional anch lines of the company. All bonds so issued will rank ri passu with those previously issued, but no issue can be ade until the government guarantee in respect therefore has en authorized by the legislative assembly.

These branch lines will be worked under agreement by e Grand Trunk Pacific Railway Company, and will form portant feeders to the main line of that company.

Messrs. Speyer and Company have underwritten the prosctive issue of Grandby Consolidated bonds, of which $1,-0,000 will be offered, as soon as authorized, to stockholders r subscription at par. It is understood that the underwritg commission is 3 per cent., which will make the bonds yield e company 97, or $1,455,000 for the issue.

exico Northwestern Railway.

At the bondholders' meeting of the Mexico Northwestern ailway Company on February 12 next, the directors will commend that of the £2,500,000 of 15-year prior lien 6 per nt. bonds which they desire authorized, there be sold a fficient amount to pay off the existing floating debt. This bt amounts approximately to £1,100,000. In addition it is ped that the sale of bonds will meet the coupons, amountg to about $140,000, on the 5 per cent. 50-year first mortge bonds due in March next and to provide also for general rposes of the company.

Owing to the revolution in Mexico, it has proved imposble to conduct the company's business at a profit for the st two years. The large mills at Pearson have not been erated at all, while those at Madera have been partially erated. Railway service from Pearson to El Paso has not en maintained as the rebels destroyed the wooden bridges. An irregular service has been maintained between Madera and Chihuahua.

A statement by President F. S. Pearson, just made announces that in May, 1912, the company needed £560,000 to complete its properties, but as loans already stood at about £860,000, and the price of its first mortgage bonds was still too low to make it advisable to sell a further amount of them, £750,000 of income bonds were sold. The company has suffered to the extent of £1,000,000 as a result of the revolution, and is pressing its claim on the Mexican Government as well as demanding protection for the future. In view of these exceptional circumstances, the directors have asked the bondholders to sanction the creation of the prior lien bonds.

Fox as a Bond Basis.

A block of $200,000 6 per cent. bonds of the Tuplin Silver Black Fox Corporation, Limited, is being offered at par with 40 per cent. bonus of common stock by Messrs. Cranston, Gray and Studd and the Maritime Trust Corporation, Halifax. The capitalization of the company is $300,000 of the bonds and a similar amount of common stock. The company was organized to raise and sell silver or black foxes and its assets consist of 11 pairs of silver black foxes.

◆

PROVINCIAL BANK OF CANADA

The business of the Provincial Bank of Canada was sufficiently profitable to permit the directors to declare a dividend of 6 per cent. per annum while continuing their wise policy of increasing the rest account and making the reductions deemed necessary for fixtures, furniture, etc., and the allowance for the maintenance of new branches. It was possible last year to provide a sum considered sufficient for rebate of interest on unmatured bills under discount on December 31st, 1912. That item in future will be adjusted annually.

The profits of the bank for the year were $185,165. That added to the balance at credit of profit and loss account at the end of the previous year, $12,463, gave a sum of $197,-628 for distribution. The 6 per cent. dividend accounted for $60,000 of it, while taxes absorbed $7,894. The sum of $15,-868 was written off bank furniture and fixtures, etc.; $75,000 was transferred to reserve fund, which is now $575,000, compared with paid-up capital of $1,000,000.

To a special contingent fund to strengthening assets $25,000 was transferred. The management was asked at the recent annual meeting of the bank if that fund was actually more than $25,000. The reply was that it had been created last year and now stands at $50,000, it being added that the right way to do would have been to deduct the amount from the net profits and not to show it on the debit side of the profit and loss account, but it was thought better to do as was done in order that the shareholders might be acquainted with the real net profits of the bank. The total amount of obligations due by the bank to the public exceeds $11,000,000.

◆

A by-law empowering the Moose Jaw council to borrow from the Canadian Bank of Commerce by over-draft the sum of $350,000 at the rate of 5½ per cent., was read at a recent meeting.

◆

CANADIAN CORPORATIONS OPERATING IN FOREIGN COUNTRIES

The securities issued by corporations operating under Canadian charters in foreign countries during 1912 amounted to the very large total of $42,155,000, as compared with $26,820,000 in 1911 and $5,900,000 in 1910.

Mexico and Brazil continue to be the most successful fields of exploitation for these companies. In 1912, however, ne company acquired large interests in Barcelona, Spain, and another in the United States.

British and continental investors have found the bonds and capital stocks of these enterprises exceedingly profitble in the past, and are consequently favorable toward the securities, absorbing virtually all issued during the year.

The following table gives particulars of issues, and indicates the markets in which they were absorbed:—

Company.	Amount.	Canada.	United States.	Great Britain.
Barcelona Traction, Light, Heat & Power Company ..	$ 7,500,000	......	....	$ 7,500,000
Rio de Janeiro Tramway, Light & Power Company ...	1,000,000	......	....	1,000,000
Mexican, Midland Light, Heat & Power Company ...	8,000,000	......	....	8,000,000
Mexican North Western Railway	3,750,000	......	....	3,750,000
Sao Paulo Tramway, Light & Power Company	1,105,000	......	....	1,105,000
Sao Paulo Electric Company	9,400,000	......	....	9,400,000
Porto Rico Railways Company	1,000,000	......	....	1,000,000
Porto Rico General Telephone Company	250,000	$250,000	....	....
Mexican Mahogany & Rubber Corporation	150,000	150,000	....	....
Alabama Traction, Light & Power Company	10,000,000	500,000	$3,500,000	6,000,000
	$42,155,000	$900,000	$3,500,000	$37,755,000
		2.19%	8.3%	89.51%

It will be noticed that British investors took over 89 per cent. of the bonds of Canadian companies operating in oreign countries. As pointed out previously by The Monetary Times, Canadian enterprise is directing British capital o those countries. **Canadian money is not going there.** Canada cannot complain either as to the amount of money being received from Great Britain every year.

UNITED STATES STEEL CORPORATION SPREADING

Their Plant in Canada Will Cost About Twenty Millions—Canadian Steel Companies Planning Big Extensions

Foreign sales of the United States Steel Corporation during 1912 totalled about $95,000,000, compared with about $70,000,000 in 1911, an increase in favor of last year of $25,000,000. The total tonnage exported by the corporation was nearly 2,500,000 gross tons. The value of the business done with foreign consumers last year by the corporation was about $10,000,000 in excess of any estimates that have been published, and shows a record increase. These figures are unusually interesting in view of the corporation's decision to establish a branch plant in Canada at Sandwich, Ontario.

Several large rail orders have been placed with the corporation which may get all or part of the Canadian Northern Railway's requirements of 30,000 tons of rails.

Cost of Plant in Canada.

The United States Steel Corporation expects to spend about $35,000,000 in 1913 on new plant construction, no part of which will have any connection with the new Canadian enterprise, which will cost in the neighborhood of $20,000,000. The company since 1906 has been spending on an average of close to $50,000,000 a year for new construction. In 1912, it is estimated, expenditures amounted to about $40,000,000. In 1911, the outlay was $49,400,000 in 1910, $53,000,000; in 1909 $54,000,000, in 1908, $49,500,000, and in 1907 $67,000,000.

Signs are not wanting that Canadian plants will increase their capacity. The Lake Superior Corporation have before them a lengthy programme of extensions, which will include blast furnaces, a new rail mill, a billet mill, another open hearth furnace, another battery of coke ovens, extensions to the docks, additional blooming mills and another merchant mill.

Dominion Steel Corporation.

The Dominion Iron and Steel Company, Limited, have ordered additional machinery to increase the capacity of their wire and nail plants, which have recently been put on double turn. This will give at once an output of over 2,000 kegs daily and ultimately provide an outlet for the whole of the product of the wire rod mills. The company is arranging for a distributing centre at the head of the lakes, where they may in addition put in a small nail mill to facilitate their North West business. It is the company's intention, however, to concentrate their manufacturing business as much as possible at Sydney.

◆

GERMAN COMPANY MAY BUILD STEEL MILL IN CANADA

Another example of German enterprise in Canada is the probable establishment here of a steel mill. The Mannesmannrohren-Werke, of Dusseldorf, one of the largest steel firms in Germany, has been represented in Canada for some years past by Messrs. Munderloh and Company, Limited, of Montreal. The sale of the Mannesmann products are understood to have increased substantially and the Mannesmann Tube Company, Limited, of Canada, is being incorporated. This company will handle the sales in the Dominion of all Mannesmann products. Mr. Henry Munderloh is president, Mr. C. Rinfret, secretary-treasurer and Mr. Theodor Steltmann, formerly South African manager for Mannesmannrohren-Werke is sales manager for the new concern.

Should business justify it, the new company intends to build a mill in Canada for the manufacture of solid drawn steel tubes by the Mannesmann process. The Mannesmann products that are most familiar to Canadians are seamless and lap-welded steel tubes, up to 60 inches diameter for waterworks, hydro-electric development, conduits, sewerage, gas mains, well boring, etc., weldless steel poles for electric traction and transmission; electric light pillars, trolley poles, weldless steel steam pipes; super-heater stay and boiler tubes, refrigerating piles, seamless steel gas cylinders for ammonia, oxygen, etc.

◆

The members of the British Medical Association decided to release the British doctors from the pledge they had given not to serve under the national insurance act, which provides a monetary allowance and medical attendance to the working classes during sickness.

La Compagnie Fonciere de Manitoba

LIMITED

Annual Statement

The annual meeting of the shareholders of La Compagnie Fonciere de Manitoba, Limited, took place at the Head Office of the Company, 300 Nanton Building, Winnipeg, on Monday, January 20th, 1913, and the following balance sheet was presented to the Shareholders:

ASSETS	
Loans and Interest accrued to Dec. 31st, 1912	$455,753.86
Land Investments	24,840.38
Cash on hand and in banks	1,742.78
Due by Shareholders	13,331.25
	$495,668.27

LIABILITIES	
Capital Subscribed	$400,000.00
Reserve	3,960.22
Dividend No. 14 (3 per cent. for 6 months and 1 per cent. bonus)	14,466.75
Directors' Fees	2.392.00
Profit and Loss (balance carried forward)	2,887.53
Debentures and Interest Accrued to Dec. 31, 1912	57,334.64
Due on Land Investments and Interest Accrued to Dec. 31, 1912	1,266.25
Deferred Payments to be made out of Loans and Accrued Interest to Dec. 31, 1912	13,071.10
Creditors	289.78
	$495,668.27

The usual dividend of 6 per cent. per annum, plus a bonus of 1 per cent., was declared.

The capital of the Company was voted on to be increased from $400,000 to $1,000,000, and the following Directors were elected to take office for the year 1913:—

M. J. A. M. de la Giclais, Winnipeg; Dr. Nove Josserand, Dumas, Sask.; Horace Chevrier, Winnipeg; W. H. Cross, Winnipeg; B. E. Chaffey, Winnipeg; F. T. Griffin, Winnipeg; L. de Galembert, Paris; Comte de la Fressange, Paris, France; Marquis de Polignac, Reims, France.

At a subsequent meeting of the Directors of the Company, M. J. A. M. de Giclais was re-elected President; Horace Chevrier, Vice-President; A. Griveau, Secretary-Treasurer; and Messrs. Chaffey and Carey, Solicitors for the Company.

MUNICIPAL BOND SELLING LAST YEAR

Some Isolated Cases of Unnecessary Expenditures—Accumulation of Short-term Loans

The securities issued by Canadian municipalities during 1912, according to Mr. E. R. Wood's bond review, amounted to $48,414,962, as against $47,159,288 in 1911. These were distributed among 106 eastern municipalities to the amount of $11,530,340 and 195 western municipalities (including the large school districts and rural municipalities) to an aggregate of $35,932,622, while $952,000 bonds were issued by the small villages, school districts and rural municipalities of Western Canada. Of the total, Great Britain absorbed $30,777,074, or 63.58 per cent., Canada $13,761,482 or 28.42 per cent., and the United States $3,876,406 or 8 per cent.

At the beginning of 1912, owing to favorable markets during 1910 and 1911, very few municipalities had debentures for disposal issued against completed works. A few had received reasonable bids late in 1911 but preferred to speculate in their securities. As a result they suffered severely under the influence of the less favorable monetary conditions. Speaking generally, Canadian municipalities during 1912 financed for current undertakings only, and for most of them this was a serious and arduous undertaking. The municipalities of Western Canada continue to issue debentures in yearly increasing volume. A careful study of the situation fails to disclose evidence that the various expenditures were not essential to the general health and welfare of the municipalities and warranted by their development.

As to Unnecessary Expenditures.

It is true that in certain instances expenditures on works of local improvement have been carried beyond reason, and public utilities have been undertaken where no real need seemed to exist, especially in the smaller Western cities. These, however, must be regarded as rare exceptions. Practically all the Western cities of any importance have made issues of permanent securities during 1912. This statement is not true of our large Eastern centres. Halifax, Ottawa, and Hamilton sold their debentures, but Toronto, Montreal and Quebec have accumulated large issues of securities as a result of their unwillingness to accept current prices. Temporary financing by the sale of treasury bills was the natural solution. A feature of municipal finance during the year was the issue of such treasury bills and certificates, disposal of which was made in the London market.

This method of temporary financing was even adopted by several of the so-called second-class cities of the middle west, but their short term obligations did not find general favor with investors. Such temporary funds, secured mainly in Great Britain, relieved the general financial situation in Canada, as our large municipalities were not under the necessity of leaning on the local banks for all their requirements. On a conservative estimate Canadian municipalities at the end of 1912 have outstanding treasury bills and certificates to an aggregate of $25,000,000, which must be met by the issue of permanent securities.

Unfavorable to Municipal Securities.

The year 1912 cannot be regarded as generally favorable to the distribution of municipal securities. For the first five months of the year prices held at about the same level as obtained at the end of 1911. The supply was always in excess of the demand during that period, and investors became chary of commitments. A decided shading of prices was the feature of the next three months. The last four months of the year witnessed a very sharp fall in prices—so marked, in fact, that in many instances the low levels of 1908 were touched.

As in the past, it was necessary during 1912 to finance the requirements of our larger municipalities in the London market. At the close of 1911 underwriters were carrying many undigested Canadian municipals in London. Several large issues made in the early part of 1912 at high prices aggravated this situation. A breathing space was required and London for many months refused to accept Canadian municipal loans on any terms. It was not until very late in the year that several small loans could be made with any degree of success. Public absorption of these latter loans was due to the attractive prices at which the securities were offered.

Municipal Credit Good.

The credit of our Canadian municipalities has not been impaired in the least. Their obligations must, however, be put out at a price that conforms more closely to the British investor's conception of an adequate interest return. Such conditions as exist at present are not necessarily detrimental to municipalities, as a spirit of caution in making large expenditures is often engendered.

The record of municipal issues for each month of the present year, with the markets in which they were absorbed, is set forth in the following table:—

Municipal Issues.

	Total Issues.	Eastern Municipalities.	Western Municipalities.	School District.	Sold in Canada.	Sold in United States.	Sold in Great Britain.
January	$ 2,376,045	$ 2,060,645	$ 252,600	$ 62,800	$ 826,045	$1,500,000	$ 50,000
February	3,923,335	137,863	3,731,972	53,500	884,650	185,000	2,853,685
March	5,676,492	557,318	5,059,574	59,600	852,552	......	4,823,940
April	2,755,508	345,735	2,342,273	67,500	1,093,658	......	1,661,850
May	7,890,116	1,379,016	6,467,100	53,000	1,259,516	100,000	6,539,600
June	5,029,092	2,461,092	2,432,400	135,600	3,825,792	......	1,203,300
July	7,203,289	938,055	6,200,034	65,200	1,103,603	190,700	5,908,986
August	3,051,428	1,201,928	1,795,500	54,000	1,107,428	285,000	1,659,000

Number of eastern municipalities issuing—106.

ARE SET ASIDE FOR THE USE OF THE PUBLIC

The former erroneous impression, that forest reserves are areas set apart by the government to be reserved from use and development is giving way to the correct view that they are for the general use of the public.

The Dominion Forestry Branch is desirous of spreading this idea abroad, and with this end in view, has inaugurated the policy of surveying summer-resort lots around convenient lakes in forest reserves. These lots are of two kinds, viz., building lots and camping lots, so that the demands of both cottagers and campers may be met. Such lots are leased to the public for a term of years at a nominal figure.

It is hoped that in this way a start may be made in bringing to the public a realization of the opportunities and advantages which the reservation of these great areas of the public domain affords the country at large.

A good example of such a resort is seen in British Columbia, where a site has been laid out at Trout Lake in the Long Lake forest reserve. This reserve is situated in the Kamloops district of the Railway Belt.

Trout Lake, at an altitude of 4,100 feet, is an ideal retreat for the residents of the towns and cities of the Dry Belt. Here they may escape the oppressive heat and drought of the summer season, and at the same time enjoy some of the finest fishing to be had anywhere in Canada. Already many people have secured building lots, and it is expected that in a short time a large and flourishing summer colony will be established at this point.

MOONEY BISCUIT MERGER COMPLETED

The Mooney Biscuit Company amalgamation is complet-
d, so The Monetary Times is informed. The new company
the Mooney Biscuit and Candy Company, Limited with
eadquarters at Stratford, Ontario. The company has ab-
orbed Messrs. Foley Brothers, Larson and Company, Winni-
eg; The H. Smith Biscuit Company, Vancouver; and the
ong Manufacturing Company, Montreal

The capitalization is as follows:—

	Authorized.	Issued.
Common stock	$500,000	$250,000
Preferred stock	500,000	320,600
Bonds	545,000	515,000
Total	$1,545,000	$1,085,600

None of the stock or bonds have been offered publicly. As
result of the amalgamation the company's plants have been
xtended and the number of employees increased. The
hief advantages enjoyed by the consolidation are specializa-
on and the minimizing of production costs, and the ability
the company to furnish customers, at widely separated
oints, with fresh goods promptly.

◆

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to
orrow money. The particulars are given in order, name and
umber of school district, amount required and name of
ecretary-treasurer:—

SASKATCHEWAN

Silton, No. 1038, $2,000. H. B. Allen, Silton.
Connaught, No. 51, $1,600. G. A. Gray, Capitol.
Beverley, No. 1172, $3,000. E. Larkins, Beverley.
Grace Hill, No. 973, $2,250. R. J. Brown, Cactus.
Willdon, No. 1063, $1,300. W. H. Martin, Loreburn.
Grattle, No. 1162, $2,030. O. W. Roberts, Marengo.
Cameron, No. 1187, $1,500. J. Wiseman, Daylesford.
Arbana, No. 683, $800. W. F. McFarline, Maple Creek.

at.
Rich Hill, No. 2817, $1,500. G. S. Thompson, Garring-
n.

◆

TORONTO STRUCTURAL STEEL COMPANY

A Dominion charter has been granted the Toronto Struc-
ral Steel Company, Limited, and the head office will be in
oronto. The company is given power to carry on bridge
uilding in all its departments and to construct steel and
on structural work of every description. The company was
rmed about a year ago by Mr. Nicholson, previously Cana-
ian representative of the Lackawanna Steel Company. Mr.
. Dunlop, of the Toronto Hardware Company, and Mr. A.
. Williams, of the A. R. Williams Machinery Company,
oronto, are also interested.

The company has a plant at Toronto with a capacity of
ooo tons per annum. Late last year the company was re-
nanced and seventeen acres of land at Weston were pur-
hased from Sir Henry Pellatt, where a plant with 15,000 tons
apacity is being erected at an established cost of $230,000.
he capitalization of the company is as follows:—

	Authorized.	Issued.
Common stock	$500,000	$300,000
Preferred stock	500,000	300,000
Total	$1,000,000	$600,000

The Royal Securities Corporation, Limited, have under-
ritten the stock and it has been subscribed. No public
sue will be made for some time yet.

The demand for structural steel has for many years been
excess of the supply and the company anticipate a large
olume of business.

◆

Mayor Sinnot has submitted an estimate to the Calgary
ity council providing for a $10,000,000 pipe line from Bow
sland to Calgary and neighboring points to be controlled by
e municipalities and retailed at cost to manufacturers and
ther consumers.

LA COMPAGNIE FONCIERE DE MANITOBA

At the annual meeting of La Compagnie Fonciere de Manitoba at Winnipeg, it was decided to increase the capital from $400,000 to $1,000,000. The usual dividend of 6 per cent. per annum was declared and in addition a bonus of 1 per cent. The company's assets include loans and interest accrued December 31st, 1912, $455,753; land investments, $24,840; cash on hand and in bank, $1,742. There is due by shareholders a sum of $13,331. The reserve fund amounts to $3,960 and it would appear advisable to increase that fund from year to year rather than to pay bonuses.

Among the liabilities are debentures and interest accrued amounting to $57,334. On land investments and interest accrued a sum of $1,266 is due. Deferred payments to be made out of loans and accrued interest total $13,071. The directors for the coming year are as follows:—M. J. A. M. de la Giclais, Winnipeg; Dr. Nove Josserand, Dumas, Sask.; Horace Chevrier, Winnipeg; W. H. Cross, Winnipeg; B. E. Chaffey, Winnipeg; F. T. Griffin, Winnipeg; L. de Galembert, Paris; Comte de la Fressange, Paris, France; Marquis de Polignac, Reims, France. At a meeting of the directors, M. J. A. M. de la Giclais was re-elected president; Horace Chevrier, vice-president; A. Griveau, secretary-treasurer; and Messrs. Chaffey and Carey, solicitors for the company.

◆

DOMINION BANK

The shareholders of the Dominion Bank have again reason to be gratified at the results of the bank's operations during the past year. Net profits totalled $901,529, being at the rate of 18.38 per cent., an increase of $198,000 over 1911. Not only was the substantial dividend of 12 per cent. paid, but also a bonus of 2 per cent. The officers' pension fund benefited by $25,000 which left a balance of profit and loss carried forward of $688,109, after transferring $297,200 to the reserve fund. That fund now totals $6,000,000, $1,000,000 in excess of paid-up capital.

During the year, circulation has increased $600,000 and deposits $5,800,000. The total assets, $79,224,680, have gained $9,000,000 during the twelve months. The cash assets, about $16,000,000, are 23.80 per cent. of liabilities to the public. The assets immediately available, $28,241,840, are 43.58 per cent. of the total liabilities to the public.

The Dominion Bank is another of the chartered banks which has included in its general statement a memorandum respecting contingent liabilities. In this case there are acceptances under commercial letters of credit against merchandise, amounting to £174,789. The premium received on new capital stock total $297,200 and that, as stated, was transferred to the reserve fund.

An analysis of the report shows that it is particularly strong in specie, bullion and other quickly available assets. These amount to 43.58 per cent. of the total liabilities to the public.

The directors have decided to increase their capital by the issue of a further $1,000,000 of stock at a premium of $100. It was decided also to increase the number of directors from nine to eleven. Sir Edmund Osler reported that plans had been prepared for the erection of a head office building that will meet the bank's requirements for many years to come. Several new branches were opened and sites secured in various parts of the Dominion during the year. Every branch of the bank was inspected by head office officials specially qualified for such duties. The balance sheet, including the cash assets and investments of the institution, were verified by a committee of the directors.

◆

REGINA APPOINTS FISCAL AGENT

A sequel of the rejection of all tenders received for the $649,000 worth of 4½ and 5 per cent. 15, 20 and 30 years bonds of Regina, is the appointment of the Bank of Montreal as the city's fiscal agent in the United Kingdom. The bank will have a five-year agreement with the city with a provision that either party can terminate the agreement after the first year by giving six months' notice.

ASSIGNMENT OF LIFE INSURANCE POLICIES

Trading in Them is Assuming Large Proportions Canadian Companies' Provision

"The contract of life assurance may be defined as one in which the company agrees to pay a certain sum upon the occurrence of a particular event contingent upon the duration of human life, in consideration of the immediate payment of a smaller sum by way of a single premium, or of certain equivalent periodical payments of premiums by the assured, either during his entire life or for a specified portion of it." The fundamental idea underlying and governing the business of life assurance is security against the uncertainty of life, was a statement of Mr. D. Matheson, A.S.S., in an interesting paper before the Toronto Insurance Institute. The policy may take many forms, but whatever the form or purpose of the policy its value rests in the security it affords. It is a value that is tangible and measurable, and as such is steadily gaining a place in the economic arrangements of people of well nigh every class and condition.

The value of the security has for some time and is more and more gaining favor as an asset in commercial and financial transactions, and as a result the trading in the benefits of a life policy is assuming larger proportions. Hardly does a policy leave the office of the company before the benefits it confers becomes the subject of assignment or transfer from one person to another.

Life Assurance Policy is a "Chose in Action."

The life assurance policy is a particular case of a class of things called choses in action, by which term is meant "a thing of which one has not the possession or actual enjoyment, but has the right to demand by action or other proceeding." Warren thus set forth the point, "so, with regard to debts payable at a certain future time, a mere expectancy, or possibility for interest, or estate in a term of years, all of which are choses in action, but to none of them does a right of proceeding attach to recover immediately, anything outstanding, for nothing is immediately payable or recoverable, yet they are called choses in action not upon the vesting of the right to proceed immediately, but before ever any right of action is exercisable in respect of them."

And further, "choses in action, such as policies of insurance and contingent interests and possibilities may be the subject of settlement and of every kind of disposition of which a trust is capable."

Must be Made in Duplicate.

Having reviewed the subject of assignment of choses of action and the conditions under which a valid assignment may be made, the question may be asked as to what constitutes a valid assignment. Canadian companies incorporate in their policies a provision that assignments must be made in duplicate, both forms forwarded to the company when, after registering, one will be returned to the assignee. Two questions arise for immediate consideration:

1st, as to the form of the assignment.

2nd, as to the requirement of notice.

Summing up again: The assured in a policy for his own benefit may voluntarily assign its benefits to any one he pleases, but the position of the assignee depends upon what provision has been made in the local laws. If the provisions of the Judicature Act of 1873 have been incorporated in the local law, as in Ontario, the assignee who is a volunteer may recover in an action providing the assignment has not been in defraud of creditors. But if no such provision is made in the local law, in order that an assignment be effectual the assignor must have done all in his power to perfect the gift. An imperfect assignment is not binding. If a trust has been created or a cestui que trust established the assignee may enforce his rights.

When Assured Assigns Benefits.

What is the effect when the assured in a policy payable to himself assigns its benefits for a consideration? As in the case where he makes a voluntary assignment he may assign the policy to whomsoever he pleases. The question then arises: If there has been valuable consideration what is the position of the assignee? It has been the rule in equity from a very early period that assignments of all choses in action, provided they were for valuable consideration, were permissible and valid. A mere expectancy as that of an heir-at-law to the estate of his ancestor, etc., is assignable in equity for valuable consideration. It would appear, therefore, that an assignment of a life policy by the assured, if the policy is payable to himself, his executors, administrators or assigns, and if there is valuable consideration, is assignable, and the assignee may enforce his rights in respect thereto.

As in the case of other assignments, the question as to whether the assignment is in defraud of creditors must of course be taken into consideration.

Let us now consider the case where the policy is payable to a third person, whose name appears in the policy.

When considering the question of assignments of policies payable to third persons whose names appear in the policies the only question that arises, as compared with the assignment of policies payable to the assured himself, is what right with respect to the policy does the beneficiary who is third party possess in relation to the policy? Are his interests such that he has a right to a say in the control?

Beneficiaries may be divided into three classes: 1. Ordinary beneficiaries; 2. Preferred beneficiaries; 3. Beneficaries for value.

◆

BRICK COMPANY'S STOCK OFFERING

An offering of $200,000 7 per cent. preferred stock at par with a bonus of common stock is being made by the Domestic Brick and Tile Company. The prospectus of the company estimates that there is a shortage of 2,000,000 bricks a week in Montreal. The company states that its initial capacity will be 130,000 bricks a day, and says that it proposes to pay a dividend on the common stock by February 1, 1914. The plant is to be near the Laprairie plant.

◆

INDIA ABSORBS MUCH GOLD

Sir Edward H. Holden, chairman of the London City and Midland Bank, Limited, addressing the shareholders, pu especial emphasis on the problem suggested by the large absorption of gold by British India.

He estimated the world's production of gold in round numbers at £100,000,000 and its distribution as £30,000,000 to the arts and industries and £30,000,000 imported net by India. The annual production of £20,000,000 by the United States, he said, was almost entirely retained in that country Therefore, only about £20,000,000 a year was left to add to the banking and treasury reserves of Europe.

He proposed the organization of a national bank for India the operations of which would tend to lower the rate of interest in India and therefore reduce the gold-drawing power of that nation.

◆

DEATH OF ONTARIO'S TREASURER

Lieutenant-Colonel A. J. Matheson, provincial treasurer of Ontario, died at Perth, Ont., last week. In speaking of his death, Sir James Whitney said:—"He was a man of high ideals, a man of high principle, and he applied these qualities to whatever work he was engaged in. He was a loyal and zealous colleague and comrade. His death leaves a gap that can only be measured properly by those, outside of his immediate relatives, who were closely associated with him like myself and my colleagues."

Lieutenant-Colonel Matheson was born in Perth on December 8, 1845, was educated at Upper Canada College and Trinity University. He graduated in 1865, and was called to the Bar in 1870. He practised law in Perth, being senior member of the firm of Matheson and Balderson. From 1886 to 1898 he was Lieutenant-Colonel commanding the 42nd Regiment, when he retired, and was transferred to the reserve of officers, and was Brigadier commanding the 6th Infantry Brigade at Kingston camp in 1900. Colonel Matheson saw active service during the Fenian raid, and volunteered for service in the Northwest rebellion. A member of the Town Council of Perth for three years, in 1884-5 he held the office of mayor. Lieutenant-Colonel Matheson was first elected to the Legislature in 1894, and had held the seat ever since. On the accession of the Whitney Government to power in 1905 he was called to the Cabinet as Provincial Treasurer, and enjoyed the distinction of having been returned by acclamation at every election since. His death is mourned by a wide circle of friends.

◆

The Dominion Express Company is gradually extending its service until now it has running rights over 18,000 miles of railway in Canada, which is practically two-thirds of the railway mileage of the Dominion. On the 1st February next its service will be operated over the Intercolonial and Prince Edward Island railways, with direct connection to Newfoundland, and it will also establish a service on eight other tributary roads in Quebec and the Maritime Provinces, the Atlantic, Quebec and Western Railway, Quebec Central Railway, Temiscouata Railway, Caraquet and Gulf Shore Railway, Intercolonial Railway, Kent Northern Railway, North Shore Railway and the Moncton and Buctouche Railway. These roads, with the government railways, give an additional mileage of 2,400 miles.

VIRTUES OF THE MONEY TRUST

r George Paish Thinks It Has Some—Return Upon Capital Has Fallen

Sir George Paish, editor of the Statist, the well-known iter on economics and finance, has an article in his paper aling with the Congressional inquiry into the money trust, which he points out the European view of the role played the great banks of the United States in the development the country.

Those persons who are surprised to learn that the wealth the United States is in the neighborhood of $150,000,000,000 em, according to Sir George, to be under the impression at the concentration of money power and interests is opsed to the welfare of the people of the United States, adng:

nable to Accept View.

"Persons who have studied the economic conditions in the ited States and other countries and are in a position to apeciate the forces making for progress are unable to accept popular view."

Sir George goes on to consider the reasons which make ntrol by bankers of so many great corporations in the ited States one of the most important factors in the pernent prosperity of the enterprises over which the control is ercised, and, at the same time, he thinks, powerfully conbutes to the really wonderful growth in the welfare of the ople of the United States.

"First," says he, "there is the great change that has ne over the economic well-being of all countries in modern nes. This improvement has arisen almost completely from rise of large corporations for the manufacture and distrition of goods on a great scale.

nd to Mouth Production.

"In the days when production was from hand to mouth d distribution uneconomical the income of the masses was the most meagre description. Improved methods of proction and distribution have raised incomes, and vast numrs of persons are enabled to contribute their savings to the pital fund, and the introduction of corporations and jointck companies enables everyone to participate in the reward at accrues to those who, by their savings, supply the world th capital.

"Few people realize that in the period in which improvents in the methods of production and distribution have been rapid the return upon capital has steadily fallen. It has ne so largely because the creation of joint-stock enterprises s enabled the small investor to participate in trade and instry, and because the return upon the capital placed in blic enterprises whose securities enjoy a free market is ich lower than the return sought for and obtained upon pital embarked in private ventures.

vidends on Private Capital.

"The rates of dividend obtained upon what may be term private capital are not infrequently as much as 15 or 20 even higher percentages, but upon capital placed in public terprises an all-round return of 10 per cent. is unusual, and, nerally speaking, it does not average more than 5 or 6 r cent.

"If any one stops a moment to think of the difficulty of taining capital in the past and of the high rates of interest id upon it, one will realize the immense advantage enjoyed day by every one—first from the production and distribun in a wholesale manner by means of great corporations, ose capital is supplied by investors of all kinds and, second, om the steadily declining return upon capital which has relted from the replacement of private enterprises by the eat corporations whose capital is provided by the multide."

lue of Banking Houses.

These considerations, Sir George thinks, are essential to a oper appreciation of the value to society of the banking uses whose operations and influence are under examination the Pujo Committee.

Sir George Paish predicts that the results of the inquiry ll show that the influence of these banking houses has been olly beneficent, and he shows how bankers in the United ates have been largely instrumental in obtaining the vast ounts of capital spent in railway construction and imovement.

But for the bankers' connection with railroads, he declar, the foreign investor would not have had confidence ough, not only to provide his capital, but to provide it at tes of interest very low in comparison with the rates obined by the American people in private enterprises.

"The reasoning holds good," he adds, "in regard to pub utility, manufacturing and other industries. The participation of bankers in these creations capital not only enables the companies to raise capital, but assures good management.

"The banking control of railways and other corporations means a more adequate supply of capital, a greater measure of economy in production, and more efficient management in all matters of prime importance to the welfare of the nation from the point of view of all classes and sections, and, more especially, the consumers."

Sir George suggests that doubtless the Pujo evidence will show that the remuneration of bankers for their services is liberal; but, on the other hand, he says, the services rendered are so valuable that the remuneration is no greater than the public interest demands, and he concludes by attributing to the reputable bankers of the United States "the wonderful change that has been effected in the commercial morality of the United States in the last fifteen or twenty years—the period in which American bankers have successfully exerted themselves to put a stop to the malpractices which had so seriously injured the well-being of the American people.

"It is one of the paradoxes of life that the class which did more than any other to raise the standard of commercial morality to the existing high level should now be singled out for attack by those who are apparently unaware of the great service which bankers of America have performed and are performing for the people of the United States."

◆

MONARCH LIFE ASSURANCE COMPANY

In addition to presenting the shareholders with an excellent financial statement, the management of the Monarch Life Assurance Company were also able to show that the results of the past year had not only maintained but continued the progress of the company. Its general development in recent years is best shown in the following table:—

	1908.	1912.	Increase over 1911.
Assurances in force	$1,334,000.00	$5,519,348.00	38%
Assurances issued	866,500.00	2,216,500.00	68%
Policy claims reported	4,000.00	7,377.00	
Assets	183,560.69	457,886.95	26%
Reserves	35,432 40	237,753.00	42%
Cash premium income	33,964.33	122,343.31	25½%
Net surplus	54,734.59	97,670.16	9
Average rate of interest earned on all investments	6.68%	8+%	8%
Average rate of interest earned on all investments by Canadian companies..	5.30%	(not available)	

The results for the past year were favorable. New and revived assurances totalled $2,216,500, an increase of $896,600, or 68 per cent. The total in force is $5,519,348, a gain of $1,513,203, or 38 per cent. Policy claims were unusually low, amounting to $7,377.45 (including $3,000 December claims, respecting which the papers were not received in time to be paid out; provision has been made for same in the liabilities). The total claims for the year were less than 30% of the expected mortality.

The gross surplus for the protection of policyholders, including paid-up capital $100,735, amounts to $198,405.14, being a substantial increase. The net surplus has always experienced a steady increase from the commencement, the capital never having been impaired.

The investments total $350,649, the major portion of which is divided into 82% in first mortgages on Western farm and city properties, and 15.6% in debentures held as a Dominion Government deposit at Ottawa. For every $1,000 loaned on mortgages the company has security of $3,917. Not a dollar has ever been lost in any of the company's investments.

Discussing the question of dividends at the annual meeting, Mr. J. T. Gordon, president, said:—"We are trying to build an institution not for the present only, but for all time to come. The board of directors felt that they were acting in the best interests of the company when they decided not to pay a dividend this year nor until 1915, when our assurances will have passed the $10,000,000 mark. Then we feel we can pay a dividend worth while, and without any embarrassment. There are several reasons why I think we should not yet pay a dividend. The mortality was unusually low this past year, while the experience during the year upon which we have just entered may be much heavier, and for any company to start paying a dividend and not continue, would be an evidence of very great weakness indeed, and if we should in any way jeopardize our surplus by paying a dividend, in my opinion it would have a very serious effect upon the securing of new business."

Other speakers spoke of the conservative and progressive character of the company. A careful analysis of the position shows that the Monarch Life is building a strong foundation for a successful and remunerative business from every point of view.

NATIONAL TRUST COMPANY
LIMITED

Annual Meeting of Shareholders

INCREASE FOR 1912 OF $10,354,156.59 IN TOTAL ASSETS UNDER ADMINISTRATION

Messrs. F. W. Molson, T. B. Macaulay and W. M. Birks, all of Montreal, Added to Board of Directors

The Fifteenth Annual General Meeting of the Shareholders of the National Trust Company, Limited, was held in the Company's Board Room, 20 King Street East, Toronto, on Wednesday, the 29th day of January, 1913.

The President, Mr. J. W. Flavelle, was in the chair, and Mr. W. E. Rundle, the General Manager, acted as Secretary to the meeting.

The Secretary read the Fifteenth Annual Report of the Directors and the Financial Statement, as follows:—

The Directors have pleasure in submitting herewith their Fifteenth Annual Report, showing Statement of the Assets and Liabilities of the Company as at 31st December, 1912, together with the Profit and Loss Account for the year ending on that date.

The net profits, after providing for all cost of Management, Salaries, Advertising, Auditors' Fees and other expenses, amount to $242,942.52. To this must be added the sum of $21,823.13 brought forward from 1911, making the total at credit of Profit and Loss Account $264,765.65, which has been appropriated as follows:—

(a) To pay four quarterly dividends at the rate of ten per cent. per annum, amounting to $150,000.00.
(b) To increase Reserve Fund, $100,000.00.
(c) To carry forward in Profit and Loss Account, $14,765.65.

The Reserve Fund now stands at $1,400,000.00.

Respectfully submitted,
J. W. FLAVELLE,
President.

HON. D. C. CAMERON, President Rat Portage Lumber Company, Winnipeg.

KENNETH MACKENZIE, Director Canada Life Assurance Company, Winnipeg.

ARTHUR STEWART, Winnipeg.

NEW LEGISLATION FOR LOAN AND TRUST COMPANIES

That special legislation will be introduced next year to govern the operations of loan and trust companies in Canada was announced by Hon. W. T. White to the banking and commerce committee at Ottawa this week. The bill of the Dominion Trust Company, of Vancouver, was under discussion and the question of allowing such companies to receive deposits was strongly objected to. The Minister said that if allowed to receive deposits the investments should be confined to first mortgages or municipal bonds and the amount of the guarantee should be in proportion to paid-up capital. At the Minister's suggestion the bill was allowed to stand over.

◆

CONFEDERATION LIFE ASSOCIATION'S REPORT

Such a report as that of the forty-first of the Confederation Life Association shows the capability of the officers and the satisfactory conditions met by this high type of company in the life insurance arena of Canada during the past year.

Applications were received by the Association for assurances amounting to $13,275,502, and of this sum $12,218,754 was approved and accepted, which constitutes a record in the company's history and shows an increase of more than fifty per cent. over any previous year. The total amount of insurance on the books at December thirty-first was $63,764,311.

During the year there was paid to policyholders and their beneficiaries $1,609,008.35. Of this amount $614,272.61 was in settlement of death claims, while $428,997.87 was for maturing endowment contracts. A feature of importance to the insuring public was the advance made in the dividends paid to holders of participating policies. These totalled $194,302.67 and $45,977.54 in advance of those for 1911.

The increase for the year was $934,027.40, while the grand total reached $17,270,391.84. The rate of interest earned upon the company's funds remains satisfactory.

The year's increase amounted to $145,033.86, with a total of $1,815,260.79 over and above all liabilities.

The following are the directors for the ensuing year:—Mr. W. D. Matthews, Sir Edmund B. Osler, Mr. J. K. Macdonald. Hon. James Young, Colonel D. R. Wilkie, Sir William Whyte, Mr. Joseph Henderson, Mr. Cawthra Mulock, Mr. John Macdonald, Lieutenant-Colonel Albert E. Gooderham, Mr. Thomas J. Clark and Major J. F. Michie.

Mr. J. K. Macdonald was re-elected president, Mr. W D. Matthews vice-president and chairman of the board, and Sir Edmund B. Osler vice-president.

The Title and Trust Company

The annual meeting of the Title and Trust Company was held on the 24th of January. The President, Mr. E. F. B. Johnston, K.C., presided.

The annual report showed a very satisfactory year's business, the net earnings being at the rate of 19.9 per cent. on the average paid-up capital for the year.

A half-yearly dividend at the rate of six per cent. per annum was paid and the amount of $15,453.47 was added to the Reserve, leaving a balance unappropriated to the credit of Profit and Loss Account of $760.92.

The addition to Reserve Account brought the Reserve up to over thirty per cent. of the paid-up capital.

In view of the satisfactory showing and the progress that the Company had made, the shareholders approved the decision of the directors to call up the balance of the subscribed stock.

The Metropolitan Bank

ANNUAL MEETING OF SHAREHOLDERS

At the annual meeting of the shareholders of the Metropolitan Bank, held to-day, the report of the Directors for the year ending December 31st, 1912, was adopted.

The following were re-elected Directors for the ensuing year:—S. J. Moore, D. E. Thomson, K.C., Sir W. Mortimer Clark, K.C., John Firstbrook, James Ryrie, and W. D. Ross.

At a subsequent meeting of the Directors, Mr. S. J. Moore was re-elected President and Mr. D. E. Thomson, K.C., Vice-President.

W. D. ROSS,
General Manager.

Toronto, 28th January, 1913.

SINCLAIR G. RICHARDSON,
Auditor

January 11th, 1913

THE DOMINION BANK

Proceedings of
The Forty-Second Annual General Meeting of the Shareholders

The Forty-Second Annual General Meeting of the Dominion Bank was held at the Banking House of the Institution, Toronto, on Wednesday, 29th January, 1913.

Among those present were noticed: J. J. Maclennan, G. N. Reynolds, J. E. Finkle, Thomas Crawford, M.P.P., Richard Brown, J. J. Dixon, Dr. Thomas Armstrong (Deer Park), W. C. Crowther, W. Gibson Cassels, Dr. Grasett, Allan McPherson (Longford), J. D. Warde, Wallace Jones, H. G. MacKenzie, Dr. Charles E. O'Reilly, J. Harry Paterson, M. S. Bogert (Montreal), Edward Burns, R. Wilkinson, N. Hockin (Lindsay), W. McAdie, Andrew Semple, F. J. Harris, P. Leadlay, James Matthews, Peter MacDonald, William Crocker, H. Crewe, Charles E. Lee, R. B. Morley, C. Walker, A. E. Gibson, William Ince, F. E. Dingle, Sir E. B. Osler, M.P., A. W. Austin, H. S. Harwood, Robert Ross (Lindsay), E. W. Hamber, H. W. Wilcox (Whitby), W. E. Carswell, S. Jeffrey (Port Perry), R. J. Christie, James Carruthers (Montreal), J. F. Kavanagh (Hamilton), E. W. Langley, W. D. Matthews, A. R. Boswell, K.C., C. E. Van Norman, Aemilius Baldwin, James P. Bradt, H. S. McCoy, F. C. Snider, J. Gordon Jones, W. T. Kernahan, F. H. Gooch, F. D. Brown, Judge McIntyre (Whitby), C. S. Pim, J. G. Ramsey, J. T. Small, K.C., Alexander C. Morris, H. B. Hodgins, S. Samuel, C. McCollum, W. R. Brock, J. C. Eaton, Joseph Walmsley, C. A. Bogert, W. C. McFarlane (Fort William), G. E. Gross, Captain Dudley Jessopp, Rev. T. W. Paterson, David Kidd (Hamilton), Sylvester C. Halligan, H. S. Osler, K.C., W. K. Pearce, L. S. Hamilton, Harold W. A. Foster, Dudley Hill (Gravenhurst), John M. Baldwin, C. A. Ross (Hamilton), Col. Sir H. M. Pellatt, Thomas Meredith, W. C. Lee, R. M. Gray, C. H. Edwards, T. W. Forwood, T. O. Anderson, A. H. Black (Oshawa), W. C. Armstrong (Chatham), D. T. Hepburn (Uxbridge), N. F. Davidson, K.C., E. H. Osler (Cobourg).

It was moved by A. W. Austin, seconded by E. W. Hamber, that Sir Edmund B. Osler, M.P., do take the chair, and that Mr. C. A. Bogert do act as secretary.

Messrs. A. R. Boswell, K.C., and W. Gibson Cassels were appointed Scrutineers.

The Secretary read the Report of the Directors to the Shareholders and submitted the Annual Statement of the affairs of the Bank, which is as follows:—

To the Shareholders:—

The Directors beg to submit the Forty-Second Annual Report of the affairs of the Bank, and the result of its operations for the twelve months ended 31st December, 1912, which they feel will be received with satisfaction by the Shareholders:—

Balance of Profit and Loss Account, 30th December, 1911		$ 500,116 10
Net profits for the year, after deducting all charges and making full provision for bad and doubtful debts		901,529 44
Premium received on new Capital Stock		297,200 63
Making a total of		$1,698,846 17
Which has been disposed of as follows:		
Dividends (quarterly) at 12 per cent. per annum	$588,536 53	
Bonus, 2 per cent	100,000 00	
Total distribution to Shareholders of Fourteen per cent. for the year	$688,536 53	
Contribution to Officers' Pension Fund	25,000 00	
Transferred to Reserve Fund Premium on New Stock	297,200 63	
		$1,010,737 16
Balance of Profit and Loss carried forward		$ 688,109 01

RESERVE FUND.

Balance at credit of account, 30th December, 1911	$5,702,799 37
Transferred from Profit and Loss Account	297,200 63
	$6,000,000 00

There has been a further gratifying increase in the business of the Bank, as evidenced by the figures in the Statement presented. The prosperity of the country, and the consequent demand for banking accommodation permitted the employment of its funds to unusual advantage throughout the year, resulting in earnings sufficient to enable the Directors to distribute a bonus of 2 per cent. in addition to the usual dividend of 12 per cent.

To meet the general expansion of business in Canada, in which this Bank continues to participate, your Directors decided to issue to the Shareholders of record of the 15th of February, 1913, a further $1,000,000 of new Capital Stock, at a premium of 100.

This issue is a part of the $5,000,000 of new Stock authorized by the Shareholders at the Annual Meeting of the 26th January, 1910, and duly approved by the Treasury Board at Ottawa. Particulars of this allotment will be given forthwith to the Shareholders by circular. When payment of this issue has been made in full, the paid-up Capital of the Bank will amount to $6,000,000, and of the total Authorized Capital of $10,000,000 there will remain unissued $4,000,000.

Owing to the growing importance of the Bank's business the Directors considered it advisable to recommend an increase in their number from nine to eleven, and a By-law will be submitted to you covering this change.

You will also be asked to give your sanction to a By-law increasing the remuneration of the Directors, made necessary by these additions to the Board.

In connection with Bank Premises, the year just closed was one of unusual importance, several transactions of great moment having been brought to completion.

You were informed at the Annual Meeting in 1911, of the purchase of the property on the Northeast Corner of King and Yonge Streets, Toronto, for the purposes of Head Office premises, as your Directors were at that time unable to acquire sufficient land immediately adjoining the present site. Last year, however, they succeeded in purchasing the property directly south of that now occupied, and extending to Melinda Street. A sale of the Northeast Corner was subsequently effected at a satisfactory price.

Plans have been prepared, and it is the intention to begin active operations at an early date for the erection of a building that should meet the Bank's requirements for many years to come.

Necessary outlays have been made for improvements to several Offices already established, for new Branches opened, and for the purchase of the premises which the Bank has for many years occupied at the corner of Queen and Sherbourne Streets, Toronto, and at Oshawa, Ontario.

Sites were also secured at West Toronto, Edmonton South (formerly Strathcona), Elmwood (Winnipeg), and additional property was acquired adjoining our Windsor, Ontario, Branch.

Branches of the Bank were opened in 1912, as follows: In Ontario—Dupont and Christie Streets, Roncesvalles and High Park Avenues, Dufferin Street and Lappin Avenue, Dufferin Street and St. Clair Avenue, Toronto; By-Ward Market Branch, Ottawa; and Port Arthur.

In the Western Provinces—Swift Current, Moose Jaw, (South Hill Branch), Saskatchewan; Edmonton (First Street Branch), Calgary (Riverside Branch), Alberta; North Vancouver, British Columbia.

New Dundee and Malton, Ontario, and Wawota, Sask., Branches were closed in 1912.

Every Branch of the Bank has been inspected during the year by Head office officials, specially qualified for such duties, and, as is customary, the Balance Sheet of the 31st December, 1912, including the Cash Assets and Investments of the Institution, has been verified by a Committee of your Directors.

E. B. OSLER,
President.

Toronto, 20th January, 1913.

The report was adopted.

A By-law was passed authorizing an increase in the number of Directors from nine to eleven.

The thanks of the Shareholders were tendered to the resident, Vice-President and Directors for their services durng the year, and to the General Manager and other officers f the Bank for the efficient performance of their respective uties.

The following gentlemen were duly elected Directors for he ensuing year: Messrs. A. W. Austin, W. R. Brock, James Carruthers, R. J. Christie, J. C. Eaton, J. J. Foy, K.C., M.L.A., E. W. Hamber, H. W. Hutchinson, W. D. Matthews, . M. Nanton and Sir Edmund B. Osler, M.P.

At a subsequent meeting of the Directors Sir Edmund B. Osler, M.P., was elected President, and Mr. W. D. Mathews, Vice-President for the ensuing term.

C. A. BOGERT

Toronto, 31st December, 1912. General Manager.

TIN PLATE PRODUCTION AND CANADA

During 1912 the United States have largely extended their exports, and Britain has been meeting their serious competition in neutral markets, such as Canada and Japan, state Messrs. Sims and Coventry, in their report on the tinplate market during 1912. British exports to the former country are considerably smaller than they were some years ago and so long as the American makers choose to supply the Canadians with tinplates regardless of whether it pays them or not they will no doubt secure the business. The Canadians are getting the benefit and the Americans seem satisfied with the "honor and glory." At the time of writing there are no exact figures available as to the American output for the year, but as the American mills have been running much more fully during the year there is sure to be a considerable increase over 1911 and there is little doubt that their make will have exceeded that of Britain. In the last report a doubt was suggested as to the American foreign trade being on an economically sound basis. Shortly afterwards it was reported that the American Steel Corporation were invoicing steel bars to their tinplate works at 5 to 6 dols under the market price. If this is correct what is the reason? Is it that, if a fair price were debited to the tinplate works, they would show a loss on the working?

Germany lays claim to having been the original home of the tinplate industry, having, so it is said, begun the manufacture in the fourteenth century. They are now turning out some 50/60,000 tons a year, the figures for three years at intervals of ten being:—

	Tons. 1890.	Tons. 1900.	Tons. 1910.
German manufacture	21,300	30,705	57,136
Imports into Germany	4,296	18,158	46,973

It will be noticed that the imports are increasing more quickly than the home production and a proposal for a considerable extension of the German manufacture has received powerful advocacy. At one time (in the nineties) the German makers supplied 96 per cent. of their home consumption, whereas in 1910 it was only 55 per cent. In 1907 it fell as low as 51 per cent. Now, the advocates of German extension look forward to making a bid for the export trade, and a number of new mills are already at work in Westphalia. The American manufacture has increased by rapid steps. In 1910 their output was 722,770 tons. British exports in that year of tinplates, tenneplate and blackplate for tinning were 538,870 tons, and if Britains export trade takes about two-thirds of British make, this would give 808,305 tons as Britains total ouptut for 1910. In 1911, the American make was 783,360 tons and on the same method of computation Britains was 816,630.

◆

RECEPTION OF CANADIAN ISSUES IN LONDON

Official information has been received by The Monetary Times as to the results of Canadian flotations in London recently.

Of the issue in December of £128,100 4½ per cent. debentures of Lethbridge at 92, the underwriters took 65 per cent.

The city of Saskatoon also made an issue in December, one of £400,000 5 per cent. consolidated stock at 99½. These were attractive terms, with the result that the issue was oversubscribed and the underwriters were released. There was a large number of applicants for this offering. Those who applied for £500 and upwards received about 42 per cent., the smaller applicants receiving an allotment in full. The price of the stock has been quoted as high as 2½ premium.

Of the £500,000 issue of 5 per cent. first mortgage bonds of the Algoma Central Terminals, Limited, the underwriters took 88 per cent. Since the issue there has been a good demand for the bonds and they now stand at about 94¾—95¾.

The underwriters took 38 per cent. of the Grand Trunk Railway issue of £1,000,000 4 per cent. perpetual consolidated stock at 95. Of the Grand Trunk Pacific Railway's issue of £720,000 4 per cent. first mortgage guaranteed bonds at 94, 73 per cent. was left with the underwriters.

The city of Moose Jaw floated £257,600 5 per cent. debentures at 98, which were oversubscribed.

The issue of Quebec City of £400,600 4½ per cent. debentures at par was also oversubscribed.

The underwriters took 48½ per cent. of the province of Quebec's loan of £400,600 4½, the balance having been subscribed for by the public.

The city of Toronto's new £1,000,000 four per cent. loan, issued at 92½, was not well received.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

DIVIDEND NO. 102

Notice is hereby given that a dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Saturday, the 1st day of March next, to shareholders of record of 15th February.

By order of the Board.

E. L. PEASE,
General Manager.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Tenders will be received by the undersigned up to 8 p.m. on Monday, February 17th, 1913, for the purchase of $10,000 6 per cent. General Improvements Debentures, repayable in 20 equal semi-annual instalments.

J. A. NANTEL,
Secretary-Treasurer,
Morinville, Alta.

Morinville, Alta., December 21st, 1912.

TOWN OF WADENA, SASKATCHEWAN.

Tenders will be received by the undersigned up to five o'clock on the 20th day of February for the purchase of $15,000 for a period of 40 years at 6 per cent., payable in 40 equal annual instalments of principal and interest combined. The issue is for the purpose of installing an electric light and power plant in the Town of Wadena. Also for the purchase of $15,000 for a period of 30 years at 6 per cent., payable in 30 equal annual instalments of principal and interest combined. This issue is for the purpose of constructing cement sidewalks and street improvements. The highest or any tender not necessarily accepted.

JAMES F. T. SAICH,
Secretary-Treasurer.

Town of Wadena, Sask.

TOWN OF ESTEVAN

SOVEREIGN FIRE REINSURANCE

The reinsurance contract between the Sovereign Fire Assurance Company of Canada and the Globe and Rutgers Fire Insurance Company of New York has been signed. By it the Globe and Rutgers reinsures all risks the Sovereign has under policies in New York State which expire on or before December 31, 1913. It is the intention of the Sovereign to cancel policies expiring after 1913. Sumner Ballard was the intermediary in the negotiation of the reinsurance.

The Sovereign business would have been reinsured on October 22, 1912, but the New York Trust Company, its trustee, declined to pay over the necessary premium on the order of the Sovereign and the Superintendent of Insurance, and the matter has been patiently and industriously taken through all the courts since by Manager Wilson and Arnold Davis, counsel for the Sovereign. Several court decisions have been obtained and the Sovereign succeeded in abrogating the trust deed and getting its funds into the hands of the State Insurance Department, which released the necessary sum to pay the Globe and Rutgers.

The Sovereign is voluntarily withdrawing, as previously stated, from the States, but is still doing business in Canada.

COMMISSIONER ON ONTARIO'S COMPENSATION SCHEME

"To frame an act that would create this board either with
without compulsory insurance until the employers became
rouped, and then to establish conditions applicable to each
oup," is the scheme of workmen's compensation which Sir
illiam Meredith suggested that he might follow in making
s recommendation to the Ontario government on the con-
usion of the inquiry into the principles affecting compen-
tion to workmen for injuries. The Commissioner thought
ch an act might be an incentive to an employer to be in-
uded in a group. He intimated that a beginning would
ave to be made somewhere as it would be impossible to
ver the whole province at the outset.

"I do not think I shall recommend that every employer
labor be brought under this act at present," he said, "and
would like to have such help to select the classes that it
most desirable to bring under the act. There are several
odes in which the thing can be done. Bring in so much
the act as constitutes the board or commission, and give
power to make rates and to make classifications, or the act
self to make certain classifications and give the board
ower to bring in other groups as occasion justified. My
wn idea is that you would get more satisfactory grouping
the first plan were adopted."

Mr. F. W. Wegenast preferred that the classification un-
er the act should serve as a basis or suggestion to the board
what was the intention of the legislature. He also urged
at the decision of the board on all questions of fact should
e final, and an appeal could only be taken on a matter of
w.

Mr. McCarthy suggested that street railway companies,
ower and light companies, which were closely associated,
e grouped together. To a query by the Commissioner he
id in the case of a corporation that had a short life like the
oronto Railway Company, the remaining industries could
arry the payments or those which succeeded to the under-
king.

For the steam railways Mr. I. F. Hellmuth urged individual grouping, the board to assess the companies for the amounts necessary to pay the liability award.

◆

MARCONI DEAL INVESTIGATION

Mr. W. R. Lawson, one of the journalists who initiated the campaign against the Marconi Company in connection with the British Government contract for a chain of stations throughout the Empire, appeared before the Parliamentary Select Committee of inquiry. His speech was a long indictment of the Marconi Company, and, indirectly, of the Government, which, he said, had associated itself with a huge Stock Exchange gamble. On this point Mr. Lawson said:

"The holding of the Marconi Company in its many subsidiary companies was 1,742,055 shares, of a nominal value of £2,074,672 ($10,373,360). The signing of the agreement with the post office created a boom in the shares of three companies connected with the Marconi undertaking—the parent company, the American company, and the Canadian company.

"In 1908 the directors of the Marconi Company had 106,000 unissued shares. They obtained sanction from the shareholders to issue them at a discount as they wished. Shares have since been issued, but I can find no trace in regard to whom they were sold or at what price. In 1911 the price of the shares rose to 65, but in 1912 it went still higher, and on March 7, the date when the agreement was signed, the price was 85 per share.

"Between 1908 and 1912 there was an increase in the number of Marconi shares of 105,000, and in their market value an increase of £4,743,000."

Mr. W. R. Lawson is well known in Canada. He attacked the Ontario Hydro-Electric Commission scheme in English financial papers and enjoyed a heated interview with Sir James Whitney regarding it. He has contributed several articles to the columns of The Monetary Times.

CANADIAN ISSUES IN LONDON

Toronto's Loan—Western Railroad Flotation—Three-year Real Estate Notes

Regarding the Toronto city loan now upon the market, the Canadian Associated Press learns that Lloyds Bank and Coates, Son and Company are merely acting as agents for the issue which is made at 92½, less expenses made up as follows:—

	Per cent.
For underwriting	1½
To Lloyds Bank	¼
To Coates, Son and Company	¼
To brokers on allotment	¼
For advertising and like charges	⅛
For stamp duty	½
For over riding commission	¼
Total	3⅛

This total of 3⅛ per cent. for expenses, reducing the proceeds to the city of 89⅜.

Financial quarters in London consider that Toronto acted ill-advisedly, four per cents. being completely out of favor. The London market disapproves the prices and the public subscription will probably be trifling, which is most regrettable at this juncture, when general attention has been directed to borrowing on the part of Canadian municipalities, nd with such a large sum afloat in the shape of treasury bills awaiting funding.

The foregoing information was not obtained at Lloyds Bank but the Canadian Associated Press is satisfied it is quite correct.

The London Financial Times thinks the issue should prove attractive to those not requiring too high a return on their capital. Lloyds Bank is issuing it.

Another Canadian loan was issued in London this week, £738,000 of the Edmonton, Dunvegan and British Columbia Railway first mortgage four per cent. debenture stock, guaranteed by the province of Alberta. The price was 92 and only 2⅗ per cent. was subscribed by the public.

Toronto Power Issue Oversubscribed.

The Toronto Power Company's issue in London of £616,438 4½ per cent. consolidated guaranteed debentures at 97, has been oversubscribed.

The recent offering of province of Quebec bonds has gone fairly well, the underwriters being compelled to take only 48 per cent. of the issue. This is not altogether bad, says a London cable to the Montreal Star, considering that the issue was for £450,000 in 4½ per cents., which is considered low interest nowadays.

A novel Canadian issue in London is the "$3,300,o three year notes of Terminal Cities of Canada." The bear 6 per cent. interest and are offered at 97, yielding the purchaser £7-3-2 per cent. The notes are secured up land valued at $5,250,000.

A block of $2,000,000 consolidated guaranteed fifty-ye five per cent. gold bonds of the Canada Southern Railw Company has been offered in London. The company is p of the New York Central system. The railway is leased the Michigan Central for 999 years from January 1, 19 and its bonds are not only secured by the earnings of own line, but also by those of the Michigan Central. In t past year the Michigan Central earned a profit of about $ 000,000 equal to a dividend of over 16 per cent. upon stock. The New York Central is morally responsible for t welfare of the Michigan Central, inasmuch as it owns nea the whole of its stock. The bonds are guaranteed by dorsement, both as to principal and interest, by the Michig Central Railway, and form part of a total issue of $40,000,o of which $22,500,000 have been sold to redeem $14,000, of six per cent. first mortgage bonds, due January 1, 19 and $6,000,000 of five per cent. second mortgage bonds, d March 1, 1913. The company's system consists of 397 mi of railway, of which 343 miles are double track. Its m line of 226 miles is the central link of the New York Cent system between Buffalo and a point near Detroit in a ch of trunk lines forming part of the shortest route between N York and Chicago.

The following issues have been listed on the Lonc Stock Exchange: Algoma Central Terminals, £500,000 fiv Montreal Tramways $10,445,000, fives; Robert Simps Limited, $2,750,000 sixes; and £462,500 fives.

◆

DEBENTURES AWARDED

Wynard S.D.—$18,000 7 per cent. 30-years to Mess Brent, Noxon and Company, Toronto.

Cumberland, N.S.—$8,000 5 per cent. 20-years, Messrs. F. B. McCurdy and Company, Halifax.

◆

The number of directors of the General Mines, Limit has been increased from seven to eight.

Three bids were made for the $8,000 5 per cent. 20-y court house debentures of Cumberland County, N.S. offer of Messrs. F. B. McCurdy and Company, Halifax, accepted.

Upwards of 60 per cent. of the issue of $1,000,000 six cent. first mortgage bonds of the J. H. Ashdown Hardw Company, Limited, of Winnipeg, Calgary and Saskatoon, have just been offered to the public by the Dominion Sec ties Corporation, Limited, have been absorbed.

ATLANTIC OCEAN FREIGHTS

There is trouble in the North Atlantic Steamship nference. The Canadian Pacific Railway has with- wn from that shipping pool, having failed to agree h it as to a division of business. The Canadian com- ny has established under contract with the Austrian vernment a direct line between Austria and Canada. is will begin to operate on March 20th. The Canadian cific Antwerp Line withdrew from the conference last ar, and at the recent meeting the conference is said have requested the Canadian company to surrender contract with the Austrian government. The com- ny feels that the pool offered in exchange is not a sub- ntial recompense, if any at all. A Montreal dispatch ys that the Allan Steamship Company also will with- aw from the conference. A rate war is predicted. tual steamship rate wars, however, can almost be unted on the fingers of one hand, while the predictions such wars are innumerable. When the Canadian rthern Steamship Company was inaugurated a year so ago, it was said they would remain outside the nference, but the steampship pool was too strong. e history of steamship combines shows that breaches rein are usually healed quickly, as rate-cutting is not munerative to the combine adherents or to its for- kers. The present dissension may remain, but most obably it will be dissolved, even if the Canadian Pacific ilway wins the point.

The incident is not likely to have any far-reaching ect on Atlantic ocean freights between Canada and reat Britain. That subject has been the cause of many scussions by commercial bodies throughout the Dominion, particularly the Toronto and Montreal Boards of Trade, who consider they have a strong grievance in that direction. The dry goods section of the Toronto board have presented a memorial to a special meeting of that organization. In it they tell of the increase in ocean freights on several staple lines, and anticipate further advances. They cite discrimination against British bought goods and in favor of similar goods purchased in France and Germany so much so, they assert, that a large saving is made by some importers having their British bought goods sent to Havre for reshipment from that point via Liverpool by Canadian vessels.

The principle of these statements was confirmed by Mr. J. G. Colmer, C.M.G., chairman of the Canadian section of the London Chamber of Commerce at the recent Empire Commerce Commission. He referred briefly to the question of higher rates on British goods to Canada, as compared with the rates from the Continent, and gave the following illustrations, adding that the London Chamber intended to make further enquiry into the matter, and might ask to submit further evidence to the Commission. No evidence has yet been taken from British shipowners.

"I have two illustrations which I can give you," said Mr. Colmer. "A consignment of six bales of raw Persian lamb skins, packed into three cases, were sent from this country to Toronto, I think at the end of July last, and the freight charged was 1 per cent. on the value, which is about £1,086, and the freight was £10 17s. 2d. This rate was considered rather exorbitant, and endeavors were made to get a reduction, but the steamship company said that was their rate, and that no reduction could be made. About the same time, or a few weeks afterwards, a precisely similar consignment was sent from Hamburg to Toronto, and the freight then was 1.70 dols. per 100 pounds, which worked out for the whole consignment at 17 dol., equivalent to £3 10s., a compared with the charge of £10 17s. 2d. in the case of a similar consignment from the United Kingdom."

The entire matter is one of great interest, and it will be a brave David that slings a stone successfully at the transportation Goliath. And then, too, the steamship companies have a say in the matter. In the meantime, the officials of the Department of Trade and Commerce at Ottawa are investigating the matter.

RIGHTS OF CAPITAL

The famous case respecting the disputed bond money in connection with the Alberta and Great Waterways Railway has come to an end. The Privy Council last week gave judgment in favor of the Royal Bank of Canada and the Railway against the province of Alberta. It is interesting to review briefly the history of the matter, the beginning of which dates back to 1909.

An issue of $7,400,000 5 per cent. fifty-year first mortgage bonds of the Alberta and Great Waterways Railway, guaranteed by the provincial government, was made in London at 110 by Messrs. J. S. Morgan & Company, in December, 1909. The proceeds were placed on deposit in three Canadian banks. The route and length of the road were: Edmonton, north-east of Athabasca River to Fort McMurray, 350 miles. The government pressed the railroad agreement, a crisis occurred, and the provincial cabinet was dissolved.

A royal commission was appointed to investigate the deal. Their report was of little value, material witnesses not having been summoned to give evidence. The provincial government cancelled the railroad agreement, alleging that the company had defaulted bond interest. The provincial government sought the proceeds of the bond sale from the banks which had the money on deposit. The banks refused to hand it over without an order of court.

The provincial government commenced action against the company for the money, and judicial decision was made in favor of the province. An appeal was lodged. The Supreme Court of Alberta, in April, 1912, dismissed the appeal of the Royal Bank from the decision rendered in the lower court. An appeal was then made to the Privy Council, which has just rendered judgment in favor of the bank and the railway.

The Monetary Times intimated some time ago that the English bondholders were not likely to view with equanimity the proposal of Premier Sifton of Alberta, to use in other channel money subscribed specifically to build a railroad. In their judgment, the Privy Council state that "Lenders in London remitted their money in New York to be applied to carrying out a particular scheme. . . . The money claimed in the action was paid to the bank as one of those designated to act in carrying out the scheme. . . . The special account was opened at the bank solely for the purpose of the scheme, and when the action of the Alberta Government in 1910 altered its conditions, the lenders in London were entitled to claim from the bank the money which they had advanced solely for the purpose which had ceased to exist." The judgment is given in some detail on another page.

One of the lessons to be learned by our provincial governments, some of which have shown a slight inclination to allow politics to supplant the rights of capital, is that the rights of the investor in Canada must be respected at all costs, even at the sacrifice of politics. The Royal Bank, in fighting this action to the final tribunal, must be congratulated in having had that principle endorsed by the highest judicial authority in the world. At the same time, we think the entire incident proves the value of Canada's right to submit its cases to the Privy Council, where political and local bias have no sway or consideration whatever.

A QUESTION FOR SIR RODOLPHE

Does Sir Rodolphe Forget consider, in view of th recent publicity respecting his bank and other ente prises, that it is good taste for him to remain as member of the parliamentary banking and commerc committee, which shapes the financial legislation of th country?

REGULATION OF TRUST COMPANIES

It is pleasing to learn that Honorable W. T. Whit Minister of Finance, will introduce next year a gener act governing the operation of trust and loan compani providing for closer regulations. No uniform law exist and charters are granted by both the provincial ar Dominion governments. Every year new companies see new powers and existing companies want extende powers. During a discussion in the banking and con merce committee at Ottawa last week, Mr. White int mated that if trust companies were allowed to recei deposits, their investments should be limited to fir mortgages or municipal bonds, and the amount of gua antee should be in proportion to paid-up capital. M F. B. McCurdy, of Halifax, agreed that the propos to adopt a model trust company bill to apply to all e isting companies and to apply to all future applicatio for charters.

Steps, he thought, should immediately be taken define whether the power of granting such charte rested with the Dominion or the Provincial legislature and legislation shaped accordingly. The name "trust company was being used to-day in some parts of Cana in a way calculated to mislead, if not to deceive, uni formed investors and others requiring the services such a company. He said a trust company's operatio should be confined to the functions which properly belo to a trust company, and such a company should be, fact, a trust company, and the capital of such co panies should be reserved for the protection of the i terest of those people who had entrusted the compa with trust business. A large mass of capital had be placed in the hands of trust companies acting und wills and agreements, much of it tied up for very lo periods and held for the benefit of widows and orphan and it was injudicious that under those circumstanc such companies should be permitted to engage in spec lative ventures, endangering the margin of safety whi the company possessed at the time it accepted the trusts.

The regulation of trust companies in Canada is lo overdue. There are many companies, using the wo "trust," which are transacting business entirely forei to that of legitimate trust companies. New legislati is badly needed, and it is likely to be such that reputal trust companies will be benefited, while their imitatio will be eliminated. *The Monetary Times* proposes discuss this matter at length in these columns in t near future.

SMALL CHANGE

The arson trust should be given its own medici

* * * *

Lemieux—Forget: "After you, my dear Sir R dolphe."

* * * *

Montreal is talking of a 10 per cent. dividend Power—more elbow to Power.

* * * *

The latest problem novel—"What the London U derwriters Took."

If they made a flotation of Suffragettes in London, hat percentage would be left with the underwriters?

* * * *

Tariff revision anxiety has the thickness of a Lonn fog.

* * * *

There will be a race for the nearest place to Emerson's "twenty-three."

* * * *

This is a good time of the year to pound a little iper into real money.

* * * *

While Montreal's civic employees patiently wait for salary increase, the cost of living continues to make erry.

* * * *

Something for the rest of us oozes through the ngers of the twenty-three whom Mr. Emmerson says ntrol our finance and industry.

* * * *

Mr. Stefansson, B.A., explorer, does not want the ew-found Eskimo tribe modernized. Canadian comany promoters please note.

* * * *

The fire losses in Canada last month were nearly ,000,000. In other words, property was burned at e rate of $126,225 per day.

Hon. W. T. White advised Mr. Clark, of Red Deer, to a further study of Solomon. Meantime, it keeps the government busy to study Mr. Clark.

* * * *

During the naval discussion at Ottawa, an honorable member inquired, "Where are the Rainbow and the Niobe?" and echo answered, "Not there, my child."

* * * *

The member at Ottawa who complains of the payment of thirty dollars to feed fourteen cats for a year, must thrive on a diet of nuts and fresh air.

* * * *

Of the Edmonton, Dunvegan and British Columbia issue of £738,000 4 per cents. in London, 98½ per cent. was left with the underwriters—enough to chill the spine of the most ambitious promoters.

* * * *

What joy must have come to the hearts of the native of Swaziland, Basutoland, Bechuanaland, etc., when they heard of the extension of the British preference to them by Canada!

* * * *

A Montreal paper said that the big Chinese loan was settled, and continued: "The loan is for fifty years, but the Chinese government msahtn . . 6 . . 6 . . . ." —which may explain the cables next day stating there had been a hitch.

DOMINION'S ESTIMATES ARE HEAVY

inister of Finance Tables the Figures—Railways and Canals Swell the Total.

The growth of the country is reflected in the main estiates for the financial year 1913-14, tabled by the Minister Finance this week. The amount may be summarized as folvs:

Expenditure.	Amount.	Increase.
nsolidated fund account	$125,850,338	$8,031,856
pital account	53,310,845	1,893,959
	$179,152,183	

The sum of $9,720,043 is required for the redemption of bt. The revenues this year will probably exceed $170,000,000.

The largest increase under the consolidated fund is shown der railways and canals, amounting to $3,045,815, but on the ier hand the capital expenditure on railways and canals deeases by $2,558,527.82. The drop is made possible in the appriation for the Transcontinental Railway, amounting to 9,000,000, as against $25,000,000 last year. There are large creases for the Intercolonial and Hudson Bay Railways, the propriation for the Intercolonial Railway being $7,239,650, d for the Hudson Bay Railway $4,500,000.

w Welland Canal.

The construction of the new Welland Ship Canal is proled for in an initial appropriation of $2,000,000. The estiated expenditure for militia and defence is $10,500,665, an inease of $1,604,268. There is an increase of $760,000 for cusms, and $1,346,687.09 for the post-office, made up largely in lary increases.

The votes for public works amount to $684,400 under revue, and $12,202,000 under capital, the latter being an increase $3,869,487. The votes for the naval service show a decrease $570,500, accounted for in the smaller sum required for the intenance of ships, naval college, and dockyards.

ldiers and Railways.

The militia increases include a half million for ordnance nds and equipment, $250,000 for cadet corps, $200,000 for aining areas, $252,000 for engineer services and works, and 55,000 for pay for the permanent force. The appropriation r construction of armories is increased from $100,000 to $250,0, and there is a vote of $100,000 for the new Connaught nges at Ottawa. For purchases of training areas generally ere is $200,000.

The railways estimates provide $2,500,000 to begin work the new terminals at Halifax, and there are increased appriations for the Intercolonial under various heads, and the propriation for the car ferry to Prince Edward Island is ineased to $[illegible]. The Public Works Department is asking r two millions for the new departmental buildings at Ottawa, d $750,000 for new Dominion buildings at Toronto. There also a half million for harbor improvements at Toronto, and million for a dry dock at Levis, these being new votes.

The vote for French River improvements is raised from $100,000 to $500,000.

Mail and Provincial Subsidies.

The appropriations for mail subsidies includes $229,500 for a service between Canada and the West Indies, an increase of about $80,000. A Government exhibit of fresh and cured food fish is to be made at the Toronto Exhibition, for which there is a sum of $10,000.

The subsidies to provinces show very slight decreases in Ontario, Quebec, Nova Scotia, and Alberta. Manitoba gets an increase of $617,114, and Prince Edward Island an increase of $100,000. Miscellaneous votes include amounts for the National Battlefields Park and a grant of $15,000 to the Medical Council of Canada. The Customs estimates include increases of $600,000 for salaries and contingent expenses at the several ports.

In the estimates of the Department of Agriculture are increases of $70,000 for experimental farms, $50,000 for branch stations, $200,000 to enforce the Meat and Canned Foods Act, and $60,000 for cattle quarantine stations.

◆

CANADIAN FIRE INSURANCE COMPANY

Since the Canadian Fire Insurance Company commenced business in June, 1895, it has paid losses of $1,775,147. The balance sheet for the year ended December 31st, 1912, does not show how the company fared in that respect last year, but whatever the losses were the surplus to policyholders at the end of the year stood at the substantial sum of $815,431. The heaviest item in its assets are investments in the shape of first mortgages on real estate, bonds and debentures amounting to $906,938. Cash on hand and on deposit with bankers totals $118,695. There are net balances totalling $45,264 due by agents.

Funds held by the company in trust as reserve for unearned premiums of re-insuring companies amount to $28,514. The reserve for outstanding losses is $19,737 and for unearned premiums on the Dominion government basis $214,628.

An idea of the progress of the company in the past few years may be gathered from the fact that the premium income in 1897 was $50,425, and last year $425.547. During the same time the net assets increased from $[illegible] to $1,052,202. The company's capital stock fully paid is $500,000.

◆

Lethbridge board of trade new officers are:—President, Mr. W. C. Ives; vice-president, Mr. A. B. Stafford; secretary, Mr. D. J. Hay; industrial committee, Mr. G. B. McKay; finance, Mr. G. R. Tinning; entertainment, Mr. Fred. W. Downer; railways, Mr. John Taylor; municipal, Mr. Alvin Ripley; agricultural, Mr. O. T. Lathrop; publicity, Mr. J. B. Wilkie; membership, Mr. A. Rafton Canning; wholesale, Mr. John Horne; building and contract, Mr. H. J. Goode; grain and milling, Mr. G. W. Green; lumber, Mr. Joseph Jackson; professional, Mr. R. E. McArthur.

WEST KOOTENAY POWER AND LIGHT COMPANY

Annual Financial Statement—Growing Market for Power Produced

Monetary Times Office,
Montreal, Feb. 5th.

The financial statement of the West Kootenay Power and Light Company, published in connection with the recent listing of the stock on the Montreal stock exchange, shed some light on the earnings of a company which has not been well known to the investing public.

During the financial year ending August 31st, 1912,

the gross receipts of the company amounted to....			$332,865
Operating expenses, including maintenance, etc...			110,257
Interest on bonds and sinking fund......		$104,400	
Interest on bonds of Cascade Company and sinking fund		17,564	
Premium on bonds purchased for sinking fund		1,013	
Preference dividends	$14,000		
Common dividends	50,000		
		64,000	
Adjustment		14,206	
			202,083
Surplus for year			$ 20,525
Brought forward on August 31st, 1911...........			153,029
Total surplus			$173,554

As the common stock of the company amounts to $2,000,000, it will be seen that the surplus for the year, over and above all charges including dividends paid on the common stock, is about 1 per cent. on the common stock.

Financial Situation Satisfactory.

A further statement is given for the months of September, October and November, in which the gross revenue is given as $100,328, the operating expenses at $26,636, the fixed charges at $30,491, and the dividends on the preference stock at $5,250, making a total of these charges amounting to $64,377. This, deducted from the gross revenue, left surplus earnings of $35,951 for the three months, being at the rate of $143,804 a year. This applied to the $2,000,000 common stock gives earnings at the rate of about 7 per cent. per annum. The statement of liabilities as at 31st cf August, 1912, shows bonds of $1,500,000, preference shares of $300,000 and common shares of $2,000,000. Accounts payable only amounted to a little over $14,000, and other small liabilities only reached $2,500. In the assets were about $40,000 in cash, $36,000 in accounts receivable. Altogether the financial situation of the company was very satisfactory.

Operations and Prospects.

This company carries on its operations in British Columbia, the principal market for its power being in the mining regions, more especially in Rossland, Granby and Nelson. Such of the lumber companies in the vicinity as can make use of electrical power take their supply from the West Kootenay Electric Company. For some years the organizers of the company have been looking forward to the electrification of the Canadian Pacific Railway through the mountains as a possible means of increasing the amount of power consumed. The Canadian Pacific, it is understood, is interested in the company to a considerable extent, and plans for the electrification of the road have been prepared and may be carried out at some later date. The company is now developing somewhere between 20,000 and 25,000 horse-power, and is in a position to add two or three more units. Altogether, the concern owns sites with a possible development of 100,000 horse-power. The power site is at Bonnington Falls, nine miles outside of the city of Nelson, and Nelson Lake forms an excellent storage reservoir. The company has now been in operation for some years, but the failure of the Rossland mining section to make good deprived it of what would otherwise have been a large consumer of its product.

◆

Officers of the Vernon, B.C., board of trade elected for this year are: President, Mr. G. A. Henderson; vice-president, Mr. W. Scott Allan; secretary treasurer pro tem., Mr G. C. Johnston.

The Canadian Fire Underwriters' Association in its report on Portage la Prairie, suggests the following improvements in its fire prevention facilities. The fire brigade should now number twenty firemen; fire alarm boxes should be indicated by red lights; separate telephone in fire hall for alarms; city's water storage capacity increased to 1,500,000 gallons; building by-law to extend first-class fire limits.

PRACTICES OF THE WORLD'S BANKS.

Their Most Important Functions and Influences—Organization and Note Circulation.

[Below is printed the first of a series of four articles which comprise a synopsis of the practices of the principal banks of the world in respect to several of their most important functions and influences. They are specially contributed to The Monetary Times by Mr. M. P. Langstaff, A.I.A., F.A.S., of Waterloo, Ontario.

The headings selected by him are:—

I. Organization, Powers, How Controlled, Liability of Shareholders, Monopoly, etc.
II. Note Circulation.
III. Redemption of Notes.
IV. Reserves.
V. Branch System or Otherwise.
VI. When a Stringency, Crisis or Panic Occurs.
VII. In Relation to the Money Market.

The first two headings are dealt with this week. —Editor The Monetary Times.]

I.—Organization, Powers, How Controlled, Liability of Shar holders, Monopoly, etc.

(a) The Bank of England.

The Bank of England was founded in July, 1694. It is central bank, controlled by private shareholders, the gover ment having no voice whatever in its management. It has partial monopoly of the right of issuing notes, which, i theory, is destined to become complete; its notes are the onl paper legal tender in the United Kingdom; it is the chie depository of a government that maintains no public treasury and it is charged with the duty of keeping the registry of th public debt and of paying the interest thereon.

Its shareholders have no liability beyond the ownershi of their shares.

(b) The Banks of Scotland.

The banks of Scotland are controlled entirely by privat shareholders, who have no liability in addition to the owne ship of their shares. No bank has any monopoly of note issu

(c) The Bank of France.

The Bank of France is a bank of the simplest type, th is, it is authorized to practise discount, deposit, and the issu of notes, but without any special provision for the safety one class of liabilities rather than another.

The monopoly of the bank was established in 1848, by ma ing all the independent banks, branches of the Bank of Franc It now has a monopoly of note issue but numerous competito in the field of deposit and discount.

It is a private corporation but largely under State contr It performs the same duties in the management of the publ debt that the Bank of England performs in that country.

(d) The Reichsbank of Germany.

The Reichsbank of Germany was established in 1875 as central bank under the immediate supervision of the gover ment. In fact, in Germany all the other banks of issue a subject to a uniform set of regulations, and also to imperi supervision, and the Reichsbank, although owned wholly private shareholders, is under the exclusive control of th government.

The bank is required to conduct financial operations f the Imperial treasury without compensation, and also to ma age, free of cost, receipts and payments of the several Stat of the Empire. It is thus in everything except ownership national bank on a large scale.

It has no exclusive right of issue, but there is a pr vision for transferring any right of issues which may be su rendered by other banks.

(e) The National Banks of United States.

A National Bank of the United States is owned and co trolled by shareholders, who are responsible for the debts the bank in accordance with the double liability clause.

The capital stock required before a bank can be organiz varies with the size of the place. No national bank can organized with a capital smaller than $25,000, and banks this size can be organized only in places of 3,000 inhabitan or less. In places of 50,000 inhabitants or more, the ba must have a capital of at least $200.000.

The national banks have a monopoly of the note issue, State banks are prevented by the ten per cent. federal t from issuing circulating notes.

There is a provision made for designating banks as positories of public money when occasion should require, a for their employment as financial agents of the governme upon their giving satisfactory security by the deposit United States bonds and otherwise, for the faithful dischar of these functions.

(f) Canadian Banks.

In Canada, no new banks can be established with than $500,000 subscribed, of which at least $250,000 must paid up before beginning business.

The banks are private corporations and shareholders are responsible for debts in accordance with the double liability clause.

II.—Note Circulation.

(a) The Bank of England.

By Peel's Act, 1844, the Bank of England was divided into two departments, the issue department and the banking department. The former is charged exclusively with the issue and redemption of notes; the latter is charged with the other functions of banking, including the ordinary business of discount and deposit; and in all dealings with each other, the two departments are as independent as if they belonged to distinct corporations. The currency principle is in operation, the issue department being required to hold either government securities or coin or bullion for all notes issued by it; and the amount of securities which it can hold being limited to the average amount which it is believed will remain in circulation, it has been unnecessary to fix any limit to the issue of notes.

The notes of the Bank of England are legal tender at all places in England and Wales, except at the bank itself. No notes can be issued smaller than £5.

(b) The Banks of Scotland.

The principles embodied in Peel's Act of 1844 were applied to Scotland in a modified form. It was enacted that each bank should have an issue of notes equal to the amount of notes and coin then (1845) issued and held by it. This is called the 'fixed'' circulation. For any additional notes, it was to hold an equal additional amount of coin, but it was not required that this coin should be held specifically for the redemption of the notes; nor was there any provision for ascertaining whether the law was complied with in this particular. No deposited security for bank notes has ever been required in Scotland, but note-holders have a prior lien on the assets and the liability of shareholders for note issues is unlimited. For these reasons, the note issues of insolvent banks in Scotland are always accepted at par by the other banks and are never depreciated.

(c) The Bank of France.

It was stated above that in its system of note issue, the Bank of England was an example of the ''currency principle.'' The Bank of France, on the other hand, is a conspicuous example of the ''banking principle.'' It has no special provision to make for the safety of its not issue, the security for which rests upon the bank's assets and the moral character and business sagacity of its managers. The amount of notes issuable is fixed by law from time to time but the demands of commerce usually anticipated by extending the limit before the maximum is reached. It will be seen, therefore, that the restriction upon its issues is more apparent than real. Both notes and deposits rest upon the same security and the volume of both is determined by the wants of trade.

(d) The Reichsbank of Germany.

In the German system, the notes are secured by salutary regulation, rather than by the actual devotion of specific property, either in the hands of the government, as under the national banking system of the United States, or left in the charge of the bank itself as is the case of the Bank of England. The system is, therefore, a development of the conception of a note circulation resting upon a mixed basis of securities and specie, but with the important change that the law contents itself with requiring the maintenance of this basis, without specially pledging it for the payment of the notes.

In the case of the Reichsbank no limit has been fixed for the aggregate circulation, but the possible aggregate of notes which could be issued without being covered by cash in hand was fixed. The German law, however, gives the power to increase the uncovered issue beyond the limit, subject to payment of the tax of five per cent., thus securing a certain degree of elasticity at the point where, under the English law, the rigidity of the line drawn by Peel's Act has sometimes brought about precarious conditions.

(e) The National Banks of United States.

Three limitations are put on the ordinary issue of circulating notes:—

(1) They must not exceed in amount the capital stock of the bank;

(2) United States government bonds have to be purchased by the bank in amount sufficient to equal, dollar for dollar, the quantity of the notes issued, and these bonds have to be deposited with the treasurer of the United States as security for the redemption of notes;

(3) Each bank must maintain in the United States treasury a redemption fund in ''lawful money'' equal to five per cent. of its note issue.

These notes are not legal tender, except with other national banks, but they may be used in all payments to the government except custom duties.

The Aldrich Act of 1908 authorizes, in two different ways, the issue of national bank notes additional to those heretofore existing, but owing to certain conditions attached to such excess issue, banks have not thought fit to make use of this privilege.

(f) Canadian Banks.

Each bank is allowed to issue notes to an amount equal to its paid-up capital, but competition and the prompt return of the notes for redemption have generally kept the circulation below the authorized amount. A law has, however, been enacted by the Dominion Parliament providing that during the crop-moving season (October 1 to January 1) the banks may issue notes to the amount of fifteen per cent. of their combined capital and surplus in addition to the amounts outstanding at the beginning of the season. There is a five per cent. tax on this emergency issue.

The Canadian system of note issues is based upon the ''banking principle.'' It supplies an ''elastic'' currency, expanding and contracting with the variations of the seasons and the wants of trade.

Canadian banks are not allowed to issue notes below $5 or for any sum which is not a multiple of $5.

MUTUAL LIFE ASSURANCE COMPANY OF CANADA.

Progress, honesty and substance have for many years been firmly imprinted upon the records of the Mutual Life Assurance Company of Waterloo, Ontario. These three were well upheld during the past year. The company's statement for 1912 shows that its assets now total $20,071,344. In 1900 they were about $5,000,000. At the end of the year the business in force had reached $77,921,143, a creditable record.

The company's investments are of a conservative character, as should be those of all life insurance companies. The funds are all invested within the Dominion, and no speculative securities of any kind are carried. Since its foundation not one dollar of the policyholders' funds has been lost.

Regarding the mortality experienced during the previous year, the ratio of actual to expected was low. Last year it was 54%, which, while higher than that of 1911, is still quite favorable.

The expense ratio last year was also pleasingly low. In view of the fact that the large new offices of the company were completed and furnished during the past year, it was to be expected that the expense ratio might rise. To general satisfaction it was found that, on the contrary, it had fallen by almost ½ per cent.

It is good to know in these days of prosperity that our reputable life insurance and other financial institutions are not only making excellent progress, but are also, as in the case of the Mutual Life of Canada, strengthening their fabrics in such a manner as to be able to withstand the adverse economic gales which sweep all countries from time to time.

SASKATCHEWAN GENERAL TRUSTS CORPORATION.

The Saskatchewan General Trusts Corporation was incorporated under special acts of the province of Saskatchewan with an authorized capital of $1,000,000 of ten thousand shares of $100 each, of this $669,700 has been subscribed for and calls of 15 per cent.—$100,455 paid thereon, the bonuses received in connection with the sale of this stock—$26,177 has been set aside to form a reserve fund; and the balance carried forward to the credit of profit and loss, as at the 31st of December, 1912, was $715.

The officers and directors are as follows: president, Mr. W. T. Mollard, building inspector for the Dominion Government, Regina; vice-president, Mr. George H. Barr, barrister, etc., Regina; directors, Dr. D. Low, Regina; Messrs. W. H. Duncan, lumber merchant, Regina; Chas. Willoughby, contractor, Regina, and H. E. Sampson, L.L.B., barrister, etc., Regina.

The company was organized with a view of supplying a strong trust company, managed by directors resident in Saskatchewan, and whose interests are therein, and who have a knowledge of the conditions and prevailing values.

The company has been approved by the Lieutenant-Governor-in-Council as acceptable to the courts of the province for all trust company purposes, and is the only trust company organized in Saskatchewan that has complied with the rules set by the Lieutenant-Governor-in-Council before such approval is given.

The company is to be fully provincial in character, and steps are being taken to increase the directorate by appointing directors at the principal points in the province.

This company is prepared to handle trust and trustee business, and a financial agency business in all legitimate lines.

The company is limited under its act of incorporation to the amount of real estate it may hold, restricting the use of such holdings for its business alone, or as may come to it under foreclosure of mortgage, or the administration of estates or trusts. The company has no real estate holdings and will be unable at any time in the future to purchase or hold real estate for speculative purposes or even for investment except as required in the carrying on of its business.

Mr. J. T. Franks, the company's general manager, was eighteen years with the Manufacturers Life Insurance Company, at Toronto, as investment clerk and assistant secretary and as treasurer. Mr. Franks went to Saskatchewan for the Manufacturers Life Company in 1908 and remained with them until September, 1912, during which time he placed about $2,500,000 in mortgages in Saskatchewan, and purchased upwards of $500,000 of school and municipal debentures.

REVIEW OF THE MONTH

Flotations in London — Investment Offerings — Bank Branches Opened and Closed

BANK BRANCHES OPENED AND CLOSED DURING JANUARY

Thirty-four branches of Canadian chartered banks were opened during January, and five closed. Houston's Bank Directory gives the following particulars:—

Branches Opened.

Aurora, Ont.	Imperial Bank of Canada.
Cowansville, Que.	Molsons Bank.
Courtenay, B.C.	Canadian Bank of Commerce.
Dauphin, Man.	Bank of Montreal.
Empress, Alta.	Quebec Bank.
Fort Fraser, B.C.	Bank of Vancouver.
L'Ange-Gardien, Que.	La Banque Nationale.
Lillooet, B.C.	Union Bank of Canada.
Limoilou, Que.	Royal Bank of Canada.
Medicine Hat, Alta.	Dominion Bank.
Matsqui, B.C.	Royal Bank of Canada.
Montreal, Que., Ontario and Aylwin Street	Banque d'Hochelaga.
Montreal, Que., Ontario and Fullum Street	Banque d'Hochelaga.
New Westminster, B.C.	Dominion Bank.
New Westminster, B.C.	Union Bank of Canada.
Perce, Que.	La Banque Nationale.
Quebec, Que., St. Sauveur	La Banque Nationale.
Regina, Sask., North End	Bank of Nova Scotia.
Regina, Sask., North End	Royal Bank of Canada.
St. John, N.B.	Quebec Bank.
St. Lambert (Chambly) Que.	Royal Bank of Canada.
St. Roch L'Achigan, Que.	Royal Bank of Canada.
St. Stephen, N.B.	Royal Bank of Canada.
Schreiber, Ont.	Bank of Montreal.
Somerset, Man.	Union Bank of Canada.
The Pas, Man.	Union Bank of Canada.
Vancouver, B.C., Fairview	Dominion Bank.
Vancouver, B.C., South Hill	Royal Bank of Canada.
Victoria, B.C.	Bank of Toronto.
Victoria, B.C., Pandora and Cook Streets	Canadian Bank of Commerce.
Westport, Ont.	Union Bank of Canada.
West Toronto, Ont., Union Stock Yards	Bank of British North America.
Winnipeg, Man., Kelvin Street	Canadian Bank of Commerce.
Winnipeg, Man., Sargent and Arlington	Union Bank of Canada.

Branches Closed.

Brant, Alta.	Bank of Hamilton.
Montreal, Que., Bonsecours Branch	Banque Internationale du Canada.
Osage, Sask.	Bank of Hamilton.
St. Cyrille de Wendover, Que.	Banque Provinciale du Canada.
Springside, Sask.	Bank of Toronto.
Stewart, B.C., (opened in error January edition)	Union Bank of Canada.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were among those made in Canada during January:—

Crow's Nest Pass Trust Company, Limited.—Offering of shares.

Consolidated Milk Company, Limited.—$300,000 7 per cent. preference stock at par with a bonus of 50 per cent. common stock.

Independent Tire Company of Toronto, Limited.—Offering of 7 per cent. preferred cumulative participating shares at par.

Bell Telephone Company.—$3,000,000 8 per cent. common stock to shareholders at par.

Robin, Jones and Whitman, Limited.—$100,000 6 per cent. cumulative preference stock at 85 with a bonus of 25 per cent. common stock.

J. B. Baillargeon Express, Limited.—$200,000 7 per cent. per cumulative preference stock at par, with bonus of 25 per cent. common stock.

Canadian Cottons, Limited.—$865,000 6 per cent. preferred stock issued for use in part payment of acquisition of Cornwall and York mills.

Wallace Sandstone Quarries, Limited.—$800,000 6 per cent. bonds.

Eastern Rubber Company, Limited.—$400,000 8 per cent. cumulative preference stock at par, with bonus of 30 per cent. common stock.

Domestic Brick and Tile Company.—$200,000 7 per cent. cumulative preference stock at par, with 40 per cent. bonus of common stock.

Mexican Mahogany and Rubber Corporation.—$50,000 6 per cent. collateral trust sinking fund gold bonds at par, with 25 per cent. bonus of common stock.

J. H. Ashdown Hardware Company, Limited.—$1,000,000 5 per cent. first mortgage 15-year sinking fund gold bonds at 90.20.

Cedar Rapids Power Company.—$8,400,000 5 per cent. 40-year first mortgage bonds at 90, with 25 per cent. bonus of common stock.

Tuplin Silver Black Fox Corporation.—$200,000 6 per cent. bonds at par, with bonus of 40 per cent. common stock.

Stanley Mineral Springs and Brewing Company, Limited.—2,500 shares capital stock at $60 per share, fully paid, and $350,000 6 per cent. bonds at par, with 25 per cent. common stock bonus.

Canadian Bioscope Company, Limited, Halifax.—Offering of shares at $8. Capital authorized and issued, $50,000; par value of shares $10.

Alberta Electric Protection Company, Limited, Edmonton.—$75,000 worth of stock at par.

Saskatoon Trussed Wall and Building Company, Limited.—Offering of shares at par. Capital, $100,000; par value of shares, $100.

Chas. Dalton Silver Black Fox Company, Limited.—$200,000 worth of stock at par, $100 a share.

British Columbia Cafes, Limited, Victoria. Offering of shares. Authorized capital, $25,000, divided into shares of $1 par value.

Banff Lithia Water Company, Limited.—1,000 shares of capital stock at par. Authorized capital $200,000.

Salvator Silver Mine.—Shares at 15 cents. Capital, $1,000,000; par value of shares, $1.

William Currie, Limited, Montreal.—$50,000 capital stock at $50 per share. Authorized capital, $250,000.

NEW LISTINGS

The following securities of the Western Canada Power Company have been listed on the Montreal Stock Exchange: $4,000,000 5 per cent. 40-year first mortgage bonds due July 1st, 1949, £205,400 sterling, interest payable January 1st and July 1st.

Five thousand additional shares of the Quebec Bank have been listed on the Montreal Exchange.

The Montreal Exchange has listed 865 additional shares of Canadian Cottons preferred.

One million dollars common and $1,000,000 preferred stock of the Canada Interlake Line have been listed on the Toronto Exchange.

The following securities of the West Kootenay Power and Light Company, Limited, have been listed on the Montreal Exchange:—20,000 shares common; 3,000 shares preferred stock; and 308,219 first mortgage 6 per cent. 35-year sinking fund gold coupon bonds.

The Brazilian Traction Light and Power Company have listed 1,045,000 shares of common stock on the Montreal Exchange.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during January:—

British Columbia Electric Railway.—£750,000 4½ per cent. perpetual consolidated debenture stock at 98.

Grand Trunk Pacific Railway.—£479,300 4 per cent. first mortgage guaranteed bonds at 94.

City of Quebec.—£400,600 4½ per cent. debentures at par.

Quebec Government.—£400,600 4½ per cent. registered stock at 102.

Toronto Power Company.—£616,438, 4½ per cent. consolidated guaranteed debenture stock at 97.

City of Toronto.—£1,075,000 4 per cent. consolidated debentures at 92½.

Edmonton, Dunvegan and British Columbia Railway.—£738,356 first mortgage 4 per cent. guaranteed debenture stock at 92.

Canada Southern Railway Company.—£411,520 consolidated guaranteed 50-year 5 per cent. gold bonds at 106¾.

Canadian Farms, Limited. £5,000 shares of £1 at 87½.

Terminal Cities of Canada.—$3,300,000 three-year 6 per cent. notes at 97. The notes are secured upon land valued at $5,250,000.

The following flotation was omitted from the December t:—

Caledonia British Columbia Mortgage Company, Limit-.—£100,000 at par.

An unusual Canadian issue in London was made last onth in the flotation of £3,300,000 three-year notes of erminal Cities of Canada. They bear interest of 6 per cent. d were offered at 97. The notes are secured upon land with estimated value of $5,250,000.

JANUARY DIVIDEND CHANGES.

The Muskoka Navigation Company, after having failed to y any dividend for thirteen years, have declared a dividend 5 per cent.

The Bank of Hamilton have increased their dividend from to 12 per cent. per annum.

A dividend of 1½ per cent. payable March 1st, has been clared by the Granby Consolidated Mining, Smelting and wer Company. The former dividend was 1 per cent.

◆

HAMILTON FIRE INSURANCE COMPANY

The annual statement of the Hamilton Fire Insurance mpany, with head office at Hamilton, Ontario, shows that spite the heavy fire losses throughout Canada, the company anaged to make a good showing. Its income for 1912 nounted to $68,816, of which $51,056 represented cash sysm premiums and $5,424 mutual system premiums. Losses talled $29,942; re-insurance, $7,226; return premiums and bates, $6,393; commissions and bonus, $7,949; and genal expenses, $10,463. The total expenditure, therefore, as $56,973. The surplus amounted to $11,842, a substantial m. A conservative policy distributed the surplus as folws:—Written off organization expenses, $1,589; office furture account, $84; dividends paid, $1,200; transferred to -insurance reserve, $7,846; transferred to surplus account, ,123.

The company's assets include $14,362 of debentures desited with the Ontario government. Other debentures held, ares of the Dominion Permanent Loan Company and desits with the Mercantile Trust Company account for about 11,000 of the assets, while mortgages and cash on hand d in bank are represented by $26,000. The total assets are 3,092.

The subscribed capital stock is $170,900, and the stockolders' surplus, $3,639. In 1906 the company had at risk an nount of $1,389,292. Last year that sum had expanded to 7,743,713, an increase of $6,354,413. In the same period e number of policies in force has increased from 1,615 to 848, a gain of 7,233. The policyholders' security in 1906, 100,000, which by 1912 had increased to $216,357, a gain of 116,357. The statement is a good one.

◆

LAKE SUPERIOR CORPORATION

The Lake Superior Corporation propose to expend a rge sum of money—$12,000,000 is mentioned—to extend its lant at Sault Ste. Marie, Ontario. Mr. J. F. Taylor, vice-resident and managing director of the company has been New York in consultation with his associates, and states at the company has determined to meet the Canadian deand for steel rails. Sixty-seven acres of land have been urchased for the proposed extensions. Another blast furace and a new steel rail mill will be erected and large additions made to the open heart hand coke plants.

Mr. Taylor states that when the new works are complet-d the corporation will be in a position to turn out six hunred thousand tons of steel rails per year, or a daily average f two thousand tons, and he estimates that that will be sufcient to meet the requirements of the country. The maxinum output of the present steel mill is about three hundred nd sixty thousand tons a year.

CROWN LIFE INSURANCE COMPANY

At the beginning of last year, the Crown Life Insurance Company set forth with determination to write new business in the twelve months amounting to $4,000,000. That was accomplished before the end of December and when the books were closed for the year the total in new applications for insurance was $4,006,020, an increase of 47 per cent. over 1911. This satisfactory result contributed largely to the total amount of insurance in force, which at the end of the year was $10,015,879, a gain of 30 per cent. compared with the same account at the close of 1911.

Not only was progress made during 1912 but a large proportion of the old business in force was retained on the books. The company's total revenue was $388,631. Premiums paid in cash amounted to $319,832, which was $68,976 more than the preceding year. An examination of the company's figures reveals a commendable feature in the shape of a decrease in expenses. Full provision was made for all liabilities on policyholders' account, special reserves, etc., and after that the company was able to increase its surplus to $204,337.

Both policyholders and shareholders have benefited considerably. Payments to policyholders amounted to $89,081. The company was able to pay on its first maturing endowments the full amount of profits originally estimated. The policyholders' security in excess of the net insurance reserve fund of $964,984 amounts to $702,705, giving the policyholders a total security of $1,667,689. The dividend to shareholders was increased last year to 7 per cent. per annum upon the paid-up capital stock of the company.

The total assets amount to $1,283,967, having been increased during the year by 25 per cent. The investments of a life insurance company are important items. The assets of the Crown Life include $428,046 invested in first mortgages on improved farm and central city property, each loan being well within 50% of a conservative valuation and earning a good rate of interest; $205,578 invested in city, town and school district debentures and bonds; $170,170 in loans on the company's policies; and $210,567.70 in real estate. The financial statement and operating results will prove gratifying to all those interested in the company's progress and welfare.

◆

WESTERN EMPIRE LIFE ASSURANCE COMPANY

One of the most interesting announcements at the annual meeting of the Western Empire Life Assurance Company held at Winnipeg was that an offer had been received from London, England, for the balance (5,000 shares) of the company's capital stock at an increase in premium of $10 per share. The matter was the subject of considerable discussion among the shareholders and was finally rejected. This shows at least that the shareholders have confidence in the future of their enterprise.

The first annual report of the company was presented, and showed that policies totalling $1,008,500 were issued and placed with an annual premium of $27,244. There were no death claims, which fact, to some extent, is a tribute to the selection of risks, although naturally no life insurance company can expect to enjoy such a record every year, however good is its selection. After making provision for all liabilities the surplus to policyholders amounts to $209,402. The assets total $223,821, which with uncalled capital provides a total guarantee to policyholders of $549,821.

The company's investments have been confined to first mortgages on improved revenue-bearing real estate, with the exception of the amount of the deposit with the government, which, to comply with the Insurance Act, is in the form of 20-year bonds, which are yielding about 4.10 per cent., the interest being guaranteed by the Manitoba government. The demand for money to develop the resources of the country has enabled the directors to select investments affording ample security and at the same time yielding a remunerative rate of interest, the average rate realized exceeding 8 per cent.

The authorized capital of the Western Life Assurance Company is $1,000,000, of which half is subscribed and $125,000 paid up. The directors and officers are as follows:—L. J. Hallgrimson, Winnipeg; G. N. Broatch, B.A., LL.B., Moose Jaw; S. D. Hannah, Waskada; R. J. Sprott, B.A., Vancouver; G. E. Graham, Vancouver; William Smith, president and managing director; W. P. Rundle, vice-president; H. F. Tench, vice-president; A. J. Fraser, medical director; J. H. Charnley, secretary; and F. C. O'Brien, treasurer.

Ross and right, Toronto, adjusters for insured.

Montreal, Que.—February 2.—Mr. J. B. Farier's residence, 6 St. Ferdinand Street, St. Henri. Loss unknown. use, children playing with matches. Mr. G. Hall's coal eds, Wellington and Basin Streets. Loss unknown. Cause, ontaneous combustion.

February 3.—Messrs. W. J. O'Leary and Company, 46 ecollet Street. Loss $2,000. Cause, lighted torch.

◆

TORONTO GENERAL TRUSTS CORPORATION

"I again repeat the unalterable decision of this corporon rigidly to confine itself to purely trust and agency busiss, and the investment, either as agent or guarantor, of nds committed to its care, but only in securities authorized the Trustee Investment Act, unless otherwise directed by investors, together with the transaction of other business a purely fiduciary character." These statements were made Mr. J. W. Langmuir, general manager and vice-president the Toronto General Trusts Corporation at the annual eeting of shareholders this week. Their importance is phasized by the fact that by having initiated and continu for many years that rigid and proper policy, the company in the forefront as a respected, reputable and prosperous ist company. This is confirmed in the thirty-first annual atement, which shows net profits of $233,915 for the year, er payment of all expenses. To this amount the net pro om the sale of the corporation's old head office premises, rner of Yonge and Colborne Streets, Toronto, amounting $95,618.74, must be added, together with the premium of 13,746.50 received from the sale of the new stock of $250, issued during the year, and the balance of $71,237.37 ought forward to the credit of profit and loss from 1911, king a total of $614,518.54. This was dealt with by the ard as follows:—

Payment of four quarterly dividends at the rate of 10 r cent. per annum, $110,892.38; total cost of office furnie, and equipment for treasury and filing vaults in new ad office building written off, $17,155.08 reserve fund (ineasing this fund to $1,100,000), $400,000; amount carried ward to the credit of profit and loss, $86,471.08.

The total assets in the hands of the corporation amount $53,852,564, an increase over 1911 of $8,765,904. The lume of executorships, administrations, trusts and work of indred character which came into the hands of the corporon during the year amounted to $10,424,764, which exds the amount of new work assumed by the corporation in y one year since its inception.

The interesting address of Mr. J. W. Langmuir, the comny's vice-president is printed in detail on other pages, as also particulars of the excellent financial statement.

◆

The name of the Dominion Rubber Company, Limited, s been changed to Eastern Rubber Company, Limited.

TORONTO RAILWAY COMPANY

The gratification of a shareholder who was present at the annual meeting of the Toronto Railway Company this week, at the excellent financial statement presented by the directorate, was apparently disturbed by prospects of civic competition. Mr. Fleming, the general manager, however, quieted those fears, merely pointing out the heavy loss at which the short existing civic lines were being run. Every street railway is trailed by an army of critics. Mr. Fleming told his shareholders, and incidentally the army, that the Toronto system is one of the best on the continent, and we think that fair-minded critics will agree with the statement.

The gross earnings last year amounted to $5,448,050. Deducting therefrom charges of $2,866,550 for operating, maintenance, etc., the net earnings were $2,581,500. Several substantial payments were made from that sum, the heaviest being to the city and amounting to $942,048, while $879,595 represented dividends to the shareholders. Bond interest, etc., absorbed $190,992. The payments to the city were greater by $119,815 or 14.6 per cent. than in the previous year.

The progress of the company in recent years is shown in the following table:—

	1902.	1908.	1912.
Gross income	$1,834,908	$3,610,272	$5,448,050
Operating, maintenance.	1,015,361	1,889,046	2,866,550
Net earnings	819,547	1,721,226	2,581,500
Passengers carried	44,437,678	89,139,571	135,786,573
Per cent. of charges to passenger earnings .	55.3%	52.9%	58.4%

The Toronto and York Radial Railway Company report that their earnings continue to show satisfactory increases, the gross earnings amounting to $492,922, compared with $449,059 for the previous year—an increase of 9.76 per cent.

◆

OTTAWA ELECTRIC RAILWAY.

The shareholders of the Ottawa Electric Railway Company have every reason to be pleased with results of operations for the year ended December 31st, 1912. The gross earnings were $934,397, an increase of $93,717 over the previous year. The net earnings were $400,059. Out of that sum, four quarterly dividends of 3 per cent. and a bonus of 3 per cent. were paid, being a distribution to shareholders of $255,947. The gratification of the shareholders was further strengthened by the prediction of Mr. T. Ahearn, the president, that the prospects for the coming year are of the brightest character.

The growth of the company in the past few years is clearly shown in the following table:—

	1893.	1903.	1912.
Gross receipts	$110,071	$348,888	$934,397
Total expenses	70,221	254,346	578,540
Net income	39,850	94,541	355,856
Passengers carried	2,394,504	7,911,718	21,815,798
Per cent. of operating expenses to receipts		61 4-5%	57 1-5%

After the payment of dividends and bonus last year, the substantial sum of $69,000 was placed at the credit of contingent account to be applied to the reduction of track renewal, car equipment and other accounts. Interest on bonds and loans absorbed $21,303; mileage payments, $13,435, and taxes, $9,463. There remained a sum of $30,908 for transference to credit of profit and loss account. The balance at credit of that account is now $138,264 and at the credit of rest account $200,000. Several important improvements were made to the company's system last year, by which the earning capacity and facilities for handling the increasing traffic will be greatly augmented.

◆

The capital stock of the Walter M. Lowney Company of Canada, Limited, has been increased from $250,000 to $500,000, such increase consisting of 2,500 shares of $100 each.

The capital stock of the Texas Prairie Lands, Limited, has been decreased from $10,000,000 to $3,500,000, such decreasing consisting of 6,500 unissued shares of $100 each.

The attempt of the Dominion Express Company to exercise its privilege to carry on an express business over the whole system of the Intercolonial Railway, under an agreement which came into effect on February 1, has so far proved ineffectual so far as the Montreal terminus of the Intercolonial is concerned. The latter railway uses the Grand Trunk rails from St. Rosalie to the Bonaventure Station, having held running rights for a number of years, but on the eve of the new arrangements coming into effect, steps were taken by the Grand Trunk officials to prevent the handling of any express matter by the Dominion Express Company over the Grand Trunk Railway tracks or in the Bonaventure Station.

ST. JOHN DISTRICT IS ACTIVE

Good Roads Organization—Harbor Improvements—Manufacturers Recognize its Facilities.

(Special correspondence.)

St. John, N.B., Feb. 5, 1913,

A provincial good roads association was recently organized at St. John, and resolution adopted urging that trunk roads of a permanent character be constructed between leading centres in the province, and that the government secure the service of a competent highway engineer. A strong delegation will present the resolutions to the legislature. Every county was represented at the convention.

Messrs. Norton Griffiths & Co. have submitted a proposition to the effect that if the St. John municipal council and the New Brunswick Government will together guarantee $65,750 for 35 years, they will enlarge the new dry dock to 1,150 feet in length, and establish in connection with it a ship building plant, their total expenditure on the whole plant being $7,000,000.

Messrs. Norton Griffiths' agent, who made a tour of New Brunswick last year, has notified the provincial government that he will bring twenty British families to settle on ready-made farms in the province in the spring, and if more farms are available, he will bring more families. The immigration agent of the provincial government in London anticipates a large increase in immigration this year.

Lumbering and Transportation.

One lumber exporting firm have expressed the opinion that there will be as much lumber available for export as was exported last year, as this winter's cut will be supplemented by quite large quantities held over from last year, because of the almost prohibitive rate of ocean freights. Others fear that the available quantity will be considerably less. While the British deal market has recently been higher than at any time since 1884, there has been a decline because of the heavy receipts of white wood from the Baltic. The port of Riga is usually frozen up all winter, but this year an open season has prevailed as in this province, and as a result heavy shipments have been made to British ports. Recent advices received in St. John told of the receipt of 14,000,000 feet of white wood from Riga at Manchester, causing a drop of ten shillings in the price of New Brunswick spruce. The American lumber market is fairly promising. The shipments of New Brunswick spruce and pine to Montreal and Eastern Ontario are said to have more than doubled in the last year, and this market will continue to grow. The New Brunswick shingles are shipped as far as Toronto.

There were eleven ocean steamships in St. John harbor taking cargo at one time last week. The week's exports of grain alone through the Canadian Pacific Railway and Intercolonial Railway elevators amounted to more than a million bushels. Traffic both to and from transatlantic ports is heavy, and many immigrants are expected from now until the end of the season.

The Canadian Pacific Railway is considering the establishment of a fast service between St. John and Halifax by the Bay of Fundy route. It is proposed to put a twenty-two knot steamer on the bay and shorten the journey to Halifax to six hours.

Industrial Enterprises Locating.

The city engineer of St. John estimates that it will cost half a million dollars to reclaim the area at the south end of the city, comprising nearly 45 acres, as a site for new industries. Messrs. T. McAvity & Sons have submitted to the council complete plans for an iron, brass and steel site when it is reclaimed. Messrs. Haley Bros. & Co. are prepared to erect a large woodworking plant on the same area.

The Noyes Machine Company, of Portland, Maine, manufacturers of propellors and brass specialties, will establish a factory in St. John for their European business during the winter season. The manager of the company, who was in St. John last week, said they had chosen this port because of its splendid shipping facilities, and he was surprised that more American manufacturers did not locate in St. John.

The Maritime Motor Company have commenced manufacturing and expect to have the factory in full operation in a few weeks. Its estimated output is 1,000 cars per year.

◆

Edmonton's city commissioners are inviting tenders for 35,500 square yards of street paving, about fourteen miles cement walks and twenty miles plank sidewalks. This is only a portion of the paving and walk construction to be done this season.

Trenton, Ont., board of trade officers for 1913 were elected as follows:—Hon. President, Mr. Robert Weddell; president, Mr. Arthur E. Cuff; vice-president, Mr. B. H. Siddall; secretary, Mr. P. A. Thompson; treasurer, Mr. H. F. Whittier; council, Messrs. P. J. O'Rourke, J. Funnell, E. V. Illsley, Eben James, W. H. Matthews, Dr. Jacques, E. L. Marsh, and S. Hooey.

WESTERN PROSPECTS ARE BRIGHT

General Commercial Conditions—Transcona Shops Start Work—Medicine Hat Societies Merge.

Monetary Times Office.

Winnipeg, February 4, 1913.

The business outlook in the West is becoming brighter, the merchants are satisfied and there has been few failures in the West this season.

The financial situation is also encouraging and the reports being presented by many of the leading Winnipeg companies are satisfactory.

There is a good demand for loans in the country, but the money is limited. Financial houses are hopeful that the eastern situation will soon be such that there will be funds for legitimate purposes.

Collections are improving, although they are behind anticipations. In this connection the explanation given recently in The Monetary Times describes conditions accurately. Payments will come forward all right, even if they delayed more than the trade would wish. There is a large amount of the crop to be marketed yet, and it may be added that slightly better prices of grain are being obtained.

Anticipations Are Being Realized.

The Grand Trunk Pacific shops at Transcona are opened and have started work. Since the work on these shops was started Transcona has grown until it now has a population of 2,000 people.

The shops are large and cover a big acreage and containing one of the largest and best equipped locomotive works in either Canada or the States.

Two hundred and fifty mechanics and two hundred assistants arrived in Transcona from Rivers last week and started to work.

The Dominion Chemical Works, employing about 150 men all the year round, is located on Oxford street, and the site for the Manitoba Bridge and Iron Works is on the same street. Several other manufacturing concerns have or are locating at Transcona.

Medicine Hat After Industries.

The amalgamation of the Medicine Hat board of trade and the industrial bureau of that place was effected at the annual meeting of the board of trade. Mr. L. Y. Birnie, chairman of the industrial bureau, was unanimously elected president of the board of trade, and Mr. Arthur M. Grace, vice-president, together with a council of eight. Meantime the industrial bureau decided to accept the invitation to join with the board of trade, and recommended the selection of Mr. W. B. Willcox, secretary of the industrial bureau for some months, as secretary of the consolidated organization.

It was decided to carry on more vigorously the work that has been done by the industrial bureau for the last year under the title of the industrial bureau of the board of trade. This work will be looked after by a large committee of leading citizens, to co-operate with the officers and council of the board of trade.

◆

STEEL AND RADIATION COMPANY'S STRONG DIRECTORATE

The following are the directors of the Steel and Radiation Company, Toronto:—President, Sir Henry Pellatt; first vice-president, Sir John Gibson, Lieutenant-Governor of Ontario; second vice-president, F. Nicholls, general manager, Canada Foundry Company; Sir William Mackenzie, Toronto; Gordon Perry, manager National Iron Works, Toronto; Captain Reginald Pellatt, Messrs. Pellatt and Pellatt, Toronto; Grant Hugh Browne, London, England; Thomas W. Southworth, vice-president of the Deloro Mining and Reduction Company; H. H. Macrae, manager, British and Colonial Land and Securities Company, Limited, Toronto; and Samuel Trees, leather merchant, Toronto. The company's annual meeting will be held on March 3rd.

◆

CANADIAN PACIFIC RAILWAY BUYS IN CHICAGO

The Canadian Pacific Railway, through the Central Terminal Railway Company, which is owned by the Soo, has completed purchase to date of about three blocks of real estate in Chicago, on the west side of the city, near Canal and Sixteenth Streets, representing a total investment of $2,[illegible] The property will ultimately be used for freight terminals.

In addition to this, the Canadian Pacific Railway Company, through the same agency, is purchasing land in the neighborhood of Harvard Street and West Forty-eighth Avenue, for auxiliary yards, to be used in connection with the operation of the Chicago Belt Railway Line, the facilities of which are increased.

FIRE UNDERWRITERS' LABORATORIES

ıeral Opinion of Fire Insurance Men is in Favor of Branch Establishment.

The report on the underwriters' laboratories at Chicago e to the Imperial Board of Trade by Mr. G. Hamilton kes, the British Trade Commissioner in Canada, continues attract considerable attention in fire insurance circles on continent. A synopsis of the report was printed recently The Monetary Times and last week the opinions of various insurance managers were published. Mr. Wickes discussed effect of the operation of the laboratories on the importa- of British manufactures into Canada. He suggested sev- solutions for his complaints and favored the establish- t of a laboratory in England. to be practicallly an off- ot of the underwriters' laboratories, Chicago, run on similar s, utilizing the experience gained at Chicago, employing ally competent, but British consulting and technical engi- rs.

Mr. John A. Robertson, secretary of the Western branch the Canadian Fire Underwriters' Association, thinks that English manufacturers and the Trade Commissioner in plaining of the requirement of the insurance companies for examination of such English made goods as have a bearing losses by fire, entirely overlook the reason for this require- t having been instituted and its continual necessity. ney are not familiar, as we unfortunately are,'' he says, ith the tremendous annual loss suffered on this continent n fire and they consequently cannot appreciate the value put on any machinery evolved to check this. The National Protection Association, made up of manufacturers, pri- e individuals, boards of trade. architects' associations, con- tors' associations, creditmen's associations, insurance or- izations and others, is the leader in this work, and the lerwriters' Laboratories at Chicago is the branch of that ciation which does the practical work of examining, testing approving or disapproving of the numerous articles or ices which may directly or indirectly aid in the starting or ead of fires or their limitation or extinction. There can be doubt that the laboratories, in standardizing materials and ices, have performed a work of the utmost value to the munity, and the insurance companies know they would be ing in their duty both to themselves and the public if they lected to appreciate and support this work.

s Companies Are Satisfied.

''The laboratories are, it is true, located in the United tes, but the insurance companies are thoroughly satisfied to their independence and reliability, and these qualifica- s are as fully admitted by manufacturers here as they are wn to ourselves. Then also the location of the laboratories Chicago is very suitable, as this city is probably as central any point for the principal manufacturing industries of th America. and the insurance companies have always felt known that it was better to have one good institution, lified and equipped in the highest degree, rather than more aerous testing and examining stations where the equipment staff could not hope to be so complete or capable and ch would not therefore have the full confidence of the ufacturers.

''It is evident that we cannot give privileges to English ufacturers that we do not give to our own, and referring the articles Mr. Wickes speaks of more particularly, viz., trical devices and wiring, we have felt compelled, owing the poor quality of much of the latter material made and d here, to assist the laboratories in requiring a better stand- , so that now all wiring that is approved has been sub- ted and passed by the laboratories, and the output of the adian factories is examined regularly by our local inspec- s and not labeled as approved unless equal to the fixed ndard. Examination by local inspectors of goods made in gland could be carried out either there or here, as the oratories and the insurance companies are quite willing to ist the English manufacturers in any way possible to have ir product marketed here and offered to the public on ctly equal terms with the same articles made in this coun- , but at the same time our English friends must be reason- e and not expect us to be otherwise.

ditions in the Dominion.

''Conditions in the Dominion have shown that the style buildings, methods of construction, class of work done and habits of the people generally require a more rigid stand- ization of materials than is called for in Europe. We have refore asked our own manufacturers. in their own interests well as ours, to adopt certain methods and submit to a ular examination of their goods, which, on approval, are eled and then accepted as satisfactory by dealers, inspectors l the public. This, of course, involves extra trouble and ense, which, however, all here admit to be required, and o not think it is asking too much of the English manufac- ers to require them to conform, for articles they want to here, to the rules and practices that obtain in this country.

Mr. J. E. Dickson, Canadian manager of the Law ion and Rock Insurance Company, Limited, of London, Eng- d, says it is a well-known fact that the Underwriters' boratories of Chicago have done excellent work, work that has been of great value to the premium payers in both the United States and Canada, as well as being advantageous to the ''fire insurance companies'' and to the American manufacturer carrying on business in the United States, ''but however much we in Canada may sympathize with Mr. Wickes in his efforts on behalf of the British manufacturer,'' he adds, ''yet we can scarcely be expected to allow uninspected goods to be used, whether from Great Britain or elsewhere, simply on the assurance of someone interested in selling them that they are as good or superior to those which have been tested and passed by qualified experts.

Establish Laboratory in England.

''It seems to me that the most feasible solution of the difficulty would be to establish in Great Britain a laboratory similar to the Underwriters' Laboratory at Chicago and either affiliated with or separate from the Chicago laboratories, but of such a high character that its reports, after tests and inspections, would be accepted everywhere. I am sure that there is no desire on the part of the underwriters in Canada to put difficulties in the way of the British manufacturers, but our first duty is to safeguard the interests of the insurance companies.''

Mr. Alfred Wright, manager for Canada of the London and Lancashire Fire Insurance Company, Limited, of Liverpool, England, says he has not had time to go carefully into the subject, but he has not heard of any Canadian manufacturers complaining of unfair treatment or discrimination of any kind. ''On the other hand,'' he adds, ''there could be no objection, excepting on the ground of expense, to the maintenance of a laboratory, either in Canada or the United Kingdom, provided the standards were kept sufficiently high to meet the exigencies of climatic and other conditions obtaining on the North American continent, the requirements for which must necessarily be more stringent than those of Great Britain.''

◆

OUR MUNICIPALS AT HOME AND ABROAD

Saskatoon Has Placed Six Months Bills—Edmonton Has Big Issue for Disposal.

The city of Saskatoon has placed in London an issue of six months bills at 5½ per cent.

Underwriting is proceeding in London for Winnipeg city's £750,000 4½ per cent. loans, at par.

The underwriters of the Toronto city loan of £1,075,000, took eighty-five per cent., which confirms previous cables of the Canadian Associated Press, concerning the attitude of the London market and a probably poor public response.

Success of Quebec City.

The success of Quebec city's 4½ per cent. debenture issue of £400,600, which was oversubscribed when offered by the Bank of Montreal in London, is satisfactory when compared with the reception accorded issues made since. The general attitude is unfavorable to new flotations, according to the London financial correspondent of the New York Journal of Commerce, who cabled towards the end of the week as follows:—''British investors are hanging back. New capital issues are being very indifferently subscribed, underwriters themselves being compelled to take most of the offerings. There is a strong demand for money, the requirements of short-term notes, war bills, etc., easily absorbing the surplus funds of the banks and insurance companies.''

Edmonton Had One Offer.

The city of Edmonton has for sale two bond issues, one for $1,250,000 and the other for $5,500,000. Tenders were called for these and among the offers was one from a London firm to underwrite the issues for 90 if the rate of interest is 4½ per cent. This offer was refused.

The Imperial Bank will handle the smaller issue.

The city of Guelph proposes to purchase city of New Westminster debentures to the amount of $19,000, payable in 1917, for the sinking fund, as the money will be needed at that time.

No Bids for These.

The St. Agnes Roman Catholic School District, No. 22, Saskatchewan, has for sale $50,000, 5 per cent. debentures, maturing in forty years. The money is required to purchase a site and erect a school. Although this is the second time tenders have been called. no bids were received. An offer, however, was made by a Toronto bond house at 96 for $30,000 6 per cent. bonds, but the authorities refused to sell at that figure.

◆

Mr. D. L. Clink was elected president of Battleford, Sask., board of trade; Mr. W. W. Smith was elected vice-president, and Mr. J. Chivers, secretary. For the executive committee the following gentlemen were chosen, Messrs. F. G. Atkinson, L. P. O. Noel, D. B. White, A. J. MacCormack, A. G. Cunningham, J. Nicoll, J. Hoover, L. E. Schaefer, and L. H. Good.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Merchants Bank.—The Merchants Bank is calling for tenders for 2,411 shares of the new issue of stock authorized by the shareholders in December, 1909. The shares offered comprise the unaccepted allotments and the fractions which under the bank act were not allowed.

Hudson Bay Company.—For the nine months ended December 31, 1912, the total revenue of the Hudson Bay Company was $2,911,000, an increase over the same period in 1911 of $1,602,500. Probably for the year ending March 31, 1913, there will be in the neighborhood of $1,000,000 available for dividends.

Nova Scotia Steel and Coal Company.—The output of iron and steel by the Nova Scotia Steel and Coal Company for January is less than usual owing to the furnaces being repaired. The January output is as follows:—Coal mined, 69,000 tons; ore mined, 38,500 tons; pig iron, 4,800 tons; steel made, 5,800 tons.

British Columbia Packers, Limited.—It is stated at Montreal that over 60 per cent. of British Columbia Packers "A" preferred stock has been exchanged for common stock. Interests close to the company have been recommending the exchange in view of the larger dividends it is intended to pay on the common stock.

Montreal Tramways Company.—Messrs. N. W. Harris and Company, of Boston, who have already loaned the Montreal Tramways Company between eleven and twelve million dollars, are prepared to increase this to seventy-five or one hundred millions. The money, which would go towards betterments and extensions, is to be spread out over a period of thirty years.

Ritz-Carlton Hotel Company.—The annual meeting of the Ritz-Carlton Hotel Company of Montreal, Limited, was held at the hotel recently, when accounts and reports were submitted. The following officers were elected:—President. Mr. C. R. Hosmer; vice-president, Mr. William Harris: directors, Sir H. Montagu Allan, Messrs. C. B. Gordon, G. W. Farrell, T. J. Drummond, Hon. Lionel Guest, Messrs. H. V. Higgins, Charles Meredith; secretary-treasurer, Mr. L. W. Just; assistant secretary-treasurer, Mr. H. W. Norton.

Canada Landed and National Investment Company.—Directors of the Canada Landed and National Investment Company have decided to increase its dividend rate from 8 to 9 per cent. per annum. The dividend will be paid quarterly instead of half-yearly, as heretofore. Earnings of the company for last year were at the rate of 14 per cent. on the paid-up capital. Mr. G. Tower Fergusson was appointed a director of the company in succession to the late Hon. James Young.

Ottawa Electric Railway Company.—The Ottawa Electric Railway Company at its annual meeting re-elected the old board of directors, consisting of Messrs. T. Ahearn, W. Y. Soper, Thomas Workman, Elbert W. Soper, T. Frank Ahearn, G. P. Brophy and J. D. Fraser.

The company had a successful year and the shareholders were paid a dividend of 12 per cent. and 3 per cent. bonus. Many extensions are contemplated this year and considerable equipment is to be added to the rolling stock.

The dividend is the same as the preceding year.

Canada Iron Corporation.—The Canada Iron Corporation, with works at Nictaux, N.S., will ship 100,000 tons of hematite ore to the United States, Germany, Scotland and elsewhere very shortly.

Mr. T. J. Drummond is president of the concern. About 150,000 men are now employed. The docks are at Port Wade, in the Bay of Fundy. The Dominion government recently expended $125,000 on the harbor, where there is now 26 feet of water at low tide, and where ships took a full cargo as late as December 26.

The Canada Iron Corporation has erected ore receivers holding 8,000 tons on the wharves, and has loading facilities for 100,000 tons an hour into steamers.

Detroit United Railway.—The annual report submitted at the meeting of the Detroit United Railway stockholders showed an increase of nearly a million and a half in the gross earnings from operation during last year, which amounted to $11,605,530. Passenger earnings were $10,032,686 compared with $9,615,117 the previous year. Net earnings from operation were $3,965,121, as against $3,673,092 last year. Operating expenses, it was claimed, increased over $1,000,000. Net earnings from sources outside of operation amounted to $208,856, against $178,812 last year. A dividend of 1⅜ per cent., payable March 3, was declared. Messrs. A. J. Ferguson of Montreal, vice-president, and J. M. Wilson, Montreal, the two Canadian directors, were re-elected.

International Engineering Works, Limited.—This company purchased the assets of the Robb Engineering Company, Limited, at the public sales held by order of the court on the application of the trustees for the bondholders. These assets were transferred to them free and clear of all amounts due by the Robb Engineering Company to creditors.

Numerous enquiries have been received by the International Engineering Works, Limited, from creditors in respect to their position under the sale, and they have, therefore, decided to make known their position in the matter.

After purchasing the assets they were approached by Mr. Robb, who asked that they would endeavor to make some arrangement whereby the old creditors might receive some consideration, and eventually the International Company decided to issue to all the creditors of $100 one share of common stock in the International Engineering Works, Limited, and for larger amounts shares in the same proportion. They find it impossible to do anything for creditors under $100.

Belding, Paul, Corticelli, Limited.—The net profits for the first year's operations of this company were $134,470. The sales for the twelve months ended November 30 aggregated $1,435,493, which was quite up to the management's expectations. A surplus of $6,366, or equal to about one per cent. on the common stock, was reported, after reductions had been made for depreciation, sinking fund, debenture interest and preferred dividends.

The policy of the management is clearing out all the old stock in hand, while attended by temporary loss, leaves the company in excellent shape to start the year's business. An improvement in the ribbon branch of the industry was also forecasted by the president.

The net results for the past year were as follows:

Net profit for year to 30th of November, 1912		$134,47
Depreciation on plant, etc.	$21,931	
Sinking fund	8,750	
Interest on debentures	37,613	
Dividend on preferred stock	59,808	
		128,10
Surplus for 1912		$ 6,36

The board of directors was re-elected as follows: Messrs. Frank Paul, president; William McMaster, vice-president; W. M. Doull, Fred Birks, A. Haig Sims, C. A. Reynolds, and B. G. Winans.

Consolidated Mining and Smelting Company, Limited.—The Consolidated Mining and Smelting Company of Canada Limited, ore receipts at the Trail Smelter for the weeks ending January 17 and 23, 1913, and from July 1, 1912, to dat in tons were:—

Company's mines—	Week ending Jan. 17.	July to date.

. 30-year high school; $35,000 5 per cent. 30-year water-
ks; $25,000 5 per cent. 25-year manufacturing establish-
ts debentures. L. A. Duncan, secretary-treasurer. (Of-
l advertisement appears on another page).

Edson, Alta.—Until February 25th for $45,000 20-year
tric light and power; $12,500, 10-year, street grading;
000, 30-year, town hall; $14,000, 5-year, plank walks.
$9,000, 15-year, cement walk debentures; interest, 5½
cent. George M. Phillips, secretary-treasurer. (Official
ertisement appears on another page.)

Collingwood, Ont.—Authority will be sought by the
ncil to issue debentures for $16,079.98, divided as follows:
30.12 on account of fire hall; $2,302.95, deficiency aris-
out of sale of $94,000 of debentures; $2,500 on account
sewer from Hurontario Street to Birch Street, and
85.50 for roads and bridges destroyed by floods.

◆

At the annual meeting of the Western Navigation Com-
y held in Fort William, Mr. James Murphy was elected
sident, E. R. Wayland vice-president, and H. W. Robin-
secretary-treasurer. The reports as read showed an
ss in business operations over that of any previous year
he history of the company and a stock dividend of thirty
cent. was passed.

The annual general meeting of the shareholders of the
unt McKay and Kakabeka Falls Railway Company was
l in Fort William recently. Mr. W. F. Hogarth was re-
ted president and Mr. Harry James secretary. This com-
y had a successful year. During the past season over 2,-
cars of sand and gravel were delivered in Fort William
the tracks of the Mount McKay and Kakabeka Falls
lway Company.

The Fredericton, N.B., board of trade has issued an il-
rated book dealing with Fredericton as a coming indus-
l and distributing centre of the province. It describes
many railways which branch out from Fredericton, its
ximity to the coal fields of Queens County, the oppor
ties for developing hydro-electric power, the rich orchard
agricultural lands which surround it, and other advant-
s which the board claims should appeal to capitalists,
nufacturers and artisans.

SOVEREIGN BANK'S AFFAIRS

All Shareholders Must Subscribe to Stock of Holding Company, Otherwise Bank Will be Liquidated and Double Liability Call Faced.

All but twelve per cent. of the Sovereign Bank shareholders have subscribed for stock in the holding company, International Assets, Limited, to the extent of their double liability. If the balance of the shareholders do not follow their example, the company will be obliged to put the bank into liquidation, and they will have to pay their double liability without any chance of getting it back.

This was the statement of Mr. A. Bruce, vice-president of the bank, at a meeting of shareholders this week. "The bank has no assets which will at present produce any money," said Mr. Bruce, "so that if it is put into liquidation there will be only one object in view, that of collecting from these twelve per cent. the amount of their double liability, and the only way by which this can be avoided is by these shareholders subscribing and paying at once for an equivalent amount of preferred stock in the company."

How Stock is Held.

The present holding of stock in the bank is as follows:—

International Assets, Limited	$2,427,825
Stock in dispute	216,200
Shareholders who have not subscribed to stock in International Assets, Limited	355,975
Total	$3,000,000

The total payment made by shareholders who transferred their stock to International Assets, Limited, is $2,146,272, and the company expects to receive $33,000 more.

Assets and Liabilities.

Since 31st July, 1911, the liabilities of the bank have been reduced by $436,384.38, and they now stand at $3,711,478.77, of which $27,865 is represented by notes outstanding, the balance, except a trifling amount, being due to International Assets, Limited.

Apart from certain contracts with the company which are not tangible assets, the assets consist of $29,490 on deposit with the Government as security for the notes outstanding, and $1,000,000 of common stock of the company.

The deposit with the Government cannot be touched, and the common stock of the company has no present market value, and no money could be raised on it.

The bank, therefore, as a corporation, has no means of raising any money, and anything done must be done by the shareholders as individuals.

◆

Mr. M. McCulloch has been appointed as general municipal manager at Fort William.

The number of directors of the British Columbia Breweries, Limited, has been increased from five to nine.

The head office of the Vanderhoof-Gunn Company, Limited, has been changed from Winnipeg to London, Ont.

The capital of the Georgian Bay Canal Company will be increased from $100,000,000 to $175,000,000, and the time for the completion of the enterprise has been extended to 1922.

Carter's Ink Company, of East Cambridge, Mass., will establish a branch factory at St. Lamberts, Quebec. The company has been operating in Canada for several years.

At the annual meeting of the Portage la Prairie board of trade, Mr. J. J. Garland was elected president and Mr. R. J. Long vice-president. The new council comprises Messrs. R. H. M. Pratt, J. O'Brien, H. Stephens, F. G. Taylor, G. Gillam, W. Richardson, W. F. Lunn, E. A. McPherson, F. L. Newman, J. H. Metcalfe, J. H. Morrison, and J. W. McDonald.

Sir Donald Mann, vice-president of the Canadian Northern, at the Pacific coast, declared that his line will have cars running through British Columbia to Vancouver within a year. This railway is making rapid progress, and though started a long time after the Grand Trunk Pacific will be completed much sooner. The vice-president came West to confer with Sir Richard McBride in regard to proposed extensions of his company on Vancouver Island.

Summerside, P.E.I., board of trade officials for 1913 are: President, Mr. John Grady; vice-president, Mr. J. LeRoy Holman; secretary, Mr. R. H. Macdonald; auditors, Mr. W. K. McGougan and Hugh McInnis; council, Messrs. A. E. Arsenault, Creelman McArthur, J. A. Brace, Hugh McInnis, W. H. McKie, Neil McLeod, William Stewart, A. A. McLellan, J. A. Morrison and M. Bradshaw; arbitrators, Dr. Alex. McNeill, Messrs. Charles Hensley, R. H. McDonald, Thomas Johnston, John E. Campbell, R. B. Richardson, H. W. B. Stavert, and Hon. James A. McNeill.

POSITION OF THE UNION LIFE

Much of the New Business Obtained Was Term Insurance—Impairment of Capital—Investments of the Company

From a sense of duty towards the community and the good name of Canadian life insurance, we feel impelled to furnish some information as to the position of the Union Life Assurance Company of Canada, and the Home Life Insurance Company of Canada, especially as considerable interest attaches to the possible future of these companies since Mr. Pollman Evans, president of the Union Life, secured control of the Home Life a couple of years ago and was appointed president thereof. We believe it will be found to be in the best interests of the companies themselves that an impartial statement be made at the present time, when a good deal is being said among life insurance officials, agents and others as to the course these companies are likely to follow in the near future.

As is generally known, the Union Life is a Canadian industrial life insurance company, started in 1902, through the instrumentality of Mr. H. Pollman Evans, then an agent of the North American Life Insurance Company and he has continued to be its guide since its origin.

National Agency Corporation.

To overcome the well known difficulties of securing financial success in an industrial company in its earliest years, Mr. Evans organized the National Agency Corporation to act as financial buffer in the organization and the securing of business for the new industrial enterprise. The story of this agency company was laid bare before the Royal Insurance Commission and makes interesting reading, but we do not dwell upon that now, except to remark that it would be interesting to know the views of the National stockholders as to the present value of their stock and their prospects of future dividends.

President Evans has however shown no little enterprise and courage in rolling up a large volume of new business, and also in securing additional capital for the hungry business that industrial insurance is known to be.

The following table shows the new business written in each of the last five years 1907 to 1911 and also the lapses and business in force:—

Year.	New Business Paid for.	Business Lapsed.	Business in Force 31 Dec.
1907	...... $ 7,980,841	$ 6,136,463	$11,234,956
1908	 9,166,567	6,967,419	13,295,478
1909	 9,645,985	7,343,549	15,367,426
1910	 10,777,565	8,210,179	18,015,302
1911	 19,333,496	12,875,475	25,116,959

Much Term Insurance Sold.

The new business is certainly large and is almost entirely "industrial," but the business lapsed is also surprisingly large and it is to be accounted for probably by the fact that in order to show large figures of new business and to lessen the reserve liability the management appear to have resorted to the cheap and easy method of selling term insurance in place of the usual life and endowment policies as in other industrial companies, for out of some seventeen millions' dollars of industrial business written in 1911 over thirteen millions was nothing more than term business. Industrial business even on the level premium plan is notoriously non-persistent but when term insurance is resorted to it is evident the elements of stability and profit-making are largely absent.

Mr. Pollman Evans with prophetic vision evidently gazed with longing heart upon entering the industrial promised land, as such commanding geniuses as President John R. Hegeman, of the Metropolitan and President John F. Dryden, of the Prudential had done years ago in America. If only the financial provider would hold out while President Evans was guiding the enterprise through the early desert days "until the corner had been turned" and the promised land entered, then ease and glory and large financial reward lay just ahead. Whether Canada was not ripe for such an enterprise or whether President Evans was not another Hegeman or Dryden the fact remains that the Union Life does not at present after twelve years' experience seem to be drawing much nearer to the land of promise.

Company's Financial Position.

Turning now to the financial position of the company, an examination of the Government blue books shows that up to 1909 the paid up capital was $100,000 of which about 98 per cent. was held by the National Agency Corporation. Evidently the drain upon the resources of the company became [illegible] great it became necessary in 1910 to enlist more capital in the enterprise as the following table will show:—

year.	Paid-up Capital.	Assets less Liabilities.	Impairment of Capital.	Premium Income.	Expenses.
	$	$	$	$	$
1907 ..	100,000	29,422	70,578	301,182	260,427
1908 ..	100,000	15,349	84,651	356,002	287,200
1909 ..	100,000	27,597	72,403	439,583	336,845
1910 ..	628,515	420,923	207,592	530,419	532,806
1911 ..	741,232	337,430	403,802	631,485	631,426

Stock Was Sold Abroad.

The method resorted to in order to enable the company to secure more capital and so to continue in business was ingenius. President Evans resolved to tap the pockets of English and Scotch investors in whose mind Canadian securities were becoming so rosy about 1909. To the metropolis of the British Empire accordingly sailed the president of the Union Life and succeeded in launching a stock proposition at which British investors appear to have bitten eagerly. It is necessary only to examine the list of stockholders in the Government blue book to see that President Evans swept Great Britain from Land's End to John O' Groats and succeeded in bringing back to Canada over half a million additional capital for his company. Just what were the representations on which this money was secured, we do not know.

The year 1911 shows still further paid-up capital was secured to the extent of over $100,000, presumably from the same source, this bringing the paid-up capital up to $741,232. The column in the foregoing table entitled "Impairment of Capital," is instructive. It shows that between 1907 and 1911 the impairment of capital has grown from $70,000 to over $400,000. To be sure the business of the company has also increased and if the business were regular level premium business in place of being largely term business, the result would be less disquieting. An examination of the expenses of management shows the extraordinary result that during the last two years these expenses have used up practically the whole premium income, so that during 1911 the impairment of capital increased about $200,000

Capital Secured at a Premium.

An interesting sidelight on the faith of the British investor is shown by the fact revealed by the Government returns, that the new capital was secured at a premium of about 20 per cent., for of the $641,232 new capital secured in Great Britain in 1910 and 1911 the large additional sum of $122,815 was paid as premium on capital. On the other hand the still larger sum of $145,420 was spent in the effort to secure this new British capital.

Were the interests of the British investor properly safeguarded when this money was secured?

Before leaving the question of the present capital of the Union Life, it may be pointed out that on page 363 of the company's returns as published in the blue book for 1911 the paid-up capital is stated as $722,800 and on page 365 it is stated as $741,232.95, while on page 510 it is given as $745,200. As only one of these can be correct, an explanation seems in order from some one.

If now we turn for a moment, to the latest blue book we are rather struck with the character of the company's loans and investments. The loans on collateral securities amount to $374,000 and this is made up almost entirely by one loan to the Canada Provident Insurance and Investmen Company on the security of $485,000 of the Imperial Loa and Investment Company stock. It would be interesting to know the whole story of this transaction and to be more assured of the wisdom of placing so many eggs in one basket—and that made of common stock.

How the Investments Look.

Turning to the investments, we are not a little surprise to see so much money invested in the stock of buildin societies, as the following indicates:—

Canadian Birkbeck Loan and Savings Company	$ 6,90
Colonial Investment and Loan Company	86,23
Peoples Building and Loan Company	1,8
Reliance Loan and Savings Company	13,7
Standard Loan Company	15,16
Sun and Hastings Loan and Savings Company	21,70
Total	$145,50

When so many excellent bonds and debentures can b now secured at good rates of interest and when it is so eas to loan money at high rates of interest on safe mortgages i seems somewhat perplexing to discover the reason why th management of the Union Life should have departed so fa from the beaten track of approved life insurance investin We venture to think President Evans would have increa the public confidence in his company and besides mad better returns in the long run by following the practice s

(Continued at foot of next page).

JANUARY MUNICIPAL BOND SALES

r Provinces Disposed of Debentures Worth One Million Three Hundred Thousand Dollars

The municipal bond sales in Canada for January, as com-
d by The Monetary Times, amounted to $1,337,500, com-
d with $491,590 for December, and $2,133,531 for the cor-
onding period last year.

Four provinces were in the market. The largest issue
made by Calgary School District.

The following are the particulars by provinces:—

Alberta	$975,000
Ontario	231,000
Saskatchewan	123,500
Nova Scotia	8,000
	$1,337,500

The following are the monthly totals during 1909, 1910,
, and 1912:—

	1909.	1910.	1911.	1912.
iary	$2,540,862	$ 881,838	$ 420,337	$ 2,133,531
ruary	4,074,125	1,272,977	1,037,287	2,596,378
ch	1,615,368	1,169,730	6,271,025	1,926,716

POSITION OF THE UNION LIFE

(Continued from previous page).

other older and larger companies in the character and
ribution of his investments.

But now the question arises what of the future? Rumors
amalgamation have been in the air. It is also stated that
sident Evans has been abroad, endeavoring to enlist fur-
capital or other interest in his enterprise. Although the
le situation of the Union Life and Home Life demands
presence and efforts here, he is still abroad. In the mean-
e, we have confidence that the Government Insurance De-
tment is keeping a close scrutiny on the operation of
h companies so that the best interests of their policy-
ders may be maintained.

We submit, however, that President Evans owes it to
nself and to the good name of Canadian life insurance to
close his intentions as to the future of these two companies
what steps he and his co-directors are taking to con-
ve the grave interests committed to their care. The
netary Times would like to have placed at its disposal a
nplete report of the statements submitted to foreign in-
tors in England or France as a basis for investing in the
ck of the Union Life; a statement of the movement in
ns and investments for the past year in both companies;
ormation as to the subsidiary companies in which Mr.
ans is interested and their relation, if any, to the Union
e and the Home Life; and an official statement as to what
eral policy is being formulated to place these two com-
nies more fully in the public confidence, or otherwise to
eguard the security of the policyholders.

npleted in 1915.

NO NEED FOR CENTRAL BANK

Says Finance Minister—As to Large Dominion Note Issue—Guarantee of Deposits.

During the discussion in the House at Ottawa last week on the Bank Act the Hon. W. T. White, Minister of Finance, stated he could see no public demand for a great national bank in Canada, such as suggested by Mr. W. F. Maclean, M.P. He thought that Mr. Maclean had lost sight of the fact that the Bank of England was the great regulator of London, and of the financial world. The Bank of England is not a government bank; it handles the Government business; but it is a private bank, privately owned and privately administered. Therefore so far as Great Britain is concerned, and London is the money centre of the world after all is said, they have not felt the need of a national bank. The Bank of England manages the Government business; and has a great deal to do for the Government; but it is not a government bank in the sense indicated by Mr. Maclean.

High Among World's Banks.

Mr. White thought that we had failed to realize the size of the banks that we have in Canada. So far as prestige, so far as financial strength is concerned, they stand high among the great banks of the world, that is, our greatest banks. In this country he thought there was no public demand for a great national bank administered by the Government, gathering up the savings of the people and using those savings on public works. He thought the opinion of the people in regard to public works, is that it is very much better that we should use our credit abroad, where capital exists among the lending nations, especially in Great Britain, for the purpose of obtaining that money, and that the savings of the people should be available for the commercial and other needs of the country which are expanding at such a great rate.

Large Dominion Note Issue.

He also dismissed the suggestion made by Mr. Maclean as to a large issue of two or three hundred million dollars of Dominion notes secured to the extent of twenty-five per cent. by gold. Mr. White did not think that would appeal to the sound judgment of the House. If the notes were unsecured by gold and were not made fiat money, they would not remain out; the Government would not be in a position to redeem them. Only twenty-one or twenty-two million dollars of notes are in the hands of the people. There are the bank notes, but two or three hundred million dollars of Dominion notes, secured to the extent of twenty-five per cent. by gold, would be very unsafe finance. In fact it would be an impossible situation to maintain; the money would not stay out; the Government would not be able to meet its liabilities, unless it were made fiat money, and fiat money means a depreciative currency and all that follows from that.

Guarantee of Deposits.

As to the proposal that all banks should guarantee the deposits of each, it meant that the credit of all the banks, the standing and reputation of all the banks should be equalized. It meant that all the banks were behind each, that no party would exercise or would require to exercise any discrimination as to where he should place his deposits. It meant that the bank that has been in business for a hundred years, or fifty years, and has an honorable record and is entitled to credit by its standing in the community, would have no more power, really, of attracting deposits than the bank that had not that standing. So, from that standpoint, it would be extremely undesirable.

It may be said that this relates to the bank, and if it were in the interests of the public, notwithstanding that the bank might lose the advantage of its standing and reputation, still some such provision should be adopted. But there is this to be said from the standpoint of the public: if a bank, especially a smaller bank or a new bank obtains money too rapidly, it is not likely to invest it very well. In other words, a bank must be in business some time before it is in a position to invest large sums of money wisely and well.

◆

NORTHERN TRUSTS COMPANY

The assets under administration and the trust funds deposited with the Northern Trusts Company, with headquarters at Winnipeg, are assuming large proportions. The former now total $7,835,725, an increase over last year of $919,245; the latter amount to $4,227,253. In 1905 they were $97,422. The earnings as a result of operations have been eminently satisfactory. Seven years ago they were $9,922; last year they had reached $147,786. The company's shareholders after one year's business received dividends amounting to $5,326; last year their share was $96,420. There is a balance of $225,604 in profit and loss surplus accounts. Capital and reserve investments amount to $1,728,516. The amount of subscribed capital is $1,500,000, of which $1,452,980 is paid up.

FIFTY-FOUR COMPANIES INCORPORATED

Mining and Exploration Company Has Largest Capital —Hydro-Electric Tramways Have Headquarters at Victoria.

Company incorporation is a feature of Canada's development. Each week of this year has seen many companies chartered. This week's total is fifty-four and their capitalization amounts to $11,344,000.

The largest companies are:—

Northern Quebec Goldfields & Exploration Company, Three Rivers, Que.	$3,000,000
Corbeil, Limited, Montreal	1,000,000
Longueuil Riverside Land Company, Montreal	1,000,000
British Pacific Hydro-Electric Tramways, Victoria	1,000,000

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	16	$6,454,000
Ontario	23	2,700,000
British Columbia	14	1,690,000
Nova Scotia	1	500.000
	54	$11,344,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

New Westminster, B.C.—City Grocery, $15,000.

Prince Rupert, B.C.—Northern Laundry, $25,000.

Kamloops, B.C.—Kamloops Theater Company, $30,000.

North Vancouver, B.C.—Alexander Law, $10,000 (architect).

Vernon, B.C.—Okanagan Valley Loan and Trust Company, $250,000.

Wellington, Ont.—Prince Edward Canners, $40,000. R. L. Smith, E. McMahon, J. E. Lane.

Amherst, N. S.—Amherst Pianos, $500,000. R. H. Murray, J. L. MacKinnon, Miss E. Hilton.

Berlin, Ont.—Battle Heights, $65,000 (real estate). E. R. Riener, J. A. Scellen, J. J. A. Weir.

Smith's Falls, Ont.—M. Ryan & Son, $200,000 (builders' supplies). M. Ryan, E. J. Ryan, J. Shanks.

Lachute, Que.—St. Catherine Heights, $75,000. J. M. Dorion, Lachute; J. R. Collins, W. H. Moran, Fassett.

Strathroy, Ont.—Loyal Motor Car Company, $500,000. D. W. Henry, J. M. McEvoy, C. S. Parker, London, Ont.

Owen Sound, Ont.—Owen Sound Rolling Mills Company, $500,000. A. H. Macdonald, J. J. Drew, F. Watt, Guelph.

Guelph, Ont.—George E. B. Grinyer Company, $75,000 (plumbers). G. E. B. Grinyer, H. E. Bates, H. Heather.

Three Rivers, Que.—Northern Quebec Goldfields and Exploration Company, $3,000,000. J. S. Tebbutt, J. B. Tebbutt, H. J. Tebbutt.

Hamilton, Ont.—Centennial Park, $40,000. G. H. Long, J. J. Markham, E. M. Faulknor.

White Sewing Machine Company of Canada, $40.000. C. Touby, Cleveland; C. Stewart, W. C. MacBrayne, Hamilton.

Victoria, B.C.—Equitable Bond Corporation, $100,000.
Sage-Appleton, $10,000.
Graham, Warren and Company, $25,000 (real estate).
British Pacific Hydro-Electric and Tramways, $1,000,000.

Vancouver, B.C.—Harbor Shipping Company, $50,000.
Pacific Coast Cable Company, $25,000.
Honig Stores, $25,000.
Dickie Creek (Lillooet) Power and Light Company, $25,000.
Booth Logging Company, $100,000.

Ottawa, Ont.—Canadian American Land Company, $100,000. G. D. Kelley, W. L. Scott, G. H. Maclaren.

McDougall Creek Improvement Company, $15,000. H. Robinson, H. K. Egan, Hon. W. C. Edwards.

La Justice, $100,000 (printers). L. H. Morisset, M. Morisset, B.. Boutet.

Quebec, Que.—Compagnie Immobiliere Lauzon & Quebec, $99,000. N. Gilbert, Quebec; J. Carrier, T. Carrier, Levis.

Maison Canadienne de Finances et d'Immeubles, $100,000. E. Roy, R. Langlais, O. Morin.

Compagnie des Fermes Canadiennes de L'Ouest, $50,000. J. C. Boulanger, F. X. Fafard, J. E. Legare.

Montreal, Que.—W. F. Myers Diamond Saw, Tooth & Tool Company, $5,000. J. A. Mann, C. G. Mackinnon, T. B. Gould.

Modern Joint of Montreal (founders), $75,000. J. Galipeau, S. Langlais, T. Goulet.

Short and Trower, $500,000 (bond brokers). C. M. Johnston, G. R. Kappele, F. A. Sweet, Toronto.

Perkins Electric Company, $50,000. F. J. Parsons, P. S. Fergusson, W. R. Baillie.

M. Melachrino & Company of Canada, $50,000 (tobacco). A. C. Bourne, St. Lambert; R. B. Edwards, Miss J. L. Lawrence, Westmount.

Canadian Griscom-Russell Company, $50,000 (iron founders). J. W. Cook, A. A. Magee, T. J. Coonan.

Corbeil, $1,000,000 (boots and shoes). A. Corbeil, E. Corbeil, L. Blais.

Financial Trust Company, $100,000. H. E. Walker, H. N. Chauvin, G. H. Baker.

Central Land Company, $300,000. T. Rinfret, R. Genest, J. E. Billette.

Longueuil Riverside Land Company, $1,000,000. W. K. McKeown, J. R. Law.

Burnside Realty Company, $100,000. W. L. Bond, R. L. H. Ewing, J. McBride.

Toronto.—Prince Albert Real Estate Corporation, $25,000. H. C. Duff, H. P. Spragge, T. Moss.

Maple Leaf Realty Company, $100,000. J. S. Fullerton, J. J. Doran, C. J. Gibbon.

National Holding Company, $50,000 (advertising and commission agents). C. C. Osborne, C. H. R. Riches, H. A. Rice.

Home Specialty Company, $60,000. A. C. Coulson, F. J. Tracey, J. J. Kew.

Porcupine Construction Company, $40,000. C. M. Garvey, A. B. Nind, C. Jolliffe.

Goldsmith Brothers Smelting and Refining Company, $40,000. H. L. Nussbaum, Chicago; J. G. Maycock, Cincinnati; E. F. Singer, Toronto.

Young Brothers, $40,000 (fancy goods). C. H. Whitehead, Mrs. G. L. Young, Mrs. A. M. Whitehead.

Bell-Field Manufacturing Company, $40,000. J. H. Hunter, W. M. Cox, R. G. Roberts.

Frank W. Robinson, $50.000 (knitted goods). J. M. Burden, G. N. Shaver, A. R. Cochrane.

Flor de Canada Cigar Company, $40,000. E. P. Arcand, A. R. Cochrane, Mrs. L. Marcand.

Toronto Paint Supply Company, $40,000. C. H. Downes, G. C. Downes, A. E. C. Thomas.

Chambers, McCuigge and McCaffrey Company, $500,000 (contractors). W. C. Chambers, A. Spotton, H. Leighton, Harriston.

◆

CANADA LIFE ASSURANCE COMPANY.

Another satisfactory year's statement is issued by the Canada Life Assurance Company, a well-known company. Its receipts for the year 1912 amounted to $7,396,759, of which premium income yielded $5,153,994 and interest $2,242,765. The increase in surplus earned is due to an important gain in interest earnings, a gratifying rate of mortality and a low expense ratio. Any life company which can affirm these elements need not fear to meet its policyholders, and will be reasonably sure to attract new business.

The rate of interest earned on investments is a feature of the company's income which attracts attention. In five years the rate of earnings per cent. rose from 4.70 in 1907 to 5.03 in 1910 and 5.13 per cent. in 1912. The proportion of money lent on the security of mortgages is unusually large. It is $16,856,000 out of a total of bonds, stocks, mortgages and loans on policies exceeding forty-two millions, equal to about 35 per cent.; the amount loaned on bonds, stocks and debentures being 39.46 per cent. and on the company's policies 14.4 per cent.

The amount of real estate which the company owns is very considerable, amounting to something over three millions of dollars. But it is a justifiable asset, inasmuch as it includes the company's office premises in ten cities of Canada and in London, England, and they are revenue-producing buildings. The amount loaned on bonds and stocks is trifling. The assets were increased from the year's business by the large sum of $4,044,182 and their total is now $48,301,523.

It is important to observe the low rate at which the company's assets have been valued. Over half are valued at three per cent. per annum and the remainder at three and a half. And the total surplus on policyholders' account is $5,973.695

Life companies have shared in the general prosperity of Canadian business institutions and increases in amount of policies written are this year common. The new paid-for policies for 1912 amount in the case of the Canada Life to the great sum of $15,512,339, which is three millions above the largest previous year's writing. The aggregate of assurance in force now reaches $144,877,970.

Holders of policies in this old company have no reason to grumble at the share of earnings distributed amongst them. Exclusive altogether of bonus additions they have received $115,365 in dividends; their matured endowments came $380,026 (including $39,930 bonus additions); $86,441 was pai annuitants; surrender values of policies came to $262,861; an the death claims paid reached $1,618,269, which included $119 337 of bonus additions. Thus altogether the sum paid policyholders reached $2,462,964.

Representatives of the Montreal city council will joi with the board of trade and the Montreal branch of the Canadian Manufacturers' Association in a request to the Federa government to subsidize a steamship line between Canada an the West Indies.

BANK BEATS ALBERTA PROVINCE

amous Case as to Disposition of Proceeds of Railroad Bonds Goes Against Province, Privy Council Decides.

The Privy Council has allowed the appeal of the Royal nk of Canada against the judgment against it in the Alberta ovincial court in regard to paying over to the Provincial vernment a sum involving $6,000,000 held in connection th the Alberta and Great Waterways Railway project. The estion argued before the Privy Council was the validity an Act of the Legislature.

The Lord Chancellor, says a Canadian Associated Press ble, in delivering judgment, said that it was a question of eat importance, and proceeded to review exhaustively the ounds for appeal, going on to speak of the public uneasiness own in 1910 about the action of the Government in entering o arrangements concerning the railway. While a Royal mmission of Enquiry was sitting, there was a change of vernment. The new administration introduced and passed o statutes, and on the validity of the first of these the estion to be decided in appeal turned.

This statute, after setting out in the preamble that the lway company had made a default in payment of interests bonds and in the construction of the line, and then ratify- and confirming the guarantee by the Province of the nds, enacted that the whole of the proceeds of the sale of bonds and all interest thereon, including such part of the oceeds of the sale as was then standing in the banks in the me of the treasurer of the Province or otherwise, and comsing inter alia the six million dollars and accrued interest the appellant bank, should form part of the general revenue d of the Province, free from all claim of the railway comy, and be paid over to the treasurer without deduction.

ovince Assumed Liability.

It was also provided that, notwithstanding the form of the nds and guarantee, the Province should, as between itself the railway, be primarily liable on the bonds and should emnify the company against claims. By another statute, sed at the same time, any person claiming to have suffered s or damage in consequence of the passing of the Act might mit his claim to the Government.

The Lord Chancellor went on to cite the steps subsently taken in legal proceedings.

Continuing he said: "Their Lordships are not concerned h the merits of the political controversy which gave rise the statute, the validity of which is impeached. What they e to decide is the question whether it was within the power the Legislature of the Province to pass the Act of 1910. ey agree with the contention of the respondents that in a e such as this it was in the power of that Legislature subuently to repeal the Act which it had passed. If this were only question which arose, the appeal could be disposed of hout difficulty, but the Act under consideration does more n modify the existing legislation. It purports to appropriate the Province the balance standing at special discounts in ks, and so change its position as regards a scheme to carry which bondholders had subscribed their money.

the Fundamental Issue.

"Elaborately as the case was argued in the judgments of learned judges in the courts below, their Lordships are not isfied that what appears to them to be the fundamental stion at issue has been adequately considered. It is a l-established principle of English common law that when ney has been received by one person which in justice and ity belongs to another, under circumstances which render receipt of it a receipt by the defendant to the use of the intiff, the latter may recover. As for money had and reved to his use, the principle stands, and as to cases where money has been paid for a consideration that has failed, present case appears to fall within the broad principle on ich judgments in the case of Wilson versus Church proded.

ders in London.

"Lenders in London remitted their money in New York be applied to carrying out a particular scheme established statutes in 1909 and Orders-in-Council and by contracts and tgage of that year. The money claimed in action was paid the bank as one of those designated to act in carrying out scheme. The bank received the money at its branch in v York and the general manager then gave instructions from head office in Montreal to the manager of the local branches the opening of credit for special account. The local man- r was told he was to act on instructions from the head e, which retained control.

uld Get Money Back.

"It appears to their Lordships that the special account opened solely for the purpose of the scheme and that n the action of the Government in 1910 altered its conons, the lenders in London were entitled to claim from the k at its office in Montreal the money which they had adced solely for the purpose which had ceased to exist. Their right was a civil right outside the Province, and the Legislature of the Province could not legislate validly in derogation of that right.

"These circumstances distinguish the case from that of King versus Lovett, where the point decided was in reality quite a different one.

"In the opinion of their Lordships the effect of the statute of 1910, if validly enacted, would have been to preclude the bank from fulfilling its legal obligations to return their money to the bondholders, whose right to this return was a civil right, which had arisen and remained enforceable outside the province. The statute was on this ground beyond the powers of the Legislature of Alberta, inasmuch as what was sought to have been enacted was neither confined to property and civil rights within the province nor directed solely to matters of merely a local or private nature within it.

Is a Constitutional Question.

"Other questions have, as already stated, been raised in this appeal as to whether the statute of 1910 infringed the provisions of section 91 of the British North America Act by attempting to deal with a question relating to banking and by trenching on a field already occupied by the Dominion Banking Act. It was also contended that the appropriation of deposits to the general revenue fund of the province was outside the powers assigned to the Provincial Legislature for raising revenue for provincial purposes.

"The conclusions already arrived at makes it unnecessary for their Lordships to enter on a consideration of these questions, and of other points made during the arguments of counsel.

"Their Lordships will advise his Majesty that the appeal should be allowed, and the action dismissed. Respondents must pay costs here and in the courts below."

What the Royal Bank Says.

The following statement regarding the Privy Council's decision in the suit of the Royal Bank against the Province of Alberta was issued by the bank at noon to-day:

"It will be remembered that the money which formed the subject of this litigation was obtained from the sale of bonds of the Alberta and Great Waterways Railway Company, bearing the guarantee of the Province of Alberta.

"Subsequently, when Mr. A. L. Sifton retired from the Chief Justiceship and became Premier of the Province, he obtained the passing of an Act by the Legislature of Alberta confiscating this money to the general revenue of the fund of the province, thereby effectually preventing the carrying out of the railway enterprise for which the money was obtained.

"The Royal Bank having been advised that the money was the property of the bondholders refused to honor the cheque of the Government on presentation, whereupon the action just decided was instituted demanding payment of the amount to the Government. The judgment of the Privy Council justifies the Royal Bank in the position which it took in regard to this legislation. The action of the bank in taking the stand which it did for the protection of foreign investors is receiving general approval."

◆

At the annual meeting of the Vancouver Life Underwriters' Association. The secretary reported that during the year 1912, 18 new members joined the association and five more applications for membership were made at the meeting. The new officers elected for the ensuing year were Mr. J. J. Roberts, honorary president; Mr. W. J. Twiss, president; Mr. H. A. Massey, vice-president; Mr. H. Cole Evans, secretary-treasurer, and Messrs. J. T. Brownlee, Jos. Waixel and S. J. Slack the executive committee.

The newly organized Eastern Rubber Company is making an offering of 8 per cent. preferred stock, carrying a bonus of common. They have acquired property on Eastern Avenue, Toronto, where a thoroughly modern factory will be erected. The capital is $400,000 preferred, and common $600,000; par value, $50, of which 30 per cent. is being given as a bonus with the preferred. Mr. Roger Miller, Ingersoll, is president, and Mr. W. L. Horton, Goderich, vice-president, other directors being Messrs. James Playfair, J. J. Main, W. D. Tyrer, W. R. Blowers, Dr. A. H. Perfect, A. G. Gamble and W. J. Ingram, New York.

An order has been issued by the Dominion Railway Commission, cancelling proposed tariff changes by the Canadian Pacific Railway and Grand Trunk Railway abolishing stop-over privileges on international lumber shipments, except those destined exclusively to points in the United States. Consignees to whom lumber is shipped. from the United States to Canada or vice versa, often prefer to receive the timber in a partly manufactured state, planed or otherwise treated. Hitherto the railways have accorded the privilege of forwarding at the through rate raw lumber from the shipping point to some intermediate point where it is manufactured, and then shipping it on again to its destination for a slight advance over the regular tariff which would be charged for unbroken forwarding. The case will be argued in Toronto on February 7th.

LARGEST TRADE IN CANADA'S HISTORY

Imports and Exports Exceeded $874,000,000—Analysis of Our Business With the World.

That the large increase of $76,232,684 shown in the total trade of Canada for the fiscal year 1911 over that of 1910 would be exceeded when the fiscal year 1912 closed, was the prediction of Mr. F. C. T. O'Hara, Deputy Minister of Trade and Commerce. His prediction has been amply borne out by subsequent returns, the total imports and exports for the last fiscal year amounting to no less a sum than $874,637,794, the largest volume of trade for any one year in the history of Canada. This was an increase over the fiscal year 1911 of $105,193,889 or 13.67 per cent. It may be of interest to observe that the total trade of Canada for the last fiscal year was more than double the trade of Canada only ten years ago. The increase in that time amounts to $450,727,350 or 106.33 per cent.

Again, this year, after a careful survey of every source of commercial information throughout the whole of Canada, it is once more apparent, in view of the unparalleled activity which abounds in every industry, that continued increases in Canada's trade may be expected for some time. In this connection it may be observed that the total foreign commerce of Canada for the twelve months ended October 31st, 1912, amounted to the splendid total of $991,786,674, as compared with $804,253,387 for the corresponding period of the previous year, showing an increase of $187,533,287 or 23.32 per cent.

Increase in Imports and Exports.

The total imports for the fiscal year 1912 were valued at $559,320,544, representing an increase over the year 1911 of $87,073,004 or 18.44 per cent., while the increase over ten years ago was $347,050,386 or 163.49 per cent.

For the fiscal year 1912, the total exports amounted to $315,317,250,—Canadian produce accounting for no less than $290,223,857 of this amount. In comparison with the year 1911, the increase in the export trade was $18,120,885, while the increase over the total exports of ten years ago was $103,676,964.

The excess of imports over exports in the year 1912 was $244,003,294; in 1911, $175,051,175; and in 1902, $629,872.

Analysis of Import Trade.

An examination of the imports for the last fiscal year shows, with a few exceptions, large increases over the year 1911. Some of the principal increases are:—Animals, $2,104,513; breadstuffs, $2,534,084; carriages, $4,554,982; coal and coke, $8,554,578; flax, hemp and jute, $1,072,146; fruits, $3,501,494; gutta-percha, $1,141,995; leather, $1,082,374; metals, $18,043,344; oils, $1,400,046; provisions, $2,870,114; settlers' effects, $1,072.601; spirits and wines, $1,039,913; tea, $1,056,887; wood, $3,373,989.

The total imports from the principal countries of the world for 1912 show increases over those of the preceding year. The imports from the United Kingdom amounted to $117,192,431 against $110,586,801 in 1911, and $49,435,388 in 1902, showing an increase of $6,605,630 or 5.98 per cent. over the year 1911, and over ten years ago, an increase of $67,757,043 or 137.06 per cent. The imports from the United States were $368,145,107, as compared with $294,415,202 in 1911, and of $129,794,147 in 1902, the increase over the year 1911 being $73.729,905 or 25.04 per cent., and over ten years ago $238,350,960 or 183.64 per cent. The percentage of increase in the imports from the United States is thus greater than from th United Kingdom.

As a result of the operation of the Franco-Canadian trad treaty which went into force on February 1st, 1910, the import from France have considerably increased. For the year ende March 31st, 1910, the total imports from France amounted t $10,170,903, whereas the imports for the year 1912 were value at $11,885,706. Not only have the imports from France ir creased under the operation of the Franco-Canadian trad treaty, but the imports from those other countries entitled t the benefits of the said treaty have also largely increased.

The surtax tariff was imposed on dutiable imports fro Germany on the 28th of November, 1903, and continued i force until the 1st of March, 1910. During the time the su tax was in operation the imports from Germany show a marke decrease each year with the result that the imports of dutiabl goods for the year 1909 were only $4,400,718, as compared wit $10,287,909 for the year immediately preceding the impositio of the surtax. The decreases were exceedingly large for th following classes of imports, viz.: glass, $141,943; metal $1,272,968; paints, $176,753; silks, $271,461; sugar, molasse etc., $3,070,974; and wool, $591,312,—a total decrease of $5,525 411 for these classes of goods. From the day the surtax wa imposed on German goods, the imports of German sugars gav place to sugars from the British West India Colonies. Th removal of the surtax on the 1st of March, 1910, paved th way once more for the unrestricted entry of German good The dutiable imports for the fiscal year 1912 were $7,998,89 against $4,400,718 in 1909, showing an increase of $3,598,17 or 81.76 per cent.

The exports for the fiscal year 1912 were larger than fo any previous year in the history of the Dominion. An exam ination of the large divisions or classes of Canadian produc exported will show that the exports of the fisheries, $16,703 678; agricultural products, $107,143,375; and manufacture $35,836,248; are larger than ever before, and that the export of the mine, $41,324,516, are also larger than in any earlie year, except 1911. The exports of the forest, $40,892,674, an animals and their produce, $48,210,654, are smaller than i 1911. During the period under review the exports by larg divisions or classes of Canadian produce to the United King dom, the United States and other countries with proportion o each class, were as shown in the table at the foot of this page

Principal Classes Exported.

The principal classes of Canadian merchandise exporte during the fiscal year 1912 show marked fluctuations whe compared with similar exports in the year immediately preceding. The following classes of merchandise show increase viz.:—Breadstuffs, $21.604,265 (principally oats, $1,674,796 wheat, $17,069,429, and wheat flour, $2,179,274); carriage $823,995; fertilizers, $488,253; fish, $595,678; fruits, $3,497,65 (principally green apples, $3,347,223); hay, $3,650,299; hide and skins, $456,373; metals, $172,828; oils, $581,464; provision $1,826,957 (principally butter, $1,333,628).

The following classes of merchandise show decrease viz.:—Animals, $4,878,972 (principally cattle over one yea old, $4,426.916); coal, $1,675,967; furs, $617,587; leather, $148,493; paper, $43,312; seeds, $4,059,360 (principally flax seed $3,302,380); spirits and wines, $31,466; vegetables, $88,433 wood, $5,164,619 (principally logs, $425,759; lumber, $3,769,309, and wood pulp, $621,227).

The agreement concluded between representatives of Canada and certain of the West India Colonies on April 9th, 1912 has been approved by the various West India Colonies whic are parties thereto. Upon approval thereof by Canada, th agreement will take effect on and after such date as may b agreed on by all the parties to the agreement.

Divisions or Classes.	To United Kingdom.	To United States.	To Other Countries.	Proportion of Total to U. K.	U. S.	O. C.
	$	$	$	p. c.	p. c.	p. c.
The Mine	5,555,599	33,259,580	2.509,337	13.45	80.48	6.07
The Fisheries	5,132,047	5,378,664	6,193,967	30.72	32.20	37.08
The Forest	10,950,840	25,483,532	4,458,302	26.78	62.32	10.90
Animal Produce	36,923,024	9,864,524	1,423,106	76.59	20.46	2.95

Total	147,240.413	102,041,222	40,942,222	50.73	35.16	14.11

Two industrial by-laws were carried at St. Thomas, Ont. One proposing to guarantee the bonds of Thomas Brothers, brush and broom manufacturers, to the extent of $30,000 for additions to their factory, and a by-law to pay the moving expenses of the Snedicorr and Hathaway Company, shoe manufacturers, from Detroit to St. Thomas.

A securities company, with connections in the old country and Europe, is in process of formation at Toronto. The company will have a capital of $1,000,000. The management of the new concern will be in the hands of Mr. Avern Pardoe, Jr., who has severed his connection with Messrs. Baillie, Wood and Croft. The company's head office will be in Toronto.

Government insurance for workmen in Manitoba was adopted as a principle by both employers and employees at a conference of representatives of the board of trade and the builders' exchange, and the trades and labor council. It wa decided to approach the provincial government at once, an solicitors of the three parties to the conference will at onc draft a bill for submission to the legislature.

The first annual meeting of the Prince Rupert committe of the Mainland Fire Underwriters' Association of Britis Columbia was held at the offices of the Continental Trust Prince Rupert, recently. The following officers for the en suing year were elected:—Chairman, Mr. C. W. Peck; vice chairman, Mr. T. D. Pattullo; secretary-treasurer, Mr. M. J Hobin; investigating committee, Messrs. E. H. Mortimer, E C. Gibbons, and W. S. Fisher; fire protection committee Messrs. J. C. Halsey, J. Lorne McLaren and Lee Baker; rat schedule and commission committee, Messrs M. M. Stephens A. G. Forster and T. Brown.

LIFE INSURANCE COST AND THE AGENT

ustralian Writer Says Commission System Keeps Premiums Unnecessarily High.

An interesting article on the life insurance agent appears the Melbourne Age. It speaks of the large commissions rned by agents and inquires whether he can be eliminated. The sphere of life insurance reform,'' says the writer in r Australian contemporary, ''includes an examination of some the most interesting byways of business, but none more teresting or extraordinary than that which leads to a owledge of the price which the insured of the community a whole pays for the existence of the insurance agent or nvasser. Upon its corps of insurance canvassers or agents men who dedicate their working hours to persuading their llow men to insure their lives—every insurance company dends for practically the whole of its 'new business' from ar to year.

''Whether they like or dislike machinery which they diseetly admit in their candid moments is open to very serious jection, every one of the managers and secretaries of the eat insurance corporations in this city recognizes that the mmissioned agent is simply indispensable to his company's ogress and prosperity.

osed Doors Without Agents.

'' 'If we eliminated the agent,' said the general manager one of the largest Australian offices this week, 'we might well close our doors. He is simply a necessity of our istence; for if the average man is not worried or persuaded to insuring his life he neglects it, or only thinks of it when a panic—when perhaps he can only be insured at enormous st.' The 'direct business' of the insurance companies, that the business resulting from the insurer coming direct to the ice of an insurance company, is so small that, except in the se of a few small but very sound offices in England, like e Life Insurance Office of London, it may be safely put down considerably under 7½ per cent. of a given year's new surances. In the case of the Victorian branch of the Australian Mutual Provident Society the direct business in 1911 d not exceed 5.3 per cent. of the whole. Other offices in elbourne quote similar figures. In these circumstances it is rdly to be wondered at that the insurance companies cling the commission agent method of increasing the volume of eir business, and regard askance all proposals for weakening as an institution. Some managers go so far as to say that ey look with suspicion upon direct insurances, as experience s shown that many of those proposers who elude the net of e agents and come direct have something to hide.

rt of Modern Life Insurance.

''The insurance agent, therefore, is an integral part of odern life insurance in Australia as elsewhere. Few people tside the battallions of agents themselves and the inside affs of insurance offices realize what a costly matter to the nocent insurer the existence of these parasites on a great siness has proved to be. The amount of the commissions ich the agents draw bears a relation to the first year's emium on every new insurance which would scarcely be lieved were not the facts so well established.

''The commission ranges from 170 per cent. down to beeen 50 per cent. and 60 per cent. of the first year's preum, according to the terms which the various offices offer their agents. The terms vary with the practice of the different companies; but owing to the competition for new busiss now existing in the Commonwealth, and to the entrance several new competitors in the field within the last few ars, they are in all cases made as tempting to the agent possible.

ow Commissions Eat Revenue.

''A few illustrations will suffice to show the extent to ich the commission agency system eats into the revenue of e companies, and as a natural consequence loads the unfornate insurers with high premiums. The National Mutual fe Association of Australasia pays on an ordinary life policy commission of 1 per cent. on the sum assured. Thus an ent bringing in a man who takes out an ordinary insurance licy for £1,000 receives £10 for his services in the transacon. Other rates of commission are paid on other classes of surance, the return to the agent varying according to the ture of the policy. During the year ended 30th September, 12, new policies were issued by this company amounting to ,593,800. Accepting the lowest rate of commission as a basis calculation, this means that the agents secured no less than 5.938 out of the first year's premiums on these new policies.

''The probability is that they received a very great deal ore, for the costs to the National Mutual Life Association of s new business in 1911-12, including medical fees, etc., was less than 77.9 per cent. of the first year's premiums on that siness; and in the previous year it was 81.4 per cent. of the emiums. The Australian Mutual Provident Society has an ency system which has for its most prominent feature the yment to agents for the bulk of the policies taken out a mmission which is equivalent of 1½ per cent. on the sum sured. Thus an agent bringing in a proposal resulting in an surance policy for £1,000 being issued would receive £15 out the first year's premiums.

''Applying this 1½ per cent. commission arrangement to the society's new business in the year ended 31st December, 1911, it is soon seen how huge a bite out of the first premiums the agents secured. The new policies in the year named totalled £6,219,979. On the 1½ per cent. basis the commission would amount to, roughly, £93,200. As the annual premiums paid on the new business totalled £197,809, it will be seen that on this basis nearly half the first year's premiums would go into the pockets of the agent, and not of the society. The A.M.P. officials, however, say that the sum actually paid during the twelve months in commission was £81,055, and that £26,884 was paid in medical fees, so that the cost to the society of the new business in 1911 was £107,939, or a little over 50 per cent. of the new premiums. As, however, this sum does not include the proportion of the annual cost of the offices and the inside and inspecting staff expenses, properly debitable to new business under any really complete system of accountancy, it may be assumed that the cost of the A.M.P.'s new business in 1911 was much more than 50 per cent. of the premiums. The material point, however, is that on the society's own admissions £81.055 out of the new premiums received last year went into the pockets of the introducers.

''The commission paid in 1910 amounted to close upon £70,000. The Mutual Life and Citizens' Insurance Company Limited has its own commission plan. It pays its agents 40 per cent. of the first year's premiums on the new policies secured, plus a bonus, which may work out from £2 a month up to a very substantial salary, the agent's activity and success as an introducer of new policyholders being the basis of the amount of the total bonus. The company's new business expense rate last year was 58.9 per cent. of the premiums received on the new policies, the heaviest item being, of course, the remnueration of the agents.

''It is only fair to Australian offices to say that the costliness of their system of securing new business is not peculiar to them. Other great offices in England and other parts of the world pay away to agents a great proportion of the first year's income on new policies.

What Some Figures Show.

''The following figures, taken from 'Bourne's Insurance Directory, 1912,' tell their own tale:—

Company.	Percentage of First Year's Premiums Absorbed by the Expenses Incurred in Acquiring New Business in 1909.
English, Scottish and Law	101.4 per cent.
Law, Union and Rock	93.3 per cent.
Clerical, Medical and General	68.2 per cent.
Norwich Union	65.2 per cent.
Equity and Law	69.0 per cent.
Alliance	47.4 per cent.
Commercial Union	50.8 per cent.
Legal and General	49.5 per cent.

The figures do not, however, make the situation more palatable to the thinking policyholder, who is inevitably loaded with his share of the burden of maintaining a system which obliges him to foot an amazing bill year in and year out. Insurance managers say the public has only itself to blame, and that if men did not need wheedling into insuring their lives there would be no need to fee the agents to so large an extent. But the companies offer no inducements to the public to insure direct. They will give men who act as agents from 40 per cent. to 80 per cent. commission on the first year's premium to bring an insurer to them, but they decline to offer a penny commission or rebate to a man who comes to their offices voluntarily and says, 'I want to insure my life.' The companies freely admit that new business costs them about ten times as much in expenses as the cost of renewals, and they wring their hands, metaphorically speaking, over the fact. Yet they will neither encourage direct insurance by offering better first premium terms for insurance otherwise than through an agent, nor will they, if they can help it, countenance any rebate being given by their agents. Rebating is known to be done by smart agents in order to induce business on special terms. But it is performed sub rosa, and the secret of the transaction is known only to the parties directly concerned. The Australian Mutual Provident Society officials say they will sack any agent known to grant a rebate of the first year's premium to an insurer.

Less Extravagant Methods.

''There are visible symptoms, however, of a desire for some less extravagant and extortionate method of effecting insurances than the established commission agency system. A firm in Melbourne is now trying to break that system down by a device which really amounts to a sacrifice on its part of a portion of the commission it receives from the companies which consent to appoint it agent. The firm offers by advertisement to those who agree to make it their brokers half the first year's and 2½ per cent. reduction on each subsequent year's premiums. Some of the companies have flatly declined to appoint the firm as agent or to receive the propositions it submits; not because they doubt the firm's bona fides. but because they disapprove of rebating of any kind. Other companies have made contracts which enable the firm's clients to obtain the benefit of the rebates offered. The experiment is an interesting one, and is being watched with curiosity and no little anxiety by the Melbourne insurance world.

"The more cynical and worldly-wise of the company managers regard the whole effort as an impracticable tilting at windmills, which will remain as firm as ever after the impact. A searching public inquiry into the question of life insurance costs would reveal some surprising facts, and not the least interesting would relate to the commission system, which keeps premiums unnecessarily high, and makes life insurance unjustifiably dear."

GRAND TRUNK IN NEW ENGLAND

President Chamberlin Wants to Find Six Million Dollars—Questions Asked at Ottawa.

President Chamberlin of the Grand Trunk was asked by a representative of the Boston News Bureau: "Are you going to resume construction of the line to Providence?" He replied: "I can make no statement now, but if you can tell me where we can get $6,000,000, I can answer your question."

To a question whether $6,000,000 would complete the work, Mr. Chamberlin answered in the affirmative.

Mr. Charles S. Mellen and Mr. E. J. Chamberlin entered pleas of not guilty in the Federal District Court at New York to indictments charging them with violating the criminal clause of the Sherman Anti-Trust Law in connection with a "monopoly agreement" between the New York, New Haven and Hartford Railroad and the Grand Trunk Railway. They were given until Monday, February 10, to change or withdraw their pleas.

As each was under $10,000 bail to which they were admitted under previous indictments for the same alleged offence, this bail was allowed to stand. No date was set for the trial. Both of the defendants were in court.

Mr. Alfred W. Smithers, of London, England, chairman of the Grand Trunk Board of Directors, jointly indicted with Messrs. Mellen and Chamberlin, was not in court.

The United States marshal served Messrs. Mellen and Chamberlin with an order requiring them to produce in the Federal Court in New York certain documents, including letters exchanged between Mr. Ezra Baker of the New Haven and Smithers of the Grand Trunk, and transmitted by Mr. Smithers to Mr. Chamberlin. The Government contends that these letters had reference to the traffic agreement between the two roads.

For the first time, the other day, the proceedings in the United States against the Grand Trunk Railway officials was the subject of inquiry in the House at Ottawa. The Government was asked whether they were aware that proceedings had been taken in New York against the Grand Trunk Railway Company or the Grand Trunk Pacific Railway Company for failing to extend their lines in New England or in other parts of the United States.

The Government replied that it is informed that proceedings have been taken in the State of New York but understands that such proceedings are against officials of the Grand Trunk Railway Company. It has no exact information but understands that the proceedings have been taken by way of indictment for alleged contravention of the laws of the United States respecting the regulation and control of railways.

Grand Trunk Obligations.

The Government was asked also what are the obligations and responsibilities of the two railway companies under the contracts and statutes providing for the construction of the National Transcontinental Railway and replied that they are set forth in the contractual and statutory provisions which are embodied in chapter 71 of the Acts of 1903 entitled "An Act respecting the Construction of a National Transcontinental Railway" and chapter 24 of the Acts of 1904 entitled "An Act to Amend the National Transcontinental Railway Act." Both companies are also subject to the provisions of the general statutes of Canada relating to railways under federal jurisdiction, that is to say, chapter 58 of the Acts of 1903 entitled "An Act to Amend and Consolidate the Law respecting the Railways" and the various Acts since passed by Parliament in amendment thereof. By the contract and amending contract which were ratified by the Acts of 1903 and 1904 above mentioned the Grand Trunk Railway Company assumed obligations in respect of the construction of the western division of the National Transcontinental Railway; and the Grand Trunk Pacific Railway Company undertook the construction of that division within a stated period, which has since been extended.

The Grand Trunk Pacific Railway Company also undertook to operate the eastern division of the railway under lease from the Government for a period of fifty years upon the terms set forth in the contracts and confirming statutes. Among other important obligations of the company are those contained in sections 42 and 43 of the contract of 1903, which are as follows:—

How the Contract Reads.

42. It is hereby declared and agreed between the parties to this agreement that the aid herein provided for is granted by the Government of Canada for the express purpose of encouraging the development of Canadian trade and the transportation of goods through Canadian channels. The company accepts the aid on these conditions, and agrees that all freight originating on the line of the railway, or its branches, not specifically routed otherwise by the shipper, shall, when destined for points in Canada, be carried entirely on Canadian territory, or between Canadian inland ports, and that the through rate on export traffic from the point of origin to the point of destination shall at no time be greater via Canadian ports than via United States ports, and that all such traffic, not specifically routed otherwise by the shipper shall be carried to Canadian ocean ports.

43. The company further agrees that it shall not, in any matter within its power, directly or indirectly advise or encourage the transportation of such freight by routes other than those above provided, but shall, in all respects, in good faith, use its utmost endeavors to fulfil the conditions upon which public aid is granted, namely,—the development of trade through Canadian channels and Canadian ocean ports.

What Dominion Government Says.

Replying to a question as to what extent, if any, will those obligations or responsibilities be probably effected by the pending proceedings in the courts of the United States, the Government has no information at present that they will be in any way affected. The Grand Trunk Railway Company holds the capital stock of the Grand Trunk Pacific Railway Company and controls the undertaking of the last named company. The Government recognizes its duty to take all appropriate and available steps for the purpose of preventing any violation or disregard of the provisions of the above mentioned contracts and statutes, whether by diversion of traffic from Canadian ports and routes or by any such undue or improper diversion of the companies' resources as would delay or interfere with the completion and operation of the National Transcontinental Railway in accordance with the companies' obligations to the people of Canada.

REGINA'S FIRE LOSS WAS HEAVIER

Regina's fire department responded during 1912 to 135 alarms. This exceeds the number of the previous year by 34, states Fire Chief White in his annual report. The total loss by fire during the year amounted to $139,120.41, being $33,086.22 more than in 1911.

Total loss on buildings and contents, $139,120.41.

Total insurance on buildings and contents, $689,600.

Estimated value of buildings and contents to which the department were called and used either water or chemicals was $3,249,350.

Calls received included 52 to residences, 14 to offices and store buildings, 11 to rubbish, electric light poles, etc., 10 to stables, 10 to office buildings, 9 to fire alarm boxes that were false, 7 to warehouses, 5 to apartment houses, 4 to rooming houses, 3 to cars, railway and street railway, 2 to departmental stores, 1 to lumber yards, 2 to hotels, 1 to garages, 2 to bakeries, 2 to automobiles, 2 to cafes; and the causes of fires: Chimney fires, 16; chimney and stove pipes, 14; furnace pipes, 2; supposed incendiary, 2; false alarms on fire alarm by mischievous persons, 9; thawing frozen water pipes, 1; carelessness with gasoline, 6; cigar or cigarette stubs, 6; hot ashes put close to wood, 5; hot coals from stove, 3; unknown causes, 4; coal oil stoves, 6; chimneys filling house with smoke from being dirty, 3; sparks from chimneys, 5; carelessness with lighted matches, 3; sparks from hand forge, 1; children and matches, 6; rheostat, articles close to, 2; fire crackers, 2; re-kindling of previous fires, 2; electric light lamp, 1; rubbish fires, 2; struck by lightning, 3; caused by cyclone, 5; reflection of light, 2; filling lamp while lighted, 1; fires caused by hobos or tramps, 3; escaping steam taken for smoke, 3; defective fire places, 2; dust in hot air pipes, 1; ignition of grease, 2; drying clothes close to stove, 1; defective hot air and furnace pipes, 2; smoke scares by heavy smoke from chimneys, 3; sparks from furnace, 1; coal oil lamp explosions, 2; chemical explosions, 1.

* * *

A bill increasing the authorized capital of the Ottawa Terminals Company, a subsidiary of the Grand Trunk, from $3,000,000 to $6,000,000, has been passed by the railway committee of the federal government, at Ottawa. This legislation was rendered necessary by the heavy expenditure for the construction of the central station, and Chateau Laurier, which was considerably in excess of the estimates.

Increases approximating ten per cent. in the wages of railway conductors, trainmen and engineers, together with improvements in certain general conditions under which the men work, are being demanded of all the railroads in the Eastern Association, including the Canadian Pacific and Grand Trunk. Delegates from three great labor organizations, the Order of Railroad Conductors, the Brotherhood of Railroad Trainmen, and the Brotherhood of Locomotive Engineers, have arrived in Montreal for a preliminary conference with a view of presenting new wage schedules.

CRITIC OF OUR ISSUES IN LONDON.

nadian Municipalities Should Get Money for Less Than Five Per Cent.—Not Enough Information Given to Investor in Our Industrials.

A critical and fair review of Canadian industrials and ir relation to British investors appears in the London nomist. The article recalls the fact that some Cana- newspapers have been complaining lately of the lness of the British investor towards Canadian secur- s generally, and more particularly in the case of Canadian ustries. As a matter of fact, the writer continues, the tish capital found for Canada of late years has been and is on a prodigious scale. But still the complaints existed, they are seemingly founded upon the theory that the estment has been very profitable for all parties, and that British investor ought not to exercise any discrimination developing the Empire.

"Let us try to examine the matter fairly," says our conporary. "The prices of high-class Canadian issues have ainly fallen, but so have all first-class investments. Other nial governments and municipalities have had to borrow much higher rates than they have paid on previous occas—the Australian States have renewed loans at four per t. But there has been a very striking advance in the rates ch Canadian municipalities have been willing to pay in don. Moose Jaw and Saskatoon, which about a year ago e offering 4½ per cent. stock, have issued additional loans 5 per cent.

s than Five Per Cent.

"It is said that Canadians themselves have put much ital into Canadian industry; if, therefore, there is money Canada available for investment, surely a Canadian munility ought to be able to get money at less than 5½ per t., for a 5 per cent. issue in London means that approxiely this rate is paid by the borrowers. We sometimes fear t in their anxiety to "get big" quickly the small Western ns are basing their calculations on increases of population rapid in each of the next ten years as in the past two or ee, and are equipping themselves with roads, sewers, light- and water plants, and schools, on a too generous scale.

"The share that the British investor has taken in Cana- industrials is not very large as compared with the total ount of British capital invested in Canadian securities as a le, the proportion having been estimated at about one-fifth. ada has had its slumps in the past, though it is not the nory of these which may be keeping the investor away n Canadian industrials; rather is the cause to be found in low average quality of the industrial investments which e been offered over here. Some of them, of course, have n very good, and have been able to secure funds on very orable terms indeed. But too frequently have their prostuses been lacking in real information as to the security red, while indications have frequently pointed to the emyment of the vicious system of finance associated with the ly history of some of the American railways.

Much Watered Capital.

"They have been floated with a large capital in ordinary res, conveying to the unsuspecting investor the idea of bility for the bonds or debentures for which he is asked to scribe, while in reality all this capital was so much water, ng taken by the promoters for the value of their services, bondholder having to provide all the money for capital enditure, and sometimes for the promotion expenses as well. bonds in such a case have no more security than if they e the real ordinary stock of the concern, and the price at ich they are issued is out of proportion to their worth. It y be worth the while of promoters to pay the bond interest il either the company can earn it or has been proved a ure. If a failure, the bondholders lose everything; if it is uccess, the paper capital becomes of substantial value—a ads I win, tails you lose' arrangement.

"To show how investors have fared as regards Canadian ustrial securities issued during the recent boom years we y set out a few of them with their issue prices and present tations. A fair selection of some large concerns is given in following table:—

Issued in London.	Security.	Issue Price. %	Present Price.
	Industrials.		
., 1909,	Canada Cement 7% Pref.	93 (less bonus)	96
., 1910,	Do 6% Bonds	par	105

April, 1905,	Shawinigan Water and Power 5% Bonds	98	106½
June, 1907,	Do 4½% Deb. Stock	90	101½
	Iron, Coal, Steel, etc.		
Oct., 1908,	Canada Iron Corp. 6% Bonds	99½	99
Nov., 1909,	Canadian Car and Foundry 7% Pref.	95	117
Feb., 1910,	Do 6% Bonds	103	110½
May, 1910,	Canadian Collieries (Dunsmuir) 5% Bonds	95	86
July, 1909,	Dominion Iron and Steel 5% Mort. Bonds	93	100
April, 1912,	Dominion Steel Corp. 6% Cum. Pref. Shares	92½	95x
April, 1909,	Lake Superior Corp. 5% Gold Bonds	90	97½
Nov., 1910,	Lake Superior Iron & Chemical 6% Bonds	par	77
May, 1910,	Nova Scotia Steel & Coal 5% 1st Mort. Bonds	95	96
July, 1910,	Steel Co. of Canada 6% 1st Mort. Bonds	102½	101½

"It will be seen that in some cases the stocks stand higher than the prices at which they were issued, but a number have depreciated heavily. Of course, a certain amount of depreciation might be expected, because the average level of the fixed interest-bearing securities has been declining. But this cause does not account for the fall of 9 points in Canadian Collieries 5 per cent. bonds, 10 points in Canadian Cottons bonds, 7 points in Canadian North Pacific Fisheries bonds, 10 points in Canadian Pacific Lumber, and 23 points in Lake Superior Iron and Chemical 6 per cent. bonds. All these companies were formed in 1910 or 1911, either as new concerns, or to take over the property of older ones, investors having only estimates to guide them as to the security for their bonds.

Dominion Sawmills Was Nasty Shock.

"Holders of Dominion Sawmills and Lumber bonds had a nasty shock when interest payments stopped only eighteen months after the issue of the bonds and a drastic reorganization had to be adopted, bondholders accepting a reduction of 1 per cent. in the rate of interest. Another and more recent sensation is the slump in Southern Alberta Land shares, on the announcement of the failure of the irrigation scheme as originally presented, and on the strength of which the shares had been pushed up to 50s with the assistance of well-placed advertisements. Many of the present shareholders must have paid more than par for their holdings, and now see them at a heavy discount on the purchase prices. The shares of Canadian Wheat Lands, which was formed to acquire some of the Southern Alberta Land Company's holding, stand below their issue price. Some of the bonds issued by established companies, which are able to show a steady record of earnings, rightly command good prices.

"Thus the British Columbia Electric Railway has paid regular dividends on its capital, and has made several issues of 4¼ per cent. debenture stock at par or a point under. Even in this case, however, it is not possible to say whether enough is being put aside from revenue to depreciation and renewals. The great difficulty in the way of determining the positions of nearly all the companies, and particularly those of recent origin, is the lack of comparative balance-sheets and of proper information as to the value of the assets, which may be entered at fancy prices for all the investor knows. On their good points and prospective advantages the British public is well enough informed by voluminous prospectuses and lengthy advertisements, which too often look like unpaid editorial notes. The concerns floated by honest promoters on sound property valuations may suffer with the rest when the extravagant promotion methods of the bad ones are revealed by some setback to Canadian prosperity. It is hard to see where the remedy may be found. The simplest lies in the hand of the investor himself. If all bad promotions are rejected the sound ones will enjoy the better credit. Canada has many strong points—an excellent banking law, and a sound system of local and central government. But the better the country and the greater its possibilities the more is caution requisite in the piling up of liabilities. The more London discriminates as a lender the better for Canada as a borrower.''

◆

JANUARY FIRE LOSSES

They Were Very Heavy—Many Big Fires Occurred—Carelessness is Prominent Amongst Causes

The Monetary Times' estimate of Canada's fire loss during January amounted to $3,913,385, compared with December loss of $1,769,905 and $3,002,650 for the corresponding period of last year. The following is the estimate of January losses:—

Fires exceeding $10,000	$1,921,506
Small fires	1,481,438
Estimates for unreported fires	510,441
	$3,913,385

This loss has only been exceeded twice during the last two years, viz., in July, 1911, when the Porcupine conflagration increased the loss to $5,384,300, and in June, 1912, when the destructive Chicoutimi blaze sent the total for that month up to $4,329,412.

During January there were twenty-two fires where the loss exceeded $10,000, the largest being that which destroyed the Burns packing plant at Calgary.

The following are the monthly totals of the losses by fire during 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.
January	$1,500,000	$1,275,240	$2,250,550	$3,002,650
February	1,263,005	750,625	941,045	1,640,153
March	851,690	1,076,253	852,380	2,261,414
April	720,650	1,717,237	1,317,900	1,355,055
May	3,358,276	2,735,536	2,564,500	2,251,815
June	1,360,275	1,500,000	1,151,150	4,229,412
July	1,075,600	6,386,674	5,384,300	1,741,371
August	2,582,915	1,667,270	920,000	1,164,760
September	1,615,405	894,125	1,123,550	883,941
October	2,208,715	2,105,781	580,750	1,416,218
November	935,191	1,943,708	1,506,500	1,184,010
December	1,433,813	1,444,860	2,866,950	1,769,905
	$18,905,538	$23,593,315	$21,459,575	$22,900,712

Each Province Adds to Toll.

The fire waste in each province has been estimated as follows:—

Alberta	$1,973,980
Ontario	584,990
Saskatchewan	482,764
Manitoba	386,030
Quebec	167,152
British Columbia	153,629
New Brunswick	80,102
Nova Scotia	68,020
Prince Edward Island	16,100
	$3,913,385

The fires at which loss was estimated at $10,000 and over were as follows:—

Arcola, Sask., business section	$ 21,000
St John, N.B., warehouses	10,000
St. John, N.B., laundry, etc	19,000
Brantford, Ont., cordage works	90,000
Truro, N.S., business block	12,306
Calgary, Alta., packing plant	881,000
Edmonton, Alta., business block	27,600
Broderick, Sask., business section	15,000
Belmont, Man., bank	10,000
Hazelton, B.C., store	50,000
Chatham, Ont., store	30,000
St. Boniface, Man., rolling mills	40,000
Niagara Falls, Ont., transformer building	100,000
Abbotsford, B.C., business section	30,000
Wapella, Sask., business section	150,000
Portage, P.E.I., store	10,000
New Glasgow, N.S., business block	15,000
Fort Saskatchewan, Alta., business section	101,000
Montreal, Que., business block	37,000
Montreal, Que., warehouse	60,000
Toronto, Ont., business block	12,600
Edmonton, Alta., business block	200,000

Carelessness of Individuals.

The structures damaged and destroyed were 152 residences, 61 stores, 25 barns and stables, 17 factories, 14 hotels, 13 business blocks, 8 warehouses, 7 school and colleges, 6 halls, 5 sawmills, 5 garages, 5 foundries, 4 poolrooms, 4 cafes, 4 laundries, 4 theatres, 4 office buildings, 3 club houses, 3 post-offices, 3 boarding houses, 2 power houses, 2 blacksmiths' shops, 2 banks, 2 churches, 2 greenhouses, 1 convent, 1 elevator, 1 newspaper office, 1 bakery, 1 packing plant, 1 barracks, 1 picture theatre, 1 flax mill, 1 cook-house, 1 rolling mill, 1 water tank.

There were destroyed 61 horses, 29 cows, 6 calves, 4 pigs, 205 chickens, 7,500 bushels wheat, 7,300 bushels oats, 3,000 bags flour, 300 tons hay, 125 bags crushed grain, 800 tons binder twine, 4,000 carcases meat, 35 cases honey, 3 buggies, 5 sets harness, 1 carload potatoes, 1 box car of ale, 13 freight cars, 1 refrigerator car, 1 baggage coach 1 threshing outfit, 3 automobiles, 3 tents.

Of the presumed causes, 19 were attributed to overheated stoves, 15 defective chimneys and flues, 13 defective stovepipes, 12 overheated furnaces, 12 matches, 12 gasoline explosions, 9 overheated stovepipes, 7 hot ashes, 7 sparks, 5 incendiary, 5 electrical defects, 5 decorations set alight, 5 lamps upset and exploded, 4 defective furnaces, 3 curtains set alight, 3 tramps, 3 oil stove explosions, 3 thawing out water pipes, 3 heaters, 3 engine backfiring, 3 spontaneous combustion, 2 overheated molds, 2 defective grates, 2 gas fixtures, 2 mice eating matches, 2 car heaters, 1 cigarette, 1 upset lantern, 1 gas ignited, 1 gas stove, 1 smoking in bed, 1 child carrying light, 1 hot stovepipe fell on matches, 1 coal stove explosion, 1 over-heated boiler, 1 wood in stove, 1 can of japan exploded.

List of Dead is Smaller.

The number of deaths from fire during January is fourteen.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	..
March	16	20	18	24	..
April	18	37	20	15	..
May	21	15	28	18	..
June	16	52	13	6	..
July	4	15	110	9	..
August	17	11	22	16	.
September	10	10	13	6	..
October	26	16	17	21	.
November	34	19	20	22	..
December	33	10	17	28	..
Totals	210	256	317	203	14

The fires at which fatalities occurred were:—

Vancouver, B.C., burning building	1
Jonquiere, Que., exploded gasoline lamp	1
Strathroy, Ont., lamp explosion	1
Montreal, Que., burning building	1
Edgewood, B.C., burning building	2
Ryley, Alta., clothes set alight	1
Sydney, N.S., burning building	1
Fort William, Ont., burning building	1
Edmonton, Alta., burning building	2
St. Scholastique, Que., burning building	1
Cranbrook, B.C., burning building	1
Relfield, Sask., burning building	1
	14

◆

NORTHERN MORTGAGE COMPANY

Only two complete years of business have as yet bee experienced by the Northern Mortgage Company of Canad but it appears to be laying a good foundation for years to come. A balance, $23,581, was carried forward at the end of last year to the credit of profit and loss. The debenture stock issued and paid for totalled $510,462, an increase of $31-262 during the year. The company's investments are all in first mortgages on improved properties. The average rate of interest earned is about 7¾ per cent. Dividends on debenture and common stock were paid to the amount of $50 205. The company's authorized capital is $10,000,000 of which $3,000,000 is subscribed and $1,091,848 paid up. The increase in paid-up capital last year was $386,585.

PUBLIC UTILITIES AND MISCELLANEOUS BONDS.

rge Sales Were Made Last Year—Popularity of the Issues.

During the past year sixty-two miscellaneous companies ied securities aggregating $55,191,000, as against $54,580,- by forty-eight companies in 1911, according to Mr. E. R. od's bond review.

Sales in Great Britain aggregated $33,792,000, or 61.24 cent. of the total. Canada absorbing $18,524,000, or 33.56 cent., and the United States $2,875,000 or 5.2 per cent.

The general prosperity of Canada during recent years has ced our large industrial companies under the necessity of uring capital in some permanent form in order to meet the rly increasing demands made upon them. Many have sen bonds as the best method of financing.

her Rate of Interest.

The universal demand for a higher rate of return from estments has given to our miscellaneous company issues a ularity that otherwise could hardly have been attained. neral confidence in the future of Canada has made the loitation of new industrial concerns comparatively easy, and it was natural that advantage should be taken of the situation.

Too often bond issues of this class are based on too largely earning power instead of net tangible assets readily realizable under stress. With but few exceptions, however, investors in this class of security will find their confidence amply justified, for the prosperity of Canada is bound to continue, notwithstanding occasional disappointments. Most Canadian industrial issues are secured against tangible assets, are backed by an ample earning power under capable management, and are sponsored by established financial houses.

New Record Created.

In 1912 Canadian investors put more money into industrial issues than into all other classes of securities combined, due in most cases to the larger income derivable therefrom. Many investors in Great Britain, desirous of sharing in the prosperity of Canada, were enabled to do so best by purchasing our industrial securities. This impresses the necessity of being scrupulously careful that our miscellaneous company securities be fundamentally sound in assets and earning power, so that they will remain unimpaired even if periods of depression should visit Canada from time to time.

The appended table shows in detail the miscellaneous enterprises floating bonds during the year and the sources of the capital they have obtained.

The tramway, light, heat, power and telephone companies issued bonds to the extent of $21,565,000, as compared with

$32,105,500 in 1911 and $7,945,000 in 1910. Many public utilities in Canada are owned and operated by provincial governments and municipalities, and their financial requirements are met by the issuance of government and municipal securities. For this reason the figures do not indicate the entire annual expenditures on public utilities.

Readjustment and Expansion

During 1912 all the securities of this class were put out by existing and well established public utility companies for the purpose of readjustment and expansion. Not a single new company of this class was exploited—a marked contrast to former years. Public service corporations directly serving Toronto, Montreal and Vancouver were responsible for issues amounting to $16,740,000 or 80 per cent. of the year's total.

For some years the British Columbia Telephone Company secured funds for extensions by the sale of capital stock. During 1912 its needs were met by the issuance of bonds and preferred stock.

Both at home and abroad the securities of our public service corporations are well and favorably known and the demand for them at times is in excess of the supply. It is generally recognized that the position of these companies is particularly strong and bound to improve with the growth of the large centres of population. The several issues and their markets are set forth in tabulated form:—

TRAMWAY, LIGHT, HEAT AND POWER, AND TELEPHONE COMPANY ISSUES.

Company.	Amount.	Canada.	United States.	Great Britain.
Vancouver Power Company (guaranteed by British Columbia Electric Railway)	$ 4,000,000	....	....	$ 4,000,000

STANDARD TRUSTS COMPANY

Another successful year has been recorded by the Standard Trusts Company, which has made its mark in Western Canada, especially as one of the progressive and conservative trust corporations of the Dominion. The net profits for the year, after making the usual deductions, were $104,982. With a balance at credit of profit and loss there was for disposal the sum of $108,601. Dividends at 8 per cent. per annum absorbed $42,500 of that amount. A substantial contribution of $62,500 was carried to the reserve fund which now totals $262,500. The balance carried forward was $3,600.

In the directors' report to the shareholders, Mr. J. T. Gordon, the president, stated it was felt by some of the shareholders that when the reserve reached fifty per cent. of the paid-up capital the company, earning as it has been, twenty-one per cent. on its capital, would go on a ten per cent. dividend basis, but the directors, actuated by a conservative policy, deemed it prudent that twelve per cent. (or 60 per cent. of earnings) be carried to reserve. They have considered it good policy, too, at this stage of its career, to increase its capital stock by fifty per cent., or in the proportion of one share for every two shares held, and that at a premium of twenty-five per cent. As authority was given to the company's executive committee at the annual meeting of the shareholders in 1905 to increase the capital stock to $1,000,000, of which total ten thousand shares of $50 each have been issued and paid for, it was not necessary to take power from the shareholders to issue the additional five thousand shares. The shareholders, however, endorsed that course and the following figures show the standing of the capital account and reserve, immediately after the proposed subscription had taken place:—

Capital stock, 15,000 shares of $50 each		$750,000
Reserve, as above	$262,500	
Premium of 25 per cent. on new stock	62,500	
Total reserve		325,000

Mr. Gordon went fully into the company's progress during the year. The premises at Winnipeg have been adapted to the requirements of the head office. A six story building at Saskatoon is being constructed. Both these buildings have been taken into the financial statement at actual cost only.

Sir William Whyte, vice-president, dealt at some length with the company's financial position. He stated that the investment feature of the company's business was more active than usual during the year 1912. During the twelve months the company loaned $1,662,275 and received for investment from various sources $1,200,000. As a result of the large amount of new loans made, the executive committee were kept busy passing upon them, but care was exercised and only business of the highest class was accepted either for capital funds or for trust funds. The percentage loaned to the value of security rarely exceeded 35%. The total investments are $5,500,000. A further indication of the extent to which the investment business has grown may be gleaned from the fact that the collections during the last twelve months totalled $1,050,000, of which $289,500 represents interest and $760,500 principal repayments.

CANADA PERMANENT MORTGAGE CORPORATION

It should be remembered that the loaning of money is a business which cannot be learned in a day, but requires a long apprenticeship and much experience if the investor or his agent has in view the permanent security of interest on what at present appears to be a fair security. These statements were made by Mr. W. G. Gooderham, president of the Canada Permanent Mortgage Corporation at its annual meeting this week. That this company has long since completed its apprenticeship is well known, and further proof of the fact is revealed in its financial statement for the past year. The balance sheet indicates unusual strength in every account. The reserve fund amounts to $4,000,000, as compared with a capital stock of $6,000,000. A sum of $250,000 was last year's contribution to the reserve. A substantial balance of $96,027 was carried forward at credit of profit and loss and dividends at the rate of 9 per cent. for the year absorbed $540,000 of the $886,027 available for distribution. Satisfactory profits were made on operations. After deducting management expenses, interest on borrowed capital, etc., they totalled $826,799.

Deposits and accrued interest amounted to $5,637,112. Sterling debentures and accrued interest total $11,993,060. Despite the disturbed conditions in financial spheres last year, a gratifying increase was made in the company's sterling debentures. Currency debentures total $3,000,525 and debenture stock $427,541. The assets amounting to $31,299,095 comprise chiefly mortgages on real estate, amounting to $28,948,472. Advances on bonds and stocks were made to the extent of $362,182. The company holds municipal debentures, bonds and other securities, totalling $434,389. Office premises in various parts of the country are valued at $621,855 and cash on hand and in banks stands at $932,196.

Mr. Gooderham in addressing the shareholders recalled the progress of the corporation in recent years. It began the year 1906 with a reserve of $2,200,000, and unappropriated profits amounting to $44,708. At the close of the year 1912 the reserve had increased to $4,000,000, and the company has $96,027 of unappropriated profits. At the earlier date named the company was paying a dividend of six per cent., which during the seven years has been steadily increasing, till the shareholders will receive ten per cent. per annum b ginning with the next dividend period, April 1st, 1913. Collections on mortgages were satisfactory during the past y The amount collected for principal and interest on mortg alone amounted to $5,436,781. The company's statement i an excellent one. The next quarterly dividend will be at th rate of 10 per cent. per annum.

A resolution was passed at the meeting approving th formation of a trust company, the stock of which is to b owned by the Canada Permanent Mortgage Corporation. Th trust company will be operated in connection with the mo gage company, and the directors will be as far as possibl the same.

◆

The American Can Company has purchased the interests of the Western Can Company, for a consideration stated to b in the neighborhood of $200,000. The factory will be moved from East Burnaby to either Vancouver or Coquitlam to take advantage of better freight rates.

THE OTTAWA ELECTRIC RAILWAY COMPANY

Nineteenth Annual Report for the Year Ending December 31st, 1912.

Your Directors beg to present their Nineteenth Annual port, with Statement of Assets and Liabilities on 31st Dember, 1912, and the Profit and Loss Account for the year.

The gross earnings for the year were $934,397.77 comred with $840,680.52 in 1911—an increase of $93,717.25.

21,815,798 passengers were carried, compared with 19,270,- in 1911—an increase of 2,545,277.

The net earnings for the year were $400,059.07, and have en disposed of as follows:—

ur quarterly dividends of 3% and a bonus of 3%	$255,947.82
erest on bonds and loans	21,303.66
leage payments	13,435.44
xes	9,463.16
ced to the Credit of Contingent Account to be applied to the reduction of Track Renewal, Car Equipment and other accounts	69,000.00
ansferred to credit of Profit and Loss Account	30,908.99
	$400,059.07

The balance at credit of Profit and Loss Account is now 38,264.83, and of Rest Account $200,000.00.

During the year a new 1,000 H.P. substation was installed Albert Street, and land has been purchased to install two re of the same capacity, one in Lower Town and the other the Southern part of the City. A large addition to the bourg Street Car Sheds was completed, and the erection of team turbo generator of 4,200 H.P. on Middle Street was tracted for and is now under way. With these improvents and the delivery of twenty double track P.A.Y.E. cars, der construction by The Ottawa Car Company, our earn- capacity and facilities for handling the increasing traffic l be greatly augmented.

Instead of erecting a new building for office accommodan, as proposed in last year's Annual Report, your Directors rchased the building No. 248 Albert Street which is now upied by the Headquarters and Receiving Office Staffs.

The tracks along Sparks Street and the Plaza have been ewed with a 93-lb. rail, and a small portion of the new cks on Queen Street from Elgin Street to Bank Street, horized by the City, completed. The remainder of the ter work will be finished early in the Spring.

The new bridge over the canal on Bank Street is now approaching completion when we will be in a position to carry out the extension of our tracks to Ottawa South.

Prospects for the coming year are of the brightest character.

All of which is respectfully submitted.

T. AHEARN, President.

Ottawa, 3rd February, 1913.

COMPLETE REPORT FURNISHED UPON REQUEST

CANADA PERMANENT MORTGAGE CORPORATION

ANNUAL MEETING

The Annual Meeting of Shareholders of the Canada Permanent Mortgage Corporation was held at the Head Office of the Corporation, Toronto street, Toronto, on Monday, the 3rd of February, at twelve o'clock noon.

The chair was taken by the President, Mr. W. G. Gooderham. The Secretary, Mr. George H. Smith, was appointed Secretary of the meeting, and read the Report of the Directors for the year 1912, and the Statement of Assets and Liabilities, which are as follows:—

REPORT OF THE DIRECTORS.

The Directors have much pleasure in presenting to the Shareholders the Annual Statement of the business of the Corporation for the year 1912, duly certified by the Auditors.

The net profits for the year, after deducting interest on borrowed capital, expenses of management, and all charges and losses, amounted to $826,799.32. This sum, with the unappropriated profits as at December 31st, 1911, $59,228.60, made a total of $886,027.92, which amount has been appropriated as follows:—

Four quarterly dividends of two and one-quarter per cent. each on the Capital Stock	$540,000 00
Transferred to Reserve Fund	250,000 00
Balance carried forward at credit of Profit and Loss	96,027 92
	$886,027 92

The Reserve Fund now amounts to four million dollars.

All of which is respectfully submitted.

W. G. GOODERHAM, President.

Toronto, January 15th, 1913.

R. S. HUDSON,
JOHN MASSEY,
Joint General Managers.

We beg to report that we have made an audit of the accounts, and have examined the vouchers and securities of the Canada Permanent Mortgage Corporation for the year 1912. We certify the accompanying Statement is a true exhibit of the Corporation's affairs as shown by the books as at 31st December, 1912.

A. E. OSLER, A.C.A.,
HENRY BARBER, F.S.A.A. (Eng.),
Auditors.

Toronto, January 15th, 1913.

Mr. W. G. Gooderham, the President of the Corporation, then said:—

Before moving the adoption of the Directors' Report to the Shareholders for the year 1912, it gives me pleasure to state that, as intimated in my remarks at the Annual Meeting last year, the dividend for 1912 has been increased to nine per cent., as conditions were sufficiently favorable to warrant the increase, and I am glad to say that the business for the year has been so satisfactory that we have been able, out of the earnings of the year, not only to pay the increased dividend of $540,000, which was $60,000 in excess of the previous year, but to add to our Reserve Fund another $250,000 and to carry over to unappropriated profits a sum which brings that fund up to $96,027.92. The Reserve Fund now stands at $4,000,000. I trust every Shareholder will appreciate not only the wisdom, but also the necessity, of making substantial additions to our Reserve Fund, which forms an additional security to those who entrust their funds to us. I may say, also, that with conditions as they are, we feel warranted in further increasing the dividend at the next quarter to two and one-half per cent., being at the rate of ten per cent. per annum.

It will perhaps be of interest to the Shareholders to recall the progress of the Corporation in recent years. We began the year 1906 with a reserve of $2,200,000, and unappropriated profits amounting to $44,708. At the close of 1912 our reserve had increased to $4,000,000, and we have $96,027 of unappropriated profits. At the earlier date named we were paying a dividend of six per cent., which, during the seven years has been steadily increasing till, as I have stated, the Shareholders may now expect to receive ten per cent. per annum beginning with the next dividend period, 1st April, 1913.

Collections on our mortgages have been satisfactory during the past year. The amount collected for principal and interest on mortgages alone reached the substantial sum of $5,436,781.62.

Notwithstanding the receipt of so much money from our mortgagors, and although our borrowed money, including sterling debentures, has increased beyond the amount at the beginning of the year by $955,680.07, we have still been unable to meet all the demands that have been made upon us, on securities that would have been readily accepted had it been possible to provide the money, and there has been no occasion for a reduction in the rates obtained. On the contrary, the rates of interest we have obtained during the year have been somewhat higher. While this is the case, and while the present indications are that lenders may continue to receive profitable rates of interest for some time to come, it is only reasonable to presume that any cessation of the wonderful progress which is taking place in the growth and development of the country may result in a lessened demand from borrowers, and a consequent reduction in the rates of interest obtainable.

I cannot refrain from commenting on the increase in our sterling debentures, notwithstanding the disturbed condition of the financial world. This is doubtless owing to an appreciation by investors of the excellent security we offer and to the valued services of our representatives in Scotland.

During the past year the usual critical inspection of our securities has been made, as your Directors feel the necessity of continually exercising the greatest possible care, not only in the selection of investments, but also in maintaining our margin of security. While this is always our policy, it is especially advisable in a time like the present, when the selling price of land—especially in cities and towns—is increasing so rapidly. While there does not appear to be any present indication of an early depression, should the condition of the real estate market change, our constant supervision places us in a position to meet any period of lessened activity with confidence. In view of the fact that the development of cities and towns has been much more rapid than that of agricultural sections, great as the latter has been—and consequently the selling prices of town properties have been increasing much more rapidly—it has been the policy of your Directors, in selecting our securities, to give the preference to moderate loans on improved farms which are occupied and cultivated by the owners, thus assisting the agricultural development of the country. The conditions which existed during the past year, when, as previously stated, the funds available were never quite equal to the demand, afforded an excellent opportunity for the pursuit of this policy. By a consistent method of discrimination in the acceptance of applications, and by reasonable increases in the rates of interest as the condition of the money market warranted, the land mortgage companies have been able to meet the moderate requirements of borrowers, and at the same time may have done something to retard too rapid expansion of building operations, and the natural tendency towards an increase in the selling price of lands in towns and cities which—if continued—might become unhealthy. For a time we discontinued loaning on city and town property, and have always been very guarded in king advances in localities where the selling prices have wn signs of inflation. I suppose it is not necessary to say t we never lend on vacant or unproductive properties, either an or rural.

A great deal of money is being sent into the Dominion, particularly into the Western Provinces, by private in- tors who are attracted by the rates of interest obtainable the many opportunities for investment. It should be re- bered that the loaning of money is a business which can- be learned in a day, but requires a long apprenticeship and h experience if the investor or his agent has in view the manent security of his investment, and not merely the secur- of a mortgage at a good rate of interest on what at pres- appears to be a fair security. Loans on real estate are e for a term of years, during which existing conditions may erially change, and a knowledge of the science of such estments, which can only be gained by long experience, is ired, not only in their selection, but also in their subse- nt management, if they are to stand the test of recurring ods of business depression. Even when financial institu- s are formed for the purpose of embarking upon a line of ness which, under other experienced management, has been itable, are not always successful, and not infrequently in hands of valuators possessed of only limited experience, e met with disaster. It is no guarantee that an enterprise prove successful because similar institutions can be pointed s having succeeded.

I regret to have to record the death of three of our Direc- during the year—Mr. Samuel Nordheimer, Mr. Frederick d, and Mr. W. H. Beatty. Mr. Nordheimer was identified the Canada Permanent Building and Savings Society at inauguration, and continued to be identified with the new poration up to the time of his death. No Company could e had a more loyal or staunch supporter than Mr. Nord- ner, and his wise counsel doubtless aided in bringing about substantial condition in which the Corporation finds itself ay. Mr. Wyld was one of the original members of the Board his Corporation, and was held in high respect for his shrewd sound judgment. Mr. Beatty, the last of the three to be ed by death, was one of the original Directors of the Cor- tion, for some years Vice-President, and subsequently Pre- nt, and took a prominent part in guiding the affairs of Corporation. The places of the deceased on the Directorate e been supplied by the appointment of Mr. John Massey, of the Joint General Managers; Mr. F. Gordon Osler, and E. R. C. Clarkson, whose appointments I trust the Share- ers will approve.

In conclusion I may say that your Directors are well sat- d with the undoubtedly sound condition of the Corporation. I have much pleasure in moving "That the Report of the ectors be received and adopted, and, together with the eral Statement, be printed and a copy be sent to each reholder," which will be seconded by the First Vice-Pre- nt.

In seconding the motion for the adoption of the Report, W. D. Matthews, the First Vice-President, spoke of the safe margins of security on the five to ten-year mortgage loans being made still more safe by the increased value of farm lands in recent years. He stated that on his regular and frequent visits to the Western Provinces, he found the staffs of our different branch offices enthusiastic in the Corporation's interests. This was very important, as so much depended upon the successful carrying out by the staff of the Directors' policies. As the President had stated, we were giving more attention to loans on improved farm properties than ever. Farm values were still on a very low basis, as contrasted with town and city values, so that it would need a serious setback indeed to put that class of securities in a precarious condition. He saw no reason to doubt but that the Corporation's business in the year 1913 would be quite as satisfactory as that of 1912.

The President's motion for the adoption of the Report was unanimously carried.

Mr. G. W. Monk, the Second Vice-President, said:—

As many of you are aware through the press, your Directors during the past year deemed it advisable to apply to Parliament for the incorporation of a Trust Company to undertake the duties of executors and trustees under wills, etc. We are but following the lead of some of the great Banks in Great Britain, and indeed that of many of the leading financial institutions in Canada as well.

We ought to have power to take care of the estates of such of our shareholders, debenture holders or depositors who might want us to administer their affairs in the interest of their families. We are not seeking, but are being sought after, in this regard. Already some shareholders have expressed their desire that we should take their estates in hand, and have been disappointed to learn that we have not the necessary legal powers.

The Company is to be known as the Canada Permanent Trust Company, and to be owned by the Canada Permanent Mortgage Corporation. The Directors to be, as far as possible, the same as the parent Company, and the profits of the new Company to accrue entirely for the benefit of the Shareholders of the Canada Permanent Mortgage Corporation, and I would move that the shareholders approve of the action of the Directors in inaugurating a Trust Company owned and to be operated for the benefit of the Shareholders of the Canada Permanent Mortgage Corporation.

Lt.-Col. A. E. Gooderham said: "Mr. Chairman, I have much pleasure in seconding that resolution, and in addition to what Mr. Monk has said, may I be permitted to say that this subject has had very careful consideration by the Directors and the support of a great many of the large Shareholders."

The motion was unanimously adopted.

The election of Directors, which was then held, resulted in the unanimous re-election of Messrs. W. G. Gooderham, W. D. Matthews, G. W. Monk, Lt.-Col. Albert E. Gooderham, J. H. G. Hagarty, John Campbell, S.S.C. (Edinburgh), R. S. Hudson, John Massey, F. Gordon Osler, and E. R. C. Clarkson.

At a subsequent meeting of the Board, Mr. W. G. Gooderham was re-elected President; Mr. W. D. Matthews, First Vice-President, and Mr. G. W. Monk, Second Vice-President.

UEBEC PULP AND PAPER AND WASHINGTON

Whether the Province of Quebec has raised the manu- uring restrictions on certain wood cut from Crown lands ely as a "blind" in order to export the pulp and paper e therefrom free of duty into the United States under the procity act is to be investigated by President Taft, says ashington dispatch. There is a law in Quebec which pro- ts the cutting of wood from Crown lands unless it is ufactured into pulp or paper in Canada. Such pulp and er is prohibited free entry under the reciprocity act. It appears that Quebec has raised this restriction on cer- of the wood.

According to representatives to the United States govern- t, Quebec's action amounts to a discrimination against ted States holders of Crown lands, and to grant the free y privilege, it is declared, would simply defeat the real nt of the wood pulp and paper clause of the reciprocity eement. The United States State and Treasury depart- ts have investigated the situation and will make a joint rt to the President.

Complaints to the United States government declare that bec has removed restrictions only on the timber lands. re the province has received practical assurance that the er will not be exported, but only the wood pulp and pa- made from it in Canada.

It is also alleged that the province has refused to remove restrictions from other Crown lands in the same province rolled by Americans.

Until the question is settled by the President, Secretary Veagh has issued a temporary order for the collection of

GREAT WEST LIFE ASSURANCE COMPANY

For twenty years, the Great West Life Assurance Company has been transacting business in the Dominion. The results of its operations several months before the close of 1912, indicated that that year would be a good one for the company. The figures for the twelve months show that it was by far the most successful year in the company's history. Applications for insurance made a new record, the figures being $25,155,166, an increase over the previous year of $7,136,813. The company now has business in force amounting to $83,978,739, a gain of $16,009,307 for the year, and an increased gain of $4,965,002 over 1911. At the same time the mortality was unusually favorable. The net death claims last year amounted to only $328,615, a decrease from the figures of the previous year of $6,651. This result can probably be divided between the company's conservative policy of selection and the health giving climate of Western Canada.

The expense rates were comparatively low, the fact being indicated in the size of surplus earnings which amounted to $573,460. That was greater by $313,386 than the amount earned in 1911. At the end of December, 1912, the company's assets amounted to $12,251,981. Its income for the year totalled $3,556,724 being an increase for the year of $792,565. Substantial interest earnings were made, the average gross rate last year being 7.95 per cent., a gain of 0.23 per cent. for the year. The company's head office is at Winnipeg. Under an enthusiastic management and directorate it is making quick strides and is keeping pace with the general growth of the country.

◆

A deputation of maple sugar manufacturers, representing the maple sugar industry in all the Eastern Provinces, waited on Hon. Martin Burrell and Hon. W. B. Nantel and asked that the industry be protected against the free use of compounds bearing the word "maple."

Visible Evidence of Western Progress

is seen in the 1912 Records of four prominent Winnipeg Institutions—unconnected save in location and the sound principles governing their progress. Their wide operations—rapidly expanding—and large Investments—highly profitable—have been important factors in the financial development of the West.

The Great-West Life Assurance Company

reports that 1912 has been by far the most successful of twenty successful years

The Applications received make a new record.	
Total for 1912	$25,155,166
Increase for the year	$ 7,136,813
Largely increased Assets and Income evidence the Company's expansion.	
Assets, December 31st, 1912	$12,251,981
Income for 1912	$ 3,556,724
Increase in Income for the year	$ 792,565
Greatly Increased Gains indicate well-satisfied, persistent Policyholders.	
Business in force end 1912	$83,978,739
Gain for the year	$16,009,307
Increased Gain over 1911	$ 4,965,002
Interest-earnings are the highest yet recorded.	
The Average Gross Rate for 1912 being	7.95%
Increase for the year	0.23%
The Mortality has never been so favorable.	
Net Death Claims 1912	$ 328,615
Decrease for the year	$ 6,651

Low Expense Rates betoken due economy,

THE WESTERN EMPIRE LIFE ASSURANCE COMPANY

Head Office - - - Somerset Building, Winnipeg

FIRST ANNUAL REPORT

The first Annual General Meeting of the Shareholders of The Western Empire Life Assurance Company was held at the Head Office of the Company in the City of Winnipeg, on the twenty-fourth day of January, 1913. There was a large attendance. Amongst those being present were:

William Smith, W. P. Rundle, H. F. Tench, A. J. Fraser, M.D.; L. J. Hallgrimson, J. H. Charnley, F. C. O'Brien, C. W. Green, M.D.; T. W. O'Brien, B. R. Gypson, Peter Tully, Hugh Fraser, J. H. Grainger, P. J. Howard, S. H. Matheson, J. F. Stirling, D. M. Bruce, A. M. Herron, all of Winnipeg; S. D. Hannah, of Waskada; Theo. Sweet, of Portage la Prairie; G. A. Fish, J. W. Hardaker, of Moose Jaw; and John H. Hilton, of Waldron.

The meeting was a most enthusiastic one. The report submitted and the comments thereon being such as to give the greatest satisfaction. The President occupied the chair.

After the usual preliminaries had been disposed of, Mr. William Smith, the Managing Director, read the report of the Directors and the Financial Statement and Auditors' Certificate, as follows:

DIRECTORS' REPORT.

To the Shareholders, The Western Empire Life Assurance Company:

Gentlemen,—The Directors beg to submit the report and statement of accounts for the first year of the Company's operation.

The policies issued and placed total $1,008,500.00, with an annual premium of $27,244.15, which you will concede is a very satisfactory showing for the Company's first year.

We have followed out the policy set down, and have confined our investments to first mortgages on improved revenue-bearing real estate, with the exception of the amount of our deposit with the Government, which, to comply with the Insurance Act, is in the form of 20-year bonds, which are yielding about 4.10 per cent., the interest being guaranteed by the Manitoba Government. The great demand for money to develop the resources of the country has enabled your Directors to select investments affording ample security and at the same time yielding a remunerative rate of interest, the average rate realized exceeding 8 per cent.

There have been no death claims, a very gratifying feature, due, we think, largely to a judicious selection of risks in the first place by our agents and a careful revision by the Medical Director. It also reflects the fact that, while we have written a good volume of business, it has not been at the expense of quality.

Notwithstanding the ample provision for all liabilities, our surplus to policyholders amounts to the handsome sum of $209,402.71; the assets amounting to $223,821.49 plus the uncalled capital, provides a total guarantee to policyholders of $549,821.49. It is also gratifying to note that there is a surplus of $84,402.71 on Shareholders' account.

Your Directors feel the necessity of exercising the greatest care in all matters pertaining to the welfare of the Company. The result of the first year's operations, which is very gratifying to them, should prove equally so to Policyholders and Shareholders alike. It has enabled the Company to carry out every promise it has made, and we are satisfied that the Company is in a position to maintain the splendid record of its first year's operations.

Our report would not be complete if it did not make reference to those who secured the applications and collected the premiums. Life insurance to a very great extent always has been and always will be transacted by agents. The quality of the business, the persistency of the same, the satisfaction of Policyholders and to some extent the resulting mortality, reflect the character of the agents who make the representations under which the policies are taken. Upon the manner of their work depend, in no limited degree, the final financial results. The only inference that can be drawn from the splendid first year's achievements is that our agency staff is composed of men of not only exceptional ability, but of high moral character. Our policies have been placed fairly and honestly by fair and honest agents. This statement is warranted by the fact that there has not been a single complaint or a charge of misrepresentation laid by any Policyholder. Your Directors are of the opinion that the money expended in pursuit of business is money well spent, and our present enviable position is in a large measure due to those who are working so faithfully in the endeavor to add to our rapidly increasing volume of business.

FINANCIAL STATEMENT FOR YEAR ENDING DECEMBER 31st, 1912.

AUDITORS' CERTIFICATE.

Winnipeg, January 11, 1913.

We have examined the books and accounts of The Western Empire Life Assurance Company for the year ended December 31, 1912; satisfactory vouchers were produced for all disbursements, and, in our opinion, the above statement exhibits a true and correct view of the Company's affairs as shown by the books of the Company at said date. The securities, excepting the debentures lodged with the Provincial Government, of which e have seen satisfactory evidence, have been exhibited to us ıd found in order.

STIRLING AND RANKIN,
Chartered Accountants, Auditors.

Mr. Smith, in moving the adoption of the report, spoke iefly, drawing attention to the splendid position attained by e company in its first year of operation, and quoted figures hich positively demonstrated that the Company in its first ear had written a larger amount of business, at a good deal wer expense, than other Companies recently formed, operating ıder similar conditions. When the Company commenced busiss one year ago, it only had two agents under contract and e close of the year finds it with an organization capable of oducing in the neighborhood of $200,000.00 of business month-, and in addition to writing $1,044,000.00 of insurance, we ıve increased the subscribed capital of the Company by sering subscribers for an additional quarter of a million dolrs' worth of stock. Valuable assistance has been rendered the Directors; they have given a great deal of time to the mpany's affairs, and the success attained by the Company a great measure is due to their assistance, and their enthuastic attention to the business of the Company.

Mr. W. P. Rundle, in seconding the motion, said: "It cerinly gives me great pleasure to be present on an occasion ke this. The Western Empire is the child of an idea, and that ea originated in our President's brain, so that The Western npire Life Assurance Company is his child and it is up to m to see that it is well looked after. I think it is and will well looked after. While the Company is but a year old, it s already 400 policyholders, 300 Shareholders, three Provinal Managers, and 125 agents, and in the year just ended our gents scattered between the Red River and the Pacific Coast ıve no doubt talked 'Western Empire' into the ears of thounds of Canadian citizens, approaching all classes." He rearked upon the responsibility resting on the Directors, stating: There is entrusted to the Directors of any company a mighty ıd serious responsibility; they have large amounts of money trusted to their care and keeping, the money of fathers, idows, young men and women. We have in our control, to me extent at least, the future good and welfare of these ople and their children. I do not think there is any institun in the world better able to do this than a life insurance mpany, as a life insurance company, more than any other, ust say, 'I am my brother's keeper.' We started with great pes for this Company and with a great purpose; there must no debasement of motive, we must not lower our standard thought and action. What brains have done, brains can do gain. A large business, a large bank account, a great name, e good things, but I think that a long list of loyal and satisd Shareholders and Policyholders is a greater thing. I think hen we hand over the Company to our successors, we must e that we hand it over as a vigorous and clean institution." r. Rundle read the following letter from Miles M. Dawson, e Company's Consulting Actuary, to the President:

MILES M. DAWSON,
Counsellor at Law, Consulting Actuary,
141 Broadway, New York, January 16, 1913.

ILLIAM SMITH, Esq., Managing Director,
701 Somerset Block, Winnipeg, Can.:

My Dear Mr. Smith,—I beg to congratulate your Company on the handsome volume of business procured during the st year and the moderate rate of commission at which the me has been procured.

Wishing the Company even greater achievement in 1913, I n,

Yours sincerely,
(Signed) MILES M. DAWSON,
Consulting Actuary.

"It gives me pleasure indeed to second the motion for the loption of the report."

Mr. Hilton spoke in favor of the motion, expressing the inion that in consideration of the volume of business transacted, the disbursements were very low, and that he considered the expenses moderate and reasonable.

Dr. Fraser, in supporting the motion for the adoption of the report, said: "The year has been a satisfactory one, the cost of the business has been moderate and in regard to the quality of the business from a medical point of view, I consider that it is of exceptionally high quality. The care exercised by the agents in selection of risks is well shown by the fact that out of $1,044,000.00 of business applied for, we were able to issue $1,008,500.00. As a Shareholder I am well satisfied with the financial statement, and I approve very heartily in the adoption of the report."

Mr. H. F. Tench, Mr. S. D. Hannah, and others, spoke in favor of the adoption of the report, expressing great satisfaction at the showing made. The motion to adopt the report was unanimously carried.

The President then announced to the meeting that an offer had been received from London, England, for the balance of the capital stock of the Company (5,000 shares), at an increase in premium of $10 per share. The offer was made prior to the capital of the Company being increased, about one month since, and a deposit of $50,000.00 was offered as a guarantee of good faith, if the Directors would agree to allot the shares after the capital was increased. While the Directors recognized the importance of this offer, and the advantages that would accrue to the Company from the sale of 5,000 shares of stock, thus securing $300,000.00 in cash, they decided, in view of the meeting of the Shareholders being in sight, to let them deal with it. After a good deal of discussion it was decided to reject the offer and give the present Shareholders and other people in the West an opportunity to acquire stock that was so eagerly sought by men in London, England, who were accustomed to looking into projects of this kind and weighing the possible future profits accordingly. Upon the motion of Mr. B. R. Gypson, seconded by Mr. W. P. Rundle, it was resolved, "that the offer be refused."

On the motion of Mr. W. P. Rundle, seconded by Mr. J. H. Hilton, Messrs. Stirling and Rankin were appointed Auditors for the current year. A vote of thanks, on the motion of Mr. F. C. O'Brien, was accorded the Auditors. Mr. Stirling, replying, said: "There are three kinds of statements: those that require explanation, doubtful ones, and those that require no explanation. It is in the latter class that I place The Western Empire. I think the Shareholders have cause to heartily congratulate themselves on being connected with this company." He also remarked upon the very pleasant relations that had existed between the Company's officials and himself, stating that they had assisted him every possible way and that he had never, in all his experience, undertaken an audit that had given him such great satisfaction.

After the usual votes of thanks to the Directors, field and office staff has been passed, the meeting proceeded to elect a Board of Directors. The undermentioned were elected and at a subsequent meeting of the Directors and officers those named below were chosen:

DIRECTORS.

W. P. Rundle, Esq., Winnipeg.
A. J. Fraser, Esq., B.A., M.D., C.M., Winnipeg.
H. F. Tench, B.A., Winnipeg.
L. J. Hallgrimson, Esq., Winnipeg.
G. N. Broatch, Esq., B.A., LL.B., Moose Jaw.
S. D. Hannah, Esq., Waskada.
R. J. Sprott, Esq., B.A., Vancouver.
G. E. Graham, Esq., Vancouver.
Wm. Smith, Esq., Winnipeg.

OFFICERS.

Wm. Smith, President and Managing Director.
W. P. Rundle, Vice-President.
H. F. Tench, Vice-President.
A. J. Fraser, Medical Director.
J. H. Charnley, Secretary.
F. C. O'Brien, Treasurer.

HOME INVESTMENT AND SAVINGS ASSOCIATION

The shareholders of the Home Investment and Savings ociation of Winnipeg will not complain of the earnings that company for the past year. They were at the subantial rate of 14.55 per cent. on an average capital employ of $851,167. The shareholders also participated to a arked degree in those earnings, receiving four quarterly vidends of 2 per cent. and a bonus of 1 per cent. After ose payments there was still an amount for distribution of 56,641. Of that $50,000 was transferred to the reserve nd, a wise move, which now stands at $375,000. The balıce $6,641 was carried to the credit of profit and loss acunt.

The largest item among the assets is first mortgages on al estate, amounting to $2,275,446. The company holds unicipal debentures valued at $12,816 and real estate at 15,000. Liabilities to the public total $1,045,921, made up debentures and accrued interest $605,831; savings deosits $436,799; and sundry accounts, $3,291. Of the capital stock $864,000 is subscribed and $856,510 is paid up. The interest earned during the year was $161,459. Management expenses were comparatively light, being $25,137. That item included salaries, office expenses, directors' and auditors' fees.

The directorate feels that the earnings of the company warrant the placing of the dividend on a nine per cent. basis, and recommend to their successors in office the payment of quarterly dividends to the shareholders at that rate, i.e., nine per cent. per annum, instead of the past custom of paying an eight per cent. dividend with a bonus of one per cent. after the books are closed for the year.

◆

Edmonton's board of trade's nominating committee has selected the following officers:—President, E. H. Cooper, manager A. MacDonald Company; first vice-president, S. H. Smith, president Western Realty Company, and director of several industrial enterprises; second vice-president, A. W. Challand, manager J. J. McLaughlin, Limited; third vice-president, M. S. Booth, manager Hudson's Bay stores.

CROWN LIFE INSURANCE COMPANY

Head Office - Crown Life Building, 59 Yonge Street, Toronto

ANNUAL REPORT FOR 1912

The Directors have pleasure in presenting to the Shareholders and Policyholders their report on the operations of the Company for the year ending 31st December, 1912.

NEW BUSINESS, $4,006,020—INCREASE, $1,293,920.

The volume of new business which the Company hoped for during 1912 was $4,000,000, and, when this was accomplished before the end of December, the books were closed for the year with a total of $4,006,020 in new applications for insurance in the Company, an increase of $1,293,920, or 47%, over 1911. The aggregate amount of policies issued and revived during the year was $3,971,964, as compared with $2,599,020 in 1911, or an increase of 52%.

INSURANCE IN FORCE, $10,015,879—INCREASE, $2,332,600.

The total amount of insurance in force at the end of 1912 was $10,015,879, an increase of $2,332,600, or over 30%, as compared with the total insurance in force at the close of 1911. This increase represents over 62% of the amount issued, so that the Company in 1912 not only made splendid progress in securing a large and profitable volume of new business, but was also successful in retaining an exceptionally large proportion of the old business in force on its books. The average amount of policy has again increased and now stands at $1,817.

TOTAL REVENUE, $388,631.38.

Premiums paid in cash to the Company in 1912 amounted to $319,832.70, an increase of $68,976.84 over the preceding year, while net premiums in course of collection and deferred amount to an additional $83,020.75. Interest and rents collected in cash, and due and accrued at the end of the year, total $72,664.19.

PAYMENTS TO POLICYHOLDERS, $89,081.33.

The benefits paid to the policyholders and their beneficiaries, comprising matured endowments, annuities, surrender values and death claims paid and awaiting proof, amount to $89,081.33. In this connection it is gratifying to note that the Company finds itself in a position to pay on its first maturing Endowments the full amount of Profits originally estimated.

TOTAL ASSETS, $1,283,967.75—INCREASE, $256,909.29.

At 31st December the total assets of the Company amounted to $1,283,967.75, having been increased during the year by $256,909.29, or 25%. The assets included $428,046.96 invested in first mortgages on improved farm and central city property, each loan being well within 50% of a most conservative valuation and earning a good rate of interest; $205,578.63 invested in city, town and school district debentures and bonds; $170,170.80 in loans on the Company's policies; $210,567.70 in real estate, the Company during the year having purchased and improved the property at the south-east corner of Yonge and Colborne streets, in the City of Toronto. The space therein not occupied by the Company for Head Office purposes has been leased to desirable tenants and will realize profitable returns on the investment.

RESERVES FOR POLICYHOLDERS, $1,015,051—INCREASE, $173,430.

The Company's total policy and annuity reserves now amount to $1,015,051, an increase for the year of $173,430. The net insurance reserve fund is $964,984, while the policyholders' security over and above this amounts to $702,705.34, making the total security to policyholders $1,667,689.34.

SURPLUS INCREASED TO $204,337.54.

A most gratifying feature of the year's operations is a very considerable decrease in the expense percentage of the Company. After making full provision for all liabilities on policyholders' account, providing special reserves, etc., the Company's surplus at the end of the year was increased to $204,337.54. The dividend to shareholders was increased during the year to 7% per annum upon the paid-up capital stock of the Company.

GROWTH OF THE CROWN LIFE.

DIRECTORS AND OFFICERS.

G. T. SOMERS, Esq., President.
J. GOWANS KENT, Esq., First Vice-President.
H. M. MOWAT, K.C., Second Vice-President.
H. S. STRATHY, Esq., Chairman of Executive Committee.
E. B. RYCKMAN, K.C. J. B. TUDHOPE, Esq. W. D. LUMMIS, Esq. R. L. McCORMACK, Esq.
F. R. McD. RUSSELL, Esq. WM. GEORGESON, Esq. JOS. CLARK, Esq.
WILLIAM WALLACE, General Manager.
A. H. SELWYN MARKS, Secretary.
H. R. STEPHENSON, A.I.A., A.A.S., Actuary.
DR. H. T. MACHELL, L.R.C.P., Edin., Medical Director.

Motions and petitions in behalf of the former stockholders of La Banque Internationale have been presented to the courts at Montreal. The petitions have for their object the quashing of the recent seizure before judgment, taken out by Sir Rodolphe Forget against the French stockholders, in order to tie up certain funds at present in the hands of Mr. J. E. Martin, K.C., Canadian representative of these ex-shareholders. The motions all call for particulars, and would have Sir Rodolphe Forget forced to furnish proof of certain allegations made by him in support of his petition for a seizure before judgment.

The number of directors of the Atlantic Sugar Refineries, Limited, has been increased from nine to eleven.

The executive body of Moose Jaw's board of trade for the year will consist of Mr. H. Davidson Pickett, president; Mr. Lewis Rice, vice-president; members of the council, Messrs. R. Bogue, R. Loney, J. H. Wellington, H. C. Speller, John Crawford, H. A. Davidson, W. F. Baker, C. E. Austen, E. J. Chegwin, J. H. Grayson, B. C. Crichton, J. Erratt, J. H. Rankin, G. H. Tyndall, R. H. Clark, Dr. T. Douglas, I. L. Woodley, T. J. McCammon, J. A. Caulder, and J. T. Cashman.

There has recently been organized in the Province of Alberta the

COMMONWEALTH TRUST COMPANY, Ltd.

With an authorized capital of

$2,000,000.00

Head Office in Calgary

PROVISIONAL OFFICERS:

President:

HONORABLE CHARLES W. FISHER, Cochrane, Alta., Capitalist, Speaker in the Legislative Assembly of Alberta

Vice-Presidents:

MAJOR DUNCAN STUART, Calgary, Alta., Barrister-at-Law, Director Alberta Interurban Railway Company

J. R. SUTHERLAND, Esq., Calgary, Alta., Gentleman, Late Dominion Land Agent

GEORGE F. TULL, Esq., Calgary, Alta., Managing Director of Niblock & Tull, Limited

Managing Director:

D. J. YOUNG, Esq., Calgary, Alta., President of Young & Kennedy, Limited

Secretary and Treasurer:

E. W. McMULLEN, Esq., Calgary, Alta., Manager Merchants Bank of Canada, Calgary

Directors:

LT.-COLONEL JAMES WALKER, Calgary, Alta., Capitalist, Chairman South East Land Corporation, Limited

HAROLD W. RILEY, Esq., M.L.A., Calgary, Alta., President Riley's Limited

H. A. MacLEAN, Esq., Calgary, Alta., President of Alliance Investment Company (Canada), Ltd.

LOUIS M. ROBERTS, Esq., M.L.A., High River, Alta., Broker, of Roberts & Hunt

LT.-COLONEL G. E. SANDERS, Calgary, Alta., Distinguished Service Order, Police Magistrate of the City of Calgary

GEORGE PIRIE, Esq., M.D., Calgary, Alberta

Bankers:

THE MERCHANTS BANK OF CANADA

Solicitors:

Messrs. DUNCAN STUART & COMPANY, Bank of British North America Building, Calgary, Alta.

Auditors:

Messrs. EDWARDS, MORGAN & COMPANY, of Calgary, Toronto, Winnipeg and Vancouver

The Directors believe that the Stock of this Company is a good investment. The Capital of $2 000,000 is divided into 2,000 shares, par value $100 each, which is being sold at a premium of $15, making the selling price $115 per share.

The terms of subscription are $40 per share, which shall include the $15 premium, upon application and allotment, the balance subject to call of not more than $10 per share in any one year. Purchaser has the option of paying in full at any time.

The Company, in addition to the usual powers of a Trust Company, can buy and sell agreements of sale, which at this time is a very profitable business. The main objects of the Company are loaning money on mortgages on improved farm and city property, and to act as Trustees and Executors.

Prospectus and application forms will be mailed on application to

D. J. YOUNG, Managing Director,
410 Maclean Block, CALGARY.

ANNUAL REPORT

ritish Northwestern Fire Insurance Company

Iead Office - WINNIPEG

A representative gathering of the Shareholders of The itish Northwestern Fire Insurance Company assembled at the nnual Meeting of the Company held on Wednesday, the 29th nuary, at 4 p.m., to receive and consider the Directors' Rert and Financial Statement for the year ending 31st Decemr, 1912.

The Directors' Report, which was received with much satfaction, and favorably commented upon, was as follows:

The Directors have pleasure in submitting to the Shareolders the following report upon the business of the Company r the year ending 31st of December, 1912, accompanied by the alance Sheet, duly audited and certified.

During the year the work of thoroughly establishing the mpany in the four Western Provinces has been carried on, d with most satisfactory results, our agency staff now numering 374.

The premium income, which in 1911 was $18,086.57, was, 1912, advanced to $49,017.50.

We have now actually in force and on the books of the mpany 2,561 policies, representing current contracts of $3,8,158.00, an increase in the business in force of $2,060,758.00.

The risks have been carefully selected, are widely distrited, the average of preferred business is being maintained, d the net amount at risk under any one policy does not exceed e sum of $920.00.

The gross assets of the Company have increased from 82,619.96 to $554,970.85; the Subscribed Capital from 61,000.00 to $500,000.00; Paid-up Capital from $101,625.00 to 50,000.00.

Over $10,000.00 has been carried to the credit of Re-insurce Reserve Account for protection of Policyholders (reprenting unearned premiums, government basis, on business in rce).

Provision has been made for unadjusted losses, depreciaon in office furniture and fixtures written off, and the balance the year's operations to credit to Surplus Account is $19,49.94. Out of this surplus a dividend at the rate of six per nt. per annum on the paid-up Capital has been declared and aid to the Shareholders.

During the year we were favored with the opportunity of lding to the Board of Directors Mr. Thomas L. Wood, of rantford, Ontario, and Mr. Joseph Stauffer, of Galt, Ontario, nd the Shareholders will be pleased to know these gentlemen ave been added to the Directorate.

In accordance with the Act of Incorporation, the Directors etire and are eligible for re-election.

EDWARD BROWN, President.

INANCIAL STATEMENT AS ON 31st DECEMBER, 1912.

We have audited the Books of Account of the British Northwestern Fire Insurance Company for the year 1912, verifying the cash receipts and payments with the bank account, and the bank and cash balances on hand 31st December, and we certify the above to be a true statement of the affairs of the Company.

CLARKSON, CROSS & MENZIES, Auditors.

Winnipeg, 27th January, 1913.

Motion to adopt the Report was moved by the President, Mr. Edward Brown, who said: "In moving the adoption of the Directors' Report, allow me to say that I have great pleasure in again meeting the Shareholders of the Company.

"During the past year your Company has participated in the general prosperity of our country. The growth has not been phenomenal or spectacular—rather it has been normal and steady, in pursuance of the policy adopted by us at the inception of the Company's business. If this policy is strictly adhered to I look forward with the greatest confidence to the time in the near future when the policies of the Company will be regarded as being just as safe as Government bonds, and then we will not only have provided safe insurance for our customers, but will have added another to the already large number of successful Canadian organizations which lend strength and stability to our national credit.

"The volume of business secured in the year 1912 has increased three-fold over that of the previous year, while the total claims paid amount to only 14 per cent. of the net premium income, a very satisfactory showing indeed.

"Great credit is due to the management, and I again wish to compliment the Managing Director, Mr. Foster, on the good judgment which he has shown, not only in the general conduct of the business, but in the selection of agents. In his work he has been ably assisted by Mr. Kellam and the other members of the staff, who have shown entire devotion to the Company's interests.

"I further wish, on behalf of the Directors, to express appreciation of the services rendered the Company by its 374 agents. We wish these gentlemen to feel that they have a very important place in the organization of the Company, and share in the success which attends our joint efforts.

"As the subscribed capital of the Company has now reached the half million mark, I do not think it is necessary that this amount should be increased for the present."

Sir William Whyte, K.B., said that he rose with pleasure to second the motion for the adoption of the Annual Report, because if the standard of success of every business is to be measured by the volume of business done and satisfactory net results, then he was sure the Shareholders would agree with him that the operations of the British Northwestern Fire Insurance Company for the year 1912 fully measures up to that standard.

As proof of his statement, he referred to the copy of the Annual Report and Balance Sheet. The insurance in force increased during 1912 by over $2,000,000.00, and the premium income by $31,000.00.

He had every reason to believe that the success of the British Northwestern Fire Insurance Company will continue in the same marked degree in the future that it has in the past, because so long as there was a conservative, prudent and capable management, with a large and ever growing field, the opportunity is there.

He had much pleasure, therefore, in seconding the motion for the adoption of the report.

Mr. P. C. McIntyre referred to the pleasure he had in attending and reading the reports of the Annual Meetings of our local financial institutions.

Their steady growth spoke well for the sound basic principles upon which they were founded, and the ability of the men directing their policy. The success achieved and the position occupied throughout the Dominion by many of our local Loan and Trust Companies, Banks and Life and Fire Insurance Companies, makes one realize the important financial centre that Winnipeg is beginning to occupy. The report of the British Northwestern Fire Insurance Company before the meeting was a most satisfactory one, and with a continuance of the care and attention that the business of the Company was receiving, as evidenced by the results of the past year, he felt the success of the Company was assured and that one more institution was being added to the list of Winnipeg's successful Companies.

His Hon. Lieut.-Gov. Cameron expressed his pleasure in reading the satisfactory report, and had no doubt of the continued success of the Company.

The retiring Directors were unanimously re-elected the Directors for the current year:—Edward Brown, Sir William Whyte, K.B., Hon. D. C. Cameron, C. W. N. Kennedy, P. C. McIntyre, D. E. Williams, A. C. Flumerfelt, O. A. Robertson, James Balfour, E. P. Davis, K.C., T. J. S. Skinner, Thomas L. Wood, Joseph Stauffer and F. K. Foster.

At a subsequent meeting of the Board of Directors, Edward Brown was elected President; Sir William Whyte, K.B., and Hon. D. C. Cameron, Vice-Presidents, and F. K. Foster, Managing Director.

The Home Investment and Savings Association.

Head Office - WINNIPEG, Man.

ANNUAL REPORT

The Twentieth Annual General Meeting of the Shareholders of the Home Investment and Savings Association was held at the Head Office of the Association, Farmer Building, 333 Main street, Winnipeg, on Monday, 3rd February, at 8 o'clock p.m.

In the absence of Mr. Bull, the President, Mr. P. C. McIntyre, the Vice-President, on motion, acted as Chairman, and the Manager, Mr. W. A. Windatt, as Secretary of the meeting.

The following report was submitted to the Shareholders by the Directors:—

Your Directors have much pleasure in presenting the Balance Sheet and Statement of Profit and Loss for the year ending December 31st, 1912, being the twentieth in the history of the Association.

We are pleased to be able to say that the business of the Association is in a very satisfactory condition.

The earnings for the year are at the rate of 14.55 per cent. on an average Capital employed of $851,167.00. Out of the earnings four quarterly dividends of two per cent. and a bonus dividend of one per cent. have been declared. After the payment of these dividends there is still an amount of $56,641.05 of Undivided Profits to be disposed of. From this amount your Directors have transferred $50,000.00 to Reserve Fund, which now stands at $375,000.00, and the balance, viz., $6,641.05, has been carried forward to the Credit of Profit and Loss Account.

Your Board feels that the earnings of the Association warrant the placing of the Dividend on a nine per cent. basis, and would recommend to their successors in office the payment of quarterly dividends to the Shareholders at that rate, i.e., nine per cent. per annum, instead of the past custom of paying an eight per cent. dividend with a bonus of one per cent. after the books are closed for the year.

The business of the Association has been well maintained throughout the year as is evidenced by the figures the Directors are privileged to lay before you.

M. BULL, President.

The following Directors were re-elected for the current year: M. Bull, P. C. McIntyre, W. A. Black, F. H. Schofield, A. Black, F. W. Drewry, H. Byrnes, and R. J. Campbell.

At a subsequent meeting of the New Board, Mr. Bull was re-elected President and Mr. McIntyre, Vice-President.

BRITISH NORTHWESTERN FIRE INSURANCE COMPANY

With a progressive management, an active directorate, and 374 agents, the British Northwestern Fire Insurance Company increased its volume of insurance in force during 1912 by over $2,000,000 and the premium income by $31,000. That income in 1911 was $18,086 and last year advanced to $49,017. There are 2,561 policies on the company's books representing current contracts of $2,398,158. It is obviously important to select fire risks carefully. The directors of this company in their report state that that has been done, that the risks are widely distributed and the average of preferred business maintained. The net amount of risk under any one policy does not exceed $920.

Last year about $10,000 was carried to the credit of re-insurance reserve account for protection of policyholders. Provision was made for unadjusted losses, etc., and the balance on the year's operation, $19,749, was placed to the credit of surplus account. Out of the surplus a dividend at the rate of 6 per cent. per annum on the paid up capital was disbursed to the shareholders. The subscribed capital totals $500,000, of which $150,000 is paid up. The company has authorized capital of $2,000,000.

The gross assets have increased from $482,619 to $554,970. They include first mortgages on real estate and loan companies debentures amounting to $152,683. Capital in course of collection amounts to $350,000.

Sir William Whyte, one of the vice-presidents of the company, told the shareholders that he had every reason to believe that the success of the British Northwestern Fire Insurance Company will continue in the same marked degree in the future that it has in the past because so long as there was a conservative, prudent and capable management, with a large and ever-growing field, the opportunity is there.

THE CANADA LIFE ASSURANCE COMPANY

IN 1912 ENJOYED

A Record Year for Growth in Strength and Size

FINANCIAL STATEMENT

From the 66th Annual Report as at 1st of January, 1913

ASSETS	
Government, Municipal and other Bonds, Stocks and Debentures	$19,060,604.52
Mortgages on Real Estate	16,856,726.27
Loans on Policies	6,975,018.69
Real Estate Owned — (including the Company's Buildings in Toronto, Montreal, Hamilton, Ottawa, St. John, Winnipeg, Regina, Edmonton, Calgary, Vancouver and London, England)	3,028,899.73
Loans on Bonds, Stocks, Etc	152,505.77
Premiums in Transit and Deferred (Net)	739,669.73
Interest and Rents Accrued	996,552.36
Other Assets	310,164.00
Cash on Hand and in Banks	181,382.42
	$48,301,523.49

LIABILITIES	
Reserve Fund (Hm. 3½% and 3%)	$41,549,930.00
Death Claims in course of Settlement	309,700.40
Instalment Claims Fund	180,346.50
Dividends to Policyholders in course of Payment	25,751.75
Reserve for Policies which may be Revived	114,628.00
Other Liabilities	147,471.59
Total Surplus on Policyholders' Account (Hm. 3½% and 3%)	5,973,695.25
	$48,301,523.49

RECEIPTS	
Premium Income (net)	$5,153,994.79
Interest, etc	2,242,764.95
	$7,396,759.74

The CONTINUED INCREASE IN SURPLUS EARNED by the CANADA LIFE in 1912 is due to these three factors:

- A SUBSTANTIAL GAIN IN INTEREST EARNINGS.
- A SATISFACTORY MORTALITY RATE.
- A LOW EXPENSE RATIO.

PAYMENTS	
Death Claims (including $119,337.50 for Bonus Additions)	$1,618,269.76
Matured Endowments (including $39,930.15 Bonus Additions)	380,026.15
Dividends paid Policyholders (exclusive of Bonus Additions)	115,365.72
Surrender Values of Policies	262,861.50
Paid Annuitants	86,441.67
Total paid to Policyholders	$2,462,964.80
Commission, Salaries, etc	$ 763,868.41
Taxes, Gov't Fees, Stock Div'd, etc	399,021.21
Excess of Receipts over Payments	3,770,905.32
	$7,396,759.74

A FEW OUTSTANDING FACTS

THE SURPLUS EARNED in 1912 was $1,530,667, the greatest in the Company's history.

THE INCOME amounted to $7,396,760, a material increase over that of any previous year.

THE ASSETS were increased by $4,044,182, the greatest growth in any year. TOTAL ASSETS $48,301,523.

THE NEW PAID-FOR POLICIES amounted to $15,512,339, exceeding the best previous year in the Company's history by over $3,000,000. TOTAL ASSURANCES IN FORCE are for $144,877,970.

THE INTEREST RATE was again improved and the Interest Income of $2,242,765 was greater than that of previous years.

A copy of the complete Financial Statement and Report of Directors, together with the proceedings at the Annual Meeting, held February 6, 1913, will be mailed on request.

E. W. COX, General Manager.

The Standard Trusts Company

Makes a Good Showing

HEAD OFFICE - - WINNIPEG

ANNUAL REPORT OF THE DIRECTORS

There was presented on Thursday, the 30th day of January, 1913, at 3 p.m., to the Shareholders of this Company, at the Tenth Annual Meeting, held at the offices of the Company, in the Standard Trusts Company's Building, 346 Main street, Winnipeg, the annual report of the Directors.

The following Shareholders were present:—Sir William Whyte, K.B., Messrs. J. T. Gordon, Wm. Harvey, P. C. McIntyre, C. H. Mansur, Wm. Cross, G. F. Stephens, W. A. Matheson, Dr. Popham, W. E. Lugsdin, Dr. Blanchard, Thos. Atchison, Geo. Anderson, H. Sandison, H. Mullins, John Stovel, A. H. Pulford, Thos. Bruce, Dr. J. R. Jones, and F. H. Schofield.

On motion, the President, Mr. J. T. Gordon, was called to the chair; the Secretary of the Company, Mr. W. E. Lugsdin, was requested to act as Secretary of the meeting, while Messrs. Bruce and Stovel were appointed Scrutineers.

Mr. Wm. Harvey, the Managing Director, read the notice calling the meeting, then the Directors' report and financial statement, and thereafter spoke as follows:—

Mr. Chairman and Gentlemen:

The statement and report which I have just read to you represent, as you can readily understand, the busiest year yet in the Company's comparatively short career. Practically each year of its history has witnessed giant strides forward, and I can promise you through our Chairman, our worthy President, as well as through our Vice-President, Sir William Whyte, some very convincing facts and figures this afternoon all bearing directly and indirectly upon The Standard Trusts Company's prosperity.

In previous years I have adverted to the reason why the average Trust Company conducted on the lines of a sane and sound policy can earn relatively higher earnings on its capital than the straight lending institution. The latter's source of profit is circumscribed between its borrowing and its lending rates. The difference, less cost of carrying on its business and providing for bad and doubtful debts, is its profit, without any other source of revenue. For the information of our Stockholders present, as well as those absent, I would explain that to earn the 21 per cent. which we show as our net return on capital we have at least three sources of revenue. First, the fees arising out of administration of estates, which is our primary function. Second, interest on our mortgage investments, some of which are of a guaranteed character, where the Company receives the difference between the rate we guarantee (necessarily lower than the unguaranteed investment) and the rate the mortgage itself bears; and those investments—usually the larger proportion—where we earn a yearly commission on the amount invested and the client takes the mortgage at its face and without involving the Company's guarantee; and third, commissions earned in our real estate department in buying and selling properties for clients, collecting rents and interest on their behalf, as Attorney and Agent; fees obtained in acting as Trustee for Debenture holders, Transfer Agent, Registrar of Stocks, Trustee for Mortgage Corporations and other credits received on miscellaneous business too numerous to mention, and yet which come strictly within the scope of a fiduciary Agent, such as the Standard Trusts Company is.

When we incorporated ten years ago we purposely struck out of our proposed charter the power which the Legislature was ready and willing to give us, authorizing us to receive deposits and conduct a semi-banking business, but your provisional Directors felt with me that to assume such a grave responsibility was tantamount to courting trouble when the first evidence of financial stress or panic appeared in the banking world. We are not bankers, although Trust Companies are so regarded in the United States, and do not want to be regarded as such, but we are first, last and always what we originally set out to be, a healthy, strong, legitimate Trust Company in the broadest sense of the term, inviting the public's fullest sympathy and support and extending in return an equally sympathetic helpfulness in the honorable discharge of a particularly high and sacred calling—Trustee for the living as well as for the dead.

I have thought it well to offer this explanation to you, as often the question is put to me, "How does your Company manage to put forth such satisfactory statements?"

Before our Chairman addresses you and puts his motion for the adoption of the Report, I shall be glad to answer in detail any question that may be asked regarding the Financial Statement, or the Company's affairs.

REPORT OF THE DIRECTORS.

Winnipeg, January 23rd, 1913.

To the Shareholders:

Your Directors beg to present their report for the year ended 31st December, 1912. While nominally it is their tenth Report, it, in reality, represents the result of business covering nine years and a fractional part of a year.

The Balance at credit of Profit and Loss Account on 31st December, 1911, was	$ 3,618 71
The Net Profits for the year, after making all proper deductions, amounted to	104,982 42
	$108,601 13
This sum has been appropriated as follows:	
Dividend No. 16 at eight per cent. per annum	$20,000 00
Dividend No. 17 at nine per cent. per annum	22,500 00
Transferred to Reserve Fund	62,500 00
Balance carried forward	3,601 13
	$108,601 13

RESERVE.

Balance on 31st December, 1911	$200,000 00
Added as above	62,500 00
	$262,500 00

From the above it will be seen that the Company has fully sustained the hope entertained by some of the Shareholders that a dividend in keeping with the profits earned and the Reserve created would be declared. It was felt by some that when the Reserve reached fifty per cent. of the paid-up capital of the Company, earning as it has been, twenty-one per cent. on its capital, would go on a ten per cent. dividend basis, but your Directors, actuated as they have always been by careful, conservative management, deemed it prudent that twelve per cent. (or 60 per cent. of earnings) be carried to reserve. They have considered it good policy, too, at this stage of its career, to increase its capital stock by fifty per cent., or in the proportion of one share for every two shares held, and that at a premium of twenty-five per cent. As authority was given to your Executive Committee at the annual meeting of the Shareholders in 1905 to increase the capital stock to $1,000,000.00, of which total ten thousand shares of $50 each have been issued and paid for, it will not be necessary to take power from you as Shareholders to issue the additional five thousand shares. Your Directors, however, desire to have you endorse a course which is eminently, in the Company's interest, advisable to follow. The Company's earning power is capable of paying and maintaining, even under adverse circumstances, a nine per cent. dividend, and placing to reserve a substantial sum each year, notwithstanding the proposed increase of capital, and your Directors heartily endorse this move. Assuming that the course appeals to you, the following figures will show the standing of the Capital Account and Reserve, immediately after the proposed subscription has taken place:

Capital Stock, 15,000 shares of $50.00 each		$750,000 00
Reserve, as above	$262,500 00	
Premium of 25 per cent. on New Stock	62,500 00	
Total Reserve		$325,000 00

Your Directors beg to report the occupancy by the Company of its own premises, formerly occupied by the Bank of Montreal, and which, with some alterations, have been admirably adapted to the requirements of our Head Office.

The Company's building at Saskatoon, a six-storey structure, chaste in design and substantial in construction, is all but completed, and on the ground floor of which the Saskatoon branch will be comfortably located. The rest of the building will be rented on a basis to yield the Company a handsome return on its expenditure.

It is but right to add, for your information, that our Winnipeg and Saskatoon buildings have been taken in at actual cost only, notwithstanding that in the former the Company could have realized on a bona fide offer a net profit of $50,000.00 on its original purchase. The site on which the Saskato building has been erected (and which, by profits realized from le of old site, practically cost us nothing) is worth to-day not ss than another $50,000. Neither of those sums appear in our tatement by way of write-up, your Directors preferring to nore the profit.

Your Directors take pleasure in testifying to the loyalty f the staff of the head office and branches, to the painstaking re manifested by your Auditors, and to the general welleing of the Company.

J. T. GORDON, President.

WM. HARVEY, Managing Director.

AUDITOR'S CERTIFICATE.

Winnipeg, 22nd January, 1913.

I beg to report to the Shareholders of The Standard Trusts ompany that I have audited the books and accounts of the ompany at Winnipeg and Saskatoon for the year ending Deember 31, 1912, and hereby certify that the above balance heet is in my opinion properly drawn so as to exhibit a true nd correct view of the Company's affairs as shown by the ooks of the Company. All Loan Balances have been checked ith the Mortgage Ledgers and the Mortgages securing such oans have, as in previous years, been duly inspected, while the ash and Bank Balances have been verified by Certificates.

JOHN SCOTT, C.A.

The President, in moving the adoption of the report, said:—

'Gentlemen:—

This is our first Annual Meeting in the new offices of The tandard Trusts Company. I am pleased to see so many of our hareholders here to-day. I want, on behalf of our Managing irector and the other Directors, to welcome you to our new ome, and I desire to say that if any of you have not already inspected the offices, we shall be very pleased to have you do so when this meeting adjourns. We are very proud of the new premises. The equipment is complete, and I think that probably there are few Trust Companies here more comfortable and more centrally located than The Standard Trusts Company at the present time.

Now, gentlemen, to-day I shall deal more particularly with the Directors' Report to the Shareholders. I am going to leave the financial side of the question, to a very great extent, to our Vice-President, Sir William Whyte, who is Chairman of our Executive Committee, and probably more familiar with the financial side of the Company than any other member of the Directorate outside of the Managing Director himself.

In the first place, I wish to make some reference to the Winnipeg Office, as well as to the Saskatoon and Edmonton Offices. Some two years ago your Managing Director strongly recommended to the Board of Directors the purchase of our present Winnipeg site. After looking into the matter carefully, we decided that the recommendation was a good one, and we purchased the property, but we did not occupy it until October of the past year, owing to the Bank of Montreal requiring the premises up till about that time. I am satisfied that the Shareholders will bear me out in what I say that the investment is a splendid one. The property as it stands to-day, including our improvements, cost us $145,000. We have fully rented the two upper floors profitably, and therefore we are able to occupy the ground floor space at a very reasonable rental indeed. You will note that the building and site were taken in at actual cost. If the Shareholders wished to-day to dispose of the property, they would have no difficulty at all in selling it at, at least, one-third over that cost. Consequently I am sure the Shareholders will bear me out when I say that the investment is one in the interests of The Standard Trusts Company.

During the past year we let the contract for our new building in Saskatoon, in the Province of Saskatchewan. I presume the Shareholders are aware that we are the Official Administrators for the three Judicial Districts tributary to Saskatoon. The building, when completed, will cost in the neighborhood of $90,000. It is a most magnificent structure, and one, I am sure, that any of the Shareholders will be proud of when they visit Saskatoon. The first storey is of stone, after that it is of brick, with stone facing on the sixth or top storey. The building is fireproof and modern in every respect. We went thoroughly into the cost of the building and the revenue that would be derived from it. We estimated the rental value at 50c a square foot less than what we were told we would be able to get for it, and it will net us about 7 per cent. upon the money invested, and give us the ground floor free for The Standard Trusts Company. I am sure, gentlemen, that you will approve of the Company's action in that respect.

I want to say further, gentlemen, that we are particularly fortunate in the selection of our Manager at Saskatoon. Our business has grown wonderfully. We have got a capable, energetic young man, who has the confidence of the people there. Saskatoon has grown wonderfully since we opened up that branch. I predict a splendid future for the Saskatoon office under the able management of Mr. T. F. Calder, our Manager there.

In the past year we have appointed a Manager at Edmonton, in the Province of Alberta, and I want to say to the Shareholders to-day that our Managing Director and the Board of Directors have been very much pleased indeed with our appointment in the person of Mr. H. R. Holland. He is a young man of splendid ability, or as you business men would say, he is, like our Saskatoon Manager, a good "mixer." It is not an unusual thing for a Trust Company to call upon its capital to pay expenses for the first year, of a new Branch Office, but I am pleased to say that Mr. Holland has in the past year so satisfactorily transacted the affairs of The Standard Trusts Company at Edmonton, that he had a little on the right side after paying all legitimate expenses. So you will see, gentlemen, that as far as Edmonton is concerned, we have a splendid future there also. The success of the Company depends a good deal upon the management. We are very fortunate in the selection of our management, and as a result The Standard Trusts Company has no difficulty whatever in forging ahead. So far, therefore, as the business from our Branch Offices is concerned, the Stockholders may well feel satisfied it is in good hands, and I predict that for the year 1913 those two Branch Offices will do even better than they have done in the year just closed.

Now, probably it is quite in order that I should refer briefly to the conditions under which we have been carrying on our operations during the past year. The Shareholders will all agree with me that in no year in the history of this Dominion of ours, have we been more prosperous than in 1912. We have had prosperity from the Atlantic to the Pacific, and with the expansion and development that are taking place, the majority of us find it difficult to procure sufficient funds to carry on our individual business. The development is greater than the money at our command. Western Canada has prospered wonderfully, and in the three prairie provinces in which we are operating, there does not seem to be a cloud on the horizon for the year we have just entered into. That being the case, the Shareholders of this Company will expect us to bring in another splendid report at the end of 1913. I am satisfied that you will endorse the statement we have laid before you to-day as being a credit to any company, and a credit to our Managing Director and those who have tried to look after your interests in the year just passed.

We have carried to reserve this year 60 per cent. of the net profits for the year. Our surplus to-day is $262,500.

I think, gentlemen, we have taken pretty good care of our Shareholders in the years that have passed. We paid you 9 per cent. last year, and we carried $62,500 to rest. We have paid 8 per cent.; we have paid you 7 per cent. and we have paid you 6 per cent. at various periods. The dividend rate has been growing gradually since the inception of the Company. The growth of The Standard Trusts Company has been a healthy growth from the beginning up to the present time, and I do not see any reason why it should not continue.

We have earned on the money that you have entrusted us with, in the past year, 21 per cent. This seems to me to be a splendid return for the Shareholders, and I do not know of anything else, gentlemen, that you could put your money into that is as safe or that you could get better return on. The Managing Director and the Directors of The Standard Trusts Company have tried to take the best of care of the funds you have entrusted them with, and I do not think I am saying too much when I say that they have, in every respect, succeeded.

Now, gentlemen, I wish to deal with that portion of the Report of the Directors to the Shareholders that refers to the issue of new stock. You will notice there, that in 1905 at a meeting held in this city, you authorized the Directors to increase the Capital Stock of the Company from $500,000 to $1,000,000, and it was expected by some of you that when the surplus reached 50 per cent. of the paid-up capital sum, the Company would probably go on a 10 per cent. dividend basis. There has been some reference in the past as to the amount of capital, paid up, of The Standard Trusts Company, not by people who are in the Company, or people who are in the Province, but by outsiders. I presume the Shareholders are aware that we get a large amount of money for investment from the Old Land, and other parts of Europe and even Australia, and we felt that it was in the interests of the Standard Trusts Company that, when we were in a position to do so, we should ask the Shareholders to subscribe $250,000 more, which would bring up our paid-up capital to $750,000. Now this seems to me to be a reasonable suggestion, and, if acted upon, a wise action, because we are in that position to-day that we can just as well have $750,000 paid up as $500,000, and it makes us stronger in the eyes of the outside world. We can, without effort, increase our capital to $750,000, still pay you 9 per cent. thereon, and increase our reserve considerably in the year which we have now entered upon.

I want to say further, that the Board of Directors and the Managing Director felt that the men who put their money into The Standard Trusts Company in the beginning are the men who should have consideration shown them when there is a division of the new stock. When the proposal was first mooted the question was asked by one of the Directors, "How are you going to have this call paid?" As you know, for some people —and, in fact, for nearly all of us—money is not so easy to get to-day as it has been at other times. We decided that the Shareholders should have, at least, four months to buy in their shares in the proportion of one share for every two shares already held. I think the Shareholders will agree with me that this course is a reasonable and a fair one, and I fail to see where there could be any criticism on that score, and you will also agree with me that for every two shares that the Shareholders now hold, the allotment of one share of new stock is quite reasonable. We have gone further. If we had put our stock on the market, what would have been the result? We would have got at least $175, ex rights for two shares of $50 each, but we are giving it to the original Shareholders for $125. The stock was quoted on the Exchange a few days ago at 200, and it is almost impossible to get a share. I think that the shares of The Standard Trusts Company, knowing as I do how conservative the annual statements are, are too cheap at 200. I would not let any share of mine be sold even at that figure.

You as Shareholders gave us this power to increase capital, and we come to you to-day to ask you to endorse our action. We believe we have done it in your best interests, and if you will scrutinize the statement in the Report of the Directors to you, you will find that, when the subscription of $250,000 is paid in, plus the premium on it, we will have $312,500 of new money for further development.

I have made the statement before on previous occasions (and I think I had better be a little bit more severe still on our Managing Director) that the following year would show up even better than the one just ended. Every year he has said I was too optimistic altogether. I want to say to you to-day, gentlemen, that with this extra $312,500, it will just take $50,000 more when this capital is paid in, to have 50 per cent. of the paid-up capital in reserve. I am not going to say that we will pay 9 per cent. on the additional $250,000, and carry $50,000 to rest, but I know it will be pretty close on it.

Now, gentlemen, I do not know that I have very much more to say to-day. The business of the Standard Trusts Company has been harmoniously conducted in the past year. The Board of Directors and the Managing Director have all had the usual crop of business problems to solve, but all have been loyal and faithful on all occasions in the discharge of their duties. I want to say on behalf of the Managing Director, as I have often before said, that The Standard Trusts Company has been particularly fortunate in having Mr. Harvey as its Manager. There has been a continual growth right along. Our Secretary-Treasurer, Mr. Lugsdin, and the other members of the staff, have only one object in view, and that is, the best interests of The Standard Trusts Company. Mr. Harvey has loyalty, not only in the Head Office, but in the Branches, and loyalty means strength. The surroundings here are most satisfactory. Our offices are well lighted, well ventilated and well located, while the vault accommodation is ample for some years to come. Consequently I do not see any reason why the Shareholders of The Standard Trusts Company cannot look forward to the year 1913 with confidence and hope and expect splendid results at our next Annual Meeting.

I would like to add further, gentlemen (and I always take pleasure in referring to it) that another year has passed and the Board of Directors and the staff are without vacancy by death. These are things that I am sure every one of us feels grateful for. I know I am, myself.

The Vice-President, Sir William Whyte, will now deal more particularly with the financial side, and in conclusion I want to thank you, gentlemen, for your attention. I have great pleasure in moving the adoption of the report."

The Vice-President, Sir William Whyte, in seconding the motion for the adoption of the Report, said:—

"Mr. Chairman and Gentlemen:

The President has, in his address, dealt fully, clearly and capably with the Annual Report, and it is a great pleasure to me to be allowed to say something regarding the financial statement. I have had some facts and figures put together that may be of interest to you, and, with your permission, I will give you the benefit of them.

The Company has always managed to keep its funds profitably employed and last year was no exception to the rule, despite the fact that a considerable amount of capital was locked up in connection with the purchase of the Winnipeg Office premises and the erection of our building at Saskatoon. The interest earnings for the year were exceptionally good, 21 per cent. The investment feature of the business was even more active than usual during the year 1912. During the twelve months we loaned $1,662,275.00 and we received for investment from various sources $1,200,000.00. As a result of the large amount of new loans made, the Executive Committee have been kept busy passing upon them, but the usual care has been exercised and only business of the highest class has been accepted either for capital funds or for trust funds. The percentage loaned to the value of security rarely exceeds 35 per cent. The statement gives figures showing the volume of the investment end of our business, the total amount of our investments being now $5,500,000. A further indication of the extent to which our investment business has grown may be gleaned from the fact that the collections during the last twelve months total $1,050,000.00, of which $289,500.00 represents interest and $760,500.00 principal repayments.

While the year has been a very active one on the investment side of the business, the estate side has been no less active. Since the inception of the Company, less than ten years ago, we have taken in for administration over six hundred estates varying each in value from a few hundred dollars to over a million dollars. The value of the estates still in hand, in course of administration, is nearly $4,000,000. Of course during the earlier years of the Company's history only a small proportion of these estates were taken in. The older and larger the Company grows, the greater are the number and volume of estates turned over to us for administration. The large experience which our officers have gained from handling such a large amount of estate business is a very valuable asset and should be a strong incentive for the appointment of the Company as the executor of wills. It is interesting to note the net earnings of the Company for each year since its inception and the growth of the reserve fund during that period. The following are the figures:—

	Net earnings.	
1903........	$ 1,856.87	
1904........	5,954.36,	of which $4,000 was placed to reserve
1905........	15,794.25,	of which 8,500 was placed to reserve
1906........	20,900.94,	of which 12,500 was placed to reserve
1907........	25,419.41,	of which 15,000 was placed to reserve
1908........	33,991.79,	of which 20,000 was placed to reserve
1909........	49,721.93,	of which 30,000 was placed to reserve
1910........	76,319.72,	of which 50,000 was placed to reserve
1911........	100,051.30,	of which 60,000 was placed to reserve
1912........	104,982.42,	of which 62,500 was placed to reserve

The Paid-up Capital for the corresponding period is as follows:—

1903	$ 52,762 50
1904	57,162 50
1905	138,886 07
1906	159,069 15
1907	172,174 11
1908	213,033 02
1909	300,000 00
1910	500,000 00
1911	500,000 00
1912	500,000 00
Present proposed incr. ($250,000)	750,000 00

I have very much pleasure in emphasizing some of the statements made by the President regarding the success and prosperity of The Standard Trusts Company, and I have every reason to believe that the success and prosperity that have tended The Standard Trusts Company in the past wili conιue in the future.

As the President has explained, the whole of Canada is dergoing a most rapid development, and that applies with ecial force, I think, to the three prairie provinces, in which is Company is doing a large volume of business. While this ntinues, money will always yield us good rates of interest, d, with the able, energetic and prudent management of The andard Trusts Company, there is no reason whatever to doubt t that the success of this Company will continue with just as ırked an advance in the future as in the past.

I am sure you are all pleased with our headquarters here. ıe President has explained to you how the purchase was made, d how much was paid for it, and that we could make 33 per nt. on the investment if we chose to sell; but I am sure that Shareholder would be disposed to sell, even with a large ıount of profit. I am not a real estate speculator, or a aler in real estate, but I am quite satisfied in my own mind at the present price is not the highest price this property will .

The President has also explained to you our venture in curing a site in Saskatoon, out of the profits that we made a former investment. We have in that building a magnifiınt advertisement for The Standard Trusts Company, and ıen it is borne in mind, as the President explained to you, at we have several Judicial Districts in the Province of skatchewan, in which we act as administrators, and of which skatoon is the centre, it must be very satisfactory to the verning powers, that is, the Legislature of the Province of skatchewan, that the Company is performing its duties well, d these are all things that tend to make, and to draw, business to The Standard Trusts Company.

I have very much pleasure in seconding the motion for the adoption of the Annual Report.''

The motion for the adoption of the Report was then put and carried unanimously, some of the Stockholders having first expressed their appreciation of the conduct of the Company's affairs.

It was moved by Mr. Stovel, and seconded by Mr. Schofield, that Mr. John Scott, C.A., be re-appointed Auditor of the Company for the ensuing year, his remuneration for the past year to be left in the hands of the Executive Committee.—Carried.

On the motion of Mr. Matheson, seconded by Mr. Atchison, the thanks of the meeting were tendered to the President, Vice-President and Directors, for their painstaking services during the past year.

On the motion of Mr. Mullins, seconded by Mr. Mansur, a similar vote of thanks was conveyed to the Managing Director, Secretary-Treasurer, Branch Managers and Staff.

Both motions were duly acknowledged.

The election of Directors was then proceeded with, and, on motion of Mr. Pulford, seconded by Mr. Schofield, the Scrutineers cast a ballot electing the following gentlemen Directors for the ensuing year:—

J. T. Gordon, Sir William Whyte, K.B., Wm. Harvey, N. Bawlf, E. S. Popham, M.D., J. A. Girvin, G. F. Stephens, P. C. McIntyre, M. Bull, R. J. Blanchard, M.D., John Persse, C. C. Castle, A. M. Fraser, K. Mackenzie, and Wm. Georgeson.

At a subsequent meeting of the Board held immediately after the General Meeting, Mr. J. T. Gordon was re-elected President; Sir William Whyte and Mr. Harvey, Vice-Presidents, and the Executive Committee composed of Sir Wm. Whyte, Messrs. Gordon, Harvey, Bawlf, Girvin and Dr. Popham, were re-elected with Sir William Whyte as Chairman.

ONTARIO LEGISLATURE OPENED.

The Ontario Legislature was opened this week. The eech from the throne referred to the agreement with the inister of Agriculture for Canada covering the expenditure Ontario's share of the Federal subsidy for agricultural purses which amounted to $175,000. This money is being exnded for the benefit of the agricultural interests of the ovince, and the Government hails with satisfaction the anuncement that the appropriation of Federal aid to agriculre in the provinces is to be made permanent.

The immigrants brought into the province during the year ımbered more than 10,000. The production of minerals eatly exceeds in value that of any previous year.

Substantial progress were reported in the operations of e Hydro-Electric Commission, which a year ago was serving neteen municipalities, and is now supplying thirty-five. In e same period the quantity of power delivered by the Comission has been more than doubled. In consequence, the venue, after paying expenses and interest on the investment, ows a surplus, which has enabled the Commission to make reduction in the rates to the municipalities. In addition to er 500 miles of transmission lines now in operation, the mmission has 108 miles under construction to provide for ntemplated extensions.

A large sum of money will be spent by the province on od roads and a commission will probably be appointed to rry out a comprehensive scheme.

Under the instructions of the Ontario Government, Mr. J. Tyrrell, the well-known explorer, proceeded by way of Winpeg to the mouth of the Nelson River, and selected and arked out the lands and terminals to which the province of ntario is entitled. He was unable in the time at his disposal complete the survey of the five-mile strip to which the ovince is entitled to its intersection with its westerly bounary. On his return trip Mr. Tyrrell passed through the tertory recently added to the province known as the district Patricia, and reports that this territory contains areas of ricultural lands and also mineral lands of promise. His port, together with a plan of the terminals selected by him, ill be laid before the Ontario House.

WHY BONDS ARE SAFE INVESTMENTS.

In the old common law sense of the word, a bond signified obligation to perform an act, and in the event of failure to do, there was provision for the forfeit of something to mpensate for damages sustained. This is true of investment onds, which are secured by a lien against property which ould be forfeited in case the obligation were not met. The turn of the principal sum at a definite date and the regular ayment of interest at a fixed rate are set forth in special greements in the bond, which also usually provide penalties case the agreements are not carried out.

So says the writer of an interesting booklet entitled, Why Bonds are Safe Investments,'' issued by Messrs. N. W. arris and Company, the well-known bond house. The pamphıt is well worth the perusal of those who at present hold onds or who contemplate investing in them. Copies can be btained from the Canadian branch office of the company at 57 St. James Street, Montreal.

STOCK AND BOND OFFERING.

An issue of 2,500 shares of the Stanley Mineral Springs and Brewing Company, Limited, is being made by Messrs. Playfair, Paterson and Company, members of the Toronto Stock Exchange. The capitalization of the company is as follows:—

	Authorized.	Being Issued.
Six per cent. bonds	$ 500,000	$350,000
Common stock	1,000,000	500,000

The money is required to furnish working capital. The head office of the company is at Winnipeg. An offering is being made also of $350,000 six per cent. bonds, of which $100,000 have already been taken up. The bonds are being issued at par with a bonus of 25 per cent. in common stock. The company was formed to take over the business of the Stanley Mineral Springs Company, Limited, with works near Port Arthur.

PERSONAL NOTES

Dr. Beattie Nesbitt, of Toronto, is dead.

Mr. J. W. Wilson has been appointed Toronto manager for Messrs. Matthews, Wrightson and Company, financial and insurance brokers.

Mr. A. H. Allen, manager of the Canadian Bank of Commerce at McLeod, Alta., has been re-elected president of the local board of trade.

Mr. David S. Kerr, C.A., has retired from the firm of Messrs. Marwick, Mitchell, Peat and Company, and also from the firm of Marwick, Mitchell and Company, chartered accountants, Montreal, New York, London (England), etc.

Mr. Geo. S. Walsh, manager of the Molsons Bank at Waterloo, has been transferred to Cowansville, Que., where a new branch of that institution has just been started and of which branch Mr. Walsh will have charge. A representative gathering of the principal business men recently gathered to express their regard for Mr. Walsh to the number of about 200 which included friends from Cowansville, Knowlton, Foster, West Bolton, West Shefford. Mr. Walsh was tendered an address and purse of money as an expression of the citizens' regard of himself and of his services.

◆

The Dominion Gresham Guarantee and Casualty Company, of Montreal, has been licensed to carry on business in British Columbia. Mr. R. A. Welsh, Vancouver, has been appointed attorney for the company in British Columbia.

The Western Canada Power Company line of electric railway between Vancouver and Mission will be started in May next and will be completed before the end of 1015. Operation will be under the name of the Burrard, Westminster, Boundary Railway and Navigation Company. Locomotives will be used at first, since there is immediate traffic in sight, much log carrying offering. Eventually electric power from Stave River Falls will be used.

The Toronto General Trusts Corporation

REPORT OF THE PROCEEDINGS OF THE THIRTY-FIRST ANNUAL GENERAL MEETING

The Thirty-first Annual Meeting of the Shareholders of The Toronto General Trusts Corporation was held in the Board Room of the Corporation's Head Office, corner of Bay and Melinda streets, Toronto, on Wednesday, the 5th of February, 1913. There were present:—

Hon. Featherston Osler, K.C.; John Hoskin, K.C., LL.D.; Sir John M. Gibson, K.C.; Thomas Long, Sir Aemilius Irving, K.C.; D. R. Wilkie, Hon. Robert Jaffray, Sir Wm. Mortimer Clark, K.C.; Alexander Nairn, E. T. Malone, K.C.; G. A. Stimson, W. D. Matthews, H. S. Osler, K.C.; J. W. Langmuir, J. B. Holden, C. S. MacInnes, K.C.; J. Bruce Macdonald, Fred C. Jarvis, J. G. Scott, K.C.; C. W. Maclean, J. Harry Paterson, Edward Galley, A. L. Malone, D. A. Dunlap, A. D. Langmuir, G. F. Johnston, Hamilton Cassels, K.C., Sir Edmund Walker, Geo. Porter, G. A. Grover, G. L. Francis, W. R. Brock, Alexander Smith, Dr. D. King Smith, Geo. S. May, Sir Edmund B. Osler, M.P.; Wm. C. Brent, W. G. Watson, E. E. Argles, T. J. Maguire, W. N. Lonsdale, H. M. Forbes, F. R. Dymond, H. C. Hewetson, J. A. H. Burt, Fred L. Jarvis, James Lang, E. S. Dean, J. H. A. Byers, H. A. Calder.

The President, the Hon. Featherston Osler, took the chair, and Mr. A. D. Langmuir, the Assistant General Manager, acted as Secretary to the meeting.

The financial statements, showing the operations of the Corporation for the year ended 31st December, 1912, were submitted, and commented upon by the General Manager, Mr. J. W. Langmuir.

The report to the Shareholders was then read, as follows:—

THIRTY-FIRST ANNUAL REPORT OF THE TORONTO GENERAL TRUSTS CORPORATION.

Being for the Year Ended 31st December, 1912.

To the Shareholders:—

The Board of Directors have pleasure in submitting the Thirty-first Annual Report of the Corporation, accompanied by the Profit and Loss and Assets and Liabilities Statements for the year ended 31st December, 1912.

The net profits for the year, after payment of entire cost of management and all other fees and expenses, amount to $233,915.93. To this amount the net profit on the sale of the Corporation's old head office premises, corner of Yonge and Colborne streets, amounting to $95,618.74, must be added, together with the premium of $213,746.50 received from the sale of the new stock of $250,000 issued during the year, and the balance of $71,237.37 brought forward to the credit of Profit and Loss from 1911, making a total of $614,518.54, which has been dealt with by your Board as follows:—

To payment of four quarterly dividends at the rate of 10% per annum	$110,892 33
To total cost of office furniture, and equipment for Treasury and Filing Vaults in new Head Office building written off	17,155 08
To Reserve Fund (increasing this fund to $1,100,000)	400,000 00
To amount carried forward to the credit of Profit and Loss	86,471 08

The Assets and Liabilities Statement for the year shows that the total assets in the hands of the Corporation amount to $53.852,564.15, an increase over the year 1911 of $8,765,904.16.

The volume of executorships, administrations, trusts and work of a kindred character which came into the hands of the Corporation during the year ended 31st December, 1912, amounted to $10,424,764.20, which exceeds the amount of new work assumed by the Corporation in any one year since its inception.

The Board of Directors regret to announce that during the year no less than four members of the Board have passed away, viz.: Mr. John Laing Blaikie, Mr. Samuel Nordheimer, Mr. Frederick Wyld, and Mr. William Henry Beatty.

All which is respectfully submitted.

FEATHERSTON OSLER, President.

Toronto, January 28th, 1913.

THE TORONTO GENERAL TRUSTS CORPORATION. PROFIT AND LOSS STATEMENT

Trust Estates and Agencies—		
Inventory Value of unrealized Original Assets of Estates and Agencies under administration by the Corporation		25,149.236 59
		$53,852,564 15

The President, Hon. Featherston Osler, moved the adoption of the report, seconded by John Hoskin, K.C., LL.D.

The President then called upon Mr. J. W. Langmuir, Vice-President and General Manager of the Corporation, to address the Shareholders.

Mr. Langmuir spoke as follows:—

First, I may be permitted to congratulate the Shareholders and all associated with us on the completion and entire occupation of our new building. At our last Annual Meeting on 7th ruary, 1912, we were able, by ejecting plasterers and paint- to occupy the Board Room in which we are now in session, the day only, but our offices and vaults were not ready for upation until Easter, at which time we took possession of new Head Office home, and transferred, with a good deal labor and not a little anxiety, the accumulated contents of Safe Deposit, Treasury and Filing Vaults. You will be ased to know that the transfer and lodgment of securities, uments, books and records, the accumulation of over thirty rs, was effected without inconvenience to any of our clients, the loss or misplacement of a single document.

A sale of our former premises was made shortly after we ated at a net profit over the book value of $95,618.74.

I have pleasure in reporting that after over nine months' upation of our new offices we find them in all respects well ed for the Corporation's purposes, both in regard to location, erior arrangement and general equipment.

Although we have received excellent offers for the purchase the premises on Melinda Street, east of our present building, which were included in the original purchase by the Cor- ation, the Board decided to retain and rent this property, that it might be available for any future extensions to the d Office that may be required.

The Shareholders will doubtless be interested to learn that Corporation has been successful in providing itself with a h-needed Head Office that in architectural beauty and con- ction is quite up to the best standards, either here or in United States, and at the same time produces a fair interest rn upon the capital expenditure. The entire space on the er floors was readily leased to high-class tenants at a rent ch, added to a sum equal to less than $1.50 per superficial t which we charge ourselves for the ground floor, basement first floor, produces a net return of 5 per cent. on the estment, or a net return of approximately 6 per cent. if we ude the rents derived from our Safe Deposit Vaults.

So much for our new building.

Coming now to a review of the general operations of the poration for the past year, after reviewing the very elaborate tements which have been laid on the table, it will, I think, y be necessary in my remarks to summarize the more salient nts in connection with the year's operations.

The Corporation has now passed the fifty-million-dollars ord in its assets as the residuum under its care, the actual ount being $53,852,564.15, or an increase over the preceding r of close upon $9,000,000.

During the year the Corporation made permanent mortgage debenture investments authorized under the Act, or by the pective instruments appointing the Corporation, of over 00,000, as against $4,750,000 for 1912. It will be observed n the statements placed before you that there is close upon 00,000 cash on hand in the various banks, only a portion of ch, however, is subject to investment, and for this amount re were sufficient loans in the solicitors' hands at the end the year.

The character of our loans in the Province of Ontario may judged from the fact that out of mortgage investments aggre- ing $14,081,723.21, 94.40 per cent. of the interest was paid at 31st December, 1912, and a large portion of the 5.60 per t. arrears has since been paid. Respecting mortgage invest- nts in the Northwest Provinces, it will be obvious that they not be judged on the same lines as Ontario loans, for the son that interest on farm loans is payable annually, and erest payments depend very largely upon weather conditions means of transportation. Even with these conditions, out $6,331,067 invested in the Provinces of Manitoba, Saskatch- an and Alberta, interest to the amount of 73 per cent. has n paid as at 31st December, 1912, and large collections have n made since that date.

The interest, dividends, rents and general income collected the Corporation on the assets under its care during the past lve months amounted to close upon $3,000,000 as compared h $2,643,004.02 in the preceding year, or an increase of about 0,000.

The compensation received for the management of estates the year as fixed by the courts or by special arrangement h the beneficiaries, amounted to $195,593, as against $167,909 the previous year, or an increase of $27,684.14. While this pensation in the aggregate may appear considerable, it rep- ents approximately only two-fifths of one per cent. of the ue of the Trusts and Agencies under the control of the Cor- ation.

I think I can safely assert that there is no business of a netary or commercial character which necessitates the em- yment on its staff of a larger percentage of skilled and perly-trained employees than a company having the care and nagement of estates and trusts. A trust company must at times be prepared to take over and effectively administer ets of every description, which can only be properly done by ing in the service men who have acquired through practical perience a thorough knowledge of almost every branch of ustrial and commercial activity. During its career the Cor- ation has been called upon to conduct or supervise and wind such businesses as, for instance, wholesale groceries, dry ds, general stores, timber limits and mills, cement plants, tracting enterprises of all kinds, manufactories, elevators, els, summer resorts, farms, drug stores, livery stables, stock king, etc.

Keeping this in mind, I think it will be admitted that the t, viz., $216,007.22, of managing and administering the large mass of business under the care of the Corporation (now amounting to over $50,000,000) is quite moderate, it being considerably less than one-half of one per cent. on the business in hand. Of this amount the expenditures for the inspection and oversight of properties alone amounted to close upon $20,000.

The foregoing figures as to compensation and cost of management very plainly indicate that the compensation allowed for the care and management of a trust company's assets of a fiduciary nature can only show a reasonably profitable return through the accumulation of a large volume of business. That, at any rate, is the experience of this Corporation, for, as a matter of fact, we are only now beginning to derive a fair profit from the management of our Trust and Agency business, apart from our investments of capital and guaranteed funds.

Owing to the large increase in the volume of business placed under the care of the Corporation during the past five years, the Board of Directors considered it necessary to increase the Capital Stock of the Corporation, and to that end a by-law was passed authorizing an additional capital issue of $1,000,000 (making our total authorized capital $2,000,000), which by-law received the sanction of the Shareholders at a special meeting called for that purpose on the 7th May, 1912. It was decided, however, to issue during 1912 only $250,000 of the amount authorized, and to allot the same at a premium of 85 per cent., or $185 per share, to the Shareholders as of record on the books of the Corporation on the 5th day of June, 1912. Effect was given to this resolution, and, as the statements show, the sum of $213,746.50, representing premium, was credited to the Profit and Loss Account.

From the printed statements which have been placed in the hands of the Shareholders, it will be observed that the net profits for the year amounted to $233,915.93, as against $198,392.42 last year, and they further show that we have carried to Profit and Loss Account the surplus profit on the sale of our old office premises on Yonge street, namely, $95,618.74; that we have credited that account with the premiums received on the new stock issue of $250,000.00, amounting to $213,746.50, making a total of $614,518.54 appearing at the credit of Profit and Loss as at 31st December, 1912. Out of this amount your Directors declared and paid four quarterly dividends, at the rate of ten per cent. per annum, amounting to $110,892.38; wrote off the entire indebtedness for office equipment, $17,155.08; and carried to Reserve Fund the sum of $400,000, leaving at the credit of Profit and Loss the sum of $86,471.08. It will thus be seen that our paid-up capital now stands at $1,250,000.00, and the Reserve and unappropriated profits at $1,186,471.08, or a total of $2,436,471.08.

Reviewing the operations for the past year as a whole, I feel assured that not only the Shareholders have reason to be satisfied with the results, but, what is perhaps of greater importance in a Trust Company, our clients, comprising many thousand beneficiaries of estates and trusts, and others whose interests we have in charge, will also be satisfied with the financial condition and strength of the Corporation.

At the risk of wearying the shareholders and the public generally with a repetition of the warning given at almost every Annual Meeting of the Corporation, of the great danger incurred in the indiscriminate granting of charters and licenses to companies designating themselves ''trust'' companies, but many of which are really brought into existence primarily for the purpose of selling their stock in order to obtain funds for speculation in real estate and the promotion of speculative enterprises generally, I must continue to place warnings on record. Were it not that many of these companies—more particularly in the northwestern Provinces—have equal, if not greater, powers conferred on them to act as Executor, Administrator, Trustee, etc., etc., than companies that are legitimately confining themselves to the performance of duties primarily and specially devolving upon trust companies, fault might not be found with the improper and misleading designation of ''trust'' companies. So long as they are not entrusted with the management of estates and the investment of trust funds, it perhaps would make little difference with a discerning man in the appointment of an Executor and Trustee. Unfortunately, however, with the marvellous growth and prosperity of the country we have reason to believe that many of these companies are using their charter powers in the flotation of land schemes and other purely speculative transactions of a more or less doubtful character, which undoubtedly will result in loss to many people who can ill afford to lose even the small sums that they are placing in such transactions.

So long as the Dominion and Provincial Governments cannot see their way to place more drastic restrictions on the work and duties of ''trust'' companies—so designated—I shall consider it my duty to place my views before the public. Speaking for The Toronto General Trusts Corporation, I again repeat the unalterable decision of this Corporation to rigidly confine itself to purely trust and agency business, and the investment, either as agent or guarantor, of funds committed to its care, but only in securities authorized by the Trustee Investment Act, unless otherwise directed by the investors, together with the transaction of other business of a purely fiduciary character.

Before closing I have much pleasure in expressing my appreciation of the excellent services rendered by the Advisory Boards of the Corporation at Ottawa and Winnipeg, and also the faithful performance of the duties devolving upon the respective members of the staff of the Corporation, both at the Head Office and its Branches.

AUDITORS' REPORT.

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of The Toronto General Trusts Corporation to the 31st December, 1912, and find same to be correct and properly set forth in the above Statements of Profit and Loss and Assets and Liabilities. We have examined, and find in order, all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario, and Trusts, Estates and Agencies in the Corporation's hands, and we have checked same with the mortgage and debenture ledgers and registers. The bankers' balances, after deducting outstanding cheques, agree with the books of the Corporation.

We have also examined the reports of the Auditors of the Winnipeg and Ottawa Branches, and find that they agree with the Head Office books.

R. F. SPENCE, F.C.A., "Can."
GEO. MACBETH,
Auditors.

Toronto, January 27th, 1913.

The Report was unanimously adopted.

The Report of the Inspection Committee, as signed by the Hon. J. J. Foy, Sir Aemilius Irving and Mr. Hamilton Cassels, K.C., was also adopted.

The following Shareholders were elected Directors for the ensuing year:—W. R. Brock, Hamilton Cassels, K.C.; Sir Wm. Mortimer Clark, K.C.; Hon. W. C. Edwards, Hon. J. J. Foy, K.C., M.P.P.; Sir John M. Gibson, K.C.; A. C. Hardy, John Hoskin, K.C., LL.D.; Sir Aemilius Irving, K.C.; Hon. Robert Jaffray, J. W. Langmuir, Major R. W. Leonard, Thomas Long, W. D. Matthews, Hon. Peter MacLaren, J. Bruce Macdonald, Hon. Sir Daniel McMillan, K.C.M.G.; Sir Edmund Osler, M.P.; Hon. Featherston Osler, K.C.; J. G. Scott, K.C.; Sir Edmund Walker, D. R. Wilkie.

At a subsequent meeting of the Board of Directors Hon. Featherston Osler, K.C., was re-elected President, and Hon. J. J. Foy, K.C., and J. W. Langmuir, Vice-Presidents.

The Inspection Committee was re-elected, namely, Hon. J. J. Foy (Chairman), Sir Aemilius Irving, K.C., and Hamilton Cassels, K.C.

The following members were elected to the Advisory Boards of Ottawa and Winnipeg:—

Ottawa—W. D. Hogg, K.C. (Chairman), Sir Henry N. Bate, George Burn, Capt. J. L. Murphy, and Hiram Robinson.

Winnipeg—Hon. Sir D. H. McMillan, K.C.M.G. (Chairman), Hon. D. C. Cameron, W. H. Cross, A. L. Crossin, H. H. Smith and Frederick T. Griffin.

NATIONAL CAR LISTED ON TORONTO EXCHANGE.

National Steel Car shares have been listed on the Toronto exchange. The capital consists of $1,500,000 7 per cent. preferred stock and $2,000,000 common. The plant, which is located at Hamilton, has a capacity of thirty cars a day. The common sells at 38, preferred at 82.

AGRICULTURAL BRITISH COLUMBIA

eeds of Producers of the Province—Utilities Development—Vancouver's Shipping Increases.

(Staff Correspondence.)

Vancouver, February 1st.

For some time past there have been conjectures as to iat were certain steamship corporations' intentions with rerd to Panama Canal traffic.

The Royal Steam Packet line will start a North Pacific rvice in May, coming via the Suez. By getting a start ide it will then be in line for what turns up after the canal opened. Some time ago an arrival from London told The onetary Times that this company was building four new rge boats, and it was believed these boats were for the new cific trade.

The Hamburg America liner Sithonia is due to arrive in ncouver on February 1st on her first trip to this port, and irty days afterward she will be followed by another of the me line, a new service being started.

These are round-the-world plans, but a coast project has en hinted at by Mr. E. H. Heaps. He is asking the Vanuver Board of Trade to support a line of steamers to ply tween Montreal and Vancouver via the canal and Mexico, be called the Canadian Panama Steamship Company. Mr. eaps was interested in the Canadian Mexican service, and ows something of the possibilities of this side of the route.

It is noteworthy that Western Canadian ports are now nnected with the principal countries of the world, with the ception of South Africa, and that during the last year or so portant trade routes have been established. Two of the new es to bring boats to Vancouver and Victoria are the Eastern iatic connecting with Denmark and other European counies, and the Maple Leaf line running from New York via e Horn.

ilities and Increased Population.

The British Columbia Electric Railway Company is preparg for development on Vancouver Island and has purchased block of land, which will be utilized as a site for offices and rminals. It is proposed to erect a building ten stories in ight, and although it is not expected that all this space will required from the first, it is anticipated that in time the mpany's business will so expand as to make its occupation cessary. In the meantime, surplus space will be rented.

Another big company movement is the construction in ancouver of a new building to house four exchanges by the itish Columbia Telephone Company. The business section d the peninsula portion of Vancouver is becoming so consted that one central exchange cannot handle the telephone affic, although three suburban and two district exchanges, e in all, have been opened during the last two years.

Assist the Farming Community.

In British Columbia agriculture is coming in for much tice. Farmers have not been going on the land, and the vernment has appointed a commission to see if some assistce cannot be devised. A fact that is being overlooked is at farmers quite close to New Westminster and Vancouver nnot satisfactorily market their produce. For instance, this eek a rise in the price of potatoes will be announced. A rmer at Cloverdale, a few miles south of New Westminster, s stated that he has potatoes that he could not market, and o years ago he threw potatoes in the river, not being able get rid of them, yet the price in the cities close at hand as almost twice what it is now, namely, $15 a ton, with shcrofts $25. This kind of complaint is made by growers of fferent kinds of produce, yet nothing is done to help bring e producer and the consumer together. A few years ago a eamer operated down the Fraser and around to Vancouver, t that service was given up a long time ago. If the government were to foster something of this kind, which would bring e farmer in touch with the New Westminster market and so that at Vancouver, it would be a practical assistance that ould be appreciated. With people on the land will come ovision for many people now in the cities and a surplus pulation will be provided that will be of benefit to indusies. Until labor is here in sufficient quantities, capital will shy. A larger population, too, means more traffic for the ners that are to dock here, in fact people on the land is the sic principle of a province's prosperity.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from obalt Station for the week ended January 31st: McKinleyarragh, 83,500; LaRose, 64,000; Chambers Ferland, 62,400; Coalt Townsite, 82,000; Hudson Bay, 124,100; total, 416,000 ounds, or 208 tons. The total shipments since January 1st are ow 3,315,771 pounds, or 1,657 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

DAY OF FOUR PER CENTS. IS OVER

London Will Not Take Them—Comment is Lively Overseas.

"Yesterday was a marked day in the history of the evolution of colonial securities," writes the financial editor in the London Morning Post of Tuesday. "Those of several leading municipalities took a long and probably a permanent step away from the 4 per cent. toward the 4½ per cent. type. Month by month the opinion has been gaining ground that the yield on this class of securities is becoming less and less acceptable, even to the most cautious investors. New issues must be made with a higher rate of interest. The price of old issues has yet further to fall.

Toronto Loan Adverse Factor.

"Yesterday dealers acted on that opinion, and were moved by the failure of the city of Toronto issue. The price of this stock was quoted first at 1⅝ discount, but there was such a marked disposition to sell that it fell to 2 discount. Dealers decided that the time had come to make substantial alterations in the prices of similar stocks. The outstanding Toronto fours were marked down 4 points. Vancouver and Victoria fours fell 2 points. Winnipeg fours fell a point. Winnipeg's new loan, now being offered, is of the 4½ per cent. type at par. Yesterday's reduction in prices was a nail in the coffin of 4 per cent. colonial municipal loans."

Consolation for Toronto.

The best consolation Toronto's friends offer for the failure of the loan issued in London is that the city's security is so high that the underwriters will not be compelled to play part nurse for long, says a cable message.

The immediate effect is to depress existing Canadian municipal fours, because it is believed that their day is over.

Some financial writers hope that the underwriters and Canadian banks will see the advisability of calling a halt to new municipal expenditures, or at least moderating their demands.

A delegation from Prince Albert has arrived in London to place a large municipal loan on the London market.

Montreal's expected issue also excites considerable interest, though nothing definite is known respecting it.

What Lord Faber Thinks.

Lord Faber, of the eminent London banking firm, addressing the Bradford Chamber of Commerce, referred to Canada's heavy borrowing in Great Britain. "I do not want to be an alarmist," he is reported in a cable to the Montreal Star, "and I have a great opinion of Canada, but there should be moderation in all things. Some time ago, we, in the way of our business, had a bill for £400 or £500 to collect from a Canadian corporation which had been raising money in England. The bill came back with the answer: 'Present again, after we get the proceeds of our new loan from England.' So far, the proceeds do not seem to have arrived. We have many millions invested in one country. We ought to go slowly now."

NEW STEAMER ORDERED.

The Collingwood Shipbuilding Company has been awarded a contract for a combined passenger and freight steamer by the Pelee and Lake Erie Navigation Company, which operates between Pelee Island and the mainland ports including Rondeau. The new steamer will be constructed of steel and will be 145 feet long with 24 feet beam and a depth of 18 feet 3 inches. It will be a day boat and will be fitted up specially for the route on which she will ply. The motive power will consist of triple expansion engines, 12½, 21, 34 inches with a stroke of 21 inches. This will be supplied with steam by one Scotch boiler 12 feet 6 inches in diameter and 10 feet 6 inches in length. The steamer will develop a speed of thirteen miles per hour. The contract calls for delivery in July next.

PREMIER SIFTON AND PRIVY COUNCIL DECISION.

"I have read with interest the report of the decision of the Privy Council in regard to the appeal of the Royal Bank," said Premier Sifton. "I was very much surprised at the ground given by the court for their decision, as the bondholders were not in any respect parties to the action, and it was generally admitted by everyone that their rights were amply secured by the legislation. Any action that may be taken in regard to the matter will be question for further consideration."

The London Daily Express, commenting on the decision, admits that it is much criticized in Canada, but accepted by the financial community as a combination of sound common sense and good banking law.

The number of directors of the Canadian Northern Montreal Land Company, Limited, has been increased from five to seven

THE TORONTO RAILWAY COMPANY

REPORT OF THE PRESIDENT AND DIRECTORS FOR THE YEAR ENDING DECEMBER 31st, 1912.

To the Shareholders:—

Your Directors with pleasure submit herewith their Twenty-first Annual Report, together with balance sheet and profit and loss account of the Company for the year ending 31st December, 1912.

A summary of the year's operations will be found attached hereto, from which will be recognized the continued increase in the Company's business.

The gross earnings amounted to		$5,448,050.36
Charges for operating, maintenance, etc.		2,866,550.12
Net Earnings		$2,581,500.24

From which net earnings there was deducted the sum of $2,012,637.57, distributed as follows:

Dividends	$879,595.85	
Bond interest, etc.	190,992.76	$1,070,588.61
Payments to City:		
Percentage on earnings	$798,958.66	
Pavement charges	90,953.00	
General taxes	52,137.30	942,048.96
		$2,012,637.57

The increase in gross passenger earnings is most gratifying, showing as it does the amount of $567,035.00, when compared with the previous year; the earnings being $5,367,502.48, while those for 1911 amounted to $4,800,467.48. Notwithstanding the large increase in gross earnings referred to, said surplus was reduced largely by the operation of additional cars placed in service, a higher rate of wages paid to our conductors, motormen, and other employees, also the cost of material of all classes having advanced in price. The charges for the year amounted to $2,866,550.12. When compared with the previous year, which amounted to $2,653,361.86, show an increase of $213,188.26. The percentage of operating cost being 53.4% of our passenger earnings.

The payments made to the City of Toronto amounted to the sum of $942,048.96, which amount, when compared with the payments of the previous year, shows an increase of $119,815.72, or 14.6 per cent.

In addition to entirely renewing the battery plant at Frederick and Front Streets, there was expended during the year on Capital Account, the sum of $591,484.70 in building additional rolling stock and procuring electrical equipment for same, the construction of new tracks and erection of overhead work in various sections of the city, additions to buildings, and other improvements.

On the 25th day of March last a fire occurred at the King Street East Division, completely destroying the car storage house in the rear of the main building, together with about 150 cars, practically all of which cars were of the open, or summer type. The property was insured.

The Company's agreement with its employees having expired on the 15th June, 1912, your Directors are pleased to report that after a number of conferences, all differences were amicably adjusted and an increase in wages was granted, and a new agreement entered into for three years.

The second drawing of the Company's currency and sterling bond issues, under the terms of the mortgage deed dated 1st September, 1892, took place on the 27th day of June, 1912, the Company being obliged under the mortgage deed to redeem by drawing annually five per cent. of the amount of bonds issued, same to be redeemed on the 31st day of August following the date of drawing, and from which date no interest is payable. The full number of bonds drawn in June, 1911, amounting to $168,693.33 have been presented and paid, and of the bonds drawn during 1912 $159,500.00 have been presented and redeemed. The total amount of bonds so drawn for redemption aggregate $339,386.66.

Careful attention has been paid to the maintenance of the plant, rolling stock equipment, and other properties of the Company.

Your Directors declared out of the accumulated surplus earnings of the Company, four quarterly dividends of two (2) per cent., all of which dividends were paid on the several dates set for payment.

The Toronto and York Radial Railway Company report that the earnings of the said Company continue to show satisfactory increases, the gross earnings amounting to $492,922.86, compared with $449,059.16 for the previous year—an increase of 9.76 per cent.

A regular monthly audit and verification of the books, accounts and vouchers was made by Messrs. Clarkson and Cross, Chartered Accountants, and their certificate has been attached to the Company's balance sheet.

Respectfully submitted,

WILLIAM MACKENZIE,
President.

INCOME ACCOUNT.

Gross Earnings		$5,448,050.36
Operating, maintenance, etc.	$2,866,550.12	
Interest on bonds, etc.	190,992.76	
Percentage on earnings	798,958.66	
Pavements, taxes	143,090.30	3,999,591.84

COMMONWEALTH TRUST COMPANY.

The Commonwealth Trust Company, Limited, is the name a new financial concern recently organized in Alberta, with d office in Calgary. The authorized capital is $2,000.000, shares are being offered to the public. A strong board of ectors has been secured, and the company expects to com- ce business shortly. The organizers feel that there is a d field in the West for another trust company, and with ropean connections that are practically assured, it should mence business under promising conditions.

The principal business will be loaning money on first-class rtgages on improved land, and acting as trustees and execu- s. In addition, the company's charter empowers it to buy sell agreements of sale, which, with careful supervision, proven very profitable.

The provisional officers of the company are: President, norable Charles W. Fisher, Cochrane, Alta., capitalist, aker in the Legislative Assembly of Alberta. Vice-presi- ts, Major Duncan Stuart, Calgary, Alta., barrister-at-law, ector Alberta Interurban Railway Company; J. R. Suther- d, Calgary, Alta., gentleman, late Dominion lands agent; rge F. Tull, Calgary, Alta., managing director of Niblock Tull, Limited. Managing director. D. J. Young, Calgary, a., president of Young & Kennedy, Limited. Secretary and asurer, E. W. McMullen, Calgary, Alta., manager Merchants nk of Canada, Calgary. Directors, Lieut.-Colonel James lker, Calgary, Alta., capitalist, chairman South East Land Corporation, Limited; Harold W. Riley. M.L.A., Calgary, Alta., president Riley's, Limited; H. A. MacLean, Calgary, Alta., president of Alliance Investment Company (Canada), Limited; Louis M. Roberts, M.L.A., High River, Alta., broker, of Roberts & Hunt; Lieut.-Colonel G. E. Sanders, Calgary, Alta., police magistrate. Calgary; George Pirie, M.D., Calgary, Alta.

Temporary offices have been secured in the MacLean Block, Calgary, and later the company expect to have ground floor offices in one of the new buildings being erected in Calgary.

◆

DOMINION TRUST OPENS WINNIPEG OFFICE

The Dominion Trust Company, Limited, of Vancouver, which has paid up capital and surplus of $2,500,000 and total assets of $4,179,679, has opened an important branch at Winnipeg. Mr. H. W. Trenholme is manager of that office. The Dominion Trust Company acts as executor. administrator, guardian, trustee, receiver or assignee, register and trust agent. The Bank of Toronto, Toronto,
January 22nd, 1913.

Mayor Hartman, of Brantford, was authorized by the Canadian Fire Underwriters' Association to offer a reward of $500 for information leading to the conviction of the person who set fire to the building of the Brantford Cordage Company on the nights of January 13 and 18.

Over $4,000,000 worth of business was written by members of the Montreal city agency of the Sun Life Assurance Company of Canada last year.

Salmon Arm, B. C., board of trade's annual election of officers resulted as follows: President, Mr. J. R. A. Richards; vice-president, Dr. Connolly; and secretary-treasurer, Mr. J. Douglas Macey.

The introduction of oil-burners into the mountain division of the Canadian Pacific Railway has proved successful. This style of engine is to be introduced into the Cascade division during the next few months and all the engines will be converted into oil-burners. Storage fuel oil tanks will be placed at convenient stations on the line. The oil-burning will extend from Vancouver to North Bend while from North Bend to Kamloops the coal-burners will be used. This will give the entire distance from Field to Vancouver, with the exception of the space between Kamloops to North Bend. oil for fuel. District No. 3, which includes the Boundary and Kootenay country, will continue to use coal for fuel.

The officers and executive of Halifax board of trade for the year are as follows: President, Mr. F. B. McCurdy; vice-presidents, Messrs. G. W. C. Hensley, H. R. Silver; council, Messrs. W. T. Allen, Hon. R. G. Beazley, W. A. Black, S. M. Brookfield, Alderman J. L. Connolly, W. S. Davidson, J. E. DeWolf, H. Flowers, Jr., Alderman R. Harris, S. O. Hogg, C. C. Longard, D. Macgillivray, E. J. Murphy, J. A. Neville, Professor Sexton, Gavin L. Stairs. Lieutenant-Colonel Weston, and A. H. Whitman.

Mr. Huntley R. Drummond was elected president of th Montreal board of trade in place of Mr. R. W. Reford, with Mr. R. J. Dale as first vice-president; Mr. Joseph Quintal 2nd vice-president, and Mr. George F. Benson, treasurer. The board of trade council for the coming year was elected as follows:—Council, Messrs. Arthur H. Campbell, D. A. Campbell, Alfred Chaplin, Alexander Dick, Fred. W. Evans, A. Hamilton, Gault, Zeph. Hebert, W. W. Hutchison, A. McKim, Ross McMaster, John H. Scott, and H. B. Walker. Board of arbitration, Messrs. George L. Cains, James Carruthers, W. W. Craig, George E. Drummond, Thomas J Drummond, C. B. Esdaile, E. B. Greenshields, Arthur J Hodgson, H. A. Hodgson, Robert W. Reford, Farquhar Robertson, and Norman Wight.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

CITY OF HAMILTON, CANADA

DEBENTURES

Tenders addressed to John Allan, Esq., Mayor, City Hall, and endorsed "Tender for Debentures," will be received by the undersigned up to 10 o'clock a.m. on Thursday, the 20th day of February, 1913, for the purchase of City of Hamilton debentures amounting to $190,000, due at the end of twenty years, and dated the first day of April, 1913, bearing interest at 4½ per cent. half yearly.

A marked cheque for the sum of $1,000, payable to W. R. Leckie, City Treasurer, must accompany each tender.

The highest or any tender not necessarily accepted. Further particulars may be had from the undersigned.

The capital stock of the Webster Citizens' Company, mited, has been decreased from $75,000 to $50,000, divided o 500 shares of $100 each.

The capital of the Ottawa Electric Company will be inased from $1,500,000 to $3,000,000, and that of the Ottawa s Company from $500,000 to $2,000,000.

The Dominion Sugar Company, Limited, has increased capital stock from $1,500,000 to $3,000,000, by the creation 15,000 shares of new stock of $100 each.

The capital stock of the Fuel Economizer Company, mited, has been increased from $25,000 to $250,000, by the eation of 2,250 shares of new stock of $100 each.

The capital stock of the Goldsmiths' Stock Company of nada, Limited, has been increased from $100,000 to $250,-), such increase consisting of 1,500 shares of $100 each.

The new suburban electric railway to connect Victoria th the principal towns on the Saanich Peninsula, will be en for traffic by April. Steel cars with parabolic ends will used.

The North American Accident Insurance Company has en licensed to transact throughout Canada the business of cident and plate glass insurance. Mr. H. E. Ridout, Tonto, has been appointed chief agent.

Messrs. J. P. Kennedy and Company have recently comenced business as investment brokers at Outlook, Sask. r. J. P. Kennedy is well known at Outlook, having been anager of the branch of the Canadian Bank of Commerce cated there.

The new board of trade of Selkirk, Man., for the year 13 were elected at the annual meeting, which preceded the nquet, and are as follows:—Mr. F. A. Gemmel, president; r. A. D. Ferguson, vice-president; Mr. Bruce Campbell, reected clerk; councillors, Messrs. Thos. Hay, W. S. Young, S. Benson, L. S. Vaughan, C. Finkleman, R. H. Moody, J. Norquay and D. Morrison.

The Canadian Pacific Railway has decided to establish throughout the Western provinces a system of internal terminal elevators of 1,000,000 bushels capacity each. Construction is to begin this year and the first three are to be located at Calgary, Edmonton and Saskatoon.

The sixth annual banquet of the Life Underwriters' Association, Kingston, Ont., was held recently. Mr. J. A. Tory, president of the Life Underwriters' Association of Canada; Mr. H. Sutherland, general manager of the Equitable Life Assurance Company; and Mr. E. N. Kellar, of Toronto, addressed the gathering. The following are the officers of the association: President, Mr. Thomas Mills; vice-president, Mr. J. K. Carroll; secretary-treasurer, Mr. W. G. Ferguson; executive, Messrs. G. A. Bateman, J. B. Cooke, Ald. G. H. Gillespie, and J. W. Corbett.

Toronto carpet manufacturers are sending out new price lists which quote higher prices on carpets and squares. Brussels and Wiltons are 2 to 5 cents a yard higher, tapestries 4 cents higher and Axminsters 10 cents higher. The advance has come about as a result of the increased cost of raw materials and still further advances are not improbable. All carpet manufacturers in Canada are busy with orders. Wholesale dry goods houses are busy placing orders for the fall trade, blankets and heavy underwear being chiefly active. The strike of operators in English mills, if long continued, is likely to seriously delay deliveries of ladies' wear in this country.

The first issue of stock of the Weyburn Security Bank, which has its headquarters at Weyburn, Sask., was made in January, 1911. The number of shares being 6,026 on which 50 per cent. had been paid to the provisional directors, the total amount of such issue being $301,300. In 1912, the bank issued 274 shares on which it received a premium of $2,586, 50 per cent. of the par value of these shares being paid in. The bank has not made any further calls on the stock other than the original 50 per cent.

STOCKS AND BONDS—TABLE NOTES.

(u) Unlisted.

†Canadian Consolidated Rubber Bond Denominations, $100. $500 and $1,000. Steel Company of Canada, $100, $500, $1,000. Sherwin Williams, $100. $500 and $1.000. Penmans, Ltd., $100. $500 and $1.000. Canadian Cottons, $100, $500 and $1,000. ‡Quarterly

Quotations for Coniagas, Crown Reserve, La Rose, Nipissing and Trethewey will be found among the Toronto Exchange figures.

Quotations of Cobalt and Porcupine Mining Stocks are those of Standard Stock and Mining Exchanges.

Montreal Steel Stocks are commonly termed "Switch" on the Exchange. They are quoted as Montreal Steel in our tables.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

*Also a bonus of 10% per annum for 1911.

**Trethewey pays no regular dividend. They have paid: 1906, 4%; 1907, 4%, 1908, 15%, 1909, 25%; 1910, 10%; 1911, 20%, to June 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Co., 12 St. Sacrament Street, Montreal.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Feb. 1-10
(6) Jan. 2-22
(9) Dec. 31-Jan. 18.
(17) Jan. 8-Feb. 5.

CORPORATION BONDS

Some Cedar Rapids Bonds Go to England—Toledo Railways Reorganization.

The bonds of the Cedar Rapids Power Company not taken by shareholders of the Montreal, Light, Heat and Power, and Shawinigan Water and Power Companies have been taken by the underwriting syndicate of Messrs. Kitcat & Aitken, of London, England, and the Montreal representatives of this firm of Messrs. McDougall & Cowans.

Reorganization of Toledo Railways & Light Company has been completed by incorporation in Maine, of the Toledo Traction, Light and Power, with $8,000,000, 6 per cent. preferred, and $9,200,000 common stock. The new company will take over the stock, and 4 per cent. collateral bonds of the Toledo Railways and Light Company. The basis of exchange will be $4,866,000 preferred stock for that amount par value of 4 per cent. bonds, and 13 per cent. of common stock of the new company, for each share of stock of the old company, except where holders of old stock shall pay $7.50 a share assessment when they will receive 43 per cent. of new common for each share of old stock, and $7.50 par value of new preferred stock. More than 90 per cent. of the 4 per cent. bonds and more than 86 per cent. of the stock of the old company have been deposited under the reorganization plan.

Newfoundland Pulp Issue.

Messrs. Albert E. Reid & Company, of Newfoundland, offer in London £100,000 5½ per cent. first mortgage debentures at 95, the proceeds of which are to develop the Newfoundland pulp and paper industry.

The Buffalo and Fort Erie Railway Company will apply to the Ontario Legislature for an Act increasing its capital stock and authorizing the company to make a further issue of bonds and to create an issue of first mortgage and refunding sinking fund bonds for the purpose of electrifying the railway.

Saskatchewan Bond Corporation.

The Saskatchewan Bond Corporation, Limited, with head office at Moose Jaw, has been incorporated with a Dominion charter and authorized capital of $1,000,000. Mr. R. Murdie, late of the Dominion Bank at Toronto, is the manager. The officers and directors are as follows: Richard Loney, president (ex-president Board of Trade); J. Edward Caldwell, first vice-president, barrister, president Moose Jaw Securities, Limited; C. E. Austin, second vice-president, formerly treasurer and general manager Saskatchewan Flour Mills, Limited (Robin Hood); A. W. Irwin, treasurer, financial agent; D. E. Macintyre, secretary, general agent; H. Y. Smith, real estate broker; Harry F. Stirk, managing director Moose Jaw Securities, Limited; W. B. Hooker, financial agent; A. E. Beaton, financial agent; E. J. Chegwin, general secretary Young Men's Christian Association; James Armstrong, farmer; R. H. Fulton, general manager, Bank of Saskatchewan; W. E. Burke, manager Western Tire and Rubber Company; J. L. Thomas, real estate; S. A. Hamilton, lumber dealer, and Geo. Meldrum, financial agent.

◆

DEBENTURES AWARDED.

Tilsonburg, Ont.—$24,878 5 per cent., 30 instalments, to Messrs. W. A. Mackenzie & Company, Toronto.

OTTAWA PUBLIC UTILITIES

The occurrence of the annual meeting of the Ottawa Electric Railway Company, and the satisfactory earnings reported are more than usually interesting owing to the reports current concerning the Ottawa Light, Heat and Power Company. That company is a holding company in which is deposited the majority of the shares of the Ottawa Gas Company, and the Ottawa Electric Company. These concerns do not hold their annual meetings for a few weeks to come. Considerable curiosity has been aroused by the strength of the stock of the Ottawa Light, Heat and Power Company, various theories, therefore, having been advanced. Among these is the old theory that the Ottawa Electric Railway will turn in its stock for exchange in the Power Company, in which case the latter would be the holding company for all the public service corporations of Ottawa city. In some quarters, this report is disbelieved. In fact, in best informed circles, the amalgamation theory is not put forward. Instead, it is stated that the capital of Ottawa Power is to be increased or the dividends are to be increased—one or both—and that later on the amalgamation may follow. Whatever the reason, Ottawa Light, Heat and Power stock is strong, and it is stated that a distribution of some character will shortly be declared for the shareholders.

PROPOSED BRANCH LABORATORIES

For some time, dissatisfaction has been heard in rtain quarters respecting the effect of the operation of e Underwriters' Laboratories at Chicago upon the les of manufactures which have to be approved by the boratories. These complaints have been brought to head by Mr. C. Hamilton Wickes, the British Trade ommissioner in Canada, who has filed with the Imrial Board of Trade an exhaustive report tracing the rmation and scope of operation of the Laboratories.

The Laboratories are situated at Chicago, but, as r. Robertson, secretary of the Western branch of the nadian Fire Underwriters' Association, has pointed it in *The Monetary Times*, the insurance companies e thoroughly satisfied as to their independence and liability. He thinks, also, that their location is very itable, Chicago probably being as central as any point r the principal manufacturing industries of North merica. In a letter to *The Monetary Times* he adds: The insurance companies have always felt and known at it was better to have one good institution, qualified d equipped in the highest degree, rather than more merous testing and examining stations where the quipment and staff could not hope to be so complete or pable, and which would not, therefore, have the full nfidence of the manufacturers."

On the other hand, Mr. Wickes says there are real rievances from the manufacturers' viewpoint, and he ggests the following alternative remedies:—

1. A laboratory in Canada on the lines of the Underriters' Laboratories, Chicago.

2. A purely British laboratory.

3. A laboratory in England, to be practically an offshoot of the Underwriters' Laboratories, Chicago—run on similar lines, utilizing the experience gained at Chicago, employing equally competent but British consulting and technical engineers. "The article," approved by label or tab, to be accepted by both the British and Chicago Laboratories. The same system of careful experiment and tests to be followed by careful consideration of reports before they are issued, and the adoption of the same or a similar system of "labelling and tabs," accompanied by some similar system of inspection.

"I am of the opinion," he adds, "that the last, No. 3, would be to the advantage of the British manufacturer (No. 1 is open to many of the objections raised against the Chicago Laboratories); it would throw open to our British manufacturers not only the Canadian but the United States market, as the labels or tabs would carry equal consideration by inspectors throughout North America."

The Monetary Times has canvassed the situation among those who operate the laboratories and among the fire insurance companies which support them. The most important declaration, which has already been printed in our columns, is that of Mr. W. H. Merrill, the manager of the Laboratories at Chicago. He says: "We are in accord with the views favored by Mr. Wickes in his third recommendation, that is, the establishment of a Laboratory in England." Mr. Merrill thinks that the place to inspect and label fire protection and fire prevention wares is at the factory where they are made—a reasonable contention.

The establishment of branch laboratories either in Canada or England is favored also by Mr. W. B. Meikle, general manager of the Western Assurance Company; Mr. E. P. Heaton, manager of the Insurance Department of the Canadian Manufacturers' Association; and Mr. J. E. E. Dickson, Canadian manager of the Law, Union and Rock Insurance Company, Limited. Mr. Alfred Wright, manager for Canada of the London and Lancashire Fire Insurance Company, sees no objection to branch laboratories, excepting on the ground of expense, provided the standards are kept sufficiently high to meet the exigencies of climatic and other conditions obtaining on the North American continent, the requirements for which must necessarily be more stringent than those of Great Britain.''

The consensus of opinion, therefore, appears to be favorable to a branch establishment. Such a branch, we think, would tend to increase further the efficiency guaranteed by the parent laboratories. It should satisfy the manufacturers, who are complaining, and at the same time the good cause of fire prevention in Canada would be given further and hand-in-hand assistance by Canada, Great Britain and the United States.

MONTREAL'S TRANSPORTATION

The Tramways topic continues to be one of the most discussed in Montreal. It is proposed that various organizations bind themselves together in order to bring about the desired improvements in the service. Unfortunately, the bulk of the suggestions made are entirely impracticable. One is that through cars should be run at certain hours of the day between the down-town section and Westmount. There is but one line of double track between those points, connecting by means of the up-town district. It is difficult to see how the through car is to facilitate matters when other cars are stopping at every block. The company's general manager and others have suggested that the stops be made less frequent on this route. Apparently the city council does not favor that proposal. They urge that nothing but a subway will meet the situation with finality. One of the aldermen suggests that the subway be constructed by the city, and that the underground line be owned by the city and leased to the company for operation. He declares that the company will not make any move in this direction, although it owns the necessary charter to carry out the work. But is the time ripe for subways either in Montreal or Toronto?

Mr. Robert, president of the company, supports the idea that it is not the company's intention to undertake the construction of an underground system at present. He thinks a better surface system is wanted, and declares that the company will surprise the city with what it will be able to do if the city will only co-operate with it. He does not say in what respect co-operation is desired. There is a terrible amount of talk on both sides.

It seems evident that the only possible way to relieve the congestion is to build more lines. The cars frequently follow each other as closely as they well can, and they often are held up for considerable periods because those ahead cannot get out of the road fast enough. It is likely that the first measure of relief will be afforded by cutting out some of the stops, a suggestion which finds general favor, but is likely to meet with criticism after it is put into effect. The second measure will possibly be to run cars through for considerable distances on certain streets. But without more routes this relief will be of but a temporary character. There seems to be a strange reluctance to discuss the question of new routes both on the part of the company and the city. Meantime there are grievances, and the Public Utilities Commission looks like a fish out of water.

TORONTO'S FINANCING

There has been much criticism, some deserved an some undeserved, respecting the manner in which th city of Toronto has handled its finances. Opinion ha become so sharply divided that the city authorities ar almost inclined to label even fair-minded critics of thei work as detractors of the credit of Toronto and c Canada generally. That is unnecessary, as every loya citizen wishes to see Canada's municipalities stand hig in the world's money markets. Whatever opinions ma be held, there are also some outstanding facts.

Early last year, Toronto had for disposal severa million dollars' worth of debentures. At that time th market was on the downward grade. What were the excellent offers were made to the city by Canadia houses for a part of the, or the entire issue, for sale These offers were refused. The mayor and city treasure then went to London to confirm what they had alread been told in Toronto by well-posted financial men. The were advised not to make a public offering of their debentures, and they then placed £1,200,000 one-yea notes at about 4½ per cent.

Now the city has placed in London an issue o £1,075,006 4 per cent. consolidated debentures at 92½ The public took only 15 per cent., leaving the remaining 85 per cent. with the underwriters. That in itself is no a serious fact, as the rest of the bonds will be placed from time to time. Toronto needs a lot more money. however, in the near future, and it will not help matters to have the underwriters busy so long in disposing of the former issue. Also, it cannot be overlooked that far better offers were made to the city early last year and refused. Four per cents. were placed before the British investor despite universal opinion that the day of the municipal 4 per cents. in London is over. It may be contended that Winnipeg later floated £750,000 4½ per cents. at par, and even then the public took only 25 per cent. of the issue. The reception to the Toronto loan did not help the Winnipeg loan, despite the difference in yields. Aside from that, the Toronto city authorities seem to have pursued an unfortunate course in their financing. Good offers for their bonds last year were declined; a useless pilgrimage to London was made; a temporary loan was forced upon the city; four per cents. were issued in a market which has no use for them; and nobody appears to be working in the interests of Toronto in the market. It is well known that all issues need proper market support, and we fail to see where Toronto is getting that support in London.

FARMERS AND THE BANKS

The farmers' claims have been prominently advanced during the present revision of the bank act, and it is pleasing to note that the Finance Minister, the members of the House, and the bankers themselves are desirous of further serving the agricultural interests through the medium of banking legislation. At this time, similar problems are confronting several of the United States. The Tri-State Grain Growers' Association recently appointed a committee to make an extensive inquiry on farm loans. The committee reported that it was well known to careful observers of agricultural conditions that "a revolution is going on in the methods and processes of farming; that, in fact, the business of farming is rapidly changing in its character from a mining to a manufacturing process. This change has necessitated an immense amount of new capital, for the purpose of furnishing better machinery, permanent buildings, fences, live stock, home improvements and good drainage; and with this demand for more capital has come a considerable interest in methods of securing it. In the area of well-developed farming, of dairy herds and beef cattle, of pork and poultry, of creameries and ıeese factories, of corn, clover and the feeding grains. he farmers in these sections for two more generations ave established a strong line of moral credit.”

The committee, which investigated conditions in Iinnesota, North and South Dakota, Iowa and Wis-onsin, thought that proposals to establish in America ıch organizations as the co-operative credit societies een in Germany, Denmark, Italy and elsewhere were ardly necessary, especially if it be kept in mind that ome modification of the present banking laws would ake it possible for farmers to secure loans on short-me paper as extensively as seemed needed. Any pro-osal to take over a plan which had been created in ıother land and made to meet their conditions, should viewed with suspicion, said the committee.

A Saskatchewan banker, who for many years has tudied closely and experienced both in the States and Canada, the relations of bankers and farmers, thinks ıat a great many of the wrongs about which the grain rowers of Canada are complaining, will soon right ıemselves, provided the growers do their part. He can emember when the prevailing rate on real estate loans ırough the Red River Valley was 10 per cent., and ost of the farmers were paying 2 per cent. a month r their short-time accommodation at the banks. This as righted itself through natural means and without gislation. The worst trouble, says the banker, in Vestern Canada is that the farmer and everyone else ıve been too willing to run into debt, and the remark common that “It is very funny if a man cannot make per cent. on money.” This is true in some cases, but ill a great many chances are taken by people who ould not take them if they had not been able to borrow freely and had been required to pay back what they orrowed a little more promptly. Some farmers and ome business men on our Western prairies have little ea of proper credits and the way a credit deal should handled.

Mr. Duncan Coulson, of the Bank of Toronto, ıinks that too much importance should not be attached the benefits of the clause in the proposed act relating loans to farmers on the security of grain and cattle their own possession, enabling a pledge or an assign-ıent to be taken as security. Such advances, he says, ven though accompanied by security under the act, ust rest largely upon the responsibility of the individual orrower. The grain given as security remains in his ıstody, and, therefore, the personal element must be rgely considered. At present advances are made to ırmers without this security, and as freely, he thinks, they will probably be made with it, and, considering ıe number of banking offices there are in the West, ıd the competition that exists between banks, the cases ıould be few in which responsible farmers do not re-eive the accommodation to which they are entitled.

THE HANDWRITING ON THE WALL

The following table shows the results of five recent anadian flotations in London:—

Issue.	Amount £.	Rate %.	Price.	Under-writers took.
rand Trk. Pac. Ry.....	479,300	4	94	73
ity of Toronto	1,075,000	4	92½	85
d., Dunvegan and B.C. Ry.	738,356	4	92	98½
ity of Winnipeg	750,000	4½	Par	75
erminal Cities of Canada	679,012	6	97	95

These figures speak volumes on London market onditions.

CITY MONEY FOR LOANS

The city of Calgary may regret the proposed policy of loaning its funds on mortgages to local applicants. Many cities have lived to regret the pernicious system of bonusing new industries, because it is bad business.

The loaning of civic moneys on mortgages is not good business. It bears the earmarks of future trouble. Municipal funds are a public trust. A public trust should keep out of spheres where risks, great or small, are involved.

AN EARLY BLUE BOOK

On January 13th, 1913, Mr. W. Fleet Robertson, provincial mineralogist, presented a preliminary detailed estimate of the mineral production of British Columbia for 1912 to the premier. This was immediately printed and circulated. Mr. Robertson and the provincial government are to be heartily commended for their initiative. The value of government blue books in Canada is considerably minimized by delay in collection of data and in publication. Government reports for the year 1911 continue to amble into this office, looking more blue and apologetic than usual. Many 1912 reports will be received when 1914 is here.

There appears to be no good reason for such lack of enterprise on the part of our governments and their printing departments. Government reports contain a vast amount of information not obtainable elsewhere. Their belated appearance makes them usually of so little value that they go to dust-covered reference shelves. Blue books with statistics and information of recent date will be not only of future, but also of immediate reference value. Mr. Robertson, British Columbia's mineralogist, has set an excellent example.

SMALL CHANGE

Crude oil prices do not seem to be very refined.

* * * *

Some of those Alberta oil companies might well be described as corking propositions.

* * * *

Toronto's loan in London failed largely because it went on all fours to the market instead of on 4½.

* * * *

The stock market movement in American Can made a great stir—not as much, though, as when an American cannot.

* * * *

The climax will come when the Suffragettes begin to mail themselves, instead of pepper, to the cabinet ministers.

* * * *

The transfer in eight years of the Derbyshire village Doveholes to a Toronto suburb might be described as ornithological emigration.

* * * *

King Menelik, of Abyssinia, and F. H. Malcolm, of Winnipeg, hold the record for consecutive deaths—the one physical, the other promoterial.

* * * *

There was only one dollar difference between two bids for a municipal bond offering. The market views of two firms at least are only 100 cents apart.

* * * *

Several banks propose to recognize the high cost of living by increasing staff salaries, as the high cost of living may not much longer recognize the banks.

“I shall order my men off, take my apparatus back gain, and let the building burn,” declared Fire Chief auder, of Edmonton, at a recent fire enquiry, “for there are some buildings in the city that are not properly constructed and are absolutely unsafe, and nothing less than fire-traps.”

PRACTICES OF WORLD'S BANKS

Redemption of Notes—As to Reserves—Value of the Branch System

By M. P. Langstaff.

III.—REDEMPTION OF NOTES.

(a) **Bank of England.**

In accordance with Peel's Act an arbitrary amount of notes was issued against Government securities in the custody of the bank. The remainder of the circulation is just what it would be if it were composed of gold exclusively, and there is, therefore, no need for a special provision for redemption.

(b) **The Banks of Scotland.**

There is a frequent redemption of notes through the Edinburgh clearing-house, and settlements are made between banks by drafts on London. No deposited security for bank notes has ever been required in Scotland, but note holders have a prior lien on the assets. Moreover, in some cases the liability of shareholders for note issues is unlimited.

The branches pay out only the circulating notes of the bank, which are redeemable at the Head Office.

(c) **The Bank of France.**

There is no special provision for redemption of notes.

(d) **The Reichsbank of Germany.**

The Reichsbank redeems its notes at Head Office or at any of its branches, there being no special provision for redemption.

(e) **The National Banks of United States.**

Each bank must maintain in the United States Treasury a redemption fund of "lawful money" equal to 5 per cent. of its note issue. Thus the Treasury is the sole redeeming agency outside of the bank itself.

(f) **Canadian Banks.**

All banks are required by law to make arrangements to insure the par value of their circulation in any and every part of Canada, and for this purpose to establish redemption agencies at the chief city of each of the seven provinces and at such other places as may be determined by the treasury board.

In practice the notes of the different banks are exchanged daily at the clearing houses in the larger cities. At other places they are exchanged between the nearest branches, and balances are paid either in Dominion notes or by drafts on the commercial centres. The notes remain in circulation on the average 30 days after each issue, the whole circulation being redeemed twelve times each year.

IV.—RESERVES.

(a) **Bank of England.**

The Bank of England is not required by law to keep any fixed percentage of reserve, but keeps such proportion as experience shows to be needful. It has found that its line of safety ranges between 33 and 47 per cent.

(b) **Banks of Scotland.**

The Scotch banks, as is the case with those of England, are not required by law to keep any fixed percentage of reserve. As the branches pay out only the notes of the parent bank, it is necessary to have real money only in one place. Thus the maximum of business is done with the minimum of gold, and usually the gold held by the banks is not more than 5 per cent. of their deposits.

(c) **The Bank of France.**

The cash reserve to be held is fixed by the bank itself. Conant says: "By the force of circumstances, rather than by positive legislation, the Bank of France has been made the storehouse for a vast mass of specie, conveniently represented in circulation by bank notes, and thus holds in its charge a large part of the currency of the country. As a specie thus held becomes in fact a reserve protecting all the cash liabilities of the bank, it is clear that it is an effective safeguard against ordinary chances of an insufficient banking reserve, and that the Bank of France thus secures great steadiness of movement in its ordinary operations in compensation for the heavy responsibility thrown upon it. Demands which would otherwise be a serious drain upon its banking resources make no sensible impression upon a reserve so greatly disproportionate, and the bank can often offord to wait for the tide to turn in its favor under circumstances which would compel its neighbors in England or Germany to use every effort for immediate self-protection."

(d) **The Reichsbank of Germany.**

As I said above, there is a limit fixed to the amount notes which can be issued and not covered by cash—all excess of this limit being taxed 5 per cent. But it is a required that the cash held (exclusive of the notes of ot banks) shall in any cases be equal to at least one-third of total circulation, and that the remainder shall be protected discounted paper, having not more than three months to r The notes issued under this system thus rest upon a sc basis of specie; but in addition, the presence of an am specie circulation in the country is secured by a provis prohibiting the issue of any notes of lower denomination th 100 marks.

(e) **The National Banks of United States.**

Banks in "Central Reserve" cities (New York, Chica St. Louis) are required to maintain a "lawful money reser equal to 25 per cent. of deposits. Banks in other "rese cities" must also maintain 25 per cent., but their deposits the national banks of the central reserve cities may be cou ed as one-half this amount. In all other places the ba are required to hold a 15 per cent. reserve, three-fifths which may consist of deposit accounts in banks in central serve cities or other reserve cities. In all cases the fu kept by the banks with the United States treasurer for redemption of their notes are counted as part of their le reserves.

"Whenever the reserve falls below the prescribed li the bank shall neither increase its liabilities by making new loans or discounts otherwise than by the purchase sight bills of exchange, nor shall it make any dividend u the reserve has been restored to its due proportion."

(f) **Canadian Banks.**

Canadian banks are required by law to keep 40 per c of their cash reserves in Dominion notes, but this law, w obligatory, is now practically of no consequence, since banks, as a matter of convenience, hold much more than per cent. in this form.

V.—BRANCH SYSTEM OR OTHERWISE.

(a) **The Bank of England.**

Dunbar, referring to the English system, says: " private banking houses have steadily declined in num . . . On the other hand, the joint stock and limited c panies have grown rapidly in the last two generations, b in relative and absolute importance. They have felt strong tendency to concentration which marks the clos years of the century, and by consolidations have even dim ished their number, but with a vast increase, not only of dividual, but of aggregate importance. At the same time, the establishment of branches they have everywhere brou themselves into close contact with the general comme life of the country, so that most of the banking of Engl trade and commerce is now carried on by their agency.

"The Bank of England, on the other hand, having est lished eleven branches before the year 1830, has gone further in that direction. It enters into little competit with its younger neighbors for the business which is offe by the growing industry and wealth of the nation, but satisfied with the scope which its position as the head of banking hierarchy affords for employing its capital and energies of its managers."

(b) **The Banks of Scotland.**

White, in his "Money and Banking," says: "One feat of the Scotch banking is its remarkable development of branch system by which deposits are secured from every n and corner of the country and by which capital is transfer easily and quickly to the places where the demand for it greatest. There are twelve banks in Scotland, and they h 1,065 branches. The system has been so developed and tended that banking facilities reach every town and ham in the land. Whatever assistance banks can give to indus is available to the poor and to the rich on equal terms. no other country has the principle of equality in bank fav been carried further. In no other has greater pains b taken to bring them to the poor man's door."

(c) **The Bank of France.**

The law requires the Bank of France to maintain at le one branch in each department of France. In many pla too small to support a branch with the usual complement officers and employers, the bank maintains subsidiary offic

The branches of the Bank of France are very ill adap to local wants. Dunbar says: "A branch of the Bank France has a capital allotted to it by the bank, and is th required to carry on its business strictly under the sup vision of the latter, and without engaging in any operat with other branches, except by special leave, so that its bu ness, even to the rate of discount, is directed by a pol settled at Paris and not with reference to local wants. It is a board of directors selected by the governor of the ba from a list of candidates in some cases made up at Paris in some by local stockholders, where the latter represent of the capital allotted to the new branch. The real authority, however, is exercised by a manager appointed by the government, frequently a stranger, and assisted by subordinates sent from the capital. That under such circumstances more than one-half of the discounts of commercial paper made by the bank should be made at its branches, as has been the case ever since 1848, is better evidence of the great demand for banking facilities in the provincial towns than of the success of the present organization in answering this demand."

(d) The Reichsbank of Germany.

The Reichsbank has an extensive network of branches, and unlike the Bank of England, it competes energetically with the independent and joint stock banks for the general business of the country. Its 310 branches of all grades, carry on its operations in all parts of the Empire, and easily maintain the bank in its leading position among German banks.

(e) The National Banks of United States.

The United States statues do not permit branch banks in urban communities, but their place is largely taken by the smaller national banks, the state banks and the trust companies.

(f) Canadian Banks.

All the larger Canadian banks have branches, and the system of branches is very similar to that of the Scotch. One great advantage that lies in this branch system is the tendency towards equalization of the rates of interest in different parts of the Dominion. In this connection White says: "A bank receiving deposits in Halifax (say) may lend them to following day through its branches and by the issue of its own notes at (say) Winnipeg, the branches redeeming the notes by drafts on the Head Office, when they are presented for that purpose. The rate of interest in the smaller towns of the West is only 1 per cent. or 2 per cent. higher than in the larger cities of the East on the same kind of loans. To this equalization of the rate of interest both the branch system and the freedom of note issue contribute."

(To be continued).

CANADA CEMENT COMPANY

Annual Statement Omits Amount Written off for Depreciation—Property Account Shows Increase

Monetary Times Office,
Montreal, February 12th.

The annual statement of the Canada Cement Company for the year ended December 31, 1912, has just been issued, and shows profits of $1,394,677 against $1,382,039 a year ago, the surplus for common stock being 2.10 per cent. against 2 per cent. a year ago. The appearance of this statement has been anticipated with interest, not only by the shareholders of the company but by the public. It may be recalled that last spring or summer an order-in-council was passed at Ottawa by which a material cut in the duty against cement entering Canada was made, the object being doubtless to afford a measure of relief to the consumers of cement in Canada, more especially to those of the Northwest where the requirements for cement seem to have been quite pressing. It was claimed at the time that the cement mills in Canada were unable to keep up with the demands for consumption and that United States mills were prepared to accept very much lower prices than the Canadian mills, but that the freight and duty increased this price unduly, thus permitting Canadian cement to be sold at high prices. Whatever may have been the truth in this statement, the duty was lowered for the summer period and undoubtedly a heavy importation of cement from the United States followed. However, the importers did not realize the advantages originally expected. Previous to the reduction in the duty, the price at the mills in the United States was somewhat exceptionally low, and shortly afterwards it was observed to advance. That this was due to the Canadian demand is hardly likely, although such a claim was made at the time. Rather was the advance due to the fact that about that time the period of industrial dullness in the United States began to give way to a more active condition, and this taking place along with the demand from Canada combined to stiffen prices on the American side of the border. However, between this advance in price and the freight rates and the remaining duty, the advantage reaped by Canadian consumers was not so great as was at first hoped it would be.

Throughout the summer, there were many predictions and statements concerning the probable effect the cut in the duty would have upon the profits of the Canada Cement Company. Claims and statements favorable and unfavorable were made. Now we have the actual figures, and although the statement does not contain all that it should, it goes to support the statement that the company would do as well in 1912 as it did in 1911.

The following statement shows the profit and loss:

Net profits for year 1912		$1,394,677
Bond interest	$375,418	
Pfd. stock div.	735,000	
		1,110,418
Surplus carried forward from year's operations		284,259
Surplus at beginning of year		496,802
Present surplus		$ 781,061

As in the statement for the year 1911, the statement for 1912 omits to show how much was written off for depreciation and ordinary renewals and repairs. This is an important point, as it has a direct bearing upon the profits and gives information which is necessary to a proper view on the matter of profits. There was shown an amount of $75,000 for extraordinary renewals and repairs, so that when this is added to the amount written off for the ordinary account the total provision will doubtless have been quite liberal.

Some Interesting Items.

Among the items which attract most attention in the statement of assets and liabilities is the reduction in cash on hand. A year ago the amount was $554,009, while at the end of 1912 the amount was $39,234. Also, a bank loan and overdraft was created during the year and at the end amounted to $340,276. The accounts payable increased $240,000 and the investments were reduced $251,068. On the other hand, the accounts receivable increased $113,101, and the inventory of clinker, cement, etc., $407,372. The alterations made during the year were quite marked. The biggest change is in the property account. This now amounts to $29,918,672, showing an increase of no less than $1,123,237 for the year. This explains the reduction in the cash and investments and the increase in the bills payable. The company has been carrying on construction in Winnipeg and Exshaw, and on these plants, no doubt, has been spent the sums referred to.

Assets and Liabilities.

A summary of the changes in the assets and liabilities shows the following:

Assets.

	1912.	Increase.	Decrease.
Property account	$29,918,672	$1,123,237	......
Investments	42,234	....	$251,068
Deferred charges	77,936	48,021	......
Current assets	2,701,725	....	821
Total assets	$32,830,567	$1,171,258	$251,889
Net increase in assets			$919,369

Liabilities.

	1912.	Increase.
Bonds	$ 6,256,066	......
Stocks	24,000,000	......
Current liabilities	1,589,539	$562,109
Reserve fund	203,000	73,000
P. & L. account	781,061	284,259
Total	$32,830,567	$919,369
Net increase in liabilities		$919,369

Upon the appearance of the statement many predicted a decline in the price of the stock. This, however, has not taken place in spite of the fact that the markets have been anything but favorable during the past few weeks. It is generally thought that for the company to be able to carry forward a surplus of 2.10 per cent. after all appropriations and charges had been met, as against 2 per cent. a year ago, was not a bad record under the circumstances.

◆

The organization meeting of the shareholders of the new Marcil Trust Company, Limited, was held recently at the company's head office, Montreal. The following were elected directors: Mr. George Marcil, president; Hon. Charles Marcil, LL.D., P.C., M.P., K.L.H., vice-president; Mr. John P. Callaghan, managing director and secretary-treasurer; Mr. Joseph A. Ogden, N.P., and Mr. Alfred Gravel. The company is taking over the business and assets totalling $2,500,000 of Geo. Marcil & Company and the Montreal Land Corporation, hitherto conducted alone by Mr. George Marcil. The company's capital has been fully paid up, and is held by only a limited number of persons. There will be no stock offered for sale to the public, but a bond issue is being considered.

BANK AUDIT OR GOVERNMENT INSPECTION

Finance Minister Discusses Proposed Act and Says Amendment is a Great Advance in Our Legislation

The chief point of discussion in the parliamentary debates respecting the proposed Bank Act was the question of audit or of government inspection. When the Minister of Finance moved the second reading of the bill he noted a difference between audit and inspection, stating that inspection presumed a passing upon the quality of loans. He pointed out some difficulties in the way of doing that, especially in connection with a system such as we have, a branch system with some 2,800 branches—some, of course, small, but others important and some large, spread throughout Canada and in different parts of the world. Audit means, he thought, more than the mere checking of entries. It would be the duty of competent auditors to not only do that, but if there were any ultra vires or fraudulent or suspicious transactions to bring them to the attention of shareholders, and to have them remedied.

Head Office Inspection

As to the head office inspection, it was true that failures in Canada had usually taken place by reason of fraud and dishonesty at the head office. That had been the most convenient place, but he was far from saying, and he did not believe any one would say, that that was the only place, in a system such as ours, in which fraud could take place. It must be obvious to all that legislation could not absolutely prevent loss through fraud and dishonesty. Where there was collusion, means would be found to defeat, to some extent, the closest audit that could be invented, and he thought that all legislation could do was to protect the depositor and the public and the shareholders to the best of our ability, reasonably protect him.

It had been pointed out that the appointment of auditor, while vested by the Act in the shareholders, would really be made by the directors. Any suggestions that would ensure that the auditors appointed should be firms of the highest reputation and standing, men who would not collude, even if they were invited to collude, would receive the most careful and earnest consideration not only of the banking committee, but of the government. The suggestions that have been made would be considered. There was a provision in the Act that the government might ask the auditor appointed by the shareholders to make an inspection of the bank, if anything appeared in the statement handed into the government, or anything called to the attention of the government, would seem to require examination, and report to the government.

''I will be prepared to consider any suggestions that will tend to make that investigation a greater safeguard than the bill provides,'' said Mr. White to the House. ''A suggestion has been made as to a minority requesting that an auditor be appointed. We will be prepared also in committee to carefully consider that; in fact, any suggestions of a practical character are not only invited, but will be welcomed, because we have all only one desire, and that is to safeguard, as far as we can by effectual legislative safeguards, the interest of the depositors, the shareholders and the public generally.

Inspection of Insurance Companies

''Something has been said of the inspection of insurance companies. There is this essential difference between the two. An insurance company at its head office has the securities in which the moneys it has received are invested. The class of securities in which it may invest is defined in the Insurance Act; there is no difficulty in inspecting these securities; they are stock securities or bonds, tangible securities. It can be readily ascertained whether or not they are under the corporate powers of the insurance companies, and there is this essential difference between banks and life insurance or loan companies which invest in mortgages and municipal debentures, that the banks invest upon personal securities, upon notes all over Canada and the world, that they have $100,000,000 worth of current loans or discounts in a year. These are principally upon personal security, so there is that essential difference between the banks on the one hand and insurance and loan companies on the other.

As to the Audit System

''Speaking generally with regard to the audit system provided by the Act, it practically is the suggestion of Mr. McLeod, who was the general manager of the Bank of Nova Scotia, and a pioneer in this question of external inspection. The audit which is provided in this bill is the audit he had in mind. I am sure that we can so mould the provisions of this bill as to ensure that the auditors appointed by the shareholders at their annual meeting shall be reputable men of standing and capacity who will realize their duty under the Act and who will not be unduly influenced, and who will not be in a position to be unduly influenced by directors or officials or any one else. I think that can be accomplished, and we shall try to bring that about, at the same time being willing to consider any other suggestions that have been made or may be made. It has been said that the audit system will be futile and ineffectual. I hesitate to believe that. The audit is a well recognized principle and has been for generations throughout the British world.

Law in the United Kingdom

''The law in the United Kingdom provides for audit substantially as we have provided here. In all the provinces of Canada there is a system of audit under which auditors appointed by shareholders examine the affairs of a company, check over the cash and securities, and make their report to the shareholders. Personally, I believe it is of very great value, but a different opinion has been expressed as to that. As against that opinion I would just set out the fact that, as I have stated, audit is recognized throughout the British Empire as a very beneficial check upon the administration of officers of companies of all kinds, and, therefore, I cannot believe that it would be ineffectual.

''On the contrary, I believe that auditors of high standing, who are not so elected as to be under the improper influence of any set of men, would carry out their work with credit to themselves and with great benefit, so far as safeguards are concerned, to the shareholders and to the public. I think that is the principle that underlies English law relating to audit.

Good Banking Legislation

''When we came to consider this, when we found, as I have stated, that in the bill left by my predecessor there was this very form of audit made permissive, when I looked up the English law and found it was compulsory in Great Britain and that it was substantially the law throughout the British Empire, I thought, and still think, that the step made in this Act is a forward step, and that the present bill is decidedly in advance in many respects of any legislation relating to banking which we have had in this country up to date.''

◆

BRITISH COLUMBIA PERMANENT LOAN'S PROGRESS

The financial year of the British Columbia Permanent Loan Company, which closed on December 31st, 1912, showed the satisfactory progress achieved by this company. The following figures show the increase made during the past year:—

	Dec. 31, '12.	Dec. 31,'11.	Increase.
Assets	$4,141,259	$3,553,429	$587,830
Earnings	315,564	270,392	45,172
First mortgage loans	3,568,200	2,880,325	687,875
Sterling debentures	864,368	730,428	133,940
Permanent capital	844,172	700,000	144,172
Reserve	600,000	500,000	100,000

Two semi-annual dividends were declared at the rate of 10 per cent. per annum on the permanent stock, and $100,000 added to the reserve. The reserve fund, together with surplus profits, now amounts to $629,937.81.

◆

TRUSTS AND GUARANTEE COMPANY

The net profits of the Trusts and Guarantee Company for 1912 exhibited a gain over those of the previous year, being $117,906 as compared with $110,194. The company's subscribed capital stock amounts to $2,000,000. It has a balance at credit of profit and loss of $304,540. The trust funds with interest accrued amount to $3,599,141. The company has estates and trusts under administration of $5,196,383. Among the assets are mortgage loans, call loans, debentures and other securities totalling $1,251,624. Other assets are office premises, $282,768; real estate, $70,274; cash on hand and in bank, $90,716. There is a guaranteed trust account amounting to $3,599,141 comprising securities on real estate, stock, bonds, debentures, etc., $3,457,683, and cash on hand and in bank, $141,458. The following table gives an idea of the progress of the company during the past two years:—

	1905.	1912.
Guaranteed trust funds	$ 82,022	$ 3,599,141
Estates trust funds	644,442	5,196,383
Total assets	2,870,006	11,146,006
Paid-up capital	1,037,883	1,344,900
Net profits	68,002	117,906

◆

NEW ROLLING MILL

The Owen Sound Rolling Mills Company, Limited, has been incorporated under a Dominion charter, with a capital of $500,000. The company will build a rolling mill at Owen Sound, Ontario, where it will manufacture wrought iron and steel pipe and tubing, both butt weld and lap weld, and pipe fittings, steel and cast iron elbows, bar iron and steel, angle iron and steel rods and structural steel, fish plates, spikes and steel rails. It is said that the capital will be increased largely in the near future.

GOVERNMENTS AND RAILROADS

Effect of Policies in Canada and the United States—Question of Increased Costs

The effects of government policies upon railroad development in Canada and United States are discussed by Mr. H. M. P. Eckardt in the New York Journal of Commerce. The new first track railway mileage built in the United States in 1911, he says, amounted to 3,067 miles, as compared with a total of 1,899 miles in Canada. For the year 1912 the figures are: United States, 2,997 miles; Canada, 2,232 miles. In 1911 the Dominion acquired new mileage to the extent of 62 per cent. of the mileage acquisitions of the United States, notwithstanding that Canada's population is but one-twelfth of the population of the United States. Next year, in 1912, the mileage built in the Dominion increased 333 miles, or 17 per cent., while that built in the Republic decreased 70 miles, or about 2 1-3 per cent. So it devolved that Canada's new mileage in that year amounted to 75 per cent. of her neighbor's.

That there will be extensive additions to the Canadian mileage in 1913 and 1914 is indicated by the following figures, taken from an abstract issued by the Ottawa Department of Railways and Canals. This abstract states that as at June 30, 1912, the mileage under construction, apart from at least 1,200 miles merely projected, amounted to 8,826 miles. This is accounted for by the various provinces as follows: Alberta, 2,614 miles; Saskatchewan, 792 miles; Manitoba, 471 miles; British Columbia, 1,209 miles; Ontario, 1,857 miles; Quebec, 1,345 miles; New Brunswick, 448 miles.

Construction of New Lines

Perhaps it will be pointed out, by way of explanation of the Dominion's relatively greater activity, that the heavy movement of farmers and other settlers into Western Canada necessitates extensive construction of new railway lines. The new settlements provide traffic for new railways, and, on the other hand, the new lines increase the profits of the farmers and enhance the value of land and other property. However, this matter of the Canadian immigration movement does not wholly explain the difference in conditions. There are portions of the United States which are undergoing development almost as rapid as that of Alberta and Saskatchewan. Several of the southwestern states are making phenomenal gains in population and in value of annual products. And the population and production of Washington, Oregon and California are growing rapidly.

In all probability these portions of the country, and other portions too, have quite as much need of new railway lines as have the new Canadian provinces. The provision of better transportation facilities there would have beneficial effects on all classes of the population. Costs of production would be lowered, land and other values would be increased, but there does not seem to be much prospect of aggressive railway building anywhere in the country. If the executive of any American railway company proposed, under present conditions, to build extensions on the scale of the Canadian Pacific's annual extensions, they would almost be classed as lunatics. It might be that the proposed additions would draw traffic from good territory, but nevertheless there would be many of the stockholders immediately concerned who would be inclined to sell out their holdings if their company proceeded to enlarge its system and thereby expose itself in greater degree to the attacks and exactions of the legislative bodies.

Profits and Mileage

If there existed a prospect of fair and reasonable profits for the increased mileage, in other words, if the purchase of the new securities representing the additional property promised to be a good investment, the stockholders would be glad to provide the necessary funds. Unfortunately, that prospect or promise does not exist. Everybody knows that the margin of profit in railway operation tends to diminish. The expenses have shown an irresistible tendency to increase.

Pressure from the labor unions for higher wages, increased cost of materials, and, latterly, high rates of interest on securities and loans, have increased the expense accounts. And also, the rapidly rising rate of taxation, the multiplication of laws designed to safeguard the lives and persons of employes and passengers, and other enactments, at the instance of labor unions, the real purpose of which was to force the railways to employ more men for a given piece of work, have had the same effect.

Increase in Expenses

Hence the investment public has arrived at the conclusion that a more or less continual increase will occur in the expenses of the transportation systems, while the attitude of the Interstate Commerce Commission appears to preclude an increased ratio of revenue. In the case of the richer railways it is recognized that as things stand at present they can probably pay dividends at current rates; but the unsettling thing is that if the present movement against the railways continues, even these strong companies may have to reduce dividends. And, as for the weaker roads, scarcely anybody would buy their junior securities for investment purposes. So it will be seen that a too strict limitation of the profits to be derived in the transportation business may become an important factor in lessening the efficiency of the companies or systems.

There is no inducement for fresh capital to enter the field; the weaker systems must fall behind and grow weaker still; and the strong ones may be left with a monopoly. It is worth while taking into serious consideration the question whether it is in the public interest to work toward monopoly in that manner, trusting to the government's power or ability to regulate and control such monopolies as develop.

As to Dividend Expectations

It is quite possible—some will think it probable—that the interests of the people would be best served by allowing the stockholders of railways and other big corporations to have expectations of satisfactory and increasing dividends, to accrue as the result of increasing the usefulness of the corporations owned by them. If they were permitted to have such expectations, there would no longer be any difficulty in financing railroad requirements on satisfactory terms; and it is but natural to suppose that the construction of new mileage would be actively resumed.

It was mentioned that the better equipped roads could stand the costs, as at present, but the prospects of indefinite increase of operating costs had a weakening effect on them. In the same way it can perhaps be said that the existing railway facilities are sufficient, after a fashion, for the needs of most of the states. But the requirements of the country are increasing by leaps and bounds, even in the older states, while the railway mileage is increasing very slowly or not at all. If that state of affairs lasts a decade or two, the United States will assuredly fall behind with its equipment.

Question of Punishment

It is unfortunate, to be sure, that in the past, railway magnates and financiers have gone too greedily after riches. They have in many instances hired the cleverest corporation lawyers to show them how they could ride roughshod over everybody without breaking the laws. One can understand that such conduct would produce a natural desire to punish; but the punishment should not be carried so far as to seriously injure the country.

Better let them go free and guard against the repetition of such offences, if it can be done without crippling the nation. In the meantime the Canadian legislatures—federal and provincial—are vying with each other in encouraging railway building. Railway bonds are guaranteed; subsidies of cash and lands are granted, and other inducements offered. Parties who buy the best railway stocks in Canada have reason to expect an increasing return therefrom.

◆

CONTINENTAL FIRE INSURANCE COMPANY

The many who invariably look first to policyholders' security, when examining an insurance company's financial statement, will not be disappointed at the security provided by the Continental Fire Insurance Company, of Winnipeg. Their total assets are $59,502. From that sum must be de- ducted total liabilities to the public of $9,106, leaving a balance of $50,396. To that should be added uncalled capital amounting to $335,475, thus affording total security of $385,-871 to policyholders.

At the end of the past year, there were losses of $250.000 under adjustment. The reserve for unearned premiums was $51,183 are $8,856. The company's investments amounting to divided as follow:—Municipal and school debentures, $35,-589.63; first mortgages, guaranteed investment, $14,000; ac- crued interest, $1,593.92. The balance of the revenue account is $2,031. The statement reflects a healthy position.

◆

DOMINION PERMANENT LOAN COMPANY

A further sum of $30,000 was transferred to the reserve fund of the Dominion Permanent Loan Company last year. That account now amounts to $403,000. The profit and loss account shows that during 1912 dividends amounting to $70,-000 were paid and that the sum of $612 was written off office furniture and fixtures. There was a balance of $[illegible] to the credit of profit and loss.

The company's liabilities are made up chiefly of deposits and accrued interest, $221,337; and debentures and accrued interest, $2,030,038. The assets are as follows:—Mortgages and other securities, $3,803,710.91; real estate, $15,230.80; office fixtures and furniture, $5,777.55; sundry accounts, $3,-300.54; cash on deposit and on hand, $92,105.21; total, $3,-921,523.10. The surplus of assets over liabilties amounts to $1,668,613.

The following directors were elected at the annual meeting:—Hon. J. R. Stratton, Peterborough; Messrs. D. W. Karn, Woodstock; C. Kloepfer, Guelph; T. H. Johnson, M.L.A., Winnipeg, Man.; Geo. H. Cowan, K.C., City Counsel, Vancouver, and F. M. Holland, Toronto. At a subsequent meeting of the directors, Hon. J. R. Stratton was elected president, and Mr. D. W. Karn, vice-president.

◆

HURON AND ERIE LOAN AND SAVINGS COMPANY

A profitable year of business is shown in the Huron and Erie Loan and Savings Company's 49th annual financial statement. The company's balance of profit after defraying expenses of management and all other charges, etc., amounts to $425,385, and the reserve fund with undivided profits is $2,284,208. The business of this company in the west amounts to three million dollars, and with the exception of $70,000 lent in Winnipeg and Regina is on approved farm properties, with the exception of office premises no real estate is held.

Four quarterly dividends of 2½ per cent. each, with a quarterly bonus of ¼ of one per cent., making a total dividend distribution of 11 per cent. for the year. The president, Mr. T. G. Meredith, K.C., in speaking of the company's assets, remarked: "It affords me pleasure to say that the past year has been the most profitable in the history of the company. The assets have increased over $800,000 during the year, and now amount to nearly 15 million. The net profits amount to $335,163.11, an increase of nearly thirty-five thousand dollars over 1911, and equivalent to better than 16½ per cent. on the company's average paid-up capital."

The cash value of mortgages is $12,490,769 less $125,221 retained to pay prior mortgages. And the general outlook is for a continuance of the company's progress.

The company's achievement has not only given satisfaction to the management and creditors but also to its shareholders and clients.

TELEGRAPH COMPANIES IN CANADA

First Official Statistical Returns — Twelvemonths' Revenue is Five Millions

In an interesting statistical report, the first issued on telegraph interests in Canada, Mr. J. L. Payne, comptroller of statistics, states that the capital liability of telegraph companies operating in Canada was reported to the department at $202,580,365, of which $160,342,873 was represented in stocks, and $42,237,492 in bonds. The statements which created this total related to several companies having headquarters outside the Dominion; on the other hand, capital liability was not attached to the Canadian Pacific, the Temiskaming and Northern Ontario, and the Dominion government telegraph service.

Of the distinctly Canadian corporations, the capital liability was made up as follows:—

	Stocks.	Bonds.
Canadian Northern Telegraph Company...	$ 500,000	$800,000
Grand Trunk Pacific Telegraph Company..	100,000	......
Great North Western Telegraph Company.	500,000	......
Marconi Wireless Telegraph Company....	5,000,000	......
North American Telegraph Company....	200,000	......
Total	$6,300,000	$800,000

Canadian Companies' Property, etc.

The cost of real property and equipment was put down at $184,149,677, of which a large percentage had reference to foreign organizations. The figures of Canadian companies were as follows:—

Canadian Pacific Railway Company	$6,696,421
Dominion Government Telegraph Company	1,975,000
North American Telegraph Company	57,522
Pacific Cable Board	87,133
Temiskaming and Northern Ontario	84,250
Total	$8,900,326

The foregoing figures require explanation. In the first place, the alleged cost of the telegraph property of the Canadian Pacific Railway Company is an appraisement of present value.

The actual outlay was probably much lower, and the company does not assume any responsibility in connection with the valuation. It is claimed that a separation was not made at the time of construction as between the cost of railway and commercial lines.

Moreover, in some cases the same wires are used for both purposes. The cost of the Dominion Government Telegraph Service is also an estimate. The figures attached to the Pacific Cable Board relate wholly to expenditures in Canada. The cost of the whole work was in excess of $10,000,000.

Revenue and Operating Expenses

Revenue from operation for the year ended June 30, 1912, amounted to $5,216,170.92. These figures relate wholly and definitely to Canadian business, with this qualification: So far as the Western Union Telegraph Company is concerned, it was not possible to give exact information. The best that could be done under the circumstances was to make an arbitrary assignment of income and outgo to the Canadian end of the business.

In doing this, there is cause for the inference that too low an apportionment was made of Canada's share in the business of the Company, to which might have been added the immense volume of telegraph business which passed through the offices of the three cable companies in Canada and which are operated by the Western Union. It is hoped to have a better adjustment made for the current year.

The total revenue was made up as follows:—

Canadian Northern Telegraph Company	$ 226,445.45
Canadian Pacific Railway Company	3,009,767.84
Dominion Government Telegraph Service	200,330.20
Grand Trunk Pacific Telegraph Company	55,392.47
Great North Western Telegraph Company	1,161,414.92
Halifax and Bermudas Cable Company	68,805.00
Marconi Wireless Telegraph Company	143,018.00
North American Telegraph Company	26,331.42
Pacific Cable Board	73,861.40
Temiskaming and Northern Ontario Commission.	38,932.03
Western Union Telegraph Company	354,888.19
Total	$5,359,188.92

Operating expenses had a total of $3,379,336.96, and were distributed among the reporting organizations as follows:—

Canadian Northern Telegraph Company	$ 108,143.11
Canadian Pacific Railway Company	1,435,944.28
Dominion Government Telegraph Service	505,731.73
Grand Trunk Pacific Telegraph Company	48,264.54
Great North Western Telegraph Company	839,602.95
Halifax and Bermudas Cable Company	26,140.00
Marconi Wireless Telegraph Company	148,485.00
North American Telegraph Company	13,983.16
Pacific Cable Board	122,708.13
Temiskaming and Northern Ontario Commission..	11,990.25
Western Union Telegraph Company	266,828.81
Total	$3,527,821.96

COMMERCIAL HALIFAX IS BUSY

Terminals, Transportation and Trade—Immigration——Mines and Factories Increase Output.

(Special Correspondence.)

Halifax, N.S., February 11.

The general plan for the new railway terminals at Halifax is said to be completed and in the hands of the minister of railways at Ottawa, awaiting the approval of the Government. The detail plans are not yet completed, but reliable informants stated that the piers, freight sheds and immigration quarters will be the most up-to-date on the Atlantic seaboard. The sheds on the wharves will be two-story, with tracks above for passenger cars, making it possible for the passengers to board the cars on the same level as the decks of the steamers and only crossing the width of the sheds; the tracks below will be for freight moving purposes. The sheds on the wharves will probably be "twin" style—that is, two separate sheds with tracks between and a turnstile at the end of the wharves for the return of empties or full cars, as the case may be. This and other proposals involve, it is estimated, 52 million dollars.

Canada's Sugar Supply

Work is progressing favorably on the Acadia Sugar Refinery's new buildings and plant at Woodside; this enormous plant, which will be the largest in Canada, will have a fine situation for such an industry. Halifax has all along been the headquarters of the West Indian sugar trade, and the West India steamers plying regularly bring to this port practically all the raw sugar used by the refineries in Canada.

The new ferry terminal in connection with the steam ferry to Dartmouth is now assured, the people of Dartmouth having voted for an expenditure amounting to $25,000.

Work on the Halifax and Eastern Railway is also progressing favorably, and it is expected this road will be in operation within three years—it will open up a fine farming section on the Atlantic slope of the province, and also make possible the working of mineral areas in the Musquodoboit section.

Steel and Coal Industries are Busy

The Nova Scotia Car Company, Limited, are working full time, having received several orders for cars.

The industries throughout the province are having an era of prosperity. The output of coal last year was 690,000 tons greater than the year previous, and a large increase was made in the January output, over that of the same month last year. The steel works at Trenton, Sydney Mines and Sydney are working on full time, and a satisfactory increase in the production of steel is anticipated.

It is expected a number of immigrants will come to this province and take up some of the vacant farms.—E. A. S.

◆

NORTHERN CANADIAN MORTGAGE COMPANY

A surplus of $27,780 is shown in the third annual report of the Northern Canadian Mortgage Company, Limited, $10,867 having been carried forward this year to the profit and loss account. The company's earnings amounted to $36,030.

The company's subscribed capital amounts to $990,000, of which $410,755 is paid up. This is an increase of $263,472 during the year.

Mr. E. Cass, the president, states that the company has made a careful selection of its loans, as a much larger amount of attractive business has offered than they had funds to accept.

"With the rapid growth of Western Canada," he reported at the annual meeting, "this condition is likely to continue for an indefinite period, and we need have no fear of being unable to invest our funds to give us satisfactory results." The financial statement is a satisfactory one.

At the meeting the directors, Messrs. Cass, Paterson, Hartley, Webb, and Mr. T. McAvity Stewart, were re-elected for the ensuing year. Mr. Cass was re-elected president, Mr. Paterson vice-president, and Mr. Hartley, secretary-treasurer.

Chatham, Ont., electors carried the industrial by-law to grant certain concessions to the Chatham Auto Wheel Company.

PERILS OF ASSESSMENT INSURANCE

osition of the Royal Arcanum and the Independent Order of Foresters

A correspondent, who has been reading the article in he Monetary Times of January 24th, showing the exceedingly angerous condition of the Ancient Order of United Workıen, wishes to know whether the Royal Arcanum and the . O. F. are not in an entirely different class. His letter indiates that he is connected with all three of them, and while isappointed with, and greatly alarmed at the condition of he Workmen, he feels confident that if he loses his money on , his holdings are safe in the other two.

It depends largely as to what a man's age is at present, hether or not his chance of winning is fairly good. The ree societies are all travelling towards total extinction. It only a question of time—of a few years at most—when e unsoundness of the assessment method will be clearly aparent to the dullest intellect. Those members whose deaths me soon will have realized for their families all they ever xpected from the society, whether it be the Workmen, the rcanum, or the I.O.F. But there will be two large classes f the members who will not be winners, viz., those who get rozen out from year to year, feeling compelled to drop out hile possible to get insurance elsewhere, and those who hold n to the final end because too old or too ill to have any hope f getting into any other insurance society, fraternal or old ashioned.

arable of the House on Fire

When a man whose house is on fire, and who has no inrance on it, is compelled to stand by and see it burn, it akes a good deal of difference whether he is on the outside r inside of it, while the roof falls in, even if there should nally be some charred timbers left unconsumed in the cellar. he A. O. U. W. structure is but a small one, and, therefore, e fire which has consumed about one-third of its safety fund cumulation during the past twelve months, may last another hole year, or two years or more, before it burns down the last timbers. Even then, the sensation and shock will e comparatively a local one, because its membership is mostly nfined to the one province of Ontario. A desperate effort will ndoubtedly be made at the forthcoming session of the grand dge to prolong its life, but in the opinion of The Monetary imes little can now be done to give it a chance of permancy.

wo Larger Societies

It is a little different with the Arcanum and I. O. F. hey are both much larger, and their membership is not of a cal character, and their accumulations have not yet been riously diminished, though both now are about at a standill. The Workmen never had more than 46,125 members (in 03), while the Arcanum once boasted 305,183 (in 1904), and e Foresters once had 257,267, in December, 1907.

From $680,848,00 of insurance in force in 1904, the Arnum in the seven following years, dwindled to $487,992,345 December 31st, 1911. (The figures for 1912 are not yet ailable). The I. O. F., from having $264,960,142 in force 1907, dropped down, in four years, to $242,093,787, notwithanding the issue of new certificates, in the four years, for 07,681,687. Likewise, in the case of the Arcanum, the total op of business in force was $192,856,655 from 1904 to 1911, spite of the large amount of $175,465,000 of new certificates sued.

eath Claims Growing Heavy.

The following table shows how rapidly the death losses ve been over-topping the income, using only the first five onths of each year for seven years past, in the Royal Arnum's case:—

	Assessments.	Death Claims.		
06	$3,787,806.35	$3,433,974.35	Gain	$353,832.00
07	3,604,431.32	3,645,832.79	Loss	41,401.47
08	3,524,127.99	3,619,347.53	Loss	95,219.54
09	3,437,350.63	3,501,174.61	Loss	63,823.98
10	3,385,495.93	3,784,546.48	Loss	399,050.55
11	3,333,517.40	3,622,281.14	Loss	288,763.74
12	3,286,658.92	3,776,827.78	Loss	490,168.86

Compare the last three years with the preceding four years d it is plain that the mortality of the Royal Arcanum is owing apace, rendering it incapable of adding anything to s reserve fund. This reserve fund, as everybody might know, ould be increasing rapidly for many years yet, to be ready meet the much larger mortality that must come in future ith the increasing age of the whole membership. But inead of increasing, it is now diminishing. On December 31st, 10, it had reached $6,875,310, but a year later had fallen to ,683,826, notwithstanding that 6 per cent. interest would ve added $412,518.00. This sum and about two millions ore that should have been contributed as a surplus from e assessments of the year, were both conspicuous only by eir absence. The record for the year just closed will be oked for with much interest, and cannot now be long deyed.

(To be concluded).

TO LESSEN FIRE WASTE

Mr. G. W. Ross, Fredericton's building and fire inspector, incorporates the following fire prevention suggestions in his annual report:—

Forty old and dangerous chimneys have been repaired so as to prevent danger from fire and falling brick.

In regard to cellars attics, and out-buildings the majority are in a good condition, but at the same time it is necessary to caution many in regard to keeping ashes in wooden barrels and boxes, also the storing of dangerous or burning fluids in the city limits.

On several occasions attention has been drawn to old furnaces in different parts of the city, and especially to wornout pipes, and these were ordered to be repaired, thus helping to lessen the loss by fire.

Legislation should be sought in regard to the moving of all old and delapidated buildings that are beyond repair. As the law now stands the owner cannot be compelled to remove them.

◆

STATE INSURANCE DISCUSSED

The principle of state insurance was endorsed at a recent meeting of the joint committees on the Workmen's Compensation Act at the Industrial Bureau, Winnipeg. Mr. F. J. Murray represented the Trades and Labor Council, and Mr. J. B. Hugg, solicitor, the Canadian Manufacturers' Association.

Mr. Carter, of the Builders' Exchange, was in the chair and Secretary Poussette, of the Manufacturers' Association, acted as secretary. The conference went on record as being in favor of state insurance. It was moved, seconded, and carried that the conference adjourn for a week, and that the two solicitors representing the Trades and Labor Council and the Canadian Manufacturers' Association bring in a joint report at that meeting embodying suggestions that would be agreeable to both interests upon which government insurance can be carried out.

It was also decided that a deputation consisting of two employees and two employers wait upon the provincial government to ascertain if the government would favorably consider the question of state insurance.

The Trades and Labor Council declared in favor of these five schemes:

First—Favor state insurance.

Second—Favor cost of administration to be borne by government; the scheme to be handled by an independent commission.

Third—Favor amendment incorporating fixed rates of compensation.

Fourth—Favor forfeiting of claims under Common Law and Employers' Liability Act, providing satisfactory rates of compensation can be agreed upon.

Fifth—Recommend that conference be conducted with two or three representatives from each side.

◆

VICTORIA'S LOSSES BY FIRE

Victoria's fire loss for the year 1912 shows loss to buildings and contents aggregate $139,596, compared with $142,730 in 1911.

The returns of Fire Chief Davis compared with those of the preceding year show:

	1912.	1911.
Loss on buildings	$ 46,732	$ 54,269
Loss on contents	92,864	88,461
Total loss	$139,596	$142,730
Insurance on buildings	433,550	205,900
Insurance on contents	128,750	308,725
Total insurance	$572,300	$514,625

During the year alarms totalled 217, compared with 219 the previous year, and in responding thereto the brigade travelled a distance of 565 miles. At fires 84,450 feet of hose was laid, 1,987 feet of ladders raised, 3,864 gallons of chemicals used and 246 hours spent in actual fire fighting.

The chief fires during the twelve months were that at the residence of Colonel E. G. Prior, St. Charles Street, on the night of February 23, at which the loss was $15,000, and that at the Canadian Puget Sound Lumber Company on April 25, when a loss of $72,400 was incurred.

Victoria's January fire loss amounts to $379 on buildings insured for $30,750; the number of alarms received were: Box alarms, 4; telephone alarms, 14; messenger alarms, 1; total, 19. The purchase of a motor tractor, the need of fire alarm boxes, and a new fire drill tower are among Fire Chief Davis' suggestions to the board of fire wardens.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Illinois Traction Company.—Illinois Traction Company will issue 55[illegible] additional shares of preferred stock for the purchase of a small lighting plant. The total issue of preferred will then be 65,440 shares.

National Steel Car Company.—National Steel Car Company, Hamilton, have booked $3,500,000 worth of business in the past three months. They have started to deliver cars to the Canadian Pacific Railway on an order received from that company amounting to $1,500,000.

Grand Trunk Railway.—The Grand Trunk Railway Company has declared an annual dividend of 2½% on the third preference shares of the company. The dividend last year was at the rate of 1½%. The net surplus for the year 1912 was £575,300, as against £466,900 the previous year. After the 2½ per cent. disbursement on the third preference shares is provided for, the amount carried forward to the next year is £12,700.

Halifax Fire Insurance Company.—The 104th annual meeting of the shareholders of the Halifax Fire Insurance Company was held in their office. The retiring directors were reelected as follows:—Messrs William Roche, C. Willoughby Anderson, John MacNab, Henry G. Bauld, Edmund G. Smith, Edward J. Longard, and Frederick P. Bligh. At a directors' meeting the following officers were elected:—Mr. William Roche, president; Mr. C. Willoughby Anderson, vice-president; Mr. Thomas Goudge, secretary and treasurer; Mr. James C. Lithgow, auditor.

Dominion Steel Corporation.—The output of the Sydney plant of the Dominion Steel Corporation, Limited, for January was as follows:—

	Tons.
Pig-iron	27,164
Steel ingots	28,022
Blooms	25,809
Rails	14,410
Wire rods	3,092

The coal output in the Cape Breton collieries for the month was 414,944 tons, as compared with 320,901 tons in 1912.

Richelieu and Ontario Navigation Company.—It is claimed that the earnings of the Richelieu and Ontario Navigation Company during the past year only amounted to 9¾ per cent. Should this be the case, shareholders will not be encouraged. In fact, the stock is now showing an easy tone and the price has declined a couple of points, particularly as it was expected that the earnings of the company would be large. It now turns out that the Richelieu and Ontario passenger service made a good bargain in merging with the other companies, inasmuch as the freight lines did an excellent year's business and made up for what might have been a bad year for the passenger department alone.

Northern Ontario Light and Power Company.—The Northern Ontario Light and Power Company, Limited, reports for the year ended December 31st last:—Gross earnings, $521,605; operating expenses and maintenance, $137,046; purchased power, $12,713; loss on sales of electric apparatus and stores, $654; total expenses, $150,413; net earnings, $371,192; other income, $2,080; total income, $373,272; interest, taxes, adjustments, etc., $187,977; balance for dividends, $185,295; preferred dividend 6 per cent. $120,000, less dividend on shares held by Mr. David Fasken in trust for the company, $2,052; balance dividend payments, $117,948; surplus, $67,347; previous surplus, $67,530; total surplus, $134,877.

The balance sheet, as of December 31st last, follows:—Assets—properties, air compressors, electric plants, etc., $11,539,720; cash, $16,878; sinking fund, $65,500; trustee for bondholders' guaranteed deposit, $21,000; interest accrued, $[illegible]; insurance and rentals paid in advance, $5,811; Cobalt Hydraulic Power Company, Limited, bonds purchased, $10,800; accounts receivable, $80,677; stores on hand, $68,141; investments in shares of other companies, $45,000; total, $11,863,628.

Liabilities—First mortgage 6 per cent. bonds, $1,508,500; preferred stock, $[illegible],400,000; common stock, $4,585,000; accounts and wages payable, $58,030; reserves, $10,6[illegible]; interest accrued, $[illegible]; profit and loss surplus, $134,876; total liabilities, $11,863,628.

OUR MUNICIPALS IN LONDON

Montreal Did Too Much Trumpet-blowing of Its Coming Issue—Comments on Market Conditions

A query put to a well-known financier by the Canadian Associated Press this week as to when Montreal's new issue might be expected, brought the reply, more sincere, perhaps, because unguarded, that Montreal ought to know better than to let it get about that she is floating a huge loan. It has caused her a lot of mischief in advance.

"If the Dominion Government, or any other first-rate borrower had done likewise they would pay a pretty heavy penalty for it," it was stated. The Canadian Press was further given to understand that the loan in question will not likely be put forward for some little time.

Action Was Disadvantageous.

The financial press here has had little to say about the result of the Winnipeg loan of last week. The outcome, however, confirms the previous Canadian Press cables that Toronto's action was disadvantageous both to herself and like suitors in the London market. Winnipeg walked in as Toronto walked out, but Winnipeg got a higher percentage of applications from the public. Her loan stands now at five-eighths discount, whereas Toronto's is one and three-quarters, the yield in both cases being practically identical.

Applications have been received to list the following issues on the London Stock Exchange: Grand Trunk Pacific Branch, £240,700, fours; City of New Westminster, £256,300, four and halves; Canadian Pacific, $2,000,000, shares; Commercial Cable, £14,146, fours; Pacific Power, $5,605,000, fives; Sao Paulo Electric, £1,880,000, fives.

The Canadian Gazette, commenting on the market's cool attitude towards Canadian municipal bonds, says the situation will have to find a natural level. Municipalities must lessen their demands, while issuing houses here must offer further inducements to stimulate the attention of investors.

On the Down Grade.

The underwriters of the city of Winnipeg loan of £750,000 4½ per cents. in London will have to take 75 per cent. of the issue.

Canadian municipal issues, generally, seem momentarily on the down grade. Montreal's declined 1 to 2 points last week, Toronto 1 to 4, Vancouver 1 to 2, Winnipeg 2 to 3, and Victoria 2. A further shrinkage is anticipated.

The city of Montreal bills, which fell due on February 12th, have been replaced by another issue for six months. The Bank of Montreal officials say they cannot divulge the terms of the renewal, but it is understood that the terms are more favorable than another leading city recently secured.

The city of Vancouver recently placed $5,500,000 six months bills, and the city of Edmonton also recently placed £200,000 six months' bills.

Six Months Hence.

Sanguine financiers hope that the monetary situation six months hence will be easier for Canadian municipal issues in London. At present the disinclination of the public is only too apparent, even at the increased rate of interest, but the public needs of municipalities are large and urgent.

They declare their actual commitments in the way of local improvements make it almost impossible to accept the advice of Lord Faber, chairman of the English Country Bankers' Association, to withhold fresh issues, lest an already satiated public get a distaste for Canadian municipal issues as permanent as their distaste for American municipals.

Underwriters have taken 95 per cent. of the three-year notes of Terminal Cities of Canada, $2,300,000 for development of the Mount Royal townsite, Canadian Northern Prairie Townsites, also Port Mann.

HALIFAX ELECTRIC TRAMWAY COMPANY

At the adjourned annual meeting of the Halifax Electric Tramway Company the Montreal interests now in control elected an entirely new board of directors, except that Mr. O. E. Smith, of Halifax, remains a member. The number of directors was increased from nine to eleven.

Members of the new board are:—Messrs. J. A. Neville, H. H. Smith, W. M. P. Webster, J. F. Wood and O. E. Smith, all of Halifax; Sir Fred. Borden, Ottawa; P. J. McIntosh, New York; E. A. Robert, J. W. McConnell, W. G. Ross and F. H. Wilson, all of Montreal.

A resolution was also adopted and sent to the Mayor of Halifax, authorizing the directors to negotiate with the city council in the event of the city desiring any modification in the terms of the present contract with the company.

BOND TENDERS INVITED

netary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Edmonton, Alta.—A by-law for $675,000 for land pur-
e will be submitted to the electors February 24th.

Morinville, Alta.—Until February 17th for $10,000 6 per
. 20-year general improvement debentures. J. A. Nantel,
etary-treasurer.

Mariposa R.M., No. 350, Sask.—Until March 15th for
,000 5½ per cent. 20-year debentures. A. M. Carlile, secre-
-treasurer, Kerrobert.

Hamilton, Ont.—Until February 20th for $190,000 4½
cent. 20-year debentures. John Allan, Mayor. (Official
ertisement appears on another page.)

Fort Frances, Ont.—Until March 8th for $9,691.34 5 per
. 28-year electric light debentures. J. W. Walker, clerk.
cial advertisement appears on another page.)

Port Alberni, B.C.—Until February 25th for $115,000 50-
waterworks, $30,000 20-year electric light and $10,000 20-
street improvement debentures. R. F. Blandy, city
surer.

Lanark County, Ont.—Application will be made to the
ario Legislature to confirm a by-law authorizing the ex-
diture of $40,000 for roads. C. J. Foy Perk is solicitor
the county.

Guelph, Ont.—Application will be made at the present
ion of the Ontario Legislature for an act to validate
aws authorizing the issue of $32,775.60 debentures for
improvements.

National Park S.D., No. 102, Alta.—Until February 20th
$30,000 5 per cent. 20-year debentures. Wm. Mather,
etary-treasurer, Banff, Alta. (Official advertisement ap-
s on another page.)

London, Ont.—Application will be made to the next
ion of the Ontario Legislature to authorize the city
icil to issue $28,000 debentures for the purpose of erect-
an addition to Victoria Hospital.

Wadena, Sask.—Until February 20th for $15,000 6 per
. 40-year electric light and power plant, $15,000 6 per
. 30-year sidewalks and street improvement debentures.
. T. Saith, secretary-treasurer.

Pincher Creek, Alta.—Until February 24th for $30,000
er cent. 30-year municipal building; $15,000 6 per cent.
ear sidewalk debentures. G. D. Plunkett, secretary-
surer. (Official advertisement appears on another page.)

Ponoka, Alta.—Until March 15th for $4,255.30 5 per
. 20-year sidewalks, and $4,000 5 per cent. 20-year
nage and sewerage debentures. T. W. Hutchinson, sec-
ry-treasurer. (Official advertisement appears on another
e.)

Perth County, Ont.—Application will be made to the
ario Legislature for an act authorizing the county to
ow $51,000 to retire the balance of the existing railway
enture debt. Messrs. McPherson & Davidson, Stratford,
the solicitors for the applicant.

Edson, Alta.—Until February 25th for $45,000 20-year
tric light and power; $12,500 10-year, street grading;
000 30-year, town hall; $14,000 5-year plank walks,
$9,000, 15-year, cement walk debentures; interest, 5½
cent. George M. Phillips, secretary-treasurer. (Official
ertisement appears on another page.)

Scarboro Township, Ont.—Debenture by-laws for bor-
ing $8,000 for the erection of a new school building in
No. 9, Scarboro Village, over a period of twenty years,
$10,000 for the erection of a public school building in
No. 12, these debentures to be spread over a period
wenty-five years at 5½ per cent., were introduced at a
nt meeting of the council.

Ottawa, Ont.—The corporation will apply to the Ontario
islature for acts authorizing the borrowing of the fol-
ing sums of money without submitting any by-law in
nection therewith to the electors: $2,400 for drain; $12,-
for construction of annex to Howick Hall; $7,500 for
er; $50,000 for swimming baths; $30,000 for equipment
Works Department; $10,000 to cover shortage on sale
lebentures for smallpox hospital; $78,000 for water main
nsions; $8,500 for discount on sale of debentures issued
r by laws No. 3412 and 3337; $35,000 for completion of
h-pressure water plant; $4,000 for flush valves; $85,000
waterworks; $10,000 for Bacteriological Laboratory, and
,000 for electric light system.

◆

That the telegraph business was "vanishing" before the
aught of the telephone companies was the statement
le by a witness during the session of the Government
iry into telegraph rates, which has resumed before the
way Commission at Ottawa.

NELSON IS ADVANCING

Nelson's board of trade is alive to the needs of the city and district and their developments. They are co-operating with Rossland, Trail and other cities to interview the provincial government for the completion of the railroad from Nelson west to Cascade. The following committees were elected at a recent meeting: Railway and transportation improvements—C. R. Hamilton, K.C., J. E. Anable, A. B. Netherby and Alderman James Johnstone.

Roads and bridges—C. F. McHardy, A. L. McCulloch, R. W. Hinton, T. A. Robley and J. A. Irving. Freight rates and shippers—G. W. McBride, L. K. Larson, T. E. Levasseur, R. Andrew, Alderman W. M. Cunliffe, H. Amas, W. C. E. Koch, E. F. Gigot and T. D. Stark. Telephones and telegraphs—F. A. Starkey, W. G. Foster and Charles Scott. Finance—J. H. D. Benson and L. B. De Veber. Membership—T. A. Robley, William Rutherford, Hugh W. Robertson and C. A. Benedict. Insurance—James Johnstone and G. A. Brown.

Mr. W. F. Cochrane is secretary pro tem. of Nelson's publicity bureau. Things generally are humming in Nelson and district.

◆

CANADA TRUST COMPANY

A pleasing feature of the eleventh annual report of the Canada Trust Company is the policy observed by the management and directorate with regard to the reserve fund. The sum of $15,718 was added to that account last year, bringing that fund up to $180,000, or nearly 38 per cent. of the paid-up capital, and, including the premium on new stock, $235,781. The net earnings of the company amounted to $42,448, including $1,172 brought forward from the previous year. Out of that sum a dividend of 5 per cent., amounting to $15,390 was paid to the shareholders. The remaining sum, $2,893, was carried forward.

An important step was taken by the company at a special meeting held before its annual meeting when authority was given to issue 5,000 more shares of the company's stock. This makes the subscribed capital $1,000,000. The full amount of the new issue has been subscribed, and, to date, over $200,000 paid thereon. The paid-up capital now amounts to $700,050, and the total assets of the company, including both company and trust funds, are now over $3,600,000.

The trust funds of the company, so far as assets are concerned, are as follow: Mortgages, bonds and debentures, $2,135,008; unrealized assets, $312,535; cash in banks, $115,986; total, $2,563,529. The company's financial statement generally shows that a profitable and conservative business is being carried on under capable management and directorship.

◆

CANADA LANDED AND NATIONAL INVESTMENT COMPANY

The general prosperity of the country was shared by the Canada Landad and National Investment Company last year, as is indicated in the report of the directors for 1912. After paying expenses of management, interest on debentures and all other charges, the net profits for the year amounted to $169,569. To that was added the balance of $9,347 at credit of profit and loss account brought forward from last year, making a total for distribution of $178,917. Dividends accounted for $88,061. The sum of $84,700 was transferred to the reserve fund. Besides that addition to the reserve fund from the ordinary profits, the directors also transferred to that account the sum of $10,300, received as premium on the disposal of the unaccepted and fractional shares of the new issue. The reserve fund now amounts to $910,000.

The capital stock subscribed is $2,410,000, of which $1,205,000 is paid up. The paid-up capital was increased to that amount during the past year.

Among the assets of the company ore loans on mortgage securities, $5,729,748; call loans on stocks and debentures, $79,259; municipal and school district debentures, $291,731; interest due and accrued, $178,605. The company has issued sterling debentures amounting to $3,819,154 and currency debentures to the value of $300,270.

The company's president, Mr. John Hoskin, noted that the investments had increased over the preceding year by the sum of $559,700 by investments carefully selected by the directors, partly in Ontario and partly in the Western provinces. Mr. Hoskin referred to the gradual and satisfactory progress of the company. Since the year already referred to, viz., 1871, when the paid up capital was $248,552, it has increased to $1,205,000. The rest or reserve was at that date $5,064, it is now $910,000. The amount borrowed on debentures in 1871 was $551,2[illegible]; now it stands at nearly eight times that sum. The company continues to make substantial progress.

BRITISH COLUMBIA'S MINERAL PRODUCTION

New High Record Created Last Year—Many Minerals Included in Operations

The value of the estimated mineral production of British Columbia last year is $32,606,000, according to the preliminary report of Mr. W. Fleet Robertson, provincial mineralogist.

The total value of production in 1912 is expected to be $9,106,928 more than in 1911, and more by $6,228,934 than that of 1910, the total for the last-mentioned year ($26,377,066) being the highest on record in the history of mineral production in British Columbia.

Conditions during the year 1912 were, on the whole, favorable to an increased mineral production, and the results obtained must be regarded as highly satisfactory, although in some respects the earlier expectations were not fully realized; for instance, an unusually dry and short working season affected the production of placer gold; the yield of lode gold also fell short of what had appeared earlier in the season, a reasonable promise from all the districts contributing substantially to the total production of that metal. The production of lead also seems to have been somewhat less than had been anticipated, although it is quite possible that it will be found to have been underestimated.

Increase in Coal Production

In coal also the increase in production is smaller than had been looked for, but this is explained by the fact that during the last quarter of the year, labor troubles affected adversely the output of the Cumberland and Extension Collieries on Vancouver Island. With these exceptions, however, conditions were favorable for the production of minerals in larger quantities than in several years past.

Average prices for the year of silver and copper, especially of the latter, induced efforts to maintain production on as large a scale as was practicable; one of the good results was an output of copper that, as regards both quantity and total value, is the highest on record in the province.

British Columbia's proportion of the mineral production of the whole of Canada continues to be comparatively large. The aggregate value of the production of British Columbia to the end of 1912 is, approximately, $430,000,000, but since the published official records of that of the whole Dominion do not include production prior to 1886, the present comparison must be restricted to the period of twenty-seven years—1886-1912. Placing the aggregate for all Canada at $1,352,000,000 (which allows for 1912 a Dominion total of $116,000,000, an amount nearly $13,000,000 greater than that of 1911), and British Columbia's proportion for the same period at $365,000,000, it follows that this province has to be credited with about 27 per cent. of the aggregate value of the mineral production of the whole of Canada in the twenty-seven-year period under notice.

It is a striking fact, as indicating the substantial increase in the value of the mineral production of British Columbia in recent years, as compared with that of less than twenty years ago, that nearly 36 per cent. of the $365,000,000 mentioned above as the aggregate of production for twenty-seven years is to be credited to the last five years, 1908-1912, while nearly one-half was produced during seven years, 1906-1912.

Mineral Production for Two Years

The following table shows the quantities and value of the several minerals produced in the year 1911, and the estimated production in 1912. The prices used in calculating the estimated value for 1912 of silver, lead, copper, and zinc are the average prices for the year, as published in The Engineering and Mining Journal, New York, less a deduction of 5 per cent. off silver, 10 per cent. off lead, and 15 per cent. off zinc.

	Production, 1911.		Estimated Production, 1912.		
	Quantity.	Value.	Quantity.	Value.	Increase.
Gold, placer ....oz.	....	$ 426,000	....	$ 500,000	$ 74,000
Gold, lode ....oz.	228,617	4,725,513	240,000	4,960,800	235,287
Total gold	....	$5,151,513	....	$5,460,800	$ 309,287
Silver ....oz.	1,892,364	958,293	2,900,000	1,676,200	717,907

BULLION PRODUCED IN CANADA

Two Gold Refineries—Silver Second in Point of Valu on List of Dominion's Mineral Productions.

Gold bullion is received, assayed, and purchased at th assay office in Vancouver, operated in connection with th department of mines, the bullion being resold. The total qua tity of bullion thus received during the twelve months endin December 31, 1911, was 39,069.31 ounces, being the weig after melting, valued at $647,416.38, after deducting ass charges.

A refinery has been erected at the Royal Mint at Ottaw and small shipments of gold have been received from differe provinces, but at present the greater part of the Canadian go finds its way to the United States refineries or to the Unite States Mint.

One Other Refinery

There is but one other refinery in Canada producing fi gold; that at Trail, established in 1904, operated by the Co solidated Mining and Smelting Company of Canada, Limite the annual output of which in ounces of fine gold for the yea 1904-1911 is shown below.

The gold is recovered from the ores treated in the le furnaces.

The production of gold in Canada—made up of gold d rived from alluvial workings, gold obtained from the crushi of free milling quartz ores, and the gold obtained from oth metalliferous ores sent to copper and lead smelters, etc., a cording to the report of Mr. Cosmo T. Cartwright, B.S., of t department of mines, reached a total, in 1911, of 473,159 fi ounces, valued at $9,781,077, as compared with 493,707 fi ounces, valued at $10,205,835, produced in 1910, a decrease 20,548 ounces in quantity and $424,758 in value, or 4.16 p cent.

Cobalt Added to Total

Owing to the rapid development of the Cobalt silver ca in Ontario during the past five years, the production of silv in Canada has, in point of value, taken second place in t list of our mineral productions, being exceeded only by co

The total production of silver in 1911, including that pr duced as bullion and the metal estimated as recovered fro ores sent to smelters or otherwise treated, was reported 32,559,044 fine ounces, which, compared with a production 32,869,264 ounces in 1910, shows a decrease of 0.94 per cent.

Values and Comparisons

The average value of fine silver in 1911, according to Ne York quotations, was 53.304 cents per ounce, as compared wi an average value of 53.486 cents in 1910, a decrease of abo 0.34 per cent.

The total value of the silver production in 1911 was $1 355,272, a decrease of $225,183, or 1.28 per cent. over the val $17,580,455, in 1910.

A comparison of the production of 1910 and 1909, sho an increase for 1910 of 5,339,791 ounces, or 19.4 per cent. quantity, and $3,401,951, or 24 per cent. in value, the avera price in 1910 having increased about 3.85 per cent. from 19

Mr. Fred S. Penfield, of Portland, Superintendent Agencies for the Pacific Coast for the Germania Fire surance Company, has been investigating fire insuran companies in British Columbia, and placed a general agen with the National Finance Company, Limited, who are n prepared to write policies. The Germania Fire Insuran Company is one of the best known companies in Americ and at the end of 1911 had assets amounting to nea $7,000,000. The company also had a surplus of $2,280,6

The directors of the Dominion Bridge Company, Limit has been increased from ten to eleven.

RAILWAY FINANCING LAST YEAR

ty Millions of Bonds Were Sold—Grand Trunk Put Out Equipment Trust Notes for the First Time

During the past ten years Canada has experienced a won- ul era of expansion in railway building, which has had a ked influence on the development of the country from e to shore. Probably in no other country have such de- ined efforts been made to provide transportation facili- and the rapid rise in importance of Western Canada is eloquent tribute to this far-sighted and courageous policy. total railway issues for 1912, according to Mr. E. R. d's bond review, were $69,972,320, almost the same as aggregate for 1910, but falling considerably below the rd of 1911—$100,472,700.

The Canadian Northern Railway and its subsidiary com- es disposed of $28,960,000 securities, or 41 per cent. of year's total.

nd Trunk Financing

The Grand Trunk Railway required heavy financing dur- 1909, 1910 and 1911, but in 1912 issued no securities to public. Under a special arrangement, we understand, cer- advances were made to this company by the Dominion ernment. The Grand Trunk Railway in 1912 issued se- ties aggregating $19,800,000, as compared with $10,000,- in 1911. The issuance of equipment trust notes by the nd Trunk Railway is worthy of special mention in that the first time this company availed itself of this modern reasonable method of financing its equipment requirements. se obligations found a ready market in the United States.

adian Pacific Railway

The Canadian Pacific Railway made its annual issue of 4 cent. consolidated debenture stock, aggregating $10,962,- proceeds of which were used to build branch lines, purchase tional steamships and to acquire the bonds of subsidiary panies. Its larger requirements are met by the sale of tal stock, of which $18,000,000 was issued in 1912, with additional $60,000,000 in immediate prospect.

The construction of the Edmonton, Dunvegan and British mbia Railway is the first serious attempt to open up that of Northern Alberta commonly known as the Peace r country.

Of the railway bond issues, $61,382,320, or 87.73 per cent., d a market in Great Britain, while Canada took .21 per ., and the United States 12.06 per cent. Great Britain inues to finance the greater part of our railway develop- t. These issues and the markets in which they were sold set forth in the following table:—

RAILWAY ISSUES.

Company.	Amount.	United. States.	Great Britain.
adian Pacific Railway % Consolidated Debenture ock	$10,962,320	. . . .	$10,962,320
nd Trunk Railway 4% Per- tual Consolidated Deben- re Stock	12,500,000	. . . .	12,500,000
nd Trunk Railway Equip- ent Trust Notes, Series A"	3,940,000	$3,440,000	500,000
nd Trunk Railway Equip- ent Trust Notes, Series B"	3,360,000	3,000,000	360,000
adian Northern Railway % Perpetual Consolidated ebenture Stock	6,960,000	. . . .	6,960,000
adian Northern Railway % Income Charge Convert- le Debenture Stock	10,000,000	. . . .	10,000,000
adian Northern Railway quipment Trust Notes, eries "C 1"	2,000,000	2,000,000	. . . .
adian Northern Railway quipment Trust Notes, eries "D 1"	3,000,000	3,000,000	. . . .
adian Northern Railway quipment Trust Notes, eries "E 1"	2,000,000	1,850,000	. . . .
adian Northern Pacific ailway 4% Debenture tock (guaranteed by Bri- sh Columbia)	5,000,000	. . . .	5,000,000
John and Quebec Railway % Stock (guaranteed by ew Brunswick)	4,250,000	. . . .	4,250,000
nonton, Dunvegan and Bri- sh Columbia Railway 4% ebenture Stock (guaran- eed by Alberta)	3,500,000	. . . .	3,500,000
Algoma Central Terminals Limited 5% Bonds (guaranteed by Lake Superior Corporation)	2,500,000	. . . .	2,500,000
	$69,972,320	$8,440,000	$61,382,320
		12.06%	87.73%

The only railway block absorbed in Canada was $150,000 of Canadian Northern Railway Equipment Trust Notes, Series "E 1," the United States taking the remainder, $1,850,000. Canada's percentage share of Canadian railway bonds taken last year was only 0.21 per cent.

◆

WIRE PRODUCTS STOCK OFFERING

The Montreal Bond Company, Limited, will offer $450,000 of 7 per cent. cumulative preferred stock at 95 with 50 per cent. bonus common stock of the National Wire Products Limited, head office in Montreal and plant at Port Arthur, Ontario. The capitalization is $500,000, preferred authorized and $450,000 issued; $1,000,000 common stock authorized and $850,000 issued. It is likely that H. A. Lovett, F. Wilson Fairman and R. Brutinel will be members of the board, and A. E. Blashill general manager.

◆

ISLAND INVESTMENT COMPANY

At the annual meeting of the Island Investment Company, Limited, the report submitted by the retiring board of directors was generally considered the most satisfactory, from a financial viewpoint, that has been laid before the shareholders since the company's inception five years ago.

In view of the success of the activities of the last twelvemonth a dividend of 10 per cent. was declared.

That the year's profits amounted to $43,396; that both the subscribed and paid-up capital has increased in both cases materially over $100,000, or in the aggregate considerably in excess of $200,000, and the bright prospects for the forthcoming year were some of the facts dwelt upon by President D. C. Reid, and endorsed by the directors. It was shown that, after meeting the dividend payments at the rate per annum recommended, there would be a surplus. This it was suggested, should be added to the reserve fund. The proposal was adopted, so that the total reserve now amounts to $55,000.

Mention was made by the directors of the success achieved by the branch office established in Vancouver.

◆

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Ehnes, No. 2834, $1,500. H. Ehnes, Faith.
Avalon, No. 2385, $1,500. R. R. Paul, Avalon.
Moose Hill, No. 2727, $1,200. H. A. Kemp, Waugh.
Hill End, No. 249, $1,500. E. Longhurst, Hill End.
Champion, No. 2795, $9,300. A. V. Brown, Champion.
Crocus Plains, No. 2693, $1,200. W. H. Bird, Stoppington.
Bowling Green, No. 2808, $1,700. J. McFadzean, Minburn.

Saskatchewan.

Gwyfe, No. 937, $1,800. E. T. Hang, Ada.
Edam, No. 2256, $3,000. S. A. Wollen, Edam.
Vester, No. 1451, $6,000. J. M. Guilmett, Howell.
Mossbank, No. 1204, $1,900. T. E. King, Mossbank.
Ruperra, No. 812, $1,500. R. E. Ludlow, Assinboia.
Knowleside, No. 1407, $1,600. D. F. Curtis, Chaplin.
Minnehaha, No. 909, $1,950. G. Creasy, Minnehaha.
Carrot River, No. 735, $1,000. O. S. Nelson, Bagley.
Skandenava, No. 1076, $1,300. W. Ledrew, Russborough.
Buchanan, No. 1556, $2,500. H. P. A. Hermanson, Buchanan.

◆

Hog raising is a feature of Alberta's development, and some interesting proposals are likely to be made in connection with the allied industries. Prince Rupert Packing Company are making arrangements to ship two carloads of hogs per week during the spring and summer. Mr. O. T. Lathrop, chairman of the agricultural section of Lethbridge board of trade, predicts within twelve months Southern Alberta will be in a position to ship 200,000 hogs per year.

SEVERAL LARGE COMPANIES

Have Received Charters — Distributed Among Seven Provinces—Realty, Building and Mining Corporations in the West

One hundred and nine companies, with a total capitalization of $23,408,900, have been incorporated this week. Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	24	$ 7,990,000
Quebec	20	3,645,000
Ontario	21	4,428,900
Manitoba	13	2,980,000
Saskatchewan	13	2,245,000
Alberta	17	1,970,000
New Brunswick	1	150,000
	109	$23,408,900

The largest companies are:—

C. S. Hyman and Company, London	$3,000,000
Dominion Mortgage and Loan Company, Toronto	1,500,000
E. L. Drewry, Winnipeg	1,500,000
Standard Whaling and Fishing Co., Vancouver	1,500,000
Missisquoi Marbles, Philipsburg	1,000,000
Laporte, Martin, Montreal	1,000,000
Marcil Trust, Montreal	1,000,000
Mercury Mills, Hamilton	1,000,000
Alberta and Western Mines, Edmonton	1,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Barnwell, Alta.—Bestel Estate, $25,000.

Humboldt, Sask.—Humboldt Properties, $20,000.

Prince Rupert, B.C.—Atlin Fisheries, $100,000.

Weyburn, Sask.—Weyburn Building Company, $20,000.

Kamloops, B.C.—Kamloops-Vancouver Meat Company, $150,000.

Blairmore, Alta.—Murphy and Frayer Liquor Company, $35,000.

Stettler, Alta.—Holton Bradley Hardware Company, $20,000.

Melville, Sask.—Scotia Western Investment Company, $100,000.

Cumberland, B.C.—Macfarlane Brothers $50,000 (departmental stores).

Medicine Hat, Alta.—Gillespie and Ginther, $200,000. Medicine Hat Ice Company, $50,000.

Moose Jaw, Sask.—Metal Specialties, $500,000. Manufacturers' Heights, $75,000.

Vernon, B.C.—Barnard Hotels, $300,000. Vernon Orange Hall Company, $25,000.

Roxton Falls, Que.—La Compagnie Lariviere, $95,000. V. Lariviere, O. Lariviere, H. Gillet.

Thedford, Ont.—Thedford Fruit Growers' Association. R. Tidball, A. M. Crawford, W. J. French.

Windsor, Ont.—M. Eisenberg, $40,000 (tobacco). M. Eisenberg, L. H. Eisenberg, W. B. Eisenberg.

Sorel, Que.—Sorel Iron Works, $100,000. A. P. Pontbriand, G. W Pontbriand, H. M. Pontbriand.

St. Catharines, Ont.—Trout Creek Gold Mines, $150,000. J. K. Kernahan, E. C. Graves, A. W. Marquis.

Sackville, N.B.—Eastern Hay and Feed Company, $150,000. F. A. Dixon, J. L. Dixon, C. E. Dixon.

Quebec City.—National Cartage and Supply Company, $19,000. T. Delisle, E. Blouin, F. C. Alleyn.

Hamilton, Ont.—Mercury Mills, $1,000,000. J. Penman, R. Thomson, Paris, Ont.; H. G. Smith, Hamilton.

Three Rivers, Que.—Enterprise Investment Company, $50,000. J M. Dalton, H. T. Ham, L. J. N. Page.

Sherbrooke, Que.—W. R. Webster and Company, $250,000. W. R. Webster, F. W. S. Webster, J. H. Webster.

Ottawa, Ont.—Renfrew White Granite Company, $180,000. A. Grauel, Berlin; A. G. Blair, J. B. Arbrick, Ottawa.

Kingsville, Ont.—C. W. Hendershot Company, $40,000 (merchant). C. W. Hendershot, D. Conklin, W. T. Conklin.

Philipsburg, Que.—Missisquoi Marbles, $1,000,000. A. R. McMaster, Westmount; T. M. Papineau, J. Kerry, Montreal.

New Hamburg, Ont.—Schaefer Brick Company, $75,000. F. Schaefer, Breslau; M. Schaefer, E. Merner, New Hamburg.

London, Ont.—National Brass, $40,000. J. F. Grant, C. H. Ivey, J. O'D. Dromgole. C. S. Hyman Company, $3,000,000 (hides). G. S. Gibbons, G. McNaughton, F. H. Harper.

Victoria, B.C.—Pacific Sanitarium Company, $500,000. Tyee Shale Products Company, $100,000. Gore and McGregor, $75,000 (civil engineers). Victoria Motion Pictures, $50,000.

St. Luce, Que.—Compagnie Neigette, $175,000. I. S. Laurent, P. Tremblay, St. Luce; L. P. Cote, Ste. Marie de Sayabec.

New Westminster, B.C.—Fraser River Ferry and Navigation Company, $100,000. Royal City Lumber and Shingle Company, $50,000.

Regina, Sask.—Wascana Investments, $100,000. Regina Dairy Company, $200,000. Central Canada Investments, $200,000. McKay Construction Company, $200,000.

Saskatoon, Sask.—Southern and Eastern Investors, $10,000. Western Syndicates, $100,000. Ruthenian Land Company, $20,000. Silver Springs Brewing Company, $700,000

Calgary, Alta.—Ovans and Company, $10,000. Sarcee Oil and Natural Gas Company, $25,000. Shaw Estates, $50,000. Hayden and Skene, $100,000. Siegel MacFarlane, $25,000.

Guelph, Ont.—Jones and Johnston, $40,000 (insurance and real estate). W. H. Jones, R. G. Johnston, I. J. Shaw. Albert W. Smith Company, $5,000 (plumber). A. W. Smith, W. Montgomery, Miss L. I. Smith.

Edmonton, Alta.—Alberta and Western Mines, $1,000,000. Edmonton Home Construction Company, $40,000. Columbian Conservatory of Music of Alberta, $15,000. Hotel and Restaurant Employees Company, $15,000. Farmers' Loan Company, $100,000. A. D. MacDonald and Company, $10,000. Windsor Hotel, $25,000.

Vancouver, B.C.—Universal Investments, $10,000. Mission Fixture Company, $30,000. Standard Whaling and Fishing Company, $1,500,000. Kilgard Company, $500,000 (bricks). Connaught Works, $20,000 (shipbuilders) Shaughnessy Manufacturing Company, $25,000 (lumber) Hematite Mining Company, $10,000. McCallum and Sons, $50,000 (hardware). Merlin, Grimm and Company, $100,000.

Toronto.—William Croft and Sons, $400,000. J. S. Lovell, C. D. Magee, W. Bain. Ridout and Strickland, $150,000 (insurance). D. K. Ridout, W. D'E. Strickland, H. E. Ridout. Anderson (motor cars), $40,000. G. Anderson, F. G. Anderson, J. A. McHardy. Alliance Realty Company, $100,000. H. E. Manning, G. W. Morley, H. Riley. Wellington Properties, $200,000. A. McKenzie, A. T. Davidson, J. Schiller. Weston Realty, $40,000. E. W. Goulding, H. Fairty, J. Montgomery. Alexo Mining Company, $40,000. E R. Sugarman, Misses T. A. Spoor, K. Faragher. Canadian Woodtile Company, $150,000. J. S. Fullerton, J. Gray, J. P. Crawford. Queen City Pressed Brick Company, $200,000. R. A. Olmsted, A. A. Amos, R. Murton. National Gas Company, $500,000. W. L. Carr, C. J. F. Collier, D. J MacLean. Ontario Stone Corporation, $175,000. G. A. Begy, T. A. Nicholson, W. S. McNamara. Benedict-Proctor Manufacturing Company, $25,000 (silverware). L. G. Proctor, W. T. A. Proctor, Toronto; R. B. Roantree, Syracuse. Dominion Mortgage and Loan Company, $1,500,000. G. B. Strathy, J. F. MacGregor, W. H. Walter.

Winnipeg, Man.—Inwood Stone Quarry Company, $100,000. S. Long, M. C. Pope, J. Worswick. E. L. Drewry, $1,500,000 (brewers). E. L. Drewry, F. W. Drewry, C. E. Drewry. Canada National Mortgage and Investment Company, $500,000. L. E. MacKenzie, J. Lee, A. W. G. Vassar. Stanbridge Packing Company, $100,000. H. H. Smith, W. G. Stanbridge, Winnipeg; M. J. Patricia Land Company, $99,000. A. D. Denis, T. Denis, L. E. Beauregard. Institut du Dr. LaForest, $60,000. G. L. La Forest, G. L. Prud'homme, G. B. LaForest

MANITOBA'S LARGE SURPLUS

Provincial Treasurer's Budget—Condensed Statement —Banks and Western Farmers.

"The best financial statement ever presented by a treasurer of the Province of Manitoba, and certainly one of the best budgets ever presented by any treasurer of any province of the Dominion since confederation," was a remark by Hon. Hugh Armstrong in presenting the public accounts of Manitoba for eleven months ended November 30, 1912, a condensed statement of which follows.

Receipts.

Cash on hand	$ 94,318.73
Department of:	
Attorney-General	517,901.86
Agriculture and Immigration	43,486.24
Education	28,413.67
Legislation	8,500.00
Municipal Commissioner	20,000.00
Provincial Secretary	106,514.93
Provincial Lands	400,013,54
Provincial Treasurer	753,302.62
Public Works	289,276.84
Telegraphs and Telephones	1,373,090.41
Dominion of Canada	3,506,175.13
	$7,140,993.97

Expenditures.

Department of:	
Executive Council	$ 20,827.18
Attorney-General	434,480.15
Agriculture and Immigration	342,925.41
Education	564.558.62
Legislation	121,839.05
Municipal Commissioner	3,766.20
Provincial Secretary	12,341.39
Provincial Lands	13,423.82
Provincial Treasurer (chargeable to income)	82,358.26
Provincial Treasurer (statutory payments)	482,498.35
Public Works (chargeable to income)	1,057,365.20
Public Works (chargeable to capital)	1,682,576.16
Telegraphs and Telephones	1,202,422.83
Railway Commissioner	733.35
Balance	1,118,878.00
	$7,140,993.97

This shows a balance of $1,118,878, and adding to this the sum of $1,682,576 capital expenditure, smaller sums, making balance of two and three-quarter million dollars.

Farmers Need Money in Fall.

"The provisions of the new Bank Act, which permits of the loaning of money on farmers' grain stored at home, may to a certain extent assist in the enabling of the farmer to carry his wheat," Hon. Mr. Armstrong remarked, "but I have some doubt as to the utility of the Act in this way.

"The truth is, that when the fall of the year comes, the farmer is forced to sell his wheat because the money represented by the value of the wheat must be turned back into the financial mill in order to make the wheels go round.

"I was informed by a prominent Winnipeg banker last fall, that the bank with which he was connected had $20,000,000 in loans to the farmers west of the Red river, and I do not think the banks can be charged with having adopted a skimping policy towards the farmer."

◆

REGULATING DIVERSION OF NIAGARA WATER.

Agreement on a bill for the preservation of Niagara Falls has been reached by the United States House Committee on Foreign Affairs. The bill gives to the Federal Government general control and power to regulate the diversion of water from Niagara River above Niagara Falls.

The state of New York is to have authority, through its public service commission, to fix rates and tolls. Attorney-General Carmody, and other New York state officials, have been urging the committee to confine its action to a ten-line bill to give effect to the treaty of January 11, 1909, between the United States and Great Britain relative to the diversion of water from Niagara Falls.

Governor Sulzer and Attorney-General Carmody favored the measure providing merely that power be given to the Secretary of War to issue permits for the diversion daily of not more than 20,000 cubic feet of water for power purposes at Niagara Falls. These permits were to be issued by the Secretary of War only to the state of New York, which would, in turn, control their issuance to the power companies.

The Foreign Affairs Committee did not adopt the suggestion of the officers of New York state, but drew up an elaborate measure which gives the Federal Government complete control over the diversion of the water from Niagara River.

The bill does not attempt to fix rates or tolls, but it does fix restrictions to be observed by all who receive permits to generate power from water diverted from Niagara, whether on the American or Canadian side.

DOMINION'S FIELD CROPS

Last Year's Harvest Was Estimated to be Worth Five Hundred and Eleven Million Dollars.

Upon a total area under field crops of 32,449,000 acres a harvest has been reaped the value of which, calculated at average local market prices, makes a total of $511,951,000, states the Census and Statistics Monthly. The area under wheat last year was 9,758,400 acres, of which 781,000 acres represents the harvested area of fall wheat grown principally in Ontario and Alberta, but also to a limited extent in Manitoba, Saskatchewan and British Columbia. The total production of wheat was 199,236,000 bushels of the value of $123,522,000. Fall wheat produced 16,396,000 bushels of the value of $13,735,000. Oats upon 9,216,900 acres yielded 361.733,000 bushels of the value of $116,996,000, barley upon 1,415,200 acres yielded 44,014,000 bushels of the value of $20,405,000 and flax upon 1,677,800 acres yielded 21,681,500 bushels of the value of $19,626,000.

Prices and Yields Somewhat Less.

By comparison with 1911 the results of last year's harvest, both as regards total yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, peas, beans and corn for husking were also lower. On the other hand oats yielded about 13½ million bushels more than in 1911 and the following crops also show more or less an excess yield, viz., barley, rye, buckwheat, mixed grains, flax, potatoes, turnips, etc., fodder corn, sugar beet and alfalfa.

The average yields per acre for the year 1912 as compared with 1911 are as follows: Wheat, 20.42 bushels against 20.87; oats, 39.25 against 37.76; barley, 31.10 against 28.94; rye, 19.06 against 18.89; peas, 15.04 against 15.80; buckwheat, 26.34 against 22.69; mixed grains, 34.38 against 29.78; flaxseed, 12.92 against 11.47; beans, 17.40 against 19.06; corn for husking, 56.58 against 59.59; potatoes, 172 against 144; turnips, etc., 402 against 374; hay and clover, 1.47 ton against 1.61; fodder corn, 10.26 tons against 9.92; sugar beets, 10.74 tons against 8.66, and alfalfa, 2.79 tons against 2.24.

Oats, Barley, Etc., Are Superior.

The quality of the grains of cereals, as shown by average weight per measured bushel, is somewhat inferior to that of last year in the case of wheat, rye, peas, mixed grains and flax, but is superior in the case of oats, barley, buckwheat, beans and corn for husking.

In the three Northwest provinces of Manitoba, Saskatchewan and Alberta the production of wheat is placed at 183,322,000 bushels compared with 194,083,000 bushels in 1911, of oats at 221,857,000 bushels compared with 212,819,000 and of barley at 26,671,000 bushels compared with 24,043,000 bushels. The wheat production of 1912 in Manitoba was 58,899,000 bushels from 2,653,100 acres, in Saskatchewan 93,849,000 bushels from 4,891,500 acres and in Alberta 30,574,000 bushels from 1,417,200 acres.

◆

CELLULOID FIRE DANGERS.

Having regard to the interest accorded at the present moment to the provision of suitable substitutes for the dangerous celluloid cinematograph films, which are now not only used in theatres and halls, but also in schools and private residences, and even on children's toy lanterns, the British Fire Prevention Committee announce that they have undertaken a series of comparative tests with cinematograph films of celluloid and of a substance known as "Cellit," and that the results of these tests may be summarized as follows:—

These tests demonstrated—

1. That an ordinary celluloid film is extremely inflammable and burns with great rapidity and fierceness.
2. That a loose roll of celluloid film when ignited is most difficult to extinguish with water or sand.
3. That celluloid films present in a building add most seriously to the fire risk.
4. That celluloid films when burning produce a pungent smell and dense suffocating smoke.
5. That a cinematograph film made of "Cellit" is practically a non-inflammable film, and may be described as "non-flaming."
6. That, even if the conditions are such that a loose roll of "Cellit" film should become ignited, the film either burns with difficulty, or can be easily put out.
7. That "Cellit" films may be present in large quantities in a building without materially increasing the fire risk.
8. That practically little or no objectionable smoke was produced when "Cellit" films were burnt.

Having regard to the results of these tests "Cellit" has been classified by the committee as "non-flaming."

This is the only celluloid substitute that has, so far, been submitted to the British Fire Prevention Committee for official test and carries its certificate.

LIENS AND THE BANK ACT

Those on Grain and Cattle and Those of Manufacturer's Discussed by Finance Minister.

The question of liens was prominent in the recent parliamentary discussions on the proposed Bank Act. In his reply to various crticisms, Hon. W. T. White, Minister of Finance, told the House that he had made careful inquiry into the provisions of the present Act under which manufacturers' liens may be given without registration. He found that the lien given by the wholesale manufacturer is in use daily in almost all the banks and their branches in the principal places. Thus, hundreds of these liens are being taken daily. He thought that, having regard to the fact that that provision had been in operation for over twenty years and has given satisfaction, it would be extremely unwise to enact now that anything in the nature of a chattel mortgage should be given and registered. The giving of a chattel mortgage is looked upon askance by the commercial community; and to make any provision for the filing of these liens, to say nothing of the difficulty owing to their number, would tend to disturb the whole commercial community.

Liens to Workmen.

With regard to liens which are given under the provincial laws to workmen Mr. White thought it a matter which should receive careful consideration on the part of the banking and commerce committee. He was not sure that the Dominion law over-rides the provincial law in this matter. He would see if a provision could be made to meet that position, if it is thought desirable by the committee to meet it.

On Grain and Cattle.

In regard to liens on grain and cattle there is a principle that has been recognized in the Chattel Mortgage Act of every province that anyone who has in his possession goods shall be assumed to be the owner unless, if he gives a bill of sale or chattel mortgage, he gives public notice of it. Mr. White thought that was a very good law. A good many evils arose from non-registration of these mortgages and bills of sale in the old days, and creditors were seriously and adversely affected. And the result is that in nearly all the provinces they have the usual law relating to chattel mortgages. He made some inquiries as to whether liens given by farmers could be registered conveniently—for, of course, the legislation as to loans upon threshed grain is general in this character, applying to the west and to the east. The committee would have to consider carefully in taking that question under review, whether facilities exist in the several provinces for the convenient registration of these liens if it is thought desirable to allow them.

Manufacturers' Lien Registered.

The manufacturer who has a lien on his manufactured goods sold to another has that lien registered. That is the law of Ontario, of Nova Scotia, of New Brunswick. There is not chattel mortgage in Quebec province. So, there are matters which will have to be considered first as to whether facilities exist throughout the Dominion under which these liens could be registered, and second, whether it is desirable that they should be registered. Much can be said in favor of registration; but it must be obvious that so far as the west is concerned—for this was primarily designed to meet conditions in the west—much will depend on the expense of the registration. It is obvious that if an expensive registration were provided for—let us say the drawing of a chattel mortgage and filing it—that might have the effect of so increasing the cost of the loan to the farmer who wished to borrow say $100, or $200, or $1,000, that he would not avail himself of this provision. As to liens on cattle, in 1890 that question was discussed fully, and the conclusion was reached at that time that it would not be in the interest of the creditors or the public generally that the powers should be given, and consequently up to this time it applied only to wholesalers and manufacturers—that is, the wholesale principle has governed—and they have been able to avail themselves of the Act and give a lien on goods in process of manufacture in order to pay for material and pay wages of workmen in the meantime. Wholesalers and manufacturers have been allowed to do that; not retailers and private individuals.

Personal Security of Individuals.

The gist and essence of Canadian banking has been to loan upon the personal security of individuals, which is a sound principle of banking. We all know the situation in the west, said Mr. White. We know that it is very undesirable that the farmer should have to market his grain quickly. He needs money and cannot get it. He has to throw his grain on the market, let us say, within a few weeks' time. He sells at a time when the price is not as good as he probably could get if he were able to wait and there are other considerations in connection with transportation and so on.

Mr. White made inquiries to ascertain whether the banks would be likely to lend more freely if such a provision was inserted in the Act, and he became satisfied from his inquiries that they would. It was by reason of that fact that he came to the conclusion that the advantages would outweigh the disadvantages and that the former should have the privilege of giving a lien upon the grain in his possession. With regard to grain in the possession of a third party, no question arises as to registration.

"If I held a warehouse receipt," said Mr. White, "that is a receipt from a third party—a responsible party—it is out of my power to dispose of that property or to deal with it in any way. In the same way, if I obtain a loan upon a bill of lading and the property which it covers is in the possession of a third party—a responsible party—it is out of my power to deal with it. The act has not in the past given power to an individual to give a lien upon property not in his own possession. However, I think this is well worth giving a trial, and if the committee, after a full discussion of the matter, comes to the conclusion that the lien should be registered, and if there are facilities for registration, I need not say I shall be only too glad to give that my very best consideration, because I do want to reach the best results in the matter, and to adopt the best method of bringing about that result."

Liens of Ranchers.

In reference to liens of ranchers upon their cattle, there has been great doubt as to whether cattle ranchers could legally give a lien to the bank. Mr. White thought it was desirable that the cattle raising industry should be encouraged, and all facilities afforded for its development. By virtue of a decision in the courts of Alberta, some doubt was thrown upon the rights of a bank to take a lien of that kind from so-called wholesale or large cattle raisers. It is very difficult to obtain a word that will cover the case. In 1890, when a definition was sought of the word 'wholesaler,' it was finally decided that a wholesaler was a wholesaler, and the word could not be otherwise defined. "We are only too glad," continued Mr. White, "to consider any improvement to that clause, or, as a matter of fact, any other clause of the bill. What we desire to do is to assist, by giving proper banking facilities to those who raise cattle in the west, in order that the industry may be encouraged to as great an extent as possible."

◆

CANADA'S DAIRY INDUSTRIES

Factories Divided Into Four Classes—Much Capital Invested—Twenty-seven Million Pounds of Condensed Milk.

The latest census of the dairy industries of Canada was taken in June, 1911, for the calendar year 1910. It presents the statistics (1) of factories making butter only, (2) factories making cheese only, (3) factories making butter and cheese, and (4) factories making condensed milk.

The statistics for making butter only, shows that there were 1,035 factories in operation and that the value of buildings and plant was $3,897,532. The number of engines and motors employed was 1,210 and the indicated horse power 11,492. The number of patrons of factories was 76,579 and of days in operation 238,280. The quantity of milk converted into butter was 917,903,274 pounds, and of cream converted into butter 48,328,974 pounds, and the total quantity of butter made from milk and cream was 57,328,191 pounds, with a value of $13,726,546. Patrons were paid as their share of this value $11,832,705, and the employees of factories were paid for salaries and wages $690,347.

Two Thousand Cheese Factories.

The statistics of factories making cheese only, shows that there were 2,154 factories in operation and that the value of buildings and plant was $3,455,528. The number of engines and motors employed was 1,772 and of horse power 13,485. The number of patrons of factories was 70,778, and of days in operation 365,372. The quantity of milk converted into cheese was 1,724,132,011 pounds, and the quantity of cheese made 162,450,802 pounds with a value of $17,524,021. The patrons of factories were paid $15,299,855. The employees of factories were paid for salaries and wages, $739,030.

The statistics of factories making butter and cheese, shows that there were 436 factories in operation and that the value of buildings and plant was $1,394,498. The number of engines and motors was 472, and of horse power 4,211. The number of patrons of factories was 22,766, and of days in operation 103,505. The quantity of butter made was 7,690,189 pounds, with a value of $1,870,861 and of cheese 37,453,403 pounds, with a value of $4,063,103. Patrons were paid for butter $1,625,644, and for cheese $3,540,566. The aggregate days of service was 198,090, and the earnings of salaries and wages $272,398.

Milk Is Condensed.

The statistics of factories making condensed milk, shows that there were 11 factories in operation, and that the value of buildings and plant was $929,649. The number of engines and motors was 18 and of horse power 607. The number of patrons of this class of factories was 904, and the quantity of milk delivered was 69,264,090 pounds with a value of $838,912. The quantity of condensed milk made was 27,831,596 pounds and the value as produced was $1,813,971. Other products of the factory are valued at $900. The aggregate days of service are reported as 106,772, and the value of salaries and wages as $170,356.

SEVENTEEN THOUSAND TONS OF NICKEL

Valued at More Than Three and Half Million Dollars Were Obtained From Ontario Mines.

The returns of the Ontario bureau of mines show that from the mines of the Sudbury district there were raised, in 1911, 612,511 tons of nickel-copper ore, and at the blast furnaces of the mining companies there were smelted 610,788 tons of ore. The product was 32,607 tons of Bessemer matte, the nickel contents of which were estimated at 17,049 tons, valued at $3,664,474, or at the rate of 10.75 cents per pound. As compared with 1910, the production fell off somewhat, the output of matte being less by 2,626 tons, and of nickel contents by 1,587 tons. The production, however, was larger than in any previous year, with the exception of 1910, and towards the close of the twelve months the mines were very active, and production was going on at full capacity rate. The number of employees at the mines and works was 2,439, of whom 35 were boys, all working above ground.

Producers and Their Plants.

The producing companies were the same as in former years —the Canadian Copper Company, and the Mond Nickel Company. The former was the pioneer in the Ontario nickel mining industry and remains the largest producer. Its works are at Copper Cliff, and are maintained at a high level of efficiency. During the year 1911, ten acid converters for bessemerizing the low-grade matte produced in the blast furnaces were replaced by five basic converters, and two reverberatory furnaces were installed to treat about 50,000 tons of flue dust, the accumulation of years from the blast furnace dust chambers, also a similar accumulation of green ore fines from the mines, too small for use in the blast furnaces.

Of the 449,159 tons of ore mined by the Canadian Copper Company last year, 351,311 tons were taken from the Creighton mine, 66,023 tons from Crean Hill, and 34,825 tons from No. 2.

The Mond Nickel Company has hitherto had its smelting plant at Victoria Mines, west of Sudbury, in proximity to its mine of the same name. Recently, however, a new site has been selected at Coniston, near the crossing of the Canadian Pacific and Canadian Northern Railways, and new smelters there are well advanced towards completion. One advantage will be nearness to the company's mine, in the township of Garson, from which the bulk of its ore is now obtained. In 1911, out of 163,352 tons of ore raised by the Mond Company, 116,932 tons came from the Garson mine, and 46,370 from Victoria No. 1.

Considerable diamond drilling was done on its properties, in the northern nickel range by the Dominion Nickel-Copper Company, but the mines have not yet reached the productive stage.

Nearly Four Hundred Tons.

Owing to the absence of assay records, reports Mr. T. W. Gibson, deputy minister of mines, it is impossible to say, with accuracy, how many tons of nickel were contained in the ore taken from the silver mines of Cobalt in 1911. But, assuming that the percentage of nickel adopted in last year's returns for the ores and concentrates shipped from Cobalt, namely, 1.47, is approximately correct, this would give 392 tons of nickel produced by the mines of that camp. There can be no doubt that at least that portion of the nickel which is contained in the mixed oxides exported from the refineries finds its way into some industrial use. Adding, therefore, the 392 tons of nickel from Cobalt to the product of the Sudbury mines, a total of 17,441 tons of nickel is obtained as the output for the year.

◆

CANADIAN LUMBERMEN AND TARIFFS.

The report of the Canadian Lumbermen's Association at their annual meeting at Ottawa referred to the proposal of the Ways and Means Committee of the United States Congress to take off the duty on lumber entering the States. It continued:—

"A year ago we discussed the proposed duty on sawn lumber coming into Canada. To-day there are evidences that our neighbors to the south may so revise their tariff that it might be urged as an argument that a revision of the Canadian tariff is now necessary or desirable. There is one feature concerning this matter, however, and that is the admission by Canada of lumber planed on one side free of duty.

"This affects our friends in the West to a very serious extent, and may become more of a menace to this section of the country as time advances.

"When a lumber-producing country like Canada imports from the United States to the extent of nearly a million dollars a month, as was the case during 1912, even admitting that one-third of this is practically lumber not grown in this country, it will be seen that Canadian lumbermen are meeting with very active competition from the United States."

◆

The capital stock of the Wahnapitae Power Company, Limited, has been increased from $250,000 to $500,000 by the creation of 2,500 shares of new stock at $100 each.

PRODUCTION OF LIME

Growth of Western Canadian Centres Indicated by Increase Which Amounts to Twenty-four Per Cent. of Total.

The production of lime in Canada in 1911, according to returns from the producers, was 7,533,525 bushels, this being the amount sold or used, equivalent to about 263,673 tons, and valued at $1,517,599, or an average of 20 cents per bushel, or $5.75 per ton, states Mr. J. McLeish, B.A., chief of the division of mineral resources and statistics, in a recent report. The production in 1910 was reported as 5,848,146 bushels (204,685 tons), valued at $1,137,079, an average of 19 cents per bushel, thus showing an increased production in 1911 of 1,685,579 bushels or 22 per cent.

Seventy-Five Producers.

Returns were received from seventy-five active firms in 1911, as compared with seventy firms in 1910. The average number of men employed was 1,056, and wages paid $523,518 during 1911, as against 976 employed and $466,876 paid in wages in 1910. Statistics of labor and wages should be used with discrimination, however, as many firms producing lime are also engaged in quarrying stone for purpose other than lime making and are unable to make separate reports to labor employed. This is particularly evident in the record for Nova Scotia and New Brunswick, since for the first mentioned the record includes only the labor employed at the kilns, while for the latter the quarry costs are also reckoned.

The average price per bushel varied from a minimum of 16 cents in Ontario to a maximum of 34 cents in British Columbia.

Hydrated lime was produced by three firms only, the sales being 5,023 tons.

A small quantity of lime is annually made in Prince Edward Island.

Export and Import Trade.

The value of the lime exported during the calendar year 1911 was $39,536, the destination of shipments being mainly the United States. The quantity is not reported, but at the average price of lime in Canada (20 cents a bushel) the quantity would be about 692 tons.

The imports of lime during the same period were 228,538 barrels (22,853 tons), valued at $161,985; an average of 70 cents per barrel, or $7.08 per ton, and were derived chiefly from the United States.

In reviewing the production of lime by provinces it will be observed that the Provinces of Ontario and Quebec, being the chief centres of population, are the largest producers, the former contributing in 1911 over 35 per cent. of the total quantity, and the latter 23 per cent.; the production west of the great lakes has, however, been rapidly increasing, these provinces accounting for nearly 24 per cent. of the total in 1911, as against 14 per cent. in 1908.

◆

FAVORED NATION TREATIES.

Mr. W. A. S. Hewins, M.P., said at a lecture in London the idea that prevailed that Great Britain was the only country having most favored nation treaties was a wild delusion. They had nearly 50 such treaties, while Germany had between 30 and 40, and nearly all the countries of the world, bound together, had similar treaties. This system came into operation in 1860, when Richard Cobden entered into the Anglo-French treaty, and that most favored nation treaty became the model of all the West European countries, and the British interpretation was accepted by the whole world, except the United States. Their interpretation was that if they granted most favored nation treatment they must have reciprocal concessions. Supposing Great Britain adopted the United States system, it would knock to pieces every tariff system in the world. Discussing the projected tariff agreement between the United States and Canada, and pointing out the different principles upon which the tariffs of the States and Canada were built, Mr. Hewins said there was solid ground for the view that under the most favored nation treaties entered into by Canada, the reciprocity treaty, if it had been adopted as drawn up, would have threatened the whole tariff system of Canada as drawn up by Sir John Macdonald. Speaking of the need there was for a great British federation, he said they had to solve the tremendous problem within one Empire, under one flag, under similar intsitutions and laws, under the influence of the same great traditions of the fullest national developments of the great dominions of the Crown, and at the same time these great dominions were to be bound with Great Britain and the other colonies in the great Imperial development of a larger unity in the world at large. In this respect Great Britain had to draft a most favored nation clause and invent a system which would carry that country through the various tariffs. They had to come down from the heights and do the humdrum work and the drudgery.

REVISION OF FIRE INSURANCE POLICIES

Special Commissioner Thinks Present Form is Filled With Perils—There is Too Much Verbiage, He Says.

The standard revision of fire insurance policies continues to exercise the minds of commissioners, policyholders and companies. The latest contribution to the discussion is the report of Mr. W. B. Ellison of New York, who was appointed special commissioner to conduct a hearing into the proposed standard revision. He thinks the present form is filled with perils and could be reduced to one-half its present verbiage. He says:—“I have at no time been unmindful of the real interests of the insurance companies in the conduct of my investigations, and they have been afforded the fullest opportunity of appearing and presenting their views in regard to this most important subject. So as to avoid any possible criticism that the insurance companies were not given ample opportunity to be heard. I personally communicated with every member of our bar whom I knew to be counsel for one or more of the companies. * * *

Innocent Insuring Public.

“The present form is filled with perils to the innocent insuring public, and it is now, in my opinion, beyond dispute that there should be a simplification at least of the conditions upon which protection against fire in the way of insurance is obtainable. The standard form of this State contains a mass of technical conditions and provisions that the public finds difficult indeed to understand. Indeed, they are so fraught with technicality and ambiguity that the courts themselves, the highest courts of record in the country, constantly differ in matters of construction. This should not be difficult of remedy, and the public welfare demands that it be remedied at once. * * *

“Let us, for instance, look at the provisions of the policy applicable to the matter of procedure on the part of the insured in case of fire. The present form provides that if the fire occur the insured shall give immediate notice of loss. Now there can be no objection to this provision, nor to the following, which makes it mandatory on the insured to protect the property from further damage, separate the damaged and undamaged personal property, put the same in good order, and make a complete inventory thereof, stating quantities and costs, so far as possible, together with the amount claimed thereon. But following this provision there is one which makes it mandatory on the insured within sixty days to render a statement or proof of loss containing a great deal of detailed matter.

Sixty Days for Claim.

“If the insured omit to present this statement or proof of loss within sixty days his claim is beyond recovery. It is not infrequently the case—in fact, it is usually so—that the company's adjuster is immediately on the scene of the loss and takes up its adjustment. The insured trusts the company's representative and furnishes him with all such information as he may require. The insured, however, forgetful of the sixty-day provision, or believing that the adjuster is protecting his interests in the matter, omits to serve the statement or proof of loss before referred to. He then stands at the mercy of the insurer. This may be readily changed and furnish ample protection to the insured by providing that such statement or proof of loss shall be rendered within sixty days only when so required by the insurer. If the insurer wants the information called for it is easy for it to make a demand therefor. such a demand would put the insured immediately on his guard and cognizant of the necessity of complying therewith. As the form now reads, no such demand by the insurer is necessary, and over and over again the insured becomes unmindful of his obligation in respect thereto and omits to furnish the statement or proof referred to. Placing the burden on the insurer to demand it leaves no excuse on the part of the insured for failure so to do. Many meritorious claims have been defeated in the courts by a failure to comply with this provision, hidden away as it is in the labyrinth of technicalities now largely making up the present form of policy.

Provision Is Too Broad.

“Then, there is the further provision in case of fire that the insured shall ‘as often as required’ exhibit to any person designated by the company all that remains of the property and submit to examinations under oath by any person named by the company, and also as ‘often as required’ shall produce for examination all books of accounts, bills, invoices. vouchers, etc., at such place as may be designated by the company. This provision in so far as it requires the insured ‘as often as required’ to do the things referred to, is entirely too broad. It is true that the insurer should be given a reasonable opportunity to make the examinations in question, but it should not have the power to put the insured to the trouble and expense thereof ‘as often as required.’ It subjects the insured to harassment at the hands of the insurer, and not infrequently the opportunity has been taken advantage of.

“There is also a provision that in case of disagreement between the insurer and the insured as to the amount of loss, the insurer may force the insured into an appraisal thereof. This provision takes from the insured the right to go into court and try his case in the ordinary way and in the way provided by law for the disposition of just such disputes. There is no reason why a loss claimant should be forced to submit his claim to three appraisers unless he is willing so to do, and the present policy should be amended so as to place that feature of the case within his election, leaving him to seek his remedy in the courts should he prefer so to do.

Cut Half of the Verbiage.

“The present policy could well be reduced to at least one-half of its present verbiage, and by so doing infinitely clarify its provisions. It could thus be made readily understandable by the insured and he be thus made aware of his obligations thereunder.

“The fundamental difficulty with the plan to standardize a form of contract throughout various States is that the courts of such States do not harmonize, and there is no judicial power above them to bring their conflicting decisions into harmony. This might be accomplished by further legislation in all of the States, but that seems to be highly improbable, if not impossible, as is well evidenced by the difficulties that now exist between the various forms of standard policies already made the subject of legislative enactment.

“It seems to me. however, as I have shown in some of the instances to which I have referred, that gross injustice has been done on either one side or the other of the questions in dispute. And I am prompted to suggest a possible remedy, though undoubtedly one of infinite difficulty in consummation, and that is the adoption of a standard form through the medium of the national Government. Such a contract would be subject to construction by the Supreme Court of the United States, and such construction would be final, and in time we might hope to have the various provisions of the policy receive a judicial construction that would have to be accepted in all parts of the country.”

WANTS SASKATOON'S CIVIC INSURANCE.

Saskatoon is carrying fire insurance on buildings, and on equipment, amounting to over half a million dollars. In addition there is employer's liability insurance carried by the city on the men in its employ and also on the members of the fire brigade. Premiums must also be paid on fidelity bonds which are also necessary in the case of certain offices of trust in the civic administration. Altogether the annual premiums paid by the city during the year amount to $8,309.69, and the total amount of the insurance carried to $674,610. Local firms have applied for appointment as the city's insurance underwriters.

These applicants are willing to do the work free of cost to the city on the understanding that they should be given a fair share of the city's insurance business. This would take all the detail work from the hands of the city clerk, although the policies would still remain in his possession.

It is suggested that all the policies now carried by the city on some 35 or 40 different risks should be set forth on one application and that the various companies represented in the city should be given their proportionate share of the total risk.

At present the city are carrying fire insurance on the following risks for the corresponding amounts: Stores, $50,000; city hospital. $56,000; fire halls, $54,360; new city offices, $37,500; board of health equipment, $16,110; old power house, $75,500; old police station, $1,600; police patrol, $3,400; old city offices, $4,000; board of works equipment, $11,000; city market, $8.000; nurses' home, $27,500; fair buildings, $62,750; board of trade building, $5,000, and children's home, $1,300.

VITAL STATISTICS.

That the Association of Life Insurance Presidents will concentrate its endeavors along health reform lines in a movement for the enactment and enforcement of adequate vital statistics registration laws in the United States is disclosed by the report of its health committee, adopted by the association at its recent sixth annual convention. This report, which was presented by Chairman F. W. Jenkins, president of the Security Mutual Life Insurance Company, of Binghamton, was not given out for publication until a few days ago. because further data had to be obtained from the Census Bureau for the completion of a registration area map which accompanies it.

The work of the association will be largely in co-operation with the census bureau, which is advocating a standard form of registration throughout the country, and with the constituted authorities of those states where there is not adequate registration at present.

The report is signed by all of the members of the health committee, who, besides Chairman Jenkins, are as follows: Mr. J. R. Clark, president Union Central Life; Mr. W. F. Dix, secretary Mutual Life, of New York; Mr. J. L. English, vice-president Aetna Life, of Hartford; Mr. John K. Gore, vice-president and actuary Prudential Insurance Company; Dr. A. S. Knight, medical director Metropolitan Life and Mr. Edgar S. Scott, president Franklin Life, of Springfield, Ill.

VHY MICHIGAN BARRED BIG FIRE COMPANIES

.aw Regarding Limited Insurance Written on Single Risk Was Violated.

The fire insurance companies do not view seriously the ction of Insurance Commissioner Palmer of Michigan in baring twenty-three corporations from that State. They are eclared to have written higher risks than the laws of the tate permitted. Most of the companies affected are also oing business in Canada, although the Canadian managers ave no jurisdiction outside the Dominion. They are none the ss interested in the case. Mr. H. M. Blackburn, manager for anada of the Sun Insurance Office of London, England, with anadian branch office at Toronto, tells The Monetary Times e thinks that the companies will probably be invited very hortly to return, adding that it is a serious matter for any tate to lose the protection provided by such a number of rst-class offices.

Mr. J. Gardner Thompson, manager of the London, Liverool and Globe Insurance Company, says the United States so busy "grandmothering" in legislation at present that he companies find it difficult to follow the laws governing nsurance in the various States.

ompanies Barred from State.

Among the companies ordered out are the following:—iverpool and London and Globe Insurance Company, Liverool; North British & Mercantile Insurance Company, London nd Edinburgh; Norwich Union Fire Insurance Society, imited, Norwich, England; Phoenix Fire Insurance Company, aris; Scottish Union and National Insurance Company, Edinurgh; Sun Insurance Office, London.

The letter addressed to the companies by the Insurance ommissioner says that the provision of the law on the subect of limited insurance written on the single risk has been iolated, under either construction of the statute, namely, hether re-insurance is to be deducted, and the statute to be pplied only to net amount carried by the company, or whether en per cent. of the capital stock is the only amount the comany can write upon a single risk, regardless of re-insurance.

sked Attorney-General.

It appears that the Michigan Insurance Department was ot quite sure of its ground as it asked the Attorney-General f the State for an opinion as to the construction of the last entence of section 6 of Act 136, P. A. 1869 (sec. 7, 229, C. L. 897), which reads as follows:—

"No fire insurance company organized under this Act, or ransacting business in this State, shall expose itself to any oss on any one fire or inland navigation risk, or hazard, to n amount exceeding ten per cent. of its paid up capital, nor hall any fire insurance company organized under the laws, r by authority of, any foreign government, expose itself to ny loss on any one fire or inland navigation risk, or hazard, o an amount exceeding ten per cent. of its deposited capital n the United States."

But one decision has been found directly construing a imilar provision and in that case an added provision changed he tenor of the decision. This added sentence (in the New ork Statute) reads as follows:—

"No portion of any such risk or hazard which shall have een re-insured in a corporation authorized to do insurance usiness in this State shall be included in determining the imitation of risk prescribed in this section." New York Laws 892, Chap. 690, Section 24.

"The Supreme Court of New York held," replied the Attorney-General, "that, under this provision, though defendant nsurance company had exceeded the ten per cent. limitation and had then re-insured the excess, since the statute expressly provided for the deduction of the portion insured, the company could comply with the statute by re-insuring, and it was bound to do so and thus live up to its contract with the assured; and this decision was affirmed by the Court of Appeals of that State. Mosier vs. United States Fidelity and Guaranty Company, 119 N. Y., Supp. 157, affirmed without opinion in 202. N. Y. 521. It is evident from the language of this opinion that had there been no provision in the statute as to re-insurance, this action of the insurance company would have been held a violation of the law.

Void as to Excess.

"It may be argued that in general an insurance policy is void as to the excess over the amount of risk prescribed and hence a company would not be exposing itself beyond the statutory amount, but there are decisions to the effect that under similar statutory limitations, where an insurance company deliberately and voluntarily insures one in an amount above this limitation, the policy will be held valid as against the company. Fuller vs. Boston Mutual Fire Insurance Company, 4 Metc. (Mass.) 206; Williams vs. New England Fire Insurance Company, 31 Me. 219, 227, and Moore vs. Susquehanna Mutual Fire Insurance Company, 196 Pa. 30. So that the question as to the amount of risk to which a company is thus exposed becomes one of serious doubt.

"Again, it may be claimed that by re-insuring, an insurance company prevents this exposure to a higher risk than allowed by law. To this there are two answers: (1) There is no assurance that the company in which a former company is re-insured may not fail, and leave the former company primarily liable for the whole amount; and (2) if the legislature had intended such re-insurance, of the portion in excess, to be lawful, they could easily have inserted a provision in our Michigan statute similar to the one in the New York statute above. Since they have not done so, we cannot presume that intention to exist. I am inclined to believe, therefore, that according to our statute, any exposure to loss by a fire insurance company on any one risk to an amount exceeding ten per cent. of its paid up capital, would be a violation of the law."

◆

REGINA'S FIRE LOSSES.

Regina's fire department responded during the past year to 135 alarms. This exceeds the number of last year by 34. The total loss by fire during the year amounted to $139,120.41, being $33,086.22 more than 1911.

Total loss on buildings and contents, $139,120.41.

Total insurance on buildings and contents, $689,600.00.

Estimated value of buildings and contents to which the department was called and used either water or chemicals was $3,249,350.00.

Fire Chief White mentioned the cyclone which so materially affected Regina and from which loss the city rapidly recovered. Said he: "This was a very trying time on the firemen, as we had no possible way to get fire alarms except verbally, and I must thank the citizens for being so careful during this time about their fires."

		—Losses—		—Insurance—	
Month.	Alarms.	Goods.	Buildings.	Goods.	Buildings.

NEW REGULATIONS FOR GOLD AND SILVER MARKING.

New regulations for marking gold, silver and plated goods will probably become law. A bill has been introduced in the Senate and it will then have to pass the House of Commons. Gold and silver articles offered for sale in Canada, if marked at all, will hereafter have to bear a trade-mark, and in addition "a mark truly and correctly indicating the quality of gold and silver," or a British hall mark, or the correct official mark of any foreign country correctly indicating the quality of gold or silver. In addition to this the article may bear a numeral intended to identify the article or pattern, and may also bear the name or initials of the dealer or any other mark not calculated to mislead or deceive. An article cannot be marked gold which is below nine karats in fineness.

The marks "silver," "sterling," "sterling silver," "coin" or "coin silver" shall not be applied to an article containing less than nine hundred and twenty-five thousandths pure silver. Below this the fineness of silver articles shall be indicated in decimals, as .800 or .900 silver.

Gold and silver plated ware, if bearing any mark whatever, must also bear a registered trade-mark to indicate the manufacturer. In the case of electro-plated silver ware there "may be applied a mark indicating truly and correctly the grade or quality as known to the trade of the plating," and there must also be a mark indicating the metal upon which the plating is deposited. The quality mark for the silver plating must indicate "truly and correctly the number of ounces or pennyweights of pure silver upon twelve dozen articles exactly the same in size, design and plating as the article to which the mark is applied."

The word "silver" alone, or in a compound word, is not authorized for use on a plated article except in the words "nickel-silver" or "German-silver." An article is not to be marked "nickel-silver" or "German-silver" unless ten per cent. of the inferior metal on which the plating is deposited is pure nickel. "When the base of inferior metal upon which the plating of silver is deposited contains less than ten per cent. of pure nickel there shall be legibly stamped on the article the word 'brass.'"

BRITISH PREFERENCE EXTENDED.

In addition to the British countries enumerate in the Customs Tariff, 1907, the benefits of the British preferential tariff will be extended to and apply on goods the produce or manufacture of the following countries: Swaziland, Basutoland, Bechuanaland Protectorate, Northern Rhodesia, Nayasaland Protectorate, Uganda Protectorate, East Africa Protectorate, Protectorate of Northern Nigeria, Colony and Protectorate of Southern Nigeria, Gold Coast, Sierra Leone, Gambia, Somaliland Protectorate, Federated Malay States, British North Borneo, Mauritius and Dependencies thereof, Seychelles, St. Helena, Ascension, Friendly or Tonga Islands, Fiji, Falkland Islands, British Honduras.

IMPERIAL OIL COMPANY EXPANDING.

A special meeting of the shareholders of the Imperial Oil Company will be held at Sarnia, Ontario, on Monday, to discuss the proposed increase of the company's capital stock from $6,000,000 to $15,000,000. The company also seeks authority to take or purchase, or otherwise acquire and hold shares of stock in any company or companies manufacturing or dealing in oil stoves or heaters, or any other appliances, machinery or apparatus in any way connected with or incidental to the production or use of petroleum or any product or by-product thereof; or in any other company or companies having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as to directly or indirectly benefit the company, and to own and operate boats, receiving stations, pumping stations, tank wagon delivery equipment, etc., and to extend the territorial jurisdiction of the company from "throughout the Dominion of Canada" to "throughout the Dominion of Canada and elsewhere."

INSURANCE RATES ON ST. LAWRENCE.

Mr. Foster, Minister of Trade and Commerce, was asked in the House at Ottawa, whether he had received resolutions passed by the Montreal Board of Trade about the diversion of grain traffic of Canada through the United States in view of the high insurance rates. Mr. Foster replied that the matter of insurance rates to Canadian ports as contrasted with the rates in the zone to the south of us, has for the last year engaged the attention of the Minister of Marine and Fisheries and himself, and a good deal of time has been expended and a great deal of information collected. The position taken by the ministers is sympathetic with any means by which more reasonable insurance rates can be got for the St. Lawrence route, and our Atlantic shipping ports, at the same time they think it is up to the shipping and exporting interests to take the first step towards some practical method of meeting the difficulty. In taking that step they will be sure of the sympathy and co-operation of the Government, but to what extent Mr. Foster was not prepared to say.

NO RUBBISH FIRES AT PETERBOROUGH.

During the past year the Peterborough, Ontario, fire department responded to 131 alarms, reports Fire Chief Howard. 23,650 feet of 2½ inch fire hose were laid and 726 feet of ladders raised. In extinguishing fires 434 gallons of chemicals were used.

The total damage by fire, as near as could be estimated for the year 1912, was $20,970.00, divided as follows: $12,632.00 damage to contents, and $8,338.00 damage to buildings. The fire loss per capita for this city is about $1.07, which is much lower than the average for the Dominion, which is estimated by The Monetary Times at $3.05.

The systematic inspection of public and mercantile buildings conducted by the department has been continued throughout the year. During the year the fire chief made 275 inspections of buildings and premises, divided as follows: 11 schools, 178 stores, 12 hotels, 14 churches, 32 factories, 4 theatres, and 24 special calls.

The introduction of the collection of garbage has had a far-reaching effect. The premises of the business district were in better shape last year than ever before, and during the year there was not a cellar fire nor a fire caused by the accumulation of combustible rubbish. There is considerable carelessness with electric wiring, and a by-law should be passed providing for the inspection of all new work, and alterations to existing wiring, comments Fire Chief Howard, who states that a new sub-station, chemical engine, more fire alarm boxes, placing of wires underground wherever possible, are among the fire protection requirements of this growing city.

Permission has been granted to the York Ontario Silver Mines, Limited, to keep its books outside the province of Ontario.

FINANCES OF ST. JOHN

Debenture Debt Exceeds Five Millions — Caution Regarding Further Bond Issues

The debenture debt of St. John, N.B., at the close of the past year was $5,028,795. Of this amount $2,600 is past due and has not been presented for payment, is the report of Comptroller Macintyre. Bonds to the amount of $21,500 matured during the year, and were paid from sinking funds; in addition water bonds amounting to $10,900, which matured May 1st, 1911, were presented and paid. Saint John City debentures Nos. 2599, 2600, 3½ per cent., $500 each were lost on SS. "Titanic." Upon proof of loss, and the filing of a bond of indemnity by Bank of Montreal these bonds were retired at the market rate, making a total of $35,900 paid during the year.

Certificates of indebtedness bearing interest at 4½ per cent., were issued to cover the following capital expenditures, namely:—

Sewerage construction	$11,483.56
Paving King Street	8,842.89
Paving Charlotte Street	14,000.00
Gordon & Sleith, Quinlan award	12,346.82
Balance South Rodney Wharf construction	3,146.16
Proportion Marsh Bridge Aboideau	8,680.57
Proportion Germain Street pavement	7,000.00
Total	$65,500.00

This leaves a net increase in the bonded debt of $29,600.

Bonds Outstanding.

In the year 1913 debentures amounting to $99,000 will mature, the sinking funds will provide for $84,000, leaving $15,000 to be re-issued or otherwise dealt with.

An abstract of the bonds outstanding on the 31st December, 1912, follows:—

$729,750	6 per cent.	$43,785
344,800	5 per cent.	17,240
3,194,645	4 per cent.	127,785
691,500	3½ per cent.	24,203
65,500	at 4½ per cent., first payment of interest 1st May, 1913	
$5,026,195		$213,013
2,600	due, not presented, no interest.	
$5,028,795.		

The debt has now passed the five millions, and in all probability bonds will have to be issued for needed civic improvement for this year.

Utmost Caution Regarding Issues.

Mr. Macintyre impresses upon the commissioners the necessity of the utmost caution in regard to future issues, so that the high standard of St. John securities be maintained both at home and abroad.

The city was in a position to purchase for sinking funds the comparatively small issue of last year.

The sinking funds are in good condition. At the credit of this account at the close of the year was the large sum of $1,046,580.92, invested as follows:—

In bonds, etc.	$935,848.21
Deposited in Bank of New Brunswick sinking fund account	107,494.35
	$1,043,342.56

The balance, $3,238.36, was deposited to Bank of New Brunswick sinking fund account, as soon as correct balance was ascertained.

During the year the sum of $105,000.00 received from the sale of city's properties was added to city debt sinking fund account.

GRAND TRUNK EQUIPMENT ORDERS

Orders have been placed by the Grand Trunk system for locomotives as follows for the coming year: 25 Mikado type from the American Locomotive Works, Schenectady, N.Y.; 50 Pacific type from the Baldwin Locomotive Works, Philadelphia, and 15 large standard switching engines from the Canadian Locomotive Works at Kingston. The Mikado locomotives are larger than any locomotives now in use in Canada. Ten Pacific engines have also been ordered from the Montreal Locomotive Works.

The Grand Trunk will place forty new towns in Western Canada next spring.

he Union Trust Company, Limited

ANNUAL MEETING OF SHAREHOLDERS

The Annual General Meeting of the Shareholders of the Union Trust Company, Limited, was held at the Company's fices, Bay Street, Toronto, on Thursday, the sixth day of February, 1913.

Twelfth Annual Report of the Board of Directors, December 31st, 1912

Your Directors have pleasure in submitting herewith the Twelfth Annual Report of the Company's business the year ended December 31st, 1912.

The net profits for the year, after payment of interest on Guaranteed Investments, cost of management, salaries, es and expenses of every kind amounted to	$206,401.23
Brought forward from the preceding year	32,541.50
Making a total of	$238,942.73
Out of this sum there have been paid:—	
Four Quarterly Dividends at the rate of ten per cent. per annum	$100,000.00
Added to the Reserve Fund	100,000.00
Balance carried forward	38,942.73
	$238,942.73

A daily audit of the Company's Accounts has been maintained throughout the year, and a copy of the ditors' Report is attached to the Statement. The Company's securities have also been inspected by the Inspection mmittee appointed by the Shareholders.

All of which is respectfully submitted.

CHARLES MAGEE,
Chairman of the Board.

J. M. McWHINNEY,
General Manager.

Sir George W. Ross and Mr. W. H. Hunter were appointed members of the Inspection Committee, and Messrs. Charles R. Cumberland and A. C. Neff, F.C.A., were appointed Auditors of the Company.

The following were elected Directors for the ensuing year:—Messrs. Samuel Barker, M.P., H. H. Beck, T. Willes Chitty, E. E. A. DuVernet, K.C., Henry F. Gooderham, Right Hon. Lord Hindlip, Messrs. Charles H. Hoare, S. F. Lazier, K.C., Charles Magee, George S. May, Dr. J. H. McConnell, Messrs. J. M. McWhinney, H. S. Strathy, Hon. Elliott G. Stevenson, Sir George W. Ross.

At a subsequent meeting of the Directors Mr. H. H. Beck was elected President, and Hon. Elliott G. Stevenson and Mr. E. E. A. DuVernet, K.C., Vice-Presidents, and Mr. Charles Magee, Chairman of the Board of Directors.

The London & Canadian Loan & Agency Co., Ltd.

THIRTY-NINTH ANNUAL MEETING

The Thirty-ninth Annual Meeting was held at the Company's Head Offices, 51 Yonge Street, Toronto, on Wednesday, 5th February, at 12 o'clock noon.

The President, Mr. Thomas Long, occupied the chair; the Secretary, Mr. W. Wedd, Jr., acted as Secretary of the meeting, and Messrs. John W. Beaty and G. G. S. Lindsey, K.C., were appointed scrutineers.

The Annual Report was unanimously adopted, and also the statements for the year ending 31st December, 1912, as presented by the Manager, Mr. V. B. Wadsworth.

The gross earnings, including the balance ($15,361.20) brought forward from last year, amounted to	$341,251.53
And after deducting the cost of management, interest on Debentures, and other charges, amounting in all to	184,666.26
There remains a net profit of	$156,585.27
Out of which four quarterly dividends at the rate of 7 per cent. per annum and the usual Tax on Capital and Business Tax have been paid, amounting in all to	70,840.06
Leaving a balance of	$ 85,745.21

Of which $69,000 was transferred to the Company's "Rest Account," and $16,745.21 was carried forward at the credit of "Revenue Account" to next year.

The "Rest Account" now amounts to $485,000, made up as follows:—

Amount at 31st December, 1911		$400,000.00
Added from "Revenue Account," as above	$69,000.00	
Added from "Contingent Account"	16,000.00	85,000.00
		$485,000.00

During the year applications for loans on mortgages were accepted and renewed to the amount of $1,174,763 on Real Estate valued at $3,060,000.

The total assets of the Company are now $4,861,941.

The increase in the Company's mortgages during the year amounted to $451,393.

In accordance with the intimation made to the Shareholders at the last Annual Meeting, the rate of dividend was increased from six to seven per cent. per annum, payable quarterly.

Owing to the large and profitable business offering, the Directors, under the powers contained in the Company's Acts, allotted to Shareholders of record on 15th December, 1912, five thousand shares at par ($50 per share), amounting to $250,000, being part of the 20,000 unissued shares of the Company's Capital Stock, in the proportion of one share of the new stock for every four shares of the then existing holdings.

The Scottish Board and Agents continue to renew the Company's Sterling Debentures as they mature, on favorable terms, and have increased the Debenture issues considerably during the past year.

The various Officers of the Company performed their duties faithfully and to the satisfaction of the Directors; and the books, accounts, vouchers and securities have been duly examined by the Auditors, and their certificate of audit is hereto appended.

THOMAS LONG,
President.

Toronto, January 24th, 1913.

AUDITORS' CERTIFICATE.

To the President and Directors of the London and Canadian Loan and Agency Company, Limited:

Gentlemen,—We have completed the audit of the books and accounts of the Company for the year ending 31st December, 1912.

We have also examined the Mortgages and Debentures and other Securities for Loans, together with the various statements thereof, and find that they agree with their respective entries in the Ledger, and we hereby certify to the correctness of the accompanying statements of "Assets and Liabilities" and "Revenue Account" for the past financial year.

We are, gentlemen, yours faithfully,

G. H. G. McVITY,
J. GEORGE, F.C.A. (Can.)
Auditors,

Toronto, 23rd January, 1913.

We have examined the Books and Accounts of the Canada Cement Company Limited for the fiscal year ending December 31, 1912, and certify that, in our opinion, the above Balance Sheet is drawn up so as to show a true and correct view of the financial position at that date. The profits of the year as shown on the Balance Sheet are arrived at after deducting a sufficient amount for depreciation, and after making provision for improvements of plants as authorized by the Directors.

(*Signed*) PRICE, WATERHOUSE & CO.
Chartered Accountants (England)

Montreal, Que., February 3, 1913

MORE BELL TELEPHONE BONDS

A special meeting of the Bell Telephone Company of nada will be held on February 27 to authorize the directors issuing additional bonds and debentures to the amount of 0,000. The outstanding bonds of the company amount $6,399,000, and the paid-up capital to $15,000,000. The npany has authority to issue bonds up to 75 per cent. of paid-up capital, which, with the new issue recently announced, will amount to $18,000,000 by the end of the year.

National Wire Products, Limited, whose proposed plant is to be at Port Arthur, will shortly offer $450,000 7 per cent. preferred stock, with 50 per cent. bonus of common stock.

Mr. H. L. Watson, of the Chartered Institute of Secretaries, made an interesting announcement at the recent banquet of the Institute of Chartered Accountants held in the legislative buildings, Regina. He said a branch of the institute would be formed in Canada, and that efforts were being made to locate it in Saskatchewan.

RICHARD LONEY AND COMPANY

Richard Loney and Company, with head office at Moose Jaw, have obtained a Dominion charter. The company is also registered under the former company's act, in the province of Saskatchewan. The company handle city and farm property, mortgages, investments and insurance. They are members of the Moose Jaw Real Estate Board and of the International Real Estate Exchange.

◆

DOMINION PERMANENT LOAN COMPANY

The reserve fund of the Dominion Permanent Loan Company was increased by $30,000 last year. That account now totals $403,000. The financial statement as published does not show what the net profits were for the twelve months' operations. The dividends paid by the company amounted to $70,999. There was also written off office furniture and fixtures the sum of $643, leaving a balance to the credit of profit and loss for further distribution of $29,090.

The company's assets, amounting to $3,921,533, are made up as follows:—Mortgages and other securities, $3,803,710.91; real estate, $15,239.89; office fixtures and furniture, $5,777.55; sundry accounts, $3,309.54; and cash on deposit and on hand, $93,495.21.

The liabilities to the public are:—Deposits and accrued interest, $221,337.27; debentures and accrued interest, $2,030,938.85; and sundry accounts, $613.58.

The surplus of assets over liabilities is $1,668,643. The liabilities to the public are as follow:—On capital stock, $1,197,431.44; contingent fund, $5,964.68; reserve fund, $403,000; unclaimed dividends, $45; dividends payable January 2nd, 1913, $33,112.04; balance of profit and loss, $29,090.24; total $1,668,643.40.

◆

NEW BOARD OF TRADE OFFICIALS

Regina's newly elected officers and council are as follows:—President, Mr. H. G. Smith; first vice-president, Mr. C. O. Hodgkins; second vice-president, Mr. S. C. Burton; secretary-treasurer, Mr. L. T. McDonald; council, Messrs. E. A. McCallum, F. J. Robinson, W. P. Wells, F. J. James, J. A. Allan, J. F. Lunney, A. Gibbons, J. A. Cross, G. Forsythe, H. E. Armstrong, A. T. Hunter, E. C. Corbeau, D. M. Balfour, W. A. Wilson, R. J. Lecky, R. J. Westgate, H. A. Knight, P. McAra, Jr., J. A. Westman, W. Parsons, J. R. Peverett, M. Rutledge, W. L. Wallace, A. M. Nichol, C. A. Dunning, J. R. Smith, G. Whitmore, D. C. McDonald, Mr. Kohlman and T. M. Bee.

The annual election of officers of the Fort William board of trade resulted in the following appointments:—President, A. A. Wilson; vice-president, F. M. Fraser; council, J. McQueen, J. T. Horne, James Murphy, F. Depew, J. W. Newcombe, C. H. Jackson, S. C. Young, Joseph Enzer, J. A. Fife, R. S. Piper, J. Ockley (Seaman-Kent), and the president and vice-president; nominating committee—E. H. Baumgarten, Dr. Dean, D. Smith, and the president and vice-president; special road committee—Messrs. Hogarth, Tonkin, R. S. Piper.

The appointment of a secretary-treasurer was left to the council of the board to report on next meeting, while the appointment of the various sub-committees of the board was left with the nominating committee.

The officers of Brandon board of trade for the coming year are as follows:—President, A. E. McKenzie; vice-president, C. B. Gas; secretary-treasurer (pro tem), O. L. Harwood; council: A. F. Campbell, K. Campbell, A. T. Colquhoun, C. A. Comings, J. Cornell, J. W. Fleming, Wm. Bourke, J. Inglis, R. M. Matheson, A. C. Fraser, A. Shewan and J. S. Willmott.

Prince Rupert board of trade officers for 1913 are as follows:—President, Mr. F. G. Dawson; vice-president, Mr. G. R. Naden; secretary-treasurer, Mr. J. Lorne McLaren; council, Messrs. J. H. Thompson, F. H. Mobley, A. J. Morris, A. E. McMaster, G. D. Tite, Douglas Sutherland, W. E. Williams, M. P. McCaffery, J. G. Scott, W. H. Lynch, J. G. McNab, Lee Baker, H. B. Rochester, H. F. McRae and S. P. McMordie.

◆

The capital stock of the St. Andrews Investment Company, Limited, has been increased from $40,000 to $60,000.

A plant that will handle the construction of steel work for bridges, heavy buildings, and similar structural work, will be installed at Edmonton by an Eastern concern. In order to obtain a share of the business of the coming season, only a small plant will be erected at once and at commencement about thirty men will be employed. The company are making provision, however, for rapid expansion, and additional equipment will be installed during the year.

HARBOR CONSTRUCTION AT NEW WESTMINSTER

(Special correspondence.)

New Westminster, B.C., February 11.

New Westminster is bringing its harbor scheme out of the preliminary stage to that of active operations. Tenders for the plant needed for widening Front Street are in the hands of the harbor engineer and the harbor committee, and these contracts will be let and the work started when the grant of the foreshore has been received from Ottawa. The order-in-council confirming the harbor line was received some time ago.

The New Westminster harbor bill has passed its first reading in the House of Commons at Ottawa. Mr. J. D. Taylor, M.P., who is in charge of the bill, pointed out that it was planned to spend a large amount to make New Westminster harbor capable of accommodating not only the traffic of to-day but that which future years will bring. At the same time Hon. J. D. Hazen, minister of marine, made a statement with regard to foreshore rights showing that those at New Westminster belonged to the Dominion Government and that there can be no difficulty in granting them to the harbor commission and the city of New Westminster.

Sir Donald Mann has re-asserted that the Canadian Northern Railway's original plans for Port Mann still hold good, and he announced that work on the company's shops and terminals will begin with as little delay as possible this spring.

Construction work will start on the company's Lulu Island branch as soon as possible, and it is understood that plans are being prepared for the work of improving the railway company's property within New Westminster itself.—K.M.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended February 7th:—Drummond, 63,469; Cobalt Lake, 71,385; La Rose, 65,141; Cobalt Townsite, 84,000; Nipissing, 61,679; Crown Reserve, 52,040; McKinley-Darragh, 66,576; Peterson Lake, 84,134; Coniagas, 256,434; Trethewey, 125,081; Temiskaming, 59,970; total, 989,909 pounds, or 494 tons. The total shipments since January 1st are now 4,305,680 pounds, or 2,152 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

◆

UNION TRUST COMPANY

Reporting on prevailing conditions last year, Mr. E. E. A. DuVernet, vice-president of the Union Trust Company, told the shareholders that there were apparently sufficient funds available for mortgage loans at slightly higher rates of interest, but towards the close of the year, very largely owing to European complications, the demand for the money far exceeded the supply. In spite of that fact, however, payments of the company's interest on their mortgage loans have been most satisfactorily met, and while the stringency is no doubt affecting some interests, on the whole it has had a correcting influence in preventing over speculation and placed values on a more solid and conservative basis.

At the company's annual meeting last week, the directors reported net profits for the year of $206,401. With the balance from the preceding year there was a sum of $238,042 for distribution. A ten per cent. dividend accounted for $100,000 of that, and a balance of $38,942 was carried forward. To the reserve fund $100,000 was added making that account $850,000.

There has been an increase in the total of the Guaranteed and Estates and Agencies Accounts, the greatest increase being in the guaranteed investment account, which shows a gain of over half a million dollars. Several important estates were placed with the company during the year, which also acted as trustee for the issue of bonds to the amount of $4,250,000. The savings department, transfer department and real estate department and safe deposit vaults particularly report increases in business, and there have been substantial increases in the business done at the branch offices at Winnipeg, Manitoba, and London, England.

The shareholders were informed that as in the past the rigid system of inspection of properties before acceptance of loans was continued during the year. A daily audit of the company's accounts was made by the company's auditors and the securities inspected from time to time, and at the end of the year by the inspection committee of the shareholders.

The Trusts and Guarantee Company, Limited

Head Office - 43-45 King Street West, Toronto

The Sixteenth Annual General Meeting of the Shareholders of The Trusts and Guarantee Company, Limited, was held January 31st, 1913, in the Company's Board Rooms.

The President was requested to act as Chairman, and the Manager as Secretary. The minutes of the last Annual General Meeting were read and confirmed.

The President then presented the

We have audited the Books and Accounts of the Northern Canadian Mortgage Company, Limited, for the half year ended 31st December, 1912, and we report to the shareholders that we have received all the information and explanations we have required.

We have examined the Agreements, Mortgages, etc., constituting the security for the Company's investments, and have found same in order: the Company's Solicitor certifying as to the sufficiency of the title and conveyancing. In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Company, according to the best of our information and the explanations given us, and as shewn by said Books.

THE
Canada Landed and National Investment Company
LIMITED

ANNUAL REPORT, 1912

The Annual General Meeting of the Shareholders of the Company was held in the Company's offices, 23 Toronto Street, Toronto, on Wednesday, February 12, 1913, at 11 o'clock forenoon, the following being present:—

Messrs. John Hoskin, K.C., LL.D., D.C.L.; E. Saunders, F. W. Harcourt, K.C.; G. Tower Fergusson, D. E. Thomson, K.C., LL.D.; Newman Silverthorn, J. S. Playfair, W. J. Robertson, Chas. Holland, Alex. Smith, Augustus Myers, Geo. Porter, Henry E. Hamilton, Wm. Wishart, F. Le M. Grasett, M.D.; J. W. Beaty, H. H. Ardagh, H. G. Langley, Alex. Nairn, C. J. Holman, K.C.; W. J. Dickson, R. C. Jennings and Miss Robinson.

The President, John Hoskin, Esq., K.C., LL.D., D.C.L., having taken the chair, the Managing Director, Mr. Saunders, acting as Secretary, the following Report and Balance Sheet were read:—

The Directors, in presenting their report for the year ending 31st December, 1912, deeply regret having to record the death, shortly after the last Annual Meeting, of Mr. John L. Blaikie, who was for over forty years President of the Company; likewise of Mr. John Stark, a Director. Both rendered valuable service to the Company.

The directors elected John Hoskin, Esq., K.C., LL.D., D.C.L., President, and D. E. Thomson, Esq., K.C., LL.D., Vice-President for the balance of the year.

During the year the paid-up capital stock of the Company was increased to $1,205,000.00.

The balance at credit of Profit and Loss Account brought forward from last year was	$ 9,347.96
The net profits for the year ending 31st December, 1912, after deducting expenses of Management, Interest on Debentures, and all other charges, amounted to	169,569.06
	$178,917.02

Disposed of as follows:—

Dividend, 4% paid 2nd July, 1912	$41,592.90	
Dividend, 4% payable 2nd Jan., 1913	46,468.80	
Transferred to Reserve Fund	84,700.00	
Balance carried forward	6,155.32	
		$178,917.02

In addition to the above transfer to Reserve Fund from the ordinary profits of the year the Directors also transferred to that fund the sum of $10,300.00 received as premium on the disposal of the unaccepted and fractional shares of the new issue.

By-laws passed by the Directors will be submitted for your confirmation.

JOHN HOSKIN,
President.

Toronto, 15th January, 1913.

AUDITORS' CERTIFICATES

We hereby certify that we have examined the books, accounts and securities of the Canada Landed and National Investment Company, Limited, for the year 1912, except such as are covered by the certificate of the Auditor at Winnipeg, and have found them correct.

All our requirements as Auditors have been complied with, and the statements of Assets and Liabilities, Profit and Loss Account and Reserve Fund, as above, exhibit a correct view of the Company's affairs at 31st December, 1912.

T. WATSON SIME, C.A. (Scotland and Ontario),
G. U. STIFF, F.C.A.,
Auditors at Head Office.

Toronto, January 23rd, 1913.

I hereby certify that I have examined the books, accounts and securities of the Canada Landed and National Investment Company, Limited, at their Winnipeg office for the year 1912, and found same correct. All my requirements as Auditor have been complied with.

J. B. PEPLER, Auditor at Winnipeg.

Winnipeg, January 3rd, 1913.

The Report was unanimously adopted and the scrutineers reported the following gentlemen elected Directors for the ensuing year:—

John Hoskin, K.C., LL.D., D.C.L.; D. E. Thomson, K.C., LL.D.; G. Tower Fergusson, F. W. Harcourt, K.C.; J. Kerr Osborne, J. S. Playfair, Edward Saunders and Newman Silverthorn.

At a subsequent meeting of the Directors, John Hoskin, Esq., K.C., LL.D., D.C.L., was elected President, and D. E. Thomson, Esq., K.C., LL.D., Vice-President.

The Dominion Permanent Loan Company

TWENTY-SECOND ANNUAL REPORT

The Twenty-second Annual Report of The Dominion Permanent Loan Company, submitted to the Annual General Meeting of the Shareholders, on Thursday, February 6th, 1913.

Your Directors submit herewith the Twenty-second Annual Report, accompanied by the Statement of Account for the year ending December 31st, 1912, certified as correct by the Auditors, who also report satisfactorily as to their inspection of the securities of the Company.

Your Directors are pleased to say that during the year the demands for funds of the Company was quite equal to the amount available for investment.

The dividends paid by the Company during the past year amounted to $70,999.68. In addition to this, there has been transferred to the Reserve Fund of the Company the sum of $30,000. There has also been written off Office Furniture and Fixtures the sum of $643.51, leaving a balance to the credit of Profit and Loss for further distribution, $29,090.24.

All of which is respectfully submitted.

J. R. STRATTON,

President.

BARS QUEBEC PULP AND PAPER

President Taft has denied the right of free entry from Canada into the United States of wood pulp and paper made from the timber of certain Crown lands in Quebec, on which that province recently announced it had removed export restrictions. The President sustained the decision of Secretary MacVeagh of the treasury department, that Quebec's action was not sufficient to entitle these products to free importation under the only operative clause of the Canadian reciprocity agreement, which abolished the duty on wood pulp and paper provided Canada did not restrict their exportation in any manner.

◆

According to reports received by the Post-office Department, Washington, approximately 40,000,000 parcel post packages were handled in January, the first month the system was in operation. Chicago exceeds all other cities in number of parcels handled, with a total of 4,168,153 followed by New York with 3,519,788, Boston 1,151,408, Philadelphia 1,035,000, St. Louis 917,800 Cleveland 870,768, Brooklyn 834,000, Detroit 510,072, Cincinnati 412,381 and Kansas City 357,102.

LAING AND TURNER
Chartered Accountants

LONDON AND CANADIAN LOAN AND AGENCY COMPANY

There are many gratifying features of the thirty-ninth nnual report of the London and Canadian Loan and Agency Company, Limited, which was recently submitted to the hareholders. The net profits were large, the reserve fund was considerably strengthened, the assets of the company tand at a substantial figure, the dividend was increased from to 7 per cent., and there was a satisfactory increase in the ompany's mortgages. The gross earnings, including the alance, $15,361 brought forward from last year, amounted o $341,251. The cost of management, interest on debenures and other charges amounting to $184,666, left a net rofit of $156,585. Dividends at the rate of 7 per cent. per nnum accounted for $70,840, leaving a balance of $85,745. Of that sum $69,000 was transferred to the company's rest ccount, which now amounts to $485,000 as compared with $1,000,000 of paid-up capital stock. In addition to that conribution to rest account $16,000 was added thereto from coningent account, obtaining the result mentioned above. To he credit of revenue account next year $16,745 has been caried forward. The total assets of the company are now $4,361,941.

There was no lack of demand for funds during the past year, or is there likely to be during the present. For the year ended December 31st, 1912, applications for loans on mortgages were accepted and renewed by the London and Canadian Loan and Agency Company to the amount of $1,174,763 on real estate valued at $3,060,000. The increase in the company's mortgages during the year amounted to $451,393. Owing to the large and profitable business offering, the directorates allotted to shareholders 5,000 shares at par amounting to $250,000, being part of the 20,000 unissued shares of the company's capital stock, in the proportion of one share of the new stock for every four shares of the then existing holdings. No difficulty has been experienced by the Scottish Board and agents to renew the company's sterling debentures as they mature, on favorable terms. The debenture issues were increased considerably during the past year.

MERCANTILE TRUST COMPANY OF CANADA

Substantial net profits, amounting to $40,815, were the result of operations last year by the Mercantile Trust Company of Canada, which has its headquarters at Hamilton, Ontario. This figure was obtained after providing for all management expenses, etc. Added to that sum was $3,505 brought forward from 1911, and also the premium of $935 received from the sale of new stock, thus making the total at credit of profit and loss account, $45,255. Dividends at the rate of 6 per cent. per annum accounted for $19,388. The sum of $25,000 was carried to the reserve fund which now amounts to $60,000 compared with paid-up capital of $336,100. This left a balance of $866 to be carried forward to profit and loss account.

In its guaranteed account, under assets there are real estate mortgages valued at $307,847, and collateral loans on bonds and debentures, $50,023. The estates, trusts, and agency investments under administration by the company total $1,144,077. The company's assets (capital account) are as follows:—Real estate mortgages, $507,274.68; bonds and debentures, $64,671.93; collateral loan on stocks, bonds, etc., $22,913.78; real estate, $41,250.00; office furniture and safe deposit boxes, $2,132.40 sundry assets, $92.84; cash on hand and in bank, $18,308.96; total, $656,644.59.

◆

NANAIMO'S FINANCING

A temporary loan by-law was introduced at the Nanaimo, B.C., council to borrow the sum of $65,000 at a rate of interest not exceeding 6½ per cent. in anticipation of the revenue for 1913. Alderman McKinnell objected to the council paying 6½ per cent. interest and favored calling for tenders from the banks of the city to provide the loan to the municipality. It was the opinion of the majority of the board that the city could not get better terms from any other bank than those offered by the Canadian Bank of Commerce and the by-law was given the three readings.

ELEVENTH ANNUAL REPORT.

The Canada Trust Company

Managed in connection with The Huron and Erie Loan and Savings Company

The Eleventh Annual General Meeting of the shareholders was held at the Company's office in London, Ontario, on Tuesday, February 4th, 1913.

The President, Mr. T. G. Meredith, K.C., took the chair, and the Managing-Director, Mr. Hume Cronyn, acted as Secretary.

The Annual Report and Financial Statement were submitted as follows —

The net earnings after paying all expenses, commissions, and other charges, amount to $42,448.51, including $1,172.24 brought forward from the previous year. Out of this sum a dividend of five per cent. amounting to $15,390.41, has been paid, $15,718.75 has been added to Reserve Fund, and the balance $2,893.69 carried forward as undivided profits.

The Reserve Fund now amounts to $180,000.00, or nearly thirty-eight per cent. of the Company's Paid-up Capital. The accounts, vouchers and securities have been duly examined by the Auditors, whose report is appended.

All of which is respectfully submitted.

T. G. MEREDITH,
President.

London, February 4th, 1913.

PERSONAL NOTES

Mr. J. Gardner Thompson was recently elected president of the Liverpool Manitoba Assurance Company, Montreal, in succession to the late Sir Edward S. Clouston. Mr. J. W. Binnie was made vice-president.

Mr. W. F. Learmonth, who has been acting as joint manager of the London office of Messrs. G. A. Stimson & Company, is visiting the company's Toronto office for about two months. Mr. Learmonth is well known in Toronto, having been in bond spheres there some years ago.

FORTY-NINTH ANNUAL REPORT
OF
THE HURON AND ERIE
LOAN AND SAVINGS COMPANY

The Forty-ninth Annual General Meeting of the Shareholders was held e Company's offices in London, Ontario, on Wednesday, February 12th,

The President, Mr. T. G. Meredith, K.C., took the chair, and Mr. ey Aylsworth acted as secretary.

The Annual Report and Financial Statement were submitted as fol- :—

fter defraying the expenses of management and all other charges, making allowance for actual and possible losses, the balance of profits shown by the annexed statement) amounted to $425,385.11, and was ibuted as follows.

our Quarterly Dividends of 2½ per cent. each, with a quarterly bonus of ¼ of 1 per cent. (making the total dividend distribution 11 per cent.)	$223,233.64
overnment and Business Tax	2,943.44
ransferred to Building Fund	15,000.00
alance carried forward	184,208.63
	$425,385.11

The issue of $100,000 of new fully paid stock was promptly subscribed paid. The premium thereon of $100,000 has been added to the Reserve l, which now amounts to $2,100,000, and is equal to the Paid-up Capital.

The Company has no real estate on hand other than office premises, roperties which have come into possession of the Company by fore- re, failure to obtain purchasers under power of sale, or otherwise, g been sold.

The Directors desire to bear testimony to the very efficient manner hich the officers of the Company have discharged their respective s.

ll of which is respectfully submitted.

T. G. MEREDITH,
President.

AUDITORS' REPORT.

We hereby certify that for the year ending December 31st, 1912, we e audited the Books and Accounts and have examined the Securities The Huron and Erie Loan and Savings Company, except those of its nch at Regina. The Cash and Bank Accounts have been audited monthly; the postings and balances of all the Company's Ledgers examined quarterly; and we find the whole correct and in accordance with the above statements.

The Books and Accounts of the Regina Branch have been audited, and the Securities there have been examined, by Mr. J. C. Pope, C.A., and the results as certified to by him are incorporated in the above statements.

M. H. ROWLAND,
F. G. JEWELL, C.A.,
Auditors.

London, January 28th, 1913.

The President in moving the adoption of the report said:—

It affords me pleasure to say that the past year has been the most profitable in the history of the Company. The assets now approaching the Fifteen Million mark, have increased over $800,000 during the year. The net profits amount to $335,163.11, an increase of nearly Thirty-five Thousand dollars over 1911, and equivalent to better than 1[illegible] per cent on the Company's average Paid-up Capital.

Adhering to the policy announced in previous years, your Directors hope in 1913 to increase the dividend to 11 per cent. per annum, and to pay a bonus of 1 per cent., thus making a total return to the shareholders of 12 per cent. per annum. This will make the third increase of the kind in five years. While your Directors hope this rate can be maintained in the future, it must not be forgotten that the strong demand for money and prevailing high rates cannot continue indefinitely, and the day may come when reductions in dividends instead of increases will be in order.

Under the authority granted at the last Annual Meeting, your Directors made an issue of Two Thousand shares of Fully-paid stock, at a premium of 100 per cent. These shares were at once subscribed, and the full amount thereof has been paid to the Company. The premium received—($100,000), was forthwith transferred to the Reserve, thus maintaining that fund on a parity with the Paid-up Capital. The undivided profits for the year—($93,986.63) added to the balance carried forward give in addition to the Reserve Fund, a surplus of $184,208.63.

The borrowing power conferred by the new issue of stock which I have referred to, is now exhausted and to enable the Company to take advantage of the excellent demand for money in all its fields of operation, a further issue of stock must soon be made.

Our business in the West has enjoyed a steady and conservative growth, and now amounts to about Three Million Dollars. Of our new business all loans save $70,000 lent in Winnipeg and Regina, are secured on farm properties in approved districts in Manitoba and Saskatchewan. The excellent harvest in Saskatchewan, where the great bulk of our Western business is done, has resulted in a satisfactory settlement of maturing payments.

For the fifth consecutive year, the Company has no real estate on hand other than office premises, and, although it is too much to hope for an indefinite continuance of this condition of affairs, we venture to believe that with energetic and careful management here and in the West, no undue accumulation of mortgaged properties will occur.

Owing to the growth of our own business and that of the Canada Trust Company, it is necessary to make use of the vacant land adjoining the Head Office Building, which was purchased two years ago, by erecting thereon an addition to our present building. The sum of $15,000 has been set aside, out of the profits of the year, to be applied towards that end.

The Canada Trust Company has had a prosperous year, and by means of a satisfactory arrangement established in Great Britain, should in the future receive its fair share of funds from that quarter. A further issue of stock in that Company has been authorized, and a resolution will later be submitted to you to enable your Directors to take up so much of the new issue as they may deem advisable.

By-law Number 39, submitted for your confirmation, affects amendments to our existing By-laws rendered necessary by the growth of the Company, and creates the office of Secretary as one distinct from that of Manager. Mr. Morley Aylsworth (who for over ten years has given the Company effective service) has been appointed to the new position.

By-law Number 40 brings our lending powers into line with those granted to the Company by the Dominion Parliament in 1899, and follows exactly the wording of the Statute enacted at that time. These powers are somewhat more restricted than those conferred by the general legislation of the Province of Ontario.

The Report was unanimously adopted. The following gentlemen were elected Directors for the ensuing year:—T. G. Meredith, K.C., President; Hume Cronyn, 1st Vice-President; F. E. Leonard, 2nd Vice-President; George T. Brown, F. R. Eccles, M.D., Robert Fox, H. E. Gates, John Labatt and Wm. Saunders, C.M.G., LL.D.

THE SOVEREIGN LIFE

Assurance Company of Canada

HEAD OFFICE: WINNIPEG, MAN.

REPORT OF THE BOARD OF DIRECTORS

For the Year Ending December 31st, 1912

To the Shareholders and Policyholders of The Sovereign Life Assurance Company of Canada.

Your Directors are pleased to present for your consideration their Annual Report of the business of the Company for the year ending December 31st, 1912.

ASSURANCES.—The new assurances applied for during the year amounted to $1,200,000.00. Those issued and revived $1,175,000.00, an increase over the best previous year in the Company's history of $319,000.00 or 37 per cent. The total assurance in force at the close of the year 1912 was $3,850,000.00, an increase over that at the close of 1911 of $676,500.00, or 21 per cent.

INCOME. (a) Premiums.—The total premium income was $137,356.15, an increase of $16,041.86 or 13.2 per cent. over that of the previous year. The re-assurance premiums were $8,158.42, leaving a net income of **$129,197.73.** The GROSS outstanding and deferred premiums represent less than 14 per cent. of the total annual premiums on the business in force at the end of the year. This extremely low percentage of uncollected premiums shows that no doubtful business is carried on the books of the Company.

(b) Interest.—The total interest received during the year was **$51,341.04,** which together with the increase in the accrued, etc., amounted to **$54,634.00,** being the actual earned interest in 1912. This represents an increase of $11,348.00 or 26 per cent. over the earnings from this source during the previous year.

The average rate of interest earned on the invested assets during the year was **6.56** per cent.

PAYMENTS TO POLICYHOLDERS.—During 1912 **$24,507.16** was paid to policyholders in death claims and surrender values on policies. The Company experienced an exceptionally low rate of mortality for the year, **the death losses being only 25 per cent. of the expected.**

ASSETS.—The total assets at the close of the year amounted to **$955,239.23,** having been increased during the year by $91,693.04 or 10.6 per cent.

INVESTMENTS.—$439,717.49, representing about 48 per cent. of the total assets of the Company, is now invested in first mortgages upon improved farm lands in Western Canada and upon City property. Over 70 per cent. of this amount is yielding to the Company 8 per cent. interest. That the greatest care has been exercised by your Executive in the selection of these securities is evidenced by the small amount of outstanding interest at the close of the year, viz.—$1,601.07. $337,362.23, or 37 per cent. of the assets, is invested in municipal debentures and bonds, and the remaining 15 per cent. in policy loans secured by legal reserves, cash in Banks, etc.

RESERVES.—The net reserves on assurances have been increased by **$77,355.00** during the year and now amount to $582,842.00. **The reserve fund is $22,481.00 in excess of Government requirements,** this difference being an amount voluntarily maintained as a result of the stringent valuation standard (Om 3 per cent. on participating and 3½ per cent. on non-participating policies) adopted by this Company.

SURPLUS.—The surplus to shareholders and policyholders at the end of the year **(exclusive of paid-up Capital of $209,995.00)** amounted to **$154.077.47.** This amount exceeds the net surplus at the close of 1911 by **$48,424.17.**

Your Directors desire to express their appreciation of the faithful work accomplished during the year by the office staff and by the field men, whose loyalty and devotion to duty has gone far in enabling your Directors to present to the shareholders such a satisfactory statement of the Company's affairs.

R. R. SCOTT, President.

AUDITORS' REPORT

We certify that we have examined the above Balance Sheet with the books and vouchers relating thereto. In our nion such Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs, accord- to the best of our information and the explanations given to us, and as shown by the books of the Company. We re also examined the Securities held by the Company and the evidence of those deposited with the Dominion Govern- nt, and find them in order. The cash at Head Office has been verified by actual count, and the Bank Balance by certi- ate, and are in accordance with the figures as shown in the above Balance Sheet

REPORTS OF ACTUARY AND MEDICAL REFEREE

ntlemen:—

The past year, in which the Company transferred its Head Office from Toronto to Winnipeg, has been appropriately nalized by the largest increase ever made in the Company's business, by the highest rate of interest earned on the mpany's funds, and by a large profit arising from a favorable mortality expense.

The valuation of the Company's liabilities under its policy contracts was made upon the same basis as last year, nely Om (5) 3 per cent. Table for participating policies, and the Om (5) 3½ per cent. for non-participating policies. e net reserve amounted to $582,842.00, which is an increase of $77,355.00.

The Company earned 6.56 per cent. upon its invested assets. This splendid result has been achieved by the invest- nt of a larger proportion of the Company's funds in first mortgages on real estate. The whole of the increase during 2, of the invested assets was accounted for in this manner. The funds of a Life Insurance Company are particularly ted to this form of investment, as they are practically immune from large and sudden demands upon them. I have nted out in previous reports that the difference between the interest earned and the rate assumed in the valuation, con- tutes the main source of profit as the mortality is subject to wide fluctuations It is therefore gratifying to see the mpany is assured of a large annual profit from this source.

The mortality during 1912 was exceptionally favorable. The actual claims were only 25 per cent. of those expected by Om (5) Table, which results in a profit of over $20,000.00 from this source. This is equivalent to over $5.00 per 000.00 on all business in force at the end of the year.

During this year (1913) the first policies will mature under the deferred dividend plan. The results will no doubt be y satisfactory to these policyholders, who have ten year endowment policies, because the sum assured and dividend l practically amount to a return of all premiums paid with bank interest compounded annually from the time of first pay- nt. These results will compare most favorably with the published results of the best Companies.

The Company is now in a strong financial condition, and in a position to command the confidence of the insuring blic. Its policies are in every way modern and contain all privileges and conditions necessary for the protection of the icyholder.

In conclusion I wish to congratulate the Company on the splendid work done during the past year and to wish it ntinued prosperity.

S. H. PIPE, F.A.S., Actuary.

ntlemen:—

It gives me much pleasure to submit for your consideration my first annual report on that part of the work which nes under my supervision—that of the Medical Department.

In examining the record of the Company, I cannot but congratulate all concerned on the very favorable character of at must always be an essential factor in the success of a Life Assurance Company, viz., the mortality rate, and the ex- rience of this Company in this respect since its organization has been most satisfactory, a fact of primary importance the shareholders and policyholders, and one which bespeaks well-merited praise for the gentlemen who have preceded as Medical Referees.

During the past year all possible care has been taken in an endeavor to safeguard the Company's interests in the ection of new risks and in the revival of lapsed policies. Vigilance has always been exercised in the appointment of aminers in the various localities where organization work has been in progress.

I have also much pleasure in acknowledging the very efficient assistance rendered me in my work by the Managing rector and all members of the Office staff during the year.

Respectfully submitted,
J. S. GRAY, Medical Referee.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DEBENTURES FOR SALE

CITY OF HAMILTON, CANADA

DEBENTURES

Tenders addressed to John Allan, Esq., Mayor, City Hall, and endorsed "Tender for Debentures," will be received by the undersigned up to 10 o'clock a.m. on Thursday, the 20th day of February, 1913, for the purchase of City of Hamilton debentures amounting to $190,000, due at the end of twenty years, and dated the first day of April, 1913, bearing interest at 4½ per cent. half yearly.

A marked cheque for the sum of $1,000, payable to W. R. Leckie, City Treasurer, must accompany each tender.

The highest or any tender not necessarily accepted. Further particulars may be had from the undersigned.

S. H. KENT,
City Clerk.
Hamilton, January 30th, 1913.

TOWN OF PINCHER CREEK DEBENTURES

Separate sealed tenders will be received by the undersigned until 6 p.m. on Monday, February 24th next, for the following Debentures of the Town of Pincher Creek:

Municipal Building Debenture, $30,000, 6%, repayable in 30 equal annual instalments.

Sidewalk Debenture, $15,000. 6%, repayable in 20 equal annual instalments.

Both these Debentures have the certificate of validity of the Department of Municipal Affairs, Edmonton, attached.

G. D. PLUNKETT,
Secretary-Treasurer,
Pincher Creek, Alta.

TOWN OF PONOKA, PROVINCE OF ALBERTA
